THE CHICAGO DAILY NEWS ALMANAC AND YEAR-BOOK

FOR

1916

COMPILED BY JAMES LANGLAND, M. A.

[Copyright, 1915, by The Chicago Daily News Company.]

PREFACE.

This issue of The Almanac and Year-Book, as was the case in the volume for 1915, contains a large amount of matter relating to the European war. To give a complete account of that gigantic struggle in a publication of this kind is obviously impossible. When the story of the contest for world supremacy is written it will require many bulky volumes. No attempt has been made here to do more than to give the outstanding features of the war from its beginning to the early part of December, 1915; to recount some of the things which attracted the greatest amount of attention and to supply, as far as might be possible at this stage of the conflict, such facts and figures as have been and are most likely to be in demand for purposes of reference.

While some of the voluminous diplomatic correspondence between the United States and various belligerent powers has been omitted, practically all of the more important documents, such as the historic notes on the sinking of the Lusitania and the sale of munitions of war to belligerents, are given in full. This is also true of the views exchanged in relation to restraints of trade and other matters involving international law and practice. Maps of the principal battle zones at the beginning of December, 1915, and portraits of some of the principal actors in the war drama are given.

It is not to be inferred from the foregoing that the 1916 edition of The Almanac and Year-Book is devoted exclusively or even mainly to the war. Those who have occasion to consult its pages will find all the usual features with such added data as seemed to be of more than fleeting value.

INDEX—1916.

NOTE—Table of contents of previous issues of The Daily News Almanac and Year-Book will be found on page 718.

ERAS OF TIME.

The Gregorian year 1916 corresponds to the following eras:

The latter part of the 140th and the beginning of the 141st year of the, independence of the United States.

The year 1334-35 of the Mohammedan era; the year 1335 begins Oct. 23.

The year 4613 (nearly) of the Chinese era, beginning now, Jan. 1.

The year 8025 of the Greek church, beginning Jan. 14.

The year 5676-77 of the Jewish era; the year 5677 begins at sunset Sept. 27.

The year 7423-24 of the Byzantine era, beginning Sept. 1.

The year 2526 of the Japanese era.

The year 6629 of the Julian period, and Jan. 1 is the 2,420,864th day since the commencement of the Julian period.

Explanatory Note.—The Dominical or Sunday letters B A indicate that the year 1916 is a leap year of 366 days. B being the second letter of the alphabet indicates that the second day of the year is Sunday, and that, therefore, the year begins on Saturday, as the first seven days of the year are indicated by the first seven letters of the alphabet. On a leap year where the years less than 100 are divisible by four, or the centennial years by 400, the 29th day of February takes no letter and hence March will begin with the letter that would fall to Feb. 29, which this year is D, and March 1 being indicated by D, A will fall on Sunday, which is March 5. Hence the rule is to use two Dominical letters for leap years, the second one being the one preceding the first in the alphabetical order, and follow the same rule for the remainder of the year as for Jan. 1 to Feb. 28. So in 1916 A falls on March 5, which is Sunday, as will be every seventh day thereafter. This is used in ascertaining the date of Easter by chronologers, and in fixing the day of the week for any date.

The Golden Number is that number of a cycle of nineteen years which shows how many years

have elapsed since the new moon fell on Jan. 1, for in about nineteen years the solar and lunar years nearly come together. The chief use of this cycle is in fixing the date of Easter, and in this same connection is used the Epact. The Solar Cycle is the number of years that have elapsed since the days of the week fell on the same days of the year, or when there will, therefore, be a recurrence of the Dominical or Sunday letter. This would be the case every seven years but for leap year, hence four times seven is the cycle, or twenty-eight years. It is the remainder found by adding nine to the year and dividing the sum by twenty-eight. The Roman Indiction is a cycle of fifteen years and is of no utility except to chronologers. It is the remainder found by adding three to the year and dividing by fifteen. The Julian period is a cycle of 7,980 years and is the product of the three cycles, Golden Number (19), Solar Cycle (28) and Roman Indiction (15), and hence shows the time when these cycles will coincide or begin at the same time. The first of this cycle will be completed in the year 2267; it is the year + 4713. The Dionysian period is a cycle of 532 years and is called the great Paschal cycle, being the product of a completed solar and lunar cycle (28×19).—It is the remainder found by adding 457 to the year and dividing by 532, and with the Julian period is chiefly used by chronologers. The Jewish Lunar cycle is always three less than the Golden Number and is used by the Jews in fixing the time of their festivals.

TIME USED IN ALMANAC AND YEAR-BOOK.

All the calculations in this Almanac and Year-Book are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for parallax and refraction. In the case of the moon no correction is needed, as in the sun, for "parallax and refraction"; with her they are of an opposite nature and just balance each other. The

figures given, therefore, are for the moon's center on a true horizon such as the ocean affords.

The calculations in each of the geographical divisions of each calendar page will apply with sufficient accuracy to all places in the contiguous North American zones indicated by the headings of the divisions.

NOTE—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For example: To know on what day of the week July 4 was in the year 1895, in what table of years look for 1895, and in a parallel

line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1750 (Sept. 2-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

CHART OF THE HEAVENS.

EXPLANATION—The chart of the heavens shows all the bright stars and groups visible in the United States, Canada, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright, uncharted body be seen near the "ecliptic circle" it must be a planet. To locate the planets or moon refer to the monthly calendar pages in this almanac, find the proper signs on the chart in the "ecliptic circle" and an inspection of that part of the heavens, comparing with the chart, will serve to identify the planet and all surrounding objects.

Because of the earth's motion from west to east (opposite to the direction of the arrow in the chart), the stars rise 4 m. earlier each day or 30 m. per week or 2 hrs. a month. The chart shows the position at 9 p. m. Then if the

position for any other hour be desired, as for 7 p. m., count ahead one month, or back one month for 11 p. m., and so on for any hour of the night, holding the month desired in front as the face looks either to the north or south with name down.

A circle described from the zenith on the "zenith circle" for the desired latitude with a radius of 90 degrees (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on latitude 40 degrees north Jan. 15, 9 p. m., as will be "big copper" at 3 a. m. Then from Capella or two stars all the surrounding visible groups can be identified. The "pointers," being 5 degrees apart and always in sight, may be used as a convenient unit of measure; also when visible, the "belt of Orion," 3 degrees, or the sides of the "square of Pegasus."

(NOTE.—The column "right ascension" corresponds to longitude as we use that term in locating points on the earth. The planets will always be found near the "ecliptic circle" on the chart of the heavens and in the right ascension given in the first column for each planet in the above table. On the margin of the chart the right ascension is given in Roman characters.

Now, if the position of Venus is desired at any time, say for April 1, when her right ascension is given as 3³⁴ hours, locate the 3³⁴ hour point on the margin of the chart and connect that point with the north pole by a straight edge, as an envelope margin, and the line intersects the ecliptic circle near the Pleiades or Seven Stars, where Venus may be seen at that time.

STORY OF OUR WORLD FAMILY FOR 1916.

THE SUN—The central power house of this cluster of worlds is the sun, as the great southern sun, Canopus, is believed to be of the universe. From the sun, directly or indirectly through other members of this family, come all of the forces that bring the storms, the seasons, and possibly all life, and all must end with the death of the sun. The ever varying influences of the other heavenly bodies, the inconstancy of solar energy and the probable fact that it is not radiated in all directions alike cause the variability in our weather conditions. Three times this year our position with respect to the sun and moon prevents full transmission of solar energy to portions of the earth in solar eclipses.

MERCURY—The youngest and smallest recognized planet of our family, being nearest to the sun, has the swiftest orbital motion. Like our moon, he probably moves about the sun in the same time he revolves upon his axis, or, in other words, his years and days are of the same length. Because of this fact and that his atmospheric envelope is not dense and of his nearness to the sun, while one hemisphere is perpetually light and a furnace of heat seven times greater than that of the desert of Sahara, the other hemisphere is in darkness and arctic cold. Hence life must be impossible there. Be sure to see this "Artful Dodger," as the ancients called him, on the evenings of Jan. 15 to 20 and Sept. 6 to 10 about 1h. 15m. after sunset and near the sunset point of the horizon, which may be previously marked by range objects, as trees, etc.; also in the mornings of March 4 to 10 and Oct. 10 to 20, near the sunrise point at break of day. At these times he will be as bright as a star of the first magnitude and at all other times practically invisible.

VENUS—In some ways the most interesting member of our family, and when at her best by far the brightest, is the next in order outward from the sun, and is almost the counterpart of our earth in all particulars and without much doubt is habitable by forms of life quite similar to those of the earth, except that by reason of her lesser density and mass things will weigh about 13 per cent less than here. If, however, it be true, as some claim, that her day and year are of equal length, then her habitability would be very doubtful indeed. When brightest she is a glorious object and may be seen in daylight by knowing where to look. Because of her great difference in distance from us, when between us and the sun or opposite the sun from us, she varies wonderfully in apparent size and brilliancy. When nearly between us and the sun, while her apparent diameter is greatest, we can only see a very small portion of her illuminated side, as in the case of our moon when two days old, and when opposite the sun from us, or at superior conjunction, she is most distant and apparently much smaller, but we see her entire illuminated side, or she is at full, as we apply that term to the moon. All of these changes as shown in the annexed figure are to be seen by the aid of any small telescope or good field glass, affording never ending delight.

She will be an evening star until July 3, and after that a morning star, being brightest the latter part of May and the first part of August.

The rapid orbital motion of Venus past the stars, some of the time apparently advancing from west to east and then retrograding from east to west, makes it interesting to "keep tab" on her and aids in the identification of the stars, clusters and constellations as she passes through or near them. Her itinerary for 1916 will be as follows: Jan. 1 she will be near the middle of Capricornus and pointed at by a line from Vega Lyra through Altair, in the Eagle (see chart of the heavens), extended about 25° southerly; also by the extension of diagonal through the square of Pegasus to the southwest, Jan. 6-7. She will be 1° north of Uranus and 5° south of the moon on Feb. 6 and March 7. Feb. 13 to 15 she crosses the prime meridian and equator of the heavens, from which distances are measured in the heavens as they are on the earth from the equator and meridian of Greenwich or Washington. At this time she will be less than the apparent diameter of the moon north of Jupiter, a very pretty sight in the early evening hours, with Alpheratz and Algenib, the two bright stars forming the east side of the square of Pegasus, directly north and pointing at these planets 15° south of Algenib. March 7 in eastern Aquarius, just south of the bright stars in the head of the Ram and pointed at by the two stars Markab and Algenib, which form the south side of the square of Pegasus, and 5° south of the moon; April 6, midway between the Pleiades and Hyades and 2° south of the moon; April 24, at greatest apparent distance east of the sun and just south of El Nath, in the end of the horn of the Bull, and in line with El Nath and Capella, 20° north; May 6, just over the line in Gemini and 1° north of the moon, and on the 24th to 27th of May, forming an equilateral triangle with Castor and Pollux to the northeast, and Saturn only 3° 25' north of her, Venus being at her brightest. This makes a wonderfully brilliant combination of attractions in the evening sky; June 4 to 13, quite stationary, and in conjunction with the moon on the 4th (1° north) and 30th (4° 30' south), and with Saturn on the 23d (57' south); June 11 she begins to retrograde or go back west past the stars, reaching the same position on the last of June that she occupied May 22. She will be too near the sun the latter part of June and first half of July to be well seen, being exactly between the earth and sun July 23. She becomes stationary again July 25, and on the 27th will be 8° south of the moon in western Gemini; brightest as a morning star Aug. 9, while still in Gemini, being 5° south of the moon on the 24th, forming a right angled triangle with Castor and Pollux; Sept. 6, in eastern Gemini 3° south of Saturn and in line with Castor and Pollux to the northwest, being at greatest angular distance west of the sun Sept. 12, and 2° south of Neptune on the 13th; Oct. 5-6, only 30' south of Regulus in the end of the handle of the Sickle in Leo and on the 23d in eastern

Explanation:

- A—About 15 days before superior conjunction with the sun, about April 1, 1917.
- B—At greatest elongation west of the sun, Sept. 12, 1916.
- C—When brightest as a morning star, Aug. 6 to 12, 1916.
- D—Just after inferior conjunction with the sun, July 5 to 15, 1916.
- E—Fifteen days after superior conjunction with the sun in May, 1917.
- F—At greatest angular distance east of the sun, April 23, 1916.
- G—When brightest as an evening star, May 24 to 30, 1916.
- H—Just before inferior conjunction with the sun, July 1, 1916.

Leo with the moon 6° north of her; Nov. 23, in eastern Virgo, with the moon 7° and Spica Virginis about 5° southwest; Dec. 22, in eastern Libra, with the moon 5° north and the brilliant red Antares, in Scorpio, about 10° southeast of her.

THE MOON—The nearest of the heavenly bodies is a dead world, without air or an atmosphere, water or moisture, and also probably destitute of heat. She was once riven with volcanic convulsions. Craters are scattered over her visible hemisphere, dimly discerned by the unaided eye as the "man in the moon," and under slight optical aid becoming startling in their vividness. Therefore, if ever life was there, it cannot be now. The craters are vastly greater than any on the earth, having a depth of 5,000 to 25,000 feet and being from thirty to seventy miles in diameter.

THE EARTH—The earth comes next in order outward from the sun and in point of age. All we know of the age of the earth is that the creative period—the "beginning" of Genesis—goes back over 100,000 years, and probably many times that, as unmistakably shown by the "footprints of the Creator" in the earth's rocks and surface deposits.

MARS—Our next neighbor outward from the sun will be a very conspicuous object throughout the winter evenings, being brightest in February and an evening star all the year, and also an all night star through the most of February. Unlike Mercury and Venus, where their heavy clouds prevent us from seeing objects or markings on their surfaces, Mars' atmosphere seems remarkably clear and his surface has been carefully watched for many years. From the data thus obtained the length of the Martian day has been ascertained to a small fraction of a second—viz., 24h. 37m. 22.67s. Mars will always hold first interest among our world family because of the various interpretations given to his surface markings as revealed by the telescopes, seas, plains, forests, canals, clouds, ice, snow masses, etc. Objects on his surface weigh only about one-third of what they would here. An interesting feature is that to an inhabitant of Mars one of his moons rises in the east and the other in the west.

His close approaches to the moon will be as follows: Jan. 22, 6° north; Feb. 18, 5° north; March 15, 4° north; April 12 and May 10, 3° north; June 8, 4° north; July 6, Aug. 4 and Sept. 1, 5° north; Sept. 30, 4° north; Oct. 29, 3° north; Nov. 26 and Dec. 25, 1° north. He will be stationary (when his motion is in the direction of our line of vision) Jan. 2 and March 22, nearest to the earth Feb. 9, and 90° east of the sun May 15.

JUPITER—The giant of the children of the sun, and because of this fact still retaining some of the parent's characteristics, and not dependent entirely for his heat, is the next in order, omitting the 700 or 800 asteroids or pocket planets. He will be an evening star until April 1 and after July 27 and a morning star the remainder of the year, though an all night star when brightest, in October and November. By reason of the fact that he is a semi-sun, it is possible that conditions on his surface are more suitable for life than would otherwise be the case. Being about ten times the diameter of the earth and turning on his axis in about 10 hours, an object on his surface would move about 30 times the speed of one on the earth, or 30,000 miles per hour. But a man weighing 150 pounds here would weigh 400 there. Storms there last two months, and the wind velocity attains 200 miles per hour.

He will be in eastern Aquarius in January, passing to the east of the prime meridian of the heavens into Pisces Feb. 10, then in western Aries until October, and then in Pisces again. When brightest, the latter part of the year, the great square of Pegasus will be to the northwest of him, some 20° or 25°.

His near approaches to the moon will be as

follows: Jan. 10, Feb. 7 and March 5, about 5° south; May 28, June 24, July 22, Aug. 18, Sept. 15, Oct. 12, Nov. 8 and Dec. 5, in all of which he will be about 6° south; in conjunction with the sun April 1, when he will be invisible for weeks before and after that date; at opposition or 180° from the sun Oct. 24, rising at sunset.

SATURN—The twin of Jupiter as to inherent light and heat, and the center of a miniature solar system, will be at his best in January, and nearly so again in December, when he will be opposite the sun and an all night star. He will also be an evening star until July 12, and after Oct. 24, and a morning star the remainder of the year, being invisible in July, when in conjunction with the sun.

His near approaches to the moon will be as follows: Jan. 18, Feb. 15, March 13, April 9, May 7 and June 3, in all of which he will be from 1° to 2° south of the moon; also Aug. 25, Sept. 21, Oct. 19, Nov. 15 and Dec. 13, in all of which he will be less than 1° south of the moon; the last four will be occultations in some southern latitudes. He will be in Gemini until September, and then in western Cancer. In January he will be exactly in line with Castor and Pollux, only a few degrees northwest of him, making a most beautiful group in the evening sky. About this same time a line from Sirius through Procyon extended about as far again will almost touch him.

URANUS—Will be brightest Aug. 5 to 15 in Capricornus, and on the 13th will be 2° south of the moon.

NEPTUNE—Will be brightest in January, being nearly in line with Castor and Pollux in Gemini, the latter being about 15° northwest of the planet. In November Neptune may be found about 4° east of Saturn.

The sun's surface is 12,000 and its volume 1,300,000 times that of the earth, but the mass is only 332,000 times as great and its density about one-quarter that of the earth. The force of gravity at the surface of the sun is twenty-seven times greater than that at the surface of the earth. The sun rotates on its axis once in 25.3 days at the equator, but the time is longer in the higher latitudes, from which fact it is presumed that the sun is not solid, at least as to its surface.

THE EARTH AND THE MOON.

Earth—The equatorial diameter of the earth is 7,926.5 miles and the polar diameter, 7,899.5 miles; equatorial circumference, 25,000. The linear velocity of the rotation of the earth on its axis at the equator is 24,840 miles a day, or 1,440 feet a second; its velocity in its orbit around the sun is approximately nineteen miles per second, the length of the orbit being about 560,000,000 miles. The superficial area of the earth, according to Encke, the astronomer, is 197,108,580 square miles, of which two-thirds is water and one-third land. The planetary mass is about 256,000,000 cubic miles.

Moon—The moon has a diameter of 2,162 miles, a circumference of about 6,800 miles and a surface area of 14,685,000 square miles. Her mean distance from the earth is 238,840 miles. The volume of the moon is about 1-49th that of the earth and the density about 3% that of water. The time from new moon to new moon is 29 days 12 hours 44.5 minutes. The moon has no atmosphere, and no water, and is a dead world.

Light travels at the rate of 186,300 miles per second. It requires 8 minutes and 8 seconds for light to come from the sun to the earth.

Explanation: By the absolute scale of magnitudes stars brighter than Aldebaran and Altair are indicated by fractional or negative quantities: thus Vega 0.2 and Sirius -1.4. As the magnitudes increase the brilliancy decreases, each increase of a unit being equal to a decrease of about two and one-half in brightness.

To ascertain when any star or constellation will be on the upper meridian add the number opposite in the column "For Meridian Passage" to the figures in the table on the following page. "Sidereal Noon," taking note whether such figures be "Morn." or "Eve." If "Morn." and the sum is more than 12h, the result will be Eve, of same day; if "Eve," and the sum is more than

12h, the result will be Morn. of the next day. Having found the time of meridian passage, for the rising subtract and for the setting add the numbers opposite the star in the column headed "For Rising and Setting" (†) and observe the directions as to Morn. and Eve, given for the meridian passage. Those marked (.....) in the last columns are circumpolar. Stars having an asterisk (*) in the last columns are only to be seen in the far south and then when near the meridian, as the vapors of the horizon will prevent seeing them when they rise or set. To tell how high up from the nearest point of the horizon a star will be at its meridian passage subtract the star's declination from 90° and if the

result is less than the latitude or the place of the observer that star will neither rise nor set, out is circumpolar, and the difference between that result and the latitude shows the star's altitude above the north point of the horizon or below the southern horizon. Or (90°-dec.)-lat. = alt. or elevation of the star above the nearest point of the horizon at meridian passage for stars of a southern declination. Examples:
Sidereal noon, Oct. 30, 9:28 p. m.
Fomalhaut "in Merid." col., 22:48

32:16
Subtract, 24:00

8:16 p. m. of the 31st.
time of meridian passage.
Fomalhaut ris. and set. col. add 4:00 for lat. 40° N.
12:16 = 0:16 a. m. of Nov. 1. the time of setting.

Fomalhaut, dec. 30° S. 90° - 30° = 60°, - 40° = 20°, altitude of Fomalhaut in latitude 40° at its meridian passage. To measure celestial distances with the eye keep in mind that one-third of the distance from the zenith to the horizon is 30°. For smaller measurements use the belt of Orion, 3° long, or the sides of the Square of Pegasus; the "pointers" in the "big dipper," which are nearly 5° apart—a convenient celestial yardstick because always to be seen. In the case of a star whose dec. is such as to bring it nearer to the zenith than to a horizon at meridian passage, it will be more convenient to use its zenith distance as a means of locating it. The difference between the latitude and dec. is this zenith distance. If the dec. is greater than the latitude then such distance is to be counted northward, otherwise southward from the zenith.

SIGNS AND CONSTELLATIONS OF THE ZODIAC.

Until recently it was taken for granted that the present relationship between signs and constellations of the zodiac was generally understood, as all astronomical textbooks mention their disagreement and explain the cause. The numerous letters of inquiry concerning differences between the data in this almanac and certain others show the necessity for this note of explanation.

Thousands of years ago when the zodiac, that belt of the heavens about 16° in width within which move the moon and planets, was formed and divided into twelve parts or seasons called signs, each containing certain star groups called constellations, each was given the name of an object or animal which never did bear any relationship to the configuration of the stars in that group or division, but which did or is supposed to have reference to certain astronomical or other facts. Thus Libra ♎, the scales or balance, comes at the autumnal equinox when there is an equilibrium or balance between the length of day and night the world over. Aquarius ♒, the water-bearer, whose sign is the Egyptian sign for running water, comes at the season of greatest rains in Egypt, and so on.

Since the time when these divisions were made and named, owing to the precession of the equinoxes, resulting from the differing polar or equatorial diameters of the earth, the signs have moved back west nearly a whole division or constellation and where ♈ was the first, ♋ now is. Hence, though the sun now enters the sign ♈ March 20, it is a month later when he enters the constellation ♈. It must be apparent, therefore, that any supposed influence or relationship which early astrologers attributed to the position of the sun, moon or planets when in certain of these divisions can no longer exist, as the sign now only represents that space or division of the zodiac where the controlling constellation was 2,000 or more years ago, but is not now. Nevertheless, some almanacs still give the signs for the moon's place, which is very misleading to those who attempt to follow her in her course among the stars. Hence, this almanac gives the constellation and discards the ancient picture of the disemboweled man as relics of the age of superstition. The sign is retained for sun's place in connection with the seasons and sun's path through the zodiac each month because of its relationship to the equinoxes and solstices.

ECLIPSES IN THE YEAR 1916.

There will be five eclipses this year, three of the sun and two of the moon, as follows:

I. Partial of the moon Jan. 20, visible throughout North America; size, 1.6 digits on the moon's southern limb as shown in the accompanying cut at b, the first point of contact being at a and the last at c.

out the United States, except in Alaska and the Philippine islands. About 5 digits, or some-

what less than half of the disk, will be eclipsed in the eastern states; from 4 to 5 digits in the central states and from 2 to 3 in the western. Fig. 1 shows the size of the eclipse as it will appear in the eastern states and Fig. 2 as it will appear in the western states, the uneclipsed portions being shaded. The sun will rise partially eclipsed west of a line from near the southeast corner of Arizona to Fort Benton, Montana. At Washington, D. C., the eclipse will begin at 10:30 a. m. and end at 1:15 p. m. mean time.

III. Partial of the moon July 14-15, visible generally in the United States; size about 9 digits, on the moon's northern limb as shown by the accompanying cut.

The eclipse will be visible as follows, according to Washington mean time and eastern and central, western and Pacific standard time:

	Washington.	Eastern.

IV. Annular of the sun July 30, visible in Australia, Southern Philippine islands, etc.

V. Partial of the sun Dec. 24; a mere contact of limbs in extreme southern latitudes only.

HUNTER'S AND HARVEST MOON.

The full moon nearest to Sept. 21 is popularly known as the "harvest moon." This is because the moon then rises, for several consecutive evenings, at nearly the same hour, giving an unusual number of moonlight evenings. This is the most noticeable in the higher latitudes and quite disappears at the equator.

The "hunter's moon" is the first full moon following the harvest moon.

VISIBILITY OF THE PRINCIPAL PLANETS IN 1916.

Copyright, 1909, by Berlin H. Wright, De Land, Fla.

EXPLANATION—The light spaces show the approximate time and extent of visibility of the planets named. Each of the small divisions represents 15 degrees of arc or 1 hour of time, and the light spaces show the angular distance in time or arc from the sun, east or west. Examples: Venus will be about 3 hours or 45 degrees west of the sun Sept. 12, and will therefore rise 3 hours before the sun. Mars will be opposite or 180 degrees east or west of the sun Feb. 10, and will therefore rise at sunset, after which he will continually approach the sun throughout the year until at the last he will be only 15 degrees or 1 hour east and will set in the evening twilight.

THE PLANETS

As Morning Stars West of the Sun—Mercury, March 4 to 10 and Oct 10 to 20, rising near the beginning of morning twilight. Venus, after July 3. Mars, not at all. Jupiter, April 1 to July 27. Saturn, from July 12 to Oct. 24.

As Evening Stars East of the Sun—Mercury, Jan. 15 to 20 and Sept. 6 to 10, setting near the close of evening twilight. Venus, to July 3. Mars, all the year. Jupiter, to April 1 and

after July 27. Saturn, to July 12 and after Oct. 24.

Brightest or Best Seen—Mercury, within the time limits given above when an evening or morning star. Venus, May 24 to 30 and Aug. 6 to 12. Mars, Feb. 5 to 15. Jupiter, Oct. 20 to 28. Saturn, Jan. 1 to 10, and at the last of the year. Uranus, Aug. 5 to 15. Neptune, Jan. 18 to 30.

Invisible or Very Dim—Mercury, at all times not included within the dates given when an evening or morning star. Venus, July 1 to 6, when between the earth and sun. Mars, toward the end of the year when very near the sun. Jupiter, in March and April when in or near conjunction with the sun. Saturn, in July, being in conjunction with the sun July 12. Uranus, at all other times than when brightest. Neptune, at all other times than when brightest.

All Night Stars or Planets—Mars, in February. Jupiter, latter part of October and first part of November. Saturn, in January and latter part of December.

NOTE—A superior planet is a morning star when it is in the east after midnight or from conjunction to western quadrature.

LOCATION OF THE BRIGHTEST STARS AND CONSTELLATIONS.

During first part of each month in the early evening.

JANUARY—Looking southward—East of the meridian: Orion, Canis Major, Sirius, Canis Minor, Procyon, Gemini, Castor, Pollux, Leo (rising); toward the south, Taurus, Pleiades, Hyades, Aldebaran; near overhead, Perseus, Algol. West of the meridian: Whale, Ram, Mira, Andromeda, square of Pegasus. Looking northward—From the pole star to the right: Big Dipper, pointers; below, Little Dipper, Dragon; to the left, Cassiopeia's Chair, Cygnus.

FEBRUARY—Looking southward—East of the

meridian: Sirius, Milky Way, Præsepe, the Sickle and Regulus, Hydra; toward the south, Dove, Canopus, Ræ, Orion's belt, Betelgeuse; near overhead, Auriga, Capella, Kids. West of the meridian: Seven Stars (cross), Aries, Whale. Looking northward—From the pole star: Vega, Lyra.

MARCH—Looking southward—East of the meridian: Crater, Virgo (rising), Leo, Regulus, Denebola, Alaphard; toward the south, Argus, Hydra, Cancer, Gemini, Præsepe; near over-

head, Lynx, Castor, Pollux. West of the meridian; Milky Way, Procyon, Gemini, Sirius, Orion, Taurus. Looking northward—From the pole star: To the right, Ursa Minor, Little Dipper, Dragon's head, Northern Crown.

APRIL—Looking southward—East of the meridian: Crow, Crater, Spica, Arcturus, Beta Leonis; toward the south, the Sickle and Regulus in Leo, Alaphard; near overhead, bowl of Big Dipper. West of the meridian: Gemini, Præsepe, Hydra, Castor, Pollux. Looking northward—From the pole star: Above, Big Dipper and Pointers; below, Cassiopeia's Chair and Milky Way.

MAY—Looking southward—East of the meridian: Square of Libra, Scorpio, Antares, Hercules, Northern Crown, Bootes, Arcturus; toward the south, Southern Cross, Crow, Virgo, Spica; near overhead, Mizar, Ursa Major, Big Dipper. West of the meridian: Crater, Denebola, Sickle, Regulus, Præsepe, Gemini (setting). Looking northward—From the pole star: Below, Cassiopeia's Chair, segment of Perseus; to the right, Alderamin; above, Little Dipper, Ursa Minor.

JUNE—Looking southward—East of the meridian: Antares, Scorpio, Milky Way, Ophiucus, Hercules and rich star cluster Eagle, Swan and Lyra (rising); toward the south, square of Libra, Arcturus, Spica Virginis; near overhead, Northern Crown, Alphecca, Rutilicus. West of the meridian: Virgo, Spica Virginis, Denebola. Looking northward—From the pole star: To the left, Capella, the pointers and bowl of Big Dipper.

JULY—Looking southward—East of the meridian: Milkmaid's Dipper in Sagittarius, Milky Way, Eagle (Aquila), Deneb, Dolphin (Job's Coffin), Great Cross, Cygnus; toward the south, Antares (low down), Hercules, Dragon; near overhead, great cluster in Hercules, Northern Crown, Dragon's head. West of the meridian: Square of Libra, Arcturus, Virgo, Spica Virginis. Looking northward—From the pole star: To the right, segment of Perseus, Algol and Cassiopeia's Chair; to the left, Big Dipper, Ursa Major.

AUGUST—Looking southward—East of the meridian: Capricornus, the Goat, Dolphin, Markab, Algenib, Alpheratz and Scheat in square of Pegasus (rising); toward the south, Sagittarius, Milkmaid's Dipper, Altair, Aquila, Cross (Swan); near overhead, Milky Way,

Great Cross in Cygnus, Harp (Lyra), Vega, West of the meridian: Scorpio (setting), Hercules, Bootes, Arcturus, Northern Crown. Looking northward—From the pole star: Little Dipper, Dragon's head.

SEPTEMBER—Looking southward—East of the meridian: Aquarius and the Y on the equator, square of Pegasus, Aries, Andromeda (naked-eye nebula); toward the south, Aquila, Altair, Dolphin, Deneb (cross); near overhead, Great Cross in the Swan, Deneb (at the head). West of the meridian: Sagittarius, Milkmaid's Dipper, Hercules, Lyra, Milky Way. Looking northward—From the pole star: Below, pointers in bowl of Big Dipper; to the right, Auriga, Capella; above, Cassiopeia's Chair.

OCTOBER—Looking southward—East of the meridian: Diphda (Cetus or Whale), Mira, Aries, Pleiades and Hyades (rising), Algol; toward the south, Fomalhaut (low in the south), Aquarius, square of Pegasus near overhead, Andromeda, Cassiopeia's Chair, Deneb, Milky Way. West of the meridian: Capricornus, Job's Coffin, Eagle, Altair, Cygnus, Lyra, Milky Way. Looking northward—From the pole star: To the left, Ursa Minor, Little Dipper, Dragon's head.

NOVEMBER—Looking southward—East of the meridian: Menkar, Eridanus, Taurus, Aries, Seven Stars, Aldebaran, Auriga, Capella; toward the south, Algenib and Alpheratz on the prime meridian of the heavens in square of Pegasus; near overhead, Andromeda, Mirach, Almach, Great Nebula (visible to the naked eye). West of the meridian: Fomalhaut, Aquarius; western side of square of Pegasus, Job's Coffin, Aquila, Great Cross, Dipper. Looking northward—From the pole star: Below Dragon's head, tail of Great Bear, handle of Big Dipper and Ursa Minor or Little Dipper.

DECEMBER—Looking southward—East of the meridian: The Hare, Dove, belt of Orion or Ell and Yard, Betelgeuse, Bellatrix, Castor and Pollux, Capella, Auriga; toward the south, Menkar, Seven Stars, Aries (the Ram), Algol, the wonderful short period variable; near overhead, Mirfak, the brightest star in the segment of Perseus. West of the meridian: Mira, wonderful variable in Cetus, great square of Pegasus, Andromeda. Looking northward—From the pole star: To the right, bowl of Big Dipper and pointers; to the left and above, Cassiopeia's Chair.

CHART SHOWING LIGHT AND DARK MOON IN 1916.

EXPLANATION—The light and dark portions show the relative amounts of moonlight and darkness and approximately the time of the rising and setting of the moon, as the small divisions represent 3 hours each or 6 hours on each side of the midnight line. Example: January 1 the moon will shine only during the

last three hours of the night, rising at 3 a. m. On the 4th and 5th there will be no moonlight; on the 8th there will be moonlight only until 9 p. m.; on the 11th until midnight, when the moon sets; on the 15th until 3 a. m. and on the 19th all night, the moon being at the full and rising at sunset.

DIFFERENCE IN TIME.

When it is 12 o'clock noon in New York, N. Y., or other places having eastern time, the corresponding time in the cities named below is:

TIME AND STANDARDS OF TIME.

Various kinds of time are in use in this country:

1. Astronomical Time or Mean Solar Time—This is reckoned from noon through the twenty-four hours of the day and is used mainly by astronomical observatories and in official astronomical publications. It is the legal time of the dominion of Canada, though "standard" and "mean" time are in general use there as in this country.

2. Mean Local Time—This is the kind that was in almost universal use prior to the introduction of standard time. This time was based upon the time when the mean sun* crosses the meridian, and the day begins at midnight. When divided into civil divisions—years, months, weeks, days, etc.—it is sometimes called civil time.

3. Standard Time—For the convenience of the railroads and business in general a standard of time was established by mutual agreement in 1883 and by this calculation trains are now run and local time is regulated. By this system the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour (7½° or 30m. on each side of a meridian), commencing with the 75th meridian. The first or eastern section includes all territory between the Atlantic coast and an irregular line drawn from Buffalo to Charleston, S. C., the latter city being

its southernmost point. The second or central section includes all the territory between this eastern line and another irregular line extending from Bismarck, N. D., to the mouth of the Rio Grande. The third or mountain section includes all the territory between the last named line and nearly the western borders of Idaho, Nevada and Arizona. The fourth or Pacific section includes all the territory of the United States between the boundary of the mountain section and the Pacific coast. Inside of each of these sections standard time is uniform and the time of each section differs from that next to it by exactly one hour, as shown on the map.

*Owing to the eccentricity of the earth's orbit and the inclination of the equator to the ecliptic, the apparent motion of the sun is retarded or accelerated according to the earth's place in its orbit. Hence, to take the actual sun as a guide would necessitate years, days and their subdivisions of unequal length. Therefore an imaginary or "mean sun" was invented. The difference between apparent and mean time is called the "equation of time" and may amount to a quarter of an hour in twenty-four hours. It is the difference between the figures in "Sun at noon mark" column in calendar and twelve hours. The figures on a correct sun dial give the apparent time.

STANDARDS OF TIME.

The following is the table of times, based upon the meridians used by the United States and Canada:

NAME OF TIME.	Degrees.	Central meridian from Greenwich.	Nearest place.
Intercolonial or Atlantic.....	60	4 hours west.....	About 34 degrees east of Halifax, N.S.
Eastern.....	75	5 hours west.....	Between New York and Philadelphia
Central.....	90	6 hours west.....	St. Louis and New Orleans.
Mountain.....	105	7 hours west.....	Denver, Col.
Pacific.....	120	8 hours west.....	1½ degrees east of Sacramento, Cal.
Sitka.....	135	9 hours west.....	¼ degree east of Sitka, Alaska.
Tahiti.....	150	10 hours west.....	¼ degree west of the island of Tahiti
Hawaiian.....	157½	10 hrs. 31 min. west.	Near center of Moikail.

It is obvious that to express the time of rising and setting of the sun and moon in standard time would limit the usefulness of such data to the single point or place for which it was computed, while in mean time it is practically correct for places as widely separated as the width

of the continent (see note at bottom of February calendar), and persons having obtained the mean time by the rising or setting of the sun or moon may easily ascertain the correct standard time of any event by making use of the following table and map:

STANDARD TIME TABLE.

To obtain standard time, add or subtract the figures given to local time.

The heavy dotted lines show the arbitrary (standard) divisions of time in the United States. The plus and minus marks on either side of the meridian lines show whether it is necessary to add to or subtract from the mean time of points east or west of these lines to arrive at actual

standard time. Example: Chicago is $2\frac{1}{2}^\circ$ east of the 90th meridian; therefore Chicago local time = $2\frac{1}{2} \times 4 = 10$ to be subtracted from mean time to standard time, and for Boston standard (eastern) time, 16m. must be subtracted from mean time.

WEIGHTS AND MEASURES USED IN THE UNITED STATES.

LONG MEASURE.		MARINERS' MEASURE.		LIQUID MEASURE.	
12 inches	= 1 foot.	6 feet	= 1 fathom.	4 gills	= 1 pint.
3 feet	= 1 yard = 36 inches.	120 fathoms	= 1 cable length.	2 pints	= 1 quart.
5½ yards	= 1 rod = 16½ feet.	7¼ cable lengths	= 1 mile.	4 quarts	= 1 gallon.
40 rods	= 1 furlong = 660 feet.	5,280 feet	= 1 statute mile.	31½ gallons	= 1 barrel.
8 furlongs	= 1 mile = 5,280 feet.	6,085 feet	= 1 nautical mile.	2 barrels	= 1 hogshead.
3 marine miles	= 1 marine league.				
SQUARE MEASURE.		CUBIC MEASURE.		DRY MEASURE.	
144 square inches	= 1 square foot.	1,728 cubic inches	= 1 cubic foot.	2 pints	= 1 quart.
9 square feet	= 1 square yard.	27 cubic feet	= 1 cubic yard.	8 quarts	= 1 peck.
30½ square yards	= 1 square rod.	128 cubic feet	= 1 cord of wood or stone.	4 pecks	= 1 bushel.
160 square rods	= 1 acre.	1 gallon contains	231 cubic inches.		
640 acres	= 1 square mile.	1 bushel contains	2,150.4 cubic inches.		
36 square miles	= 1 township.	A cord of wood is 8 ft. long, 4 ft. wide & 4 ft. high.			
CIRCULAR MEASURE.		APOTHECARIES' WEIGHT.		AVOIRDUPOIS WEIGHT.	
60 seconds	= 1 minute.	20 grains	= 1 scruple.	27 11-32 grains	= 1 dram.
60 minutes	= 1 degree.	3 scruples	= 1 dram.	16 drams	= 1 ounce.
360 degrees	= 1 circle.	8 drams	= 1 ounce.	16 ounces	= 1 pound.
1 degree	= 60 geographic miles.	12 ounces	= 1 pound.	2,000 lbs.	= 1 short ton.
1 geographic mile	= 1,527 statute miles.			2,240 lbs.	= 1 long ton.
1 degree of the equator	= 69.124 statute miles.				
TROY WEIGHT.		CLOTH MEASURE.		MISCELLANEOUS.	
24 grains	= 1 penny-weight.	2½ inches	= 1 nail.	3 inches	= 1 palm.
20 pennyw's	= 1 ounce.	4 nails	= 1 quarter.	4 inches	= 1 hand.
12 ounces	= 1 pound	4 quarters	= 1 yard.	6 inches	= 1 span.
				18 inches	= 1 cubit.
				21.3 inches	= 1 bible cubit.
				2½ feet	= 1 military pace
SURVEYORS' MEASURE.		COUNTING.		STATIONERS' TABLE.	
7.92 inches	= 1 link.	12 things	= 1 dozen.	24 sheets	= 1 quire.
25 links	= 1 rod.	12 dozen	= 1 gross.	20 quires	= 1 ream.
4 rods	= 1 chain.	12 gross	= 1 great gross.	2 reams	= 1 bundle.
10 chains	= 1 furlong.	20 things	= 1 score.	5 bundles	= 1 bale.
8 furlongs	= 1 mile.

THE METRIC SYSTEM.

The metric system is in general use in all the principal nations of Europe and America with the exception of Great Britain, Russia and the United States, where it is authorized but not compulsory. Its use for scientific purposes is common throughout the world.

WEIGHTS.

Milligram (.001 gram)	= .0154 grain.
Centigram (.01 gram)	= .1543 grains.
Decigram (.1 gram)	= 1.5432 grains.
Gram	= 15.432 grains.
Decagram (10 grams)	= 3527 ounce.
Hectogram (100 grams)	= 3,5274 ounces.
Kilogram (1,000 grams)	= 2,2046 pounds.
Myriagram (10,000 grams)	= 22.046 pounds.
Quintal (100,000 grams)	= 220.46 pounds.
Millier or tonneau-ton (1,000,000 grams)	= 2,204.6 lbs.

DRY.

Milliliter (.001 liter)	= .061 cubic inch.
Centiliter (.01 liter)	= .6102 cubic inch.
Deciliter (.1 liter)	= 6.1022 cubic inches.
Liter	= .908 quart.
Decaliter (10 liters)	= 9.08 quarts.
Hectoliter (100 liters)	= 2.398 bushels.
Kiloliter (1,000 liters)	= 1.308 cubic yards.

LIQUID.

Milliliter (.001 liter)	= .0088 fluid ounce.
Centiliter (.01 liter)	= .338 fluid ounce.
Deciliter (.1 liter)	= .345 gill.
Liter	= 1.0567 quarts.
Decaliter (10 liters)	= 2.6418 gallons.
Hectoliter (100 liters)	= 26.417 gallons.
Kiloliter (1,000 liters)	= 264.18 gallons.

LENGTH.

Millimeter (.001 meter)	= .0394 inch.
Centimeter (.01 meter)	= .3937 inch.
Decimeter (.1 meter)	= 3.937 inches.
Meter	= 39.37 inches.
Decameter (10 meters)	= 39.37 feet.
Hectometer (100 meters)	= 328 feet 1 inch.
Kilometer (1,000 meters)	= .62137 mile (3,280 ft. 10 inches).
Myriameter (10,000 meters)	= 6,213.7 miles.

SURFACE.

Centare (1 square meter)	= 1.550 sq. inches.
Are (100 square meters)	= 119.6 sq. yards.
Hectare (10,000 sq. meters)	= 2.471 acres.

METRIC EQUIVALENTS.

1 grain	= .06480 gram.
1 ounce	= 28.3495 grams.

1 pound	= 0.45359 kilogram.
1 dram (apoth.)	= 3.8967 grams.
1 scruple (apoth.)	= 1.2322 grams.
1 quart (dry)	= 1.1012 liters.
1 peck (dry)	= 8.8098 liters.
1 bushel	= 0.35239 hectoliter.
1 quart (liq.)	= 0.94636 liter.
1 gallon	= 3.78545 liters.
1 inch	= 25.4000 millimeters.
1 inch	= 2.54001 centimeters.
1 inch	= 0.0254 meter.
1 foot	= 0.3048 meter.
1 yard	= 0.9144 meter.
1 mile	= 1.6093 kilometers.
1 sq. inch	= 645.16 sq. millimeters.
1 sq. foot	= 0.0929 sq. meter.
1 sq. yard	= 0.8361 sq. meter.
1 sq. mile	= 2.5900 sq. kilometers.
1 acre	= 0.4047 hectare.
1 cubic inch	= 16.387 cubic millimeters.
1 cubic foot	= 0.02832 cubic meter.
1 cubic yard	= 0.7645 cubic meter.

ELECTRICAL UNITS DEFINED.

Ohm—Unit of resistance; represents resistance offered to an unvarying electric current by a column of mercury at the temperature of ice, 14,5421 grams in mass, of a cross-sectional area of 1.00008 square millimeters and of the length of 106.3 centimeters.

Ampere—Unit of current; decomposes .0009324 of a gram of water in one second or deposits silver at the rate of .001118 of a gram per second, when passed through a solution of nitrate of silver in water.

Volt—Unit of electro motive force; one volt equals one ampere of current passing through a substance having one ohm resistance.

Coulomb—Unit of quantity; amount of electricity transferred by a current of one ampere in one second.

Farad—Unit of capacity; capacity of a condenser charged to a potential of one volt by one coulomb. A microfarad is one-millionth of a farad.

Joule—Unit of work; equivalent to energy expended in one second by one ampere current in one ohm resistance.

Watt—Unit of power; equivalent to work done at the rate of one joule per second. A kilowatt is 1,000 watts.

SIMPLE INTEREST TABLE.

NOTE—To find the amount of interest at 2½ per cent on any given sum, divide the amount given for the same sum in the table at 5 per cent by 2; at 3½ per cent divide the amount at 7 per cent by 2, etc.

STORAGE SPACE REQUIRED FOR DIFFERENT MATERIALS.

Example—A steamer has a capacity of 180,000 cubic feet for carrying coal. How many tons will she carry?

From the table, average American coal stows 43 cubic feet per ton of 2,240 pounds, so 180,000 ÷ 43 = 4,186 tons—the number she would carry.

NOTE—The following table is based on a ton of 2,240 pounds. If the cubic feet per ton of 2,000 pounds is required, multiply the figures given by .892:

DEFINITIONS.

Displacement is the amount of water displaced by a vessel. If a vessel is floating in equilibrium in still water, the weight of the water she displaces equals the weight of the vessel herself with everything on board.

The displacement in cubic feet when floating in salt water divided by 35 (36 if in fresh water) gives the total weight of a ship and her cargo in tons, as 35 cubic feet of salt water weighs one ton (2,240 pounds) and 36 of fresh water the same amount.

The displacement of a steel vessel is calculated to the molded lines (that is, to the outside of the frames) and no allowance is made as a rule for the thickness of the shell plating. For wooden vessels (motor boats, tugs, lighters, etc.) the displacement is calculated to the outside of the planking.

Dead weight is the carrying capacity of a vessel and includes the tons of cargo and coal.

Register ton measurement is the measurement based on a ton of 2,240 pounds occupying 100 cubic feet.

Gross tonnage is the measurement in register tons of the interior capacity of the entire ship.

Net tonnage is the measurement in register tons upon which payment is made, and is the volume of the space available for cargo and passengers.

Block coefficient is the ratio of the volume of the displacement to the volume of a block having the same length, breadth and draft as the vessel. Cargo vessels have block coefficients ranging from .75 to .85, while fast passenger steamers have block coefficients of about .65.

If the length, width and draft of a vessel are multiplied by the block coefficient and this product divided by the weight of water per ton (36 cubic feet for fresh and 35 for salt water per ton of 2,240 pounds) the displacement of the vessel will be obtained.

SHIPPING TERMS.

f. o. b. steamer (free on board steamer); goods to be delivered on board steamer by seller at no extra charge to purchaser.

f. a. s. steamer (free at side steamer); goods to be delivered at side of steamer by seller.

f. f. a. steamer (free from alongside steamer); the seller pays lighterage charges in the port of destination from the steamer.

c. l. f. (cost, insurance and freight); the goods are delivered to the purchaser with the insurance and freight paid by the seller.

c. f. (cost and freight); the goods are delivered to the purchaser with the freight paid by the seller, but no insurance.

f. o. (free over side); the goods are delivered over the side of a vessel; that is, to a lighter or on to a pier, without any extra charge to the purchaser.

Bill of lading (b. l.) is a receipt for goods delivered to a carrier for transportation. The bills of lading of some steamship companies contain the following clause: "Freight is to be considered earned at time of receipt of shipment and is to be paid whether vessels or goods are lost or not." In foreign trade bills of lading are generally made out in triplicate, one for the shipper, one for the consignee and one for the captain of the vessel.

"With exchange" on a draft means that the party on whom the draft is drawn is to pay the cost of collection.

Demurrage—A charge for delay in loading or unloading a vessel.

Lay days are the days agreed upon by the shipper and captain or agent of a vessel for loading and discharging a cargo, beyond which a demurrage will be paid to the owners of the vessel. Sundays and legal holidays do not count unless the term "running days" is inserted, in which case all days are included.

Manifest—A document signed by the captain of a vessel containing a list of the goods and merchandise on board with their destination, for the use of the custom house officials. By United States Revised Statutes 2807 it is required to contain the names of the ports of loading and destination, a description of the vessel and her port, names of owners and master, names of consignees and of passengers and lists of the passenger's baggage and of the sea stores.

Clearance papers—When ready for sea the custom officials must be provided with a detail manifest of the ship's cargo. If the port charges have been paid and her cargo is properly accounted for, then the collector of the port will furnish the captain with clearance papers, without which the vessel must not leave port.

Drawback—A refund of duties paid on imported material that is used in the manufacture of goods that are exported. The United States government allows the exporter the import duty paid, less 1 per cent.

Salvage—The reward granted by law for saving life and property at sea.

Jettison—The throwing overboard of a part of

the cargo or any article on board of a ship for the purpose of lightening the ship in case of necessity.

Bill of health—A certificate stating that the vessel comes from a port where no contagious disease prevails, and that none of the passengers (if carried) nor the crew at the time of departure was infected with any disease.

MARINE INSURANCE.

A contract of marine insurance is a contract of indemnity whereby the insurer undertakes to indemnify the insured in the manner and to the extent agreed against marine losses; i. e., the losses incident to marine adventure.

Unless specially mentioned in the policy, goods are not insured until they are on board of the vessel which is to carry them. Below are brief outlines of clauses and terms occurring in policies.

General average—Suppose a vessel springs a leak and to save her from sinking the captain throws overboard a portion of her cargo. The last shipment loaded on board is generally the first to come out.

If the shipment is fully insured the underwriters will pay the amount assessed against the goods, but whether the goods are insured or not the general average will make good to the owner the value of the goods which were sacrificed less the assessment which the owner is called upon to pay. It is safe to figure that all policies of insurance on goods cover and protect the merchant against assessments in general average.

Thus a merchant can suffer considerable loss by reason of assessment levied against his goods in general average, although the goods arrive at their destination in a perfectly sound condition—but such losses can be fully covered by insurance.

Free of particular average (f. p. a.)—Under American conditions it is understood that no claim for partial loss or damage will be allowed by the underwriters unless the loss or damage is caused by the vessel having been burned, stranded, sunk or in collision.

With average (w. a.)—This means that no claim will be made on the underwriters for partial loss caused by sea perils unless the damage amounts to 5 per cent or more of the value of the shipment.

Free of all average (f. a. a.)—This, as the clause signifies, means free of all average.

Collision or ruling or running down clause (r. d. c.)—This is a clause in which the underwriters take a burden of a proportion, usually three-quarters, of the damage inflicted on other vessels by collision for which the insured vessel is held to blame. Sometimes this clause is extended to cover the whole of the assured's liabilities arising out of the damage done to property by the collision of the insured vessel with another and the clause is then known as the "four-fourths running down clause."

Inchamsee clause—This clause covers loss of or damage to hull and machinery through the negligence of master, mariners, engineers and pilots, or through explosions, bursting of boilers, breakage of shafts or through any latent defect in the machinery or hull, provided such loss or damage has not resulted from want of due diligence by the owners of the ship or by the manager.

BIRD CENSUS OF THE UNITED STATES.

In the summer of 1914 the biological survey of the department of agriculture took the first steps toward a census of the birds of the United States for the purpose of ascertaining approximately the number and relative abundance of the different species. The value of birds to agriculture is well recognized and an additional reason for the census was the fact that the department of agriculture administers the federal law for the protection of migratory and insectivorous birds. Most of the census work done in 1914 was on farms in the northeastern quarter of the United States, or north of North Carolina and east of Kansas. From the figures obtained in widely scattered localities it was found that the most abundant bird was possibly the robin and the next

the English sparrow. Following these were the catbird, the brown thrasher, the house wren, the kingbird, and the bluebird in the order named.

No other bird is anywhere near as abundant as either the robin or the English sparrow, but several others are common enough to make their numbers run well into the millions. For every 100 robins reported in the 1914 census there were 49 catbirds, 37 brown thrashers, 28 house wrens, 27 kingbirds and 26 bluebirds. The record for density of bird population came from Chevy Chase, Md., where 161 pairs of thirty-four species were found nesting on twenty-three acres. No attempt was made by the department to estimate the total number of birds of each species in the United States.

FASTEST TRIPS AROUND THE WORLD.

Made by John Henry Mears in 1913-35 days 21 hours 36 minutes.

Made by Andre Jaeger-Schmidt in 1911-39 days 42 minutes 33 seconds.

Made by Henry Frederick in 1903-54 days 7 hours 20 minutes.

Made by Nellie Bly (Mrs. Nellie Seaman) in 1889-72 days 6 hours 11 minutes.

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and centigrade. The freezing and boiling points on their scales compare as follows:

Thermometer.	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.

Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.

Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.

Reaumur to Centigrade—Multiply by five-fourths.

Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.

Centigrade to Reaumur—Multiply by four-fifths.

UNITED STATES CIVIL SERVICE.

Civil service act approved Jan. 16, 1883.

Officers.—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules.—The fundamental rules governing appointments to government positions are found in the civil service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free, open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period (six months) of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs and no discrimination shall be exercised against or in favor of any applicant or employee on account of his religion or politics. The classified civil service shall include all officers and employees in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations.—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making application, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants.—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dismissed from the public service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age

limitations in the more important branches of the public service are: Postoffice, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 18 to 35; light house, 18 to 50; life saving, 18 to 45; general departmental, 20 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment.—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals.—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal.

Salaries.—Entrance to the department service is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about \$900, but the applicant may be appointed at \$840, \$760 or even \$600.

- 1914—Home rule bill introduced for third time March 5; passed by house of commons May 25 by vote of 351 to 274; signed by King George and placed on statute book Sept. 18.

SYNOPSIS OF ACT.

The home rule act provides for an Irish senate of forty members and an Irish house of commons of 164 members. Ireland will send forty-two members to the British house of commons in London. The senators will be chosen from the four provinces and according to the principle of proportional representation. In a constituency which returns three or more members to the house of commons the election shall also be held on the proportional principle. The term of both senators and members of the commons is five years. Appropriation and tax bills shall origi-

nate only in the house of commons and the senate may not reject any such bill or amend it so as to increase the burden on the people. If the two houses fail to agree on any bill the lord lieutenant may convene a joint sitting. The act exempts specifically the following matters from the jurisdiction of the Irish parliament:

The crown or its succession.
The making of peace or war.
The navy, the army or the defense of the realm.
Treaties or foreign relations.
Dignities or titles.
Treason, allegiance or naturalization.
Trade with any place out of Ireland, except as it affects the powers of taxation of parliament.
Postal services and rates.
Coinage, legal tender, weights and measures.
Trade marks, copyrights and patents.
Customs duties unless already levied by imperial act.
The rate of the income tax may not be varied.
Establishment, prohibition or free exercise of privilege of any religion.
If a resolution is passed by both houses of the Irish parliament the following reserved services may be transferred to Ireland after six years:
All public services connected with the old age pensions act.
Services connected with the national insurance act.

Services connected with the labor exchanges act.
Services connected with postoffice savings banks, trustee savings banks and friendly societies.
The direction of the royal Irish constabulary is arbitrarily transferred to the Irish parliament after six years.

The Irish parliament shall meet at least once a year, when called by the lord lieutenant. The latter shall give or withhold the assent of his majesty to bills passed by parliament.

torney-general, postmaster-general, secretary of the navy, secretary of the interior, secretary of agriculture and secretary of commerce. The acting president, in case congress is not in session, must call a special session, giving twenty days' notice.

APPLICATIONS FOR PATENTS.

[Condensed from Rules of Practice in the United States patent office.]

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof not previously patented or described in this or any other country, for more than two years prior to his application, unless the same is proved to have been abandoned. A patent may also be obtained for any new design for a manufacture, bust, statue, alto-relievo or bas-relief; for the printing of woollen, silk or other fabrics; for any new impression, ornament, pattern, print or picture to be placed on or woven into any article of manufacture; and for any new, useful and original shape or configuration of any article of manufacture, upon payment of fees and taking the other necessary steps.

Applications for patents must be in writing, in the English language and signed by the inventor if alive. The application must include the first fee of \$15, petition, specification and oath, and drawings, model or specimen when required. The petition must be addressed to the commissioner of patents and must give the name and full address of the applicant, must designate by title the invention sought to be patented, must contain a reference to the specification for a full disclosure of such invention and must be signed by the applicant.

The specification must contain the following in the order named: Name and residence of the applicant with title of invention; a general statement of the object and nature of the invention; a brief description of the several views of the drawings (if the invention admits of such illustration); a detailed description; claim or claims; signature of inventor and signatures of two witnesses. Claims for a machine and its product and claims for a machine and the process in the performance of which the machine is used must be presented in separate applications, but claims for a process and its product may be presented in the same application.

The applicant, if the inventor, must make oath or affirmation that he believes himself to be the first inventor or discoverer of that which he seeks to have patented. The oath or affirmation must also state of what country he is a citizen and where he resides. In every original application the applicant must swear or affirm that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than seven months prior to his application. If application has been made in any foreign country, full and explicit details must be given. The oath or affirmation may be made before any one who is authorized by the laws of his country to administer oaths.

Drawings must be on white paper with India ink and the sheets must be exactly 10x15 inches in size, with a margin of one inch. They must show all details clearly and without the use of superfluous lines.

Applications for reissues must state why the original patent is believed to be defective and tell precisely how the errors were made. These applications must be accompanied by the original patent and an offer to surrender the same; or, if the original be lost, by an affidavit to that effect and certified copy of the patent. Every applicant whose claims have been twice rejected for the same reasons may appeal from the primary examiners to the examiners in chief upon the payment of a fee of \$10.

The duration of patents is for seventeen years except in the case of design patents, which may be for three and a half, seven or fourteen years, as the inventor may elect.

Caveats or notices given to the patent office of claims to inventions to prevent the issue of patents to other persons upon the same invention, without notice to caveators, may be filed upon the payment of a fee of \$10. Caveats must contain the same information as applications for patents.

REGISTRATION OF TRADE-MARKS.

Under the law passed by congress Feb. 20, 1905, and effective April 1, 1905, citizens of the United States, or foreigners living in countries affording similar privileges to citizens of the United States, may obtain registration of trade-marks used in commerce with foreign nations, or among the several states, or with Indian tribes, by complying with the following requirements: First, by filing in the patent office an application therefor in writing, addressed to the commissioner of patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant or his attorney, and such number of specimens of the trade-mark as may be required by

the commissioner of patents. Second, by paying into the treasury of the United States the sum of \$10 and otherwise complying with the requirements of the law and such regulations as may be prescribed by the commissioner of patents.

The application must be accompanied by a written declaration to the effect that the applicant believes himself to be the owner of the trade-mark sought to be registered and that no other person or corporation has the right to use it; that such trade-mark is in use and that the description and drawing presented are correct. Trade-marks consisting of or comprising immoral or scandalous matter, the coat of arms, flag or other insignia of the United States or of any state or foreign nation cannot be registered. Fees for renewal of trade-marks and for filing opposition to registration are \$10 each; for appeals from examiners to the commissioner of patents, \$15 each.

Further information may be had by applying to the commissioner of patents, Washington, D. C.

COPYRIGHT LAWS OF THE UNITED STATES.

The act to amend and consolidate the acts respecting copyright, in force July 1, 1909, as amended by the act approved Aug. 24, 1912, provides that any person entitled thereto, upon complying with the provisions of the law, shall have the exclusive right (a) to print, reprint, publish, copy and vend the copyrighted work; (b) to translate the copyrighted work or make any other version of it if it be a literary work; to dramatize it if it be a nondramatic work; to convert it into a novel or other nondramatic work if it be a drama; to arrange or adapt it if it be a musical work; to finish it if it be a model or design for a work of art; (c) to deliver or authorize the delivery of the copyrighted work if it be a lecture, sermon, address or similar production; (d) to perform the copyrighted work publicly if it be a drama or, if it be a dramatic work and not reproduced in copies for sale, to vend the manuscript or any record thereof; to make or to procure the making of any transcription or record thereof by which it may in any manner be exhibited, performed or produced, and to exhibit, perform or produce it in any manner whatsoever; (e) to perform the copyrighted work publicly for profit if it be a musical composition and for the purpose of public performance for profit and to make any arrangement or setting of it in any system of notation or any form of record in which the thought of an author may be read or reproduced.

So far as it secures copyright controlling the parts of instruments serving to reproduce mechanically the musical work the law includes only compositions published after the act went into effect; it does not include the works of a foreign author or composer unless the country of which he is a citizen or subject grants similar rights to American citizens. Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the part of instruments serving to reproduce mechanically the musical work, any other person may make a similar use of the work upon the payment to the owner of a royalty of 2 cents on each such part manufactured. The reproduction or rendition of a musical composition by or upon coin-operated machines shall not be deemed a public performance for profit unless a fee is charged for admission to the place where the reproduction occurs.

The works for which copyright may be secured include all the writings of an author.

The application for registration shall specify to which of the following classes the work in which copyright is claimed belongs:

- (a) Books, including composite and cyclopedic works, directories, gazetteers and other compilations.
- (b) Periodicals, including newspapers.
- (c) Lectures, sermons, addresses, prepared for oral delivery.
- (d) Dramatic or dramatic-musical compositions.
- (e) Musical compositions.
- (f) Maps.
- (g) Works of art; models or designs for works of art.
- (h) Reproductions of a work of art.
- (i) Drawings or plastic works of a scientific or technical character.
- (j) Photographs.
- (k) Prints and pictorial illustrations.
- (l) Motion picture photo plays.
- (m) Motion pictures other than photo plays.

These specifications do not, however, limit the subject matter of copyright as defined in the law nor does any error in classification invalidate the copyright protection secured.

Copyright extends to the work of a foreign author or proprietor only in case he is domiciled in the United States at the time of the first publication of his work or if the country of which he is a citizen grants similar copyright protection to citizens of the United States.

Any person entitled thereto by the law may secure copyright for his work by publication thereof with the notice of copyright required by the act, and such notice shall be affixed to each copy published or offered for sale in the United

States. Such person may obtain registration of his claim to copyright by complying with the provisions of the act, including the deposit of copies, whereupon the register of copyrights shall issue to him a certificate as provided for in the law. Copyright may also be had of the works of an author of which copies are not reproduced for sale by the deposit with claim of copyright of one complete copy, if it be a lecture or similar production, or a dramatic or musical composition; of a title and description, with one print taken from each scene or act, if the work be a motion picture photo play; of a photographic print if it be a photograph; of a title and description, with not less than two prints taken from different sections of a complete motion picture, if the work be a motion picture other than a photo play, or of a photograph or other identifying reproduction thereof if it be a work of art or a plastic work or drawing.

After copyright has been secured there must be deposited in the copyright office in Washington, D. C., two complete copies of the best edition thereof, which copies, if the work be a book or periodical, shall have been produced in accordance with the manufacturing provisions of the act, or if such work be a contribution to a periodical for which contribution special registration is requested one copy of the issue or issues containing such contribution. Failure to deposit the copies within a given time after notice from the register of copyrights makes the proprietor of the copyright liable to a fine of \$100 and twice the retail price of the work, and the copyright becomes void.

The text of all books and periodicals specified in paragraphs (a) and (b) above, except the original text of a book of foreign origin in a language other than English, must in order to secure protection be printed from type set within the limits of the United States, either by hand, machinery or other process, and the printing of the text and the binding of the books must also be done within the United States. An affidavit of such manufacture is required.

The notice of copyright required consists either of the word "copyright" or the abbreviation "copr.," accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical or dramatic work, the notice must also include the year in which the copyright was secured by publication. In the case, however, of copies of works specified in paragraphs (f) to (k) inclusive (given above) the notice may consist of the letter C inclosed within a circle, accompanied by the initials, monogram, mark or symbol of the copyright proprietor, provided his name appears elsewhere on the copies. In the case of a book or other printed publication the notice shall be applied on the title page or on the page immediately following, or if a periodical either upon the title page or upon the first page of text of each separate number or under the title heading; or if a musical work upon its title page or the first page of music.

Where the copyright proprietor has sought to comply with the law with respect to notice, the omission of such notice by mistake from a particular copy or copies shall not invalidate the copyright or prevent recovery for infringement against any person who, after actual notice of the copyright, begins an undertaking to infringe it, but shall prevent the recovery of damages against an innocent infringer who has been misled by the omission of the notice.

In the case of a book in English published abroad before publication in this country, the deposit in the copyright office within thirty days of one copy of the foreign edition, with a request for the reservation of the copyright, secures for the author or owner an ad interim copyright for thirty days after such deposit is made.

The copyright secured by the act endures for twenty-eight years from the date of the first publication. In the case of any posthumous work, periodical, encyclopedic or other composite work upon which the copyright was originally secured by the proprietor thereof, or of any work

copyrighted by a corporate body, or by an employer for whom such work is made for hire, the proprietor of such copyright shall be entitled to a renewal of the copyright in such work for the further term of twenty-eight years when application for such renewal shall have been made within one year prior to the expiration of the original term. In the case of any other copyrighted work, including a contribution by an individual author to a periodical or to a cyclopedic or other composite work when such contribution has been separately copyrighted, the author of such work, if living, or the heirs, executors or next of kin, if the author be dead, shall be entitled to a renewal of the copyright for a further term of twenty-eight years. In default of such application for renewal the copyright in any work shall end at the expiration of twenty-eight years.

If any person shall infringe the copyright in any work protected under the copyright laws of the United States, such person shall be liable:

(a) To an injunction restraining such infringement.

(b) To pay to the copyright proprietor such damages as the copyright proprietor may have suffered due to the infringement, as well as all the profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only and the defendant shall be required to prove every element of cost which he claims, or in lieu of actual damages or profits such damages as to the court shall appear to be just, and in assessing such damages the court may, in its discretion, allow the amounts as hereinafter stated (in numbered paragraphs), but in the case of a newspaper reproduction of a copyrighted photograph such damages shall not exceed the sum of \$200 nor be less than \$50, and such damages shall in no other case exceed the sum of \$250 and shall not be regarded as a penalty. In the case of the infringement of an undramatized or nondramatic work by means of motion pictures, where the infringer shows that he was not aware that he was infringing, the damages shall not exceed \$100. In the case of the infringement under like circumstances of a copyrighted dramatic or dramatic-musical work the entire sum recoverable shall not exceed \$5,000 nor be less than \$250.

1. In the case of a painting, statue or sculpture, \$10 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees.

2. In the case of any work enumerated in the list (given above) of works for which copyright may be asked, except a painting, statue or sculpture, \$1 for every infringing copy.

3. In the case of a lecture, sermon or address, \$50 for every infringing delivery.

4. In the case of dramatic or dramatic-musical or a choral or orchestral composition, \$100 for the first and \$50 for every subsequent infringing performance; in the case of other musical compositions, \$10 for every infringing performance.

(c) To deliver up on oath all articles alleged to infringe a copyright.

(d) To deliver up on oath for destruction all the infringing copies or devices, as well as all plates, molds, matrices or other means for making such infringing copies, as the court may order.

(e) Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the parts of musical instruments serving to reproduce mechanically the musical work, then in case of infringement by the unauthorized manufacture, use or sale of interchangeable parts, such as disks, rolls, bands or cylinders for use in mechanical music-producing machines, no criminal action shall be brought, but in a civil action an injunction may be granted upon such terms as the court may impose and the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in the act.

Any person who shall willfully and for profit infringe any copyright, or willfully aid or abet such infringement, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall

be punished by imprisonment for not exceeding one year or by a fine of not less than \$100 nor more than \$1,000, or both, in the discretion of the court. It is provided, however, that nothing in the act shall prevent the performance of religious or secular works, such as oratorios, cantatas, masses or octavo choruses by public schools, church choirs or vocal societies, provided the performance is for charitable or educational purposes and not for profit.

Any person who shall fraudulently place a copyright notice upon any uncopyrighted article, or shall fraudulently remove or alter the notice upon any copyrighted article, shall be deemed guilty of a misdemeanor and shall be subject to a fine of not less than \$100 nor more than \$1,000. Any person who shall knowingly sell or issue any article bearing a notice of United States copyright which has not been copyrighted in this country, or who shall knowingly import any article bearing such notice, shall be liable to a fine of \$500.

During the existence of the American copyright in any book the importation of any piratical copies thereof or of any copies not produced in accordance with the manufacturing provisions of the copyright law, or of any plates of the same not made from type set in this country, or any copies produced by lithographic or photo-engraving process not performed within the United States, is prohibited. Except as to piratical copies this does not apply:

(a) To works in raised characters for the blind;

(b) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright owner, unless such newspaper or magazine contains also copyright matter printed without such authorization;

(c) To the authorized edition of a book in a foreign language of which only a translation into English has been copyrighted in this country;

(d) To any book published abroad with the authorization of the author or copyright proprietor under the following circumstances:

1. When imported, not more than one copy at a time, for individual use and not for sale, but such privilege of importation shall not extend to a foreign reprint of a book by an American author copyrighted in the United States;

2. When imported by or for the use of the United States;

3. When imported for use and not for sale, not more than one copy of any such book in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school or seminary of learning, or for any state school, college, university or free public library in the United States;

4. When such books form parts of libraries or collections purchased en bloc for the use of societies, institutions or libraries, or form parts of the library or personal baggage belonging to persons or families arriving from foreign countries and are not intended for sale.

No criminal actions shall be maintained under the copyright law unless the same be begun within three years after the cause of action arose.

Copyright may be assigned, mortgaged or bequeathed by will.

There shall be appointed by the librarian of congress a register of copyrights at a salary of \$4,000 a year and an assistant register at \$3,000 a year.

These with their subordinate assistants shall perform all the duties relating to the registration of copyrights. The register of copyrights shall keep such record books in the copyright office as are required to carry out the provisions of the law, and whenever deposit has been made in the copyright office of a copy of any work under the provisions of the act he shall make entry thereof.

In the case of each entry the person recorded as the claimant of the copyright shall be entitled to a certificate of registration under seal of the copyright office.

The register of copyrights shall receive and the persons to whom the services designated are rendered shall pay the following fees: For the registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal: Provided, That in the case of photographs the fee shall be 50 cents where a certificate is not demanded. For every additional certificate of registration made, 50 cents. For recording and certifying any instrument of writing for the assignment of copyright or license, or for any copy of such certificate or license, duly certified, if not over 300 words in length, \$1; if more than 300 and less than 1,000, \$2; if more than 1,000 words in length, \$1 additional for each 1,000 words or fraction thereof over 300 words. For recording the notice of user or acquiescence specified in the act, 25 cents for each notice of not over fifty words and an additional

25 cents for each additional 100 words. For comparing any copy of an assignment with the record of such document in the copyright office and certifying the same under seal, \$1. For recording the extension or renewal of copyright, 50 cents. For recording the transfer of the proprietorship of copyrighted articles, 10 cents for each title of a book or other article in addition to the fee for recording the instrument of assignment. For any requested search of copyright office records, indexes or deposits, 50 cents for each full hour consumed in making such search. Only one registration at one fee shall be required in the case of several volumes of the same book deposited at the same time.

DECISION IN U. S. STEEL CORPORATION SUIT.

Suit filed Oct. 25, 1911.

Hearings begun May 6, 1912.

Case argued October, 1914.

Decision announced June 3, 1915.

Cost of suit, \$500,000.

Suit was brought by the federal government in the United States Circuit court at Trenton, N. J., Oct. 26, 1911, to dissolve the United States Steel corporation and all its constituent companies. Among the men made defendants were J. Pierpont Morgan (since deceased), John D. Rockefeller, Andrew Carnegie, Charles M. Schwab, George W. Perkins, E. H. Gary and Henry C. Frick. The government in its bill asked: That the corporation be adjudged unlawful; that the defendants be perpetually enjoined from doing any act for carrying out its alleged conspiracy to control and monopolize the steel industry; that the corporation be declared illegal and be dissolved, and that the ore lease of the Great Northern properties in the Mesaba range be declared illegal.

The judges deciding the case were Joseph Buffington, Victor B. Woolley, John B. McPherson and William H. Hunt. Judge Buffington wrote the principal opinion and Judge Woolley wrote a concurring opinion in which Judge Hunt concurred. The court held in substance that the United States Steel corporation was not a monopoly. It was pointed out that mere bigness of business was not equivalent to monopoly. "The real test of monopoly," the court said, "is not the size of that which is acquired but the trade power of that which is not acquired." The main points in the decision were these:

1. That there was nothing wrong in the Steel corporation's acquiring the Tennessee Coal and Iron company's properties during the 1907 panic, thus virtually approving the attitude of the Roosevelt administration in not interfering with the deal.

2. That while at the famous Gary dinners 95 per cent of the steel interests of the country were represented and prices were unlawfully fixed, these meetings ceased before the bill was filed and no injunction is necessary. The court suggests that such practices lie within the province of the new federal trade commission.

3. That there is no proof that Andrew Carnegie accepted any relation in the formation of the Steel corporation other than that of seller of his stocks and bonds. The court declared to be true his statement that he disposed of his interests in a desire to retire from active business.

4. That the steel and iron business of the country is not being and "indeed cannot be monopolized." That while the Steel corporation increased but 40 per cent in size in ten years, eight other great steel companies increased from 63 to 3,779 per cent. At the time the bill was filed the decision holds competitors were doing 60 per cent of the country's steel business.

5. That while the Steel corporation might lower the price of any product it sells and depress the price obtainable by competitors, it could not by raising or even maintaining the price of a steel product raise the obtainable price.

6. With the completion of the Erie canal Lake Superior ores can be brought cheaper to New York harbor than to Pittsburgh. This means blast furnaces on New York harbor waters. The decision further says that on the basis of actual iron units in ore Cuban ores can be delivered in Philadelphia at one-half the cost of Lake Superior, and the facts adduced are that there is no possibility of Lake Superior ore monopoly.

7. That in considering the possible range of foreign steel markets for American iron and steel there must first be excluded Germany, France, Austria, Italy and Russia, because their tariffs prevent it. Foreign markets are pre-empted and tenaciously held by foreign manufacturers and bankers, and that a steel company must be "big" to enter the trade.

8. That the defendants (Rockefellers), who were charged with having combined with the corporations in restraining trade in iron ores, are not guilty and the bill was dismissed as regards them.

9. As to finished products it was held the corporation does not dominate, that its size and power have not retarded the growth of competitors and "it is not in its inherent nature a monopoly," nor is its necessary effect to unduly restrain trade.

Date—May 8-9, 1914.

Lives lost—200.

Persons injured—1,000.

EARTHQUAKE IN CENTRAL ITALY.

Date—Jan. 13, 1915.

Hour—7:55 a. m.

Duration of shock—30 seconds.

Lives lost—29,978.

Provinces affected—Aquila, Caserta and Rome.

Communes damaged—372.

Largest city destroyed—Avezzano.

Central Italy, from Naples on the south to Ferrara on the north and from the Mediterranean on the west to the Adriatic on the east, was visited by a severe earthquake a few minutes before 8 a. m. Wednesday, Jan. 13, 1915. The center of the disturbance was in the province of Aquila, but the shock also caused deaths in the provinces of Caserta and Rome. The total number of deaths, not including those of persons who later succumbed to injuries or illness from exposure, was 29,978. The number of injured and the total amount of damage caused

were not ascertained. In the city of Avezzano, which was completely destroyed, 10,719 or 96 per cent of the inhabitants were killed. Other towns which suffered severely were Sora, Pescara, San Benedetto, Paterno, Celano, Ortona and Morino.

In Rome the shock was the severest ever experienced, but there was little or no loss of life and the damage was not great. A number of old churches had their walls and towers cracked and some of the public buildings were so shaken as to require extensive repairs. The column of Marcus Aurelius was so badly twisted as to be made insecure and a number of valuable statues were thrown from their places and shattered.

King Victor Emmanuel and Queen Helena did all in their power to rescue the injured and to provide relief for the victims of the earthquake. Parliament voted \$6,000,000 for this purpose, so that outside help was not required.

Note—Estimates of population are required primarily for use in the census bureau in calculating death rates and per capita averages for years other than the census year. The so-called arithmetical method was adopted for computing these estimates. It is the simplest and it has been shown by experience to come nearer in accuracy in the majority of cases than any other formula. It rests on the assumption that the increase in population each year since the enumeration is equal to the annual increase from 1900 to 1910.

Note—The foregoing list includes only the largest cities having a considerable colored population. The census bureau made no estimates for such cities as Albany, N. Y., Buffalo, N. Y., Cleveland, O., Omaha, Neb., Minneapolis, Minn., Milwaukee, Wis., and St. Paul, Minn., having a comparatively small negro population. The negro population of all large cities is given elsewhere in this volume.

METROPOLITAN DISTRICTS IN THE UNITED STATES (1910).

Statistics have been compiled by the bureau of the census showing the population of the chief cities of the United States together with their suburbs comprising what may be termed "metropolitan districts." A district of this character is defined as consisting of the city together with the urban portion of the territory lying within ten miles of the city limits. The following table shows the metropolitan districts of cities having a population of 200,000 or more in 1910:

City.	Metropolitan district.	City proper.	Outside.

CENTER OF POPULATION AND MEDIAN LINES.

The center of population, according to the bureau of the census, may be said to represent the center of the gravity of the population. If the surface of the United States be considered as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his

distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity, and this is the point referred to by the term "center of population" as used by the census bureau in its reports.

The median point, which may be described as the numerical center of population, is in no sense a center of gravity. In determining the median point distance is not taken into account.

and the location of the units of population is considered only in relation to the intersecting median lines—as being north or south of the median parallel and east and west of the meridian.

The position of the center of population and its movement during each decade since 1790 is shown in the following table:

MEDIAN LINES.

In connection with the definition of the median point another method of presenting facts with regard to the geographical distribution of the population has been noted, involving the location of median lines. A parallel of latitude is determined which evenly divides the population so that the population north of that parallel is the same as that south. Similarly, a meridian of longitude is determined which divides the population evenly as between east and west. In calculating these median lines it is necessary, in the case of the square degrees of latitude and longitude which are traversed by the lines themselves, to assume that the population is evenly distributed through these square degrees or to make an estimated adjustment where this is obviously not the case.

The eastern terminus of the median parallel, according to the census of 1910, is on the New Jersey coast near Seagirt. In its course west this line passes through central New Jersey, leaving the state near Burlington and entering Pennsylvania a few miles north of Philadelphia, thence passing through Norristown and continu-

ing through southern Pennsylvania and across the northern extremity of West Virginia, leaving the latter state at a point a few miles north of Wheeling. It nearly bisects Ohio, Indiana and Illinois, crossing about ten miles north of Columbus, O.; twenty-five miles north of Indianapolis, Ind., and about twenty miles north of Springfield, Ill. Through Missouri it runs about thirty miles south of the Iowa and Missouri line, thence passing through Nebraska about ten miles north of its southern boundary, and across the northern part of Colorado, passing about five miles north of Boulder City. Its location in Utah is about forty-five miles south of Salt Lake City. There are no large towns near its course across the northern part of Nevada and California. The western terminus of the median parallel is on the Pacific coast, in Humboldt county, California, about five miles north of Point Delgada and twenty miles south of Cape Mendocino, the point of continental United States extending farthest west.

The median meridian starts at Whitefish point, on the northern peninsula of Michigan, near the eastern end of Lake Superior, thence passing

south about twenty-five miles west of Lansing and through Indiana about ten miles west of the Indiana-Ohio boundary and twenty-five miles west of Cincinnati. South of the Ohio river it bisects Kentucky, crosses eastern Tennessee and leaves that state twenty miles east of Chattanooga. Through Georgia it passes close to the Georgia-Alabama line, about two miles to the west of Columbus, Ga., leaving the state near the intersection of the Alabama, Georgia and Florida boundary lines. It then crosses the northwestern part of Florida and terminates in the Gulf of Mexico at the city of Apalachicola. The following table shows the movement of the median lines from 1880 to 1910, inclusive:

Census year.	Median parallel, north latitude.			Median meridian, west longitude.			Movement in miles, parallel, meridian, westward.

MEDIAN POINT.

The exact location of the median point is indicated by the median lines already shown; in the following table its approximate location with reference to certain towns is described:

MOTHER TONGUE OF FOREIGN WHITE STOCK (1910).

In the following tables, prepared by the federal census bureau, the foreign white stock referred to is the aggregate white population of the United States which is foreign either by birth or by parentage. It embraces all foreign born whites and all native whites having one or both parents foreign born. It must be remembered that the foreign stock as here defined only includes the first and second generations—immigrants and native children of immigrants—and does not include the grandchildren or great-grandchildren of immigrants. In other words, the figures do not include the exact relative importance of the several ethnic stocks in the total population.

The eight major mother-tongue stocks in the United States, arranged in the order of their importance, are shown in the following table:

INCREASE IN URBAN AND RURAL POPULATION.

Comparing the rate of growth in urban and rural communities, it is shown by the census bureau that during the period between the census of 1900 and that of 1910 the increase in urban population in continental United States was 11.7 per cent, or 34.8 per cent, while the increase in rural population was 4,963,959, or 11.2 per cent. There had been an increase in urban population in every state, while in six states there had been an actual decrease in rural population. These states were: New Hampshire, 5.4 per cent; Vermont, 4.2 per cent; Ohio, 1.3 per cent; Indiana, 5.1 per cent; Iowa, 7.2 per cent; Missouri, 5.1 per cent.

LOWEST POINT IN THE UNITED STATES.

By a strange freak of nature the lowest point of dry land in the United States is less than eighty miles from the highest. According to the United States geological survey, the lowest point is in Death Valley, California, and is 276 feet below sea level. It is said that from this place Mount Whitney, the summit of which is 14,501 feet above sea level and the highest point in the country, can be seen on a clear day.

ESTIMATED VALUATION OF NATIONAL WEALTH.

The national wealth of the United States is estimated by the United States census bureau at \$187,739,000,000, or \$1,965 for each man, woman and child in the country. The total includes the value of all kinds of real, personal and other property, taxable and exempt, in the United States exclusive of Alaska, Hawaii, Porto Rico and the Philippines. Omitting the value of property exempt from taxation for the reason that it was not included in the figures for 1850, 1860 and 1870, the wealth for the several census years is as follows:

Year	Total.	Per cap.
1812.....	\$175,426,000,000	\$1,836
1894.....	100,273,000,000	1,234
1900.....	82,305,000,000	1,083

Year.	Total.	Per cap.
1890.....	61,204,000,000	975
1880.....	41,642,000,000	830
1870.....	24,055,000,000	624
1860.....	16,160,000,000	514
1850.....	7,136,000,000	308

Including exempt and all other classes of property the estimated national wealth in each of the census years, 1850 to 1912, was:

Year.	Total.	Per cap.
1912.....	\$187,739,000,000	\$1,965
1904.....	107,104,000,000	1,318
1900.....	85,517,000,000	1,165
1890.....	65,037,000,000	1,036

DWELLINGS AND FAMILIES IN THE UNITED STATES (1910).

In census usage a "dwelling" is any building in which one or more persons reside. A mere cabin, or room in a warehouse, occupied by a single person, is a census dwelling, while, on the other hand, an apartment house containing many families constitutes only one dwelling. Only occupied dwellings are included in the following tables. The term "family" as used in census reports means a household or group of persons, whether related by blood or not, who share a common abode, usually also sharing the same table. If one person lives alone he constitutes a family, while, on the other hand, those who dwell in a hotel or institution in which many people live are also treated as forming a single family. There is, however, no considerable difference between the average size of all families under the census usage and the average size of what are commonly termed families or households in popular speech. In 1900 the difference for the United States as a whole was only 0.1 per cent.

At each census from 1850 to 1910 a decrease was shown in the average number of persons per dwelling and the average number per family. The decrease in the average number per dwelling has been due to the decrease in the average per family, the influence of which has been partly offset by the increased construction of tenements and other dwellings containing more than one family.

In 1910 there were 7,254,242 dwellings and 4,499,765 families in urban communities, while there were 10,551,603 dwellings and 10,755,790 families in rural communities. For urban communities the number of persons to a dwelling averaged 5.9 and to a family 4.5; for rural communities the number of persons to a dwelling averaged 4.7 and to a family 4.6.

ARIZONA ALIEN LABOR LAW VOID.

In the United States District court in San Francisco, Cal., it was decided Jan. 7, 1915, by three judges that the Arizona law providing that at least 80 per cent of the employees on the pay roll of a concern employing more than five persons must be American citizens was invalid. The court held that the law was in conflict with the fourteenth amendment to the constitution of the United States, which guarantees life, liberty and

the possession of property to all persons in this country, whether citizens or aliens. The anti-alien employment act was adopted by the people of Arizona at the election of Nov. 3, 1914, as an initiative measure. Great Britain and Italy protested to the state department in Washington that the law violated the treaty rights of their citizens.

DEEPEST WELLS IN THE WORLD.

The deepest well in the world is in Upper Silesia in the German empire. It is a diamond drill hole in a coal field and is 7,350 feet deep. A well in the United States which may go deeper, according to the United States geological survey, is four miles northwest of McDonald, Pa., and about fifteen miles west of Pittsburgh. This well, which is being sunk to the Medina sandstone, is now (June, 1915) 7,174 feet deep. Some gas and oil were struck in the upper part of the well. Between the depths of 6,830 and 7,100 feet rocks bearing rock salt and salt water were encountered. These are regarded as of saline age, the same as those carrying rock salt in western New York. The temperature in

this well at the depth of 6,775 feet, as recently determined with great accuracy, is 145.8 degrees Fahrenheit.

At Derrick City, McKean County, Pa., near Bradford, there is a well 5,820 feet deep, which is probably the second deepest well in the United States. Another deep well is on Slaughter creek, Kanawha county, W. Va.; it is 5,595 feet deep. It penetrated a sandstone at 5,030 to 5,050 feet, and from this depth to the bottom, a distance of 545 feet, the well is in limestone. Near West Elizabeth, Pa., there is another well 5,575 feet beneath the surface, penetrating into a black shale.

FIRE IN COLON, PANAMA REPUBLIC.

Four hundred and thirty buildings in an area covering twenty-two blocks, or a third of the city of Colon, Republic of Panama, were destroyed by fire April 30, 1915. Five persons were

killed, twenty-eight injured and 7,500 made homeless. The value of the property destroyed was estimated at \$3,000,000.

*Marriages may be annulled for causes making them void from the beginning.

†No divorce allowed, but marriages may be annulled.

NOTE—The above table presents only the principal causes for divorce in the various states. The words "Yes" and "No" are not always to be taken without qualification, but as being applicable under certain conditions. The word "void" may indicate that a marriage may be

absolutely void for the cause named, that it may be voidable or that it may be annulled by court proceedings. Bigamy, it may be added, is a cause for divorce or annulment of marriage in practically all of the states.

QUANTITY OF SALT IN THE OCEAN.

The volume of the saline matter in the ocean is somewhat more than 295,956,133,600,000 cubic feet, according to the United States geological survey, or enough to cover the entire surface of the United States, excluding Alaska, 8,448 feet deep.

SOIL CARRIED TO TIDEWATER.

The rivers of the United States carry to tidewater every year 270,000,000 tons of dissolved matter and 513,000,000 tons of suspended matter. This total of 783,000,000 tons represents more than 350,000,000 cubic yards of rocks or 610,000,000 cubic yards of surface soil.

REVOLUTION IN PORTUGAL.

Internal political dissensions and revolutions marked the year 1915 in Portugal. In March Gen. Antonio Z. C. Barreto was proclaimed president of the "Republic of Northern Portugal" by a congress of democrats, but the new state did not materialize. There was a more serious revolution May 15, when rebels aboard the cruiser Adamaster shelled Lisbon. Two days of fighting followed, in which more than 100 persons were killed and about 400 wounded. Uprisings at the same time occurred in Coimbra, Portalegre, Oporto and Santarem. It was not a royalist movement, but was engineered by opponents of the government, who declared that it was drastic and arbitrary beyond endurance. The rebels

won and a new government with Joas Chagas as premier was proclaimed. Chagas was, however, shot and dangerously wounded by Senator Frietas, who, in turn, was shot and killed by a gendarme. Chagas was unable to take office in the new cabinet which was formed May 18.

May 27 the president of the republic, Dr. Manoel Arriaga, who had but a few months to serve of the four year term to which he was elected in 1911, resigned. Theophile Braga was chosen by the national assembly to serve out the unexpired term, and Aug. 6 Bernardino Machado was elected president for the new four year term.

FLAG OF THE UNITED STATES.

The national flag of the United States now consists of thirteen alternate red and white stripes, representing the original thirteen states, and a blue field on which are forty-eight white stars arranged in six rows of eight stars each, representing the forty-eight states now constituting the union. The last two stars were

added in 1912 when New Mexico and Arizona were officially admitted as states. June 14 is generally observed as flag display day.

Laws are in force in some of the states forbidding the desecration or mutilation of the flag or its use in any way for advertising purposes. A federal law forbids the use of the national flag on trade marks.

BARNES-ROOSEVELT LIBEL SUIT.

The trial of the \$50,000 libel suit brought by William Barnes, Jr., former republican state central committeeman for New York, against Theodore Roosevelt, former president of the United States, began in the Supreme court, 5th district, Syracuse, N. Y., April 19, 1915, with Justice William S. Andrews presiding. The suit was based on a statement issued by Col. Roosevelt July 22, 1914, in which he said:

"In New York we see at its worst the development of the system of bipartite boss rule. In New York state the two political machines are completely dominated, the one by Mr. Barnes, the other by Mr. Murphy. The state government is rotten throughout in almost all its departments and this is directly due to the dominance in politics of Mr. Murphy and his subbesses, acting through such entirely subservient agents as Mr. Dix and Mr. Glynn and aided and abetted when necessary by Mr. Barnes and the subbesses of Mr. Barnes.

"Mr. Murphy and Mr. Barnes are exactly of the same political type. The interests of Mr. Murphy and Mr. Barnes are fundamentally identical, and when the issue between popular rights and corrupt and machine ruled government is clearly drawn the two bosses will always be found fighting on the same side, openly or covertly giving one another such support as can with safety be rendered. These bosses do not hold public office themselves. They act through the holders of public office whom they control. Yet they really form the all-powerful, invisible government which is responsible for the maladministration and corruption in the public offices of the state.

"By means of elected officers, whose negatively good personal character offers little surface ground for attack and whose fundamental weak-

ness or insincerity and double dealing render them fit instruments through whom the masters of the machine can work, these machine masters secure the appointment to office of the evil men whose activities so deeply taint and discredit our whole government system.

"It is idle for a man to pretend that he is against machine politics unless he will, with straightforward good faith, openly and by name, attack Mr. Barnes and Mr. Murphy and pledge himself to do all he can to eliminate them from the control of political affairs, and in destroying them, to destroy the system which renders possible such pernicious activities as theirs."

Mr. Barnes was represented by William M. Ivins and William M. Barnum and Col. Roosevelt by John M. Bowers, Oliver D. Burden, Stewart M. Hancock and William H. Van Benschoten. The jury, which was selected on the first day of the trial, was composed of seven republicans, three progressives and two democrats.

In the course of the trial a large amount of testimony was given by both the plaintiff and the defendant as well as by others concerning political affairs, state and national, during the period when Mr. Barnes and Col. Roosevelt were active in shaping the policies of the state of New York. The former president tried to prove that the allegations on which the suit for libel were based were true, while Mr. Barnes sought to show that Col. Roosevelt himself was a "boss" and guilty of the same practices as those which he had denounced.

May 22 the jury, after taking forty ballots, brought in a verdict that everything Col. Roosevelt had charged was true and that therefore the plaintiff was not entitled to damages. The costs of the action were placed upon Mr. Barnes.

UNEMPLOYMENT IN NEW YORK CITY.

The bureau of labor statistics of the United States department of labor undertook an investigation of unemployment in New York city early in 1915. The inquiry included a complete census of 104 representative city blocks, supplemented by a further census of the families living in 3,703 individual tenement houses and residences. For all the purposes of the study all persons who had any employment whatever, regular or irregular, full time or part time, at the time of the agent's visit, were recorded as employed. This enumeration was begun Jan. 30, 1915, and finished Feb. 17, 1915, with the following results:

Number of families scheduled.....	54,849
Number of families having unemployed wage earners.....	11,723
Per cent of families having unemployed wage earners.....	21.4
Number of persons in families.....	229,428
Number of wage earners in families.....	95,443
Number of unemployed wage earners.....	15,417
Per cent of unemployed wage earners.....	16.2

NEW GENERAL OF THE SOCIETY OF JESUS.

Father Wladimir Ledochowski was elected general of the Society of Jesus in Rome, Italy, Feb. 11, 1915, in succession to Father Francis Xavier Weurz, who died Aug. 20, 1914. The new "black pope," as the head of the society is popularly called, was born Oct. 7, 1866, the son of Count Anthony Ledochowski, a cavalry

officer in the Austrian army, whose family came from Russian Poland. His uncle, the late Cardinal Ledochowski, was prefect of the propaganda. Wladimir was ordained priest in June, 1894, and Feb. 21, 1902, was appointed provincial for Poland.

CENTENARY OF ANGLO-AMERICAN PEACE.

The centenary of peace between Great Britain and the United States was observed in New Orleans, La., Jan. 8, 1915, that date being the 100th anniversary of Andrew Jackson's victory over the British at Chalmette, La. The celebration included the unveiling of a statue of Gen. Jackson at Chalmette and the formal exchange of greetings between representatives of Great Britain and the United States.

Celebrations of the 100th anniversary of the signing of the treaty of Ghent were arranged by American and British committees to take place Dec. 24, 1914, beginning with a banquet in the ancient Belgian city which gave its name to the treaty. The war in Europe caused all plans to be canceled and the anniversary was observed simply by the issuing of printed communications in English and American newspapers, calling attention to the significance of the occasion and expressing the hope that peace might continue unbroken between the two great English speaking nations.

The announcement of the American peace centenary committee was in part as follows:

"One hundred years ago to-day there was signed at Ghent, in Flanders, the treaty of peace between Great Britain and the United States, which marked the close of what has happily proved to be the last war between English speaking peoples of the earth. To-day the city of Ghent is at the very center of the terrible conflict that rages in Europe. The American peace centenary committee cannot permit this anniversary to pass without inviting the thoughtful attention of their fellow citizens to the contrast presented by the century long period of peace which English

speaking peoples have enjoyed among themselves on the one hand and the appalling destruction of life, property and great monuments of civilization which the European war involves on the other. It had been our confident hope that the example which the English speaking peoples have set in their relations with each other would be followed by the other great nations of the earth in their several international relations. It had been our earnest desire that the spirit of peaceful and friendly co-operation which each of these peoples manifests toward the people of the United States would also mark their dealings with one another. Unfortunately this was not to be, and we are sorrowfully called upon to mark our centenary celebration in the midst of the most terrible and destructive war that history records. Even at such a time we must avow once more our emphatic faith in the supremacy of justice over force, of law over might. We rejoice in the peaceful relations of a hundred years among all English speaking peoples, and particularly in the undefended and unfortified line, nearly 4,000 miles in length, which divides the territory of the United States from that of the Dominion of Canada. The mutual trust, forbearance and helpfulness which make that undefended boundary a link and not a barrier between two peoples we offer as an example to our warring brothers across the sea."

In accordance with the recommendations of the committee suitable exercises took place in various churches Feb. 14, 1915; by formal addresses at state capitals Feb. 17 and 18, the dates of the ratification and proclamation of the treaty and by exercises in the schools Feb. 22.

GOVERNMENT RAILROAD IN ALASKA.

By an act of congress, approved March 12, 1914, the president of the United States was empowered and directed to designate a route or routes of a line or lines of railroad in Alaska to connect the open harbors on the Pacific with the navigable waters in the interior and with the coal fields. Under the provisions of this law it was announced April 10, 1915, that President Wilson had designated the Susitna route, extending from Seward on Resurrection bay to Fairbanks on the Tanana river, a distance of 471 miles. This route includes the existing Alaska Northern railroad, running from Seward through the Kenai peninsula for a distance of seventy-one miles to

Turnagain Arm. The line was bought by the government for \$1,150,000. From Turnagain Arm the route extends through the Susitna valley and across Broad pass to the Tanana river and thence to Fairbanks. A side line is to run from Matanuska junction into the Matanuska coal field, a distance of thirty-eight miles. It is to be built with its present base at Ship Creek, on Cook's Inlet. The cost of the main line and branch is estimated at \$26,800,000.

W. C. Edes was designated as chairman of the Alaskan engineering commission, which has charge of the work of constructing the government railroad in Alaska.

SPECIAL PROVISIONS.

TRADE AGREEMENTS.

For the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the president of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: Provided, however, That said trade agreements before becoming operative shall be submitted to the congress of the United States for ratification or rejection.

MARKING AND BRANDING.

All articles of foreign manufacture or production which are capable of being marked, stamped, branded or labeled, without injury, shall be marked, stamped, branded or labeled in

legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. All packages containing imported articles shall be marked, stamped, branded or labeled so as to indicate legibly and plainly in English words the country of origin and the quantity of their contents.

DISCRIMINATING DUTIES.

A discriminating duty of 10 per centum ad valorem, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States, or which, being the production or manufacture of any foreign country not contiguous to the United States, shall come into the United States from such contiguous country; but this discriminating duty shall not apply to goods, wares or merchandise which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or act of congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

No goods, wares or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, shall be forfeited to the United States.

The preceding subsection shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

DISCOUNT FOR AMERICAN SHIPS.

A discount of 5 per centum on all duties imposed by this act shall be allowed on such goods, wares and merchandise as shall be imported in vessels admitted to registration under the laws of the United States: Provided, That nothing in this subsection shall be so construed as to abrogate or in any manner impair or affect the provisions of any treaty concluded between the United States and any foreign nation.

SYNOPSIS OF TARIFF LEGISLATION SINCE 1864.

Morrison Bills—First bill presented to 45th congress during Chester A. Arthur's administration; proposed a horizontal reduction of 20 per cent with free iron ore, coal and lumber; defeated in house April 15, 1884, by vote of 159 to 155; house heavily democratic and senate republican. Second bill presented to 49th congress during Grover Cleveland's first administration; similar to first bill, proposing free wool, salt and lumber; defeated in house June 17, 1886, by a vote of 157 to 140; house democratic, senate republican.

Mills Bill—Presented to 50th congress during Cleveland's first administration; provided for free lumber and wool, reduction on pig iron and abolition of specific duties on cotton; passed by house July 21, 1888, by vote of 162 to 149, but failed in senate; house democratic, senate republican.

McKinley Bill—Passed by 51st congress during Benjamin Harrison's administration; became law Oct. 6, 1890; high protective measure, though permitting duties on sugar and providing for reciprocity treaties; both houses of congress republican.

Wilson Bill—Passed by 53d congress during Cleveland's second administration; became law Aug. 17, 1894, without the president's signature; both houses democratic; measure reduced duties in some cases and made additions to free list, notably wool.

Dingley Bill—Passed by 54th congress during McKinley's administration; approved July 24, 1897; passed by house 205 yeas to 122 nays, 27 members not voting; passed by senate 38 yeas to 28 nays, 23 not voting; house contained 206 republicans and 134 democrats and senate 46 republicans and 34 democrats; measure raised rates to produce more revenue, but was similar in many respects to the McKinley act.

Payne-Aldrich Bill—Passed at extra session of 61st congress in first year of President William H. Taft's administration; approved Aug. 5, 1909; passed the house by a vote of 217 to 161 and the senate by a vote of 45 to 34. The conference vote in the house was 195 yeas to 133 nays, twenty republicans voting in the negative and two democrats in the affirmative. In the senate the vote on the final conference report was 47 to 31, seven republicans voting against it. In general the revision of the Dingley act was in the direction of lower duties, but there were some increases.

Underwood-Simmons Bill—Passed by 63d congress at extra session called immediately after President Wilson's inauguration in 1913; house and senate democratic. The bill made many reductions in the tariff duties as fixed by the Payne-Aldrich law and placed numerous articles on the free list. It also contained a section establishing a tax on incomes.

UNITED STATES COAST GUARD.

The life saving and revenue cutter services of the United States were combined under the common title of coast guard by an act of congress approved Jan. 28, 1915. For the text of that act see "Work of Sixty-third Congress" in this volume.

LIFE SAVING SERVICE.

The life saving establishment of the United States at the close of the fiscal year ended June 30, 1914, comprised 285 stations, of which 203 were on the Atlantic and gulf coasts, 62 on the coasts of the great lakes, 19 on the Pacific coast and 1 on the Ohio river. The total number of men in the service was about 800, of whom 290 were keepers of stations and refugees, 490 surfmen and the remainder superintendents and their assistants. The total cost of maintenance for the fiscal year was \$2,309,317.41. Statistics of the service for the year ended June 30, 1914, and from Nov. 1, 1871, when the service was established, to June 30, 1914, follow:

REVENUE CUTTER SERVICE.

In a general way the duties which the revenue cutter service is called upon to perform may be classified as follows:

1. Assistance of vessels in distress.
2. Co-operation with the navy in times of war.
3. Destruction of derelicts and other menaces to navigation.
4. Protection of the customs revenue.
5. Enforcement of the navigation and other laws governing merchant vessels and motor boats.
6. Regulation and policing of regattas and maritime parades.
7. Enforcement of laws relating to anchorage of vessels.
8. Enforcement of the neutrality laws.
9. Enforcement of quarantine and immigration laws.
10. Suppression of mutinies on board merchant vessels.
11. Protection of game and the seal and other fisheries in Alaska; suppression of illegal traffic in firearms, ammunition and spirits in Alaska.
12. Co-operation with the life-saving service by the instruction, drilling and inspection of its crews.

The revenue cutter service, which is organized on a military basis, is under control of the secretary of the treasury, the assistant secretary having supervision. The administration is in charge of a captain commandant, whose office is in Washington, D. C. The authorized commissioned personnel consists of 163 line officers, 81 engineer officers and 2 constructors, a total of 242. The total authorized complement of warrant officers, petty officers and men is 1,575. Commissioned officers are appointed from cadets at the School of Instruction, New London, Conn. The school course extends over three years and embraces instruction in professional and academic subjects. Admission is by competitive examination and candidates must not be less than 18 nor more than 24 years of age. Candidates for the engineer corps must be not less than 21 nor more than 26 years of age.

Warrant officers are appointed by the secretary of the navy and hold their appointments during good behavior. Petty officers and other men are enlisted for periods of one year. After three successive enlistments an increase in pay is allowed; the law also provides an annual sum for uniforms. Efficiency in the enlisted ranks is re-

warded by promotion to the several grades of petty officers and the warrant officers are selected from the petty officers as vacancies occur. The pay of the commissioned personnel is fixed by congress to correspond with the pay and allowances of like rank in the army.

By law the officers of the revenue cutter service rank as follows:

Captain commandant, with colonel in army and captain in navy.

Senior captain and engineer in chief, with lieutenant-colonel in army and commander in the navy.

Captain and captain of engineers, with major in army and lieutenant-commander in navy.

First lieutenant and first lieutenant of engineers, with captain in army and senior lieutenant in navy.

Second lieutenant and second lieutenant of engineers, with first lieutenant in army and junior lieutenant in navy.

MINES AND QUARRIES IN THE UNITED STATES.

[From reports of census bureau, 1912 and 1913.]

In 1909 in the United States, exclusive of Alaska, Hawaii, Porto Rico and other outlying noncontiguous territory, 23,682 operators conducted 27,240 mines and quarries and 166,448 petroleum and natural gas wells. Of the operators 3,749 were engaged solely in development work upon which, in 1909, the sum of \$31,548,736 was expended. In Alaska in 1909 there were 673 operators, who employed 8,026 persons, in the mining industry. The total expenses of these operators amounted to \$13,220,200, while the capital invested was reported as \$47,749,164. The total value of products was \$16,933,427, of which amount \$16,327,752 consisted of gold and silver. In Hawaii and Porto Rico the total value of product for the eighteen operators reported was only \$26,414.

The total number of persons engaged in connection with producing mines, quarries and wells, as reported on Dec. 15, 1909, or nearest representative day, was 1,139,332, of whom wage earners numbered 1,065,283, proprietors and firm members 29,922 and salaried employees 44,127. In mines, quarries and wells for which development work only was carried on there was a total of 27,616 persons, of whom 21,499 were wage earners. Of the total number of persons, 1,106,948 employed in productive and nonproductive mines, 1,158,775 were men 16 years of age and over, and 8,173 were boys under 16 years of age. Distributed by sex, 1,162,840 were male and 4,108 female, the latter being employed in supervisory and clerical capacities.

The total capital invested in all mining enterprises on Dec. 31, 1909, as reported, was \$3,662,527,064, of which \$3,380,525,841 was invested in productive enterprises and \$282,001,223 in those in which development work only was carried on.

WEIGHTS OF DIAMONDS AND FINENESS OF GOLD.

The weight of diamonds and other precious stones is expressed in metric carats. The unit is the international carat of 200 milligrams, which has been officially adopted by the United States and most of the countries in Europe. Until July 1, 1913, there were three different standards in use in the United States, although the one generally accepted was 205.3 milligrams. This was usually subdivided on the binary system, the smallest subdivision being 1-64 of the carat. The new carat is subdivided on the decimal system. The airdupois equivalent of 200 milligrams is 3.08 grains.

The fineness of gold is also expressed in carats. Pure gold is said to be twenty-four carats fine. If it contains eight parts of a baser metal or alloy it is only sixteen carats fine. The carats therefore indicate the proportion of pure gold to alloy. Most of the gold used by jewelers is about fourteen carats fine, having ten parts of alloy.

CAPITAL PUNISHMENT IN THE UNITED STATES.

Capital punishment prevails in all of the states of the union except Kansas, Maine, Minnesota, North Dakota, Oregon, Rhode Island, Washington and Wisconsin. In Michigan the only crime punishable by death is treason. The death penalty was abolished in the state of Washington in 1913. It was abolished in Iowa in 1872 and restored in

1878. It was also abolished in Colorado in 1897, but was restored in 1901. Hanging is the ordinary mode of execution, but in Arkansas, Indiana, Massachusetts, New York, Nebraska, Ohio, Pennsylvania, Vermont and Virginia electrocution is the legal method. In Nevada hanging or shooting is optional with the condemned.

ANTI-CAPITAL-PUNISHMENT SOCIETY OF AMERICA.

President—Gov. George W. P. Hunt, Arizona.
 Secretary—Maurice Bennett Kovnat, Chicago, Ill.
 Treasurer—Fay Lewis, Chicago, Ill.
 Vice-Presidents—McKenzie Cleland and Louis K. Phillips.
 Executive Board—Norman A. Sorrow, chairman;
 Dr. Rudolph V. Von Liebhich, Gov. George W. P. Hunt, Maurice B. Kovnat.

National Headquarters—624 South Michigan avenue, Chicago, Ill.

The Anti-Capital-Punishment Society of America was organized by Maurice B. Kovnat and Norman A. Sorrow for the purpose of carrying on throughout the country a systematic campaign in favor of the repeal of capital punishment laws.

*The amounts in this column include the total amounts paid out for construction and operation and maintenance without deducting amounts that have been collected for services rendered, operation and maintenance assessments, etc. The percentages noted in this column represent the approximate ratio which costs of construction to date bear to present estimate of total construction cost. †Preliminary.

NOTE—Jan. 1, 1915, there had been constructed numerous dams and over 9,000 miles of irrigation canals and ditches, involving excavation of over 122,000,000 cubic yards of material. The value of crops grown on the reclamation projects under operation in 1914 was about \$16,500,000.

NOTE—The above figures are for arid land alone and do not include rice land. The statistics of number of farms and the acreage irrigated are for 1909; the cost is to July 1, 1910.

The total length of ditches used for irrigation in 1910 was 125,591 miles and there were 6,812 reservoirs having a combined capacity of 12,581,129 acre-feet. The number of pumping plants reported was 13,906 and the acreage supplied by them 477,625. The relative importance of the several classes of irrigation enterprises is shown by the following percentages of acreage irrigated in 1909:

	Per cent.
United States reclamation service.....	2.9
United States Indian service.....	1.3

Class.	Per cent.
Carey act enterprises.....	2.1
Irrigation districts.....	3.8
Co-operative enterprises.....	33.8
Individual and partnership enterprises.....	45.5
Commercial enterprises.....	10.6

Classified by source of water supply, the acreage irrigated was as follows: From streams, by gravity, 12,763,797; by pumping, 157,778; from wells, by flowing, 144,400; by pumping, 307,496; from reservoirs, 98,193; from lakes, by gravity, 58,284; by pumping, 12,354; from springs, 196,186.

CROPS ON IRRIGATED LAND (1909).

Washington	160,483	7,994,531	49.82
Wyoming	583,786	7,362,983	12.61
Total	7,241,561	181,617,396	25.09

The percentages of the total acreage devoted to important crops on irrigated lands were: Alfalfa, 30.6; wild grasses, 21.1; oats, 10.2; wheat, 7.6; barley, 3.3; orchard fruits, 3.3; other tame or cultivated grasses, 3; grains cut green, 2.9; timothy alone, 2.8; sugar beets, 2.5; timothy and clover mixed, 2.5; potatoes, 2.3; corn, 1.8; tropical and subtropical fruits, 1.4. Crops grown on irrigated land show an excess yield of 25.6 per cent over those grown on unirrigated land.

IRRIGATION FOR RICE GROWING.

The total acreage irrigated for rice growing in Louisiana, Texas and Arkansas in 1909 was 694,800, of which 54.7 per cent was in Louisiana, 41.3 per cent in Texas and 4 per cent in Arkansas. The enterprises which were completed or under way in 1910 were reported as capable of irrigating 950,706 acres in that year and of serving ultimately a total of 1,134,322 acres. The total cost of rice irrigation enterprises to July 1, 1910, was \$13,587,629.

NOTES ON NATIONAL PARKS.

Antietam—Battle field of the civil war in Washington county, Maryland.

Casa Grande Ruin—Remains of a large prehistoric building near Florence, Ariz.

Chickamauga and Chattanooga—Battle fields of the civil war in the vicinity of Chattanooga, Tenn.

Crater Lake—Park contains remarkable mountain, lake and fine scenery in the Cascade range, Klamath county, Oregon; may be reached from Klamath Falls or from Medford on the Southern Pacific road.

General Grant—in Fresno and Tulare counties, California; forest and mountain scenery; reached from Sanger on the Southern Pacific road.

Gettysburg—Battle field of the civil war in southeastern Pennsylvania.

Glacier—Tract of mountainous country in northern Montana with glaciers, lakes, forests and peaks.

Hot Springs Reservation—Tract of land in Garland county, Arkansas, noted for its springs of warm mineral waters.

Mesa Verde—in the extreme southwestern part of Colorado; contains pueblo and other ruins; reached from Mancos on the Rio Grande Southern road.

Mount Rainier—Mountain district in southern Washington; reached from Ashford on the Tacoma Eastern railroad and from Fairfax on the Northern Pacific road.

Platt—Tract of land containing sulphur springs in Murray county, Oklahoma; reached by Santa Fe and St. Louis & San Francisco railroads.

Rock Creek—Park in outskirts of Washington, D. C.

Rocky Mountain—Tract of mountainous land of great scenic beauty in Grand, Boulder and Larimer counties, Colorado; contains forests, lakes and peaks; reached by Union Pacific and other roads.

Sequoia—Mountain tract in Tulare county, California, containing forest of big trees; reached from Visalia.

Shiloh—Battle field of civil war in Hardin county, southern Tennessee.

Sully's Hill—On the shore of Devil's lake, North Dakota; contains elevation on which Gen. Alfred Sully with a few men withstood a band of Indians for several days in 1863; reached from Devil's Lake, Narrows and Tokio stations on the Great Northern road.

Vicksburg—Battle field of civil war near city of same name in Mississippi.

Wind Cave—Canyon and extensive cave in Custer county, South Dakota, twelve miles from Hot Springs, on the Northwestern and Burlington roads; in Black Hills region.

Yellowstone—Famous park in Wyoming, Montana and Idaho, containing geysers and many other

natural phenomena as well as beautiful mountain, lake and river scenery; reached from stations on the Northern, Pacific, Burlington and Oregon Short Line roads.

Yosemite—Splendid valley in the Sierras in Mariposa county, California; reached from Merced on the Santa Fe and Southern Pacific roads by way of the Yosemite Valley railroad.

Zoological—Park in Washington, D. C., devoted to the zoological collection of the government; adjoins Rock Creek park.

PRESERVATION OF AMERICAN ANTIQUITIES.

By law approved June 8, 1906, entitled "An act for the preservation of American antiquities," the president of the United States is authorized, in his discretion, to declare by proclamation historic landmarks, historic and prehistoric structures and other objects of historic or scientific interest that are situated upon lands owned or controlled by the United States, to be national monuments. Under such authority the following monuments have been created:

Name and state.	Year.	Acres.
Big Hole battle field, Mont.....	1910.....	8

Tonto,* Ariz.	1907.....	640
Tumacacori, Ariz.	1908.....	10
Wheeler,* Col.	1908.....	300

*Administered by department of agriculture; others by interior department, except the Big Hole battle field, which is under the war department.

NOTES ON NATIONAL MONUMENTS.

Big Hole battle field—Scene of fight at Big Hole pass on Big Hole or Wisdom river, Aug. 9,

1877, between Nez Perce Indians under Chief Joseph and a small force of soldiers commanded by Col. John Gibbon; in Silver Bow county, Montana; reached from Melrose.

Cabrillo statue—At Point Loma, Cal.; land first sighted by Juan Rodriguez Cabrillo, discoverer of California, when he approached San Diego bay, Sept. 28, 1542; site of about 1½ acres set aside for heroic statue of Cabrillo.

Chaco canyon—Located in San Juan and McKinley counties, New Mexico; contains extensive prehistoric communal or pueblo ruins.

Cinder cone—An elevation in Lassen county in northern California; is of importance as illustrating volcanic activity in the vicinity 200 years ago.

Colorado—Extraordinary examples of erosion in Mesa county, western Colorado; reached from Grand Junction.

Devil postpile—Natural formations, including Rainbow waterfalls, within the Sierra national forest in California; area set aside is on middle fork of San Joaquin river.

Devil's tower—A lofty and isolated rock in Crook county, Wyoming; is an extraordinary example of the effect of erosion in the higher mountains.

El Morro—An elevation near Wingate station on the Santa Fe railroad in New Mexico; contains prehistoric ruins and interesting rock inscriptions.

Gila cliff dwellings—In the Mogollon mountains, New Mexico; known also as the Gila Hot Springs cliff houses; are among the best preserved remains of the cliff dwellers of the southwest.

Gran Quivira—Ruined town not far from Manzano in the central part of New Mexico; remains of large cathedral and chapel and of many houses thought to date from prehistoric times.

Grand canyon—In northwestern Arizona; greatly eroded canyon within the United States.

Jewel cave—A natural formation of scientific interest within the Black Hills national forest in Custer county, South Dakota.

Lassen peak—In natural forest of same name in Shasta county, northern California; marks the southern terminus of the long line of extinct volcanoes in the Cascade range from which one of the greatest volcanic fields in the world extends.

Lewis and Clark cavern—An extraordinary limestone cavern near Limespur, Jefferson county, Montana.

Montezuma castle—Large prehistoric ruin or cliff dwelling on Beaver creek, Arizona.

Mount Olympus—Mountain in the state of Wash-

ington; has extensive glaciers and on its slopes are the breeding grounds of the Olympic elk.

Muir woods—In Marin county, California; an extensive growth of redwood trees of great age and size; land presented to the government by William Kent of Chicago.

Mukuntuweap—Canyon in southwestern Utah through which flows the north fork of the Rio Virgin or Zion river; an extraordinary example of canyon erosion.

Natural bridges—Rock formations in southeastern Utah extending over streams or chasms; have loftier heights and greater spans than any other similar formations known; reserved as extraordinary examples of stream erosion.

Navajo—Within the Navajo Indian reservation in Arizona; includes a number of prehistoric cliff dwellings and pueblo ruins new to science.

Oregon caves—Within the Siskiyou national forest in Oregon; caves are of natural formation and of unusual scientific interest and importance.

Petrified forest—Deposits of fossilized or mineralized wood in Gila and Apache counties, Arizona.

Pinnacles—A series of natural formations of rock with a number of caves underlying them; located within Pinnacles national forest in California.

Rainbow bridge—An extraordinary natural bridge in southeastern Utah, having an arch which in form and appearance is much like a rainbow; is 309 feet high and 278 feet span; of scientific interest as an example of eccentric stream erosion.

Shoshone cavern—A cave in Big Horn county, Wyoming, of unknown extent, but of many windings and ramifications and containing vaulted chambers of large size, magnificently decorated with sparkling crystals and beautiful stalactites, and containing pits of unknown depth.

Sitka—Tract of about fifty-seven acres within public park, near Sitka, Alaska; battle ground of Russian conquest of Alaska in 1804; site of former village of Kiki-Siti tribe, the most warlike of Alaska Indians; contains numerous totem poles constructed by the Indians, recording the genealogical history of their several clans.

Tonto—Comprises two prehistoric ruins of ancient cliff dwellings in Gila county, Arizona.

Tumacacori—Ruin of an ancient Spanish mission of brick, cement and mortar in Santa Cruz county, Arizona.

Wheeler—Volcanic formations illustrating erratic erosion; in Rio Grande and Cochetopa national forests in southwestern Colorado.

THE WORLD'S GREATEST AQUEDUCTS.

Water from the Apennines was distributed April 14, 1915, for the first time to the provinces of Baria, Foggia and Lecce, Italy, through the Apulia aqueduct, the largest in the world, which was begun in 1905. It cost approximately \$30,000,000. From the source of the Sele river in the Apennines, where collecting basins were built at 1,370 feet above sea level, the water is conveyed by tunnel for seven and a half miles and then by the aqueduct for 135 miles. More than 2,000,000 people are furnished with a supply of

fresh water brought through 1,875 miles of pipe.

The Croton aqueduct, which supplies a large part of New York city with water, is thirty-three miles long. The Catskill aqueduct, from the Ashokan reservoir near Kingston to the limits of New York city, is about ninety-two miles long. The total cost of this aqueduct with its reservoirs, tunnels and pipes outside and within the city is estimated at \$175,000,000. This includes work projected, but not yet completed.

DESCRIPTION OF CANAL.

The entire length of the Panama canal from
 deep water in the Atlantic to deep water in the
 Pacific is 50.5 miles. Its length on land is 40.5
 miles. In passing through the canal from the
 Atlantic to the Pacific a vessel enters a channel
 with a bottom width of 500 feet in Limon bay
 and follows this for about seven miles to Gatun,
 where it enters a series of three locks in flight
 and is lifted eighty-five feet to the level of the
 Gatun lake. It sails at full ocean speed through
 this lake, in a channel varying from 1,000
 to 500 feet in width, for a distance of about
 twenty-four miles, to Bas Obispo, where it en-
 ters the Culebra cut, which on April 28, 1915, was
 by executive order named the Gaillard cut in
 honor of Col. D. D. Gaillard, who died from
 disease contracted while a member of the isthmi-
 an canal commission. It sails through the cut
 a distance of about nine miles, in a channel
 with a bottom width of 300 feet, to Pedro Mi-
 guel. There it enters a lock and is lowered 30½
 feet to a small lake at an elevation of 54½
 feet above sea level, and sails through this for
 about 1¼ miles to Miraflores. There it enters
 two locks in series and is lowered to sea level.

passing out into the Pacific through a channel $3\frac{1}{2}$ miles in length, with a bottom width of 500 feet. The depth of the approach channel on the Atlantic side, where the tidal oscillation does not exceed $1\frac{1}{2}$ feet, is 41 feet at mean tide, and on the Pacific side, where the maximum oscillation is 23 feet, the depth is 45 feet at mean tide.

GATUN DAM.

The Gatun dam, which forms Gatun lake by impounding the waters of the Chagres river and other streams, is nearly $1\frac{1}{2}$ miles long measured on its crest, nearly half a mile wide at its base, about 400 feet wide at the water surface, about 100 feet wide at the top and its crest is at an elevation of 115 feet above mean sea level, or 30 feet above the normal level of the lake. The top and upstream slope are ribrapped. The spillway is a concrete lined opening 1,200 feet long and 300 feet wide, cut through a hill of rock nearly in the center of the dam, the bottom of the opening being ten feet above sea level. It is fitted with gates and machinery for regulating the water level of the lake.

The water level of Gatun lake, extending through the Gaillard cut, is maintained at the south end by an earth dam connecting the locks at Pedro Miguel with the high ground to the westward, about 1,700 feet long, with its crest at an elevation of 105 feet above mean tide. A small lake between the locks at Pedro Miguel and Miraflores is formed by dams connecting the walls of Miraflores locks with the high ground on either side. The dam to the westward is of earth, about 2,700 feet long, having its crest about 15 feet above the water in Miraflores lake. The east dam is of concrete, about 500 feet long, and forms a spillway for Miraflores lake, with crest gates similar to those at the spillway of the Gatun dam.

GATUN LAKE.

Gatun lake covers an area of 164 square miles, with a depth in the ship channel varying from 25 to 45 feet. Throughout the first 16 miles from Gatun the width of the channel is 1,000 feet; then for 4 miles it is 800 feet and for 4 miles more 500 feet, when the entrance to Culebra cut, at Bas Obispo, is reached. The water level in the cut is that of the lake and the bottom width of the channel is 300 feet.

THE LOCKS.

There are twelve locks in the canal, all in duplicate; three pairs in flight at Gatun, with a combined lift of 85 feet; one pair at Pedro Miguel, with a lift of $30\frac{1}{2}$ feet, and two pairs at Miraflores, with a combined lift of $54\frac{1}{2}$ feet at mean tide. The dimensions of all are the same—a usable length of 1,000 feet and a usable width of 110 feet. Each lock is a chamber, with walls and floors of concrete and water tight gates at each end.

RULES FOR VESSELS.

Prior to sending a vessel through the Panama canal its owner or agent must make a deposit with the government to cover its canal expenses. Usually this deposit is made with an assistant United States treasurer. When the ship enters the harbor at either terminal port it is boarded by officers who examine its bill of health and clearance, see that its certificate of canal measurement is properly made out and ascertain what it needs in matters of fuel, supplies, extra men to handle the lines during the passage of the locks, etc. In all stages of its transit of the canal the vessel must have on board a government pilot. There is no charge for this service. As soon as the vessel starts on its transit of the canal the fact is telephoned to all the stations along the course so that there is exact knowledge at each station all the time of the status of the traffic. The course is equipped with all requisite signals and facilities for mooring, like sidings.

The transit of the canal requires about ten hours, of which approximately three hours are spent in the locks. In the sea level channels and the Gaillard cut the speed is limited to six knots; through Gatun lake vessels may make

ten, twelve and fifteen knots, according to the width of the channel. In the locks the vessels are under control of the lock-operating force. They are towed through the lock chambers by electric locomotives operating on tracks on the side walls. Six locomotives are used for the larger vessels, three on each wall. Two keep forward of the vessel, pulling and holding her head to the center of the chamber; two aft, holding the vessel in check, and two slightly forward of amidships, which do most of the towing. Except in the locks towing is not required and vessels proceed under their power. Tug service for sailing ships is at the rate of \$15 per hour.

TOLLS.

On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet—of actual earning capacity.

On vessels in ballast without passengers or cargo, 40 per cent less than the rate of tolls for vessels with passengers or cargo.

Upon naval vessels other than transports, colliers, hospital ships and supply ships, 50 cents per displacement ton.

Upon army and navy transports, colliers, hospital ships and supply ships, \$1.20 per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

LABOR FORCE.

June 23, 1915, the actual working force of the Panama canal was 21,677; of the Panama railroad, 4,845, and of contractors, 375, a total effective working force of 26,897; of these 23,304 were silver and 3,593 gold employees, the latter being composed almost exclusively of white Americans.

TRAFFIC STATISTICS.

At the close of business June 30, 1915, was completed the fiscal year which included all of the period during which the canal had been open to commercial traffic of ocean going ships. This period, from Aug. 14, 1914, to July 1, 1915, was ten and a half months or seven-eighths of a calendar year. During the period the canal was used by 1,088 vessels, having an aggregate gross tonnage of 5,416,787 and net tonnage of 3,843,035, Panama canal measurement, and carrying a total of 4,969,792 tons of cargo, which would be at the rate of 5,679,762 tons a year, or 473,313.5 tons per month, or 15,630.6 tons per day. Following is a summary by months of the canal traffic each way from the date of opening, Aug. 15, 1914, to June 30, 1915:

*Cargo tons.
Vessels without cargo passing through the canal numbered 105. Of those with cargo 335 used the coastwise route of the United States; 142 the route between Europe and the west coast of the United States and Canada; 155 the route between Europe and South and Central America; 206 the route between South and Central America, and 118 the route between the Atlantic seaboard and the far east, including Australia and New Zealand. The nationalities of the vessels using the canal were: American, 481;

British, 464; Norwegian, 41; Chilean, 35; Danish, 24; Swedish, 18; Dutch, 7; Japanese, 6; Russian, 6; Peruvian, 4; French, 3; Honduras, 3; Italian, 2; Nicaraguan, 2; Panamanian, 2.

The principal commodities passing through the canal were nitrates, sugar, coal, refined petroleum, wheat, barley, manufactured iron and steel, lumber, iron ore, railroad material, flour, copper, cotton and canned goods.

CANAL EARNINGS.

July, 1914.....	\$7,595.40
August, 1914.....	88,401.80

April, 1915.....	442,415.49
May, 1915.....	547,054.60
June, 1915.....	541,181.55
Total	4,424,256.48

The current expenses for operation and maintenance during the fiscal year were \$4,112,550.48. The excess of toll earnings over expenses was, accordingly, \$330,333.21. These figures, however, according to the Canal Record, do not take into account the depreciation of plant, except in a few cases of relatively slight importance, and do not consider the interest on the money invested or a charge to amortize the debt. A considerable part of the tolls had to be refunded on account of the ruling that tolls should not be greater than the equivalent of a charge of \$1.25 per net ton on the basis of measurement for registry in the United States. This wiped out the apparent profit.

CANAL ZONE.

The Canal Zone contains about 443 square miles. It begins at a point three marine miles from mean low water mark in each ocean and extends for five miles on each side of the center line of the route of the canal. It includes the group of islands in the Bay of Panama, named Perico, Naos, Culebra and Flamenco. The cities of Panama and Colon are excluded from the zone, but the United States has the right to enforce sanitary ordinances and maintain public order there in case the republic of Panama should not be able to do so.

WORK OF UNITED STATES CENSUS BUREAU.

The bureau of the census in the department of commerce in Washington, D. C., is charged with the duty of taking periodical censuses of the population, agriculture, manufactures and mines and quarries of the United States, together with such special statistics as are required by congress from time to time. The next general or decennial census will be taken in 1920. A census of electrical industries is taken every fifth year; the last one was taken in 1913 and consequently the next will be taken in 1918, for the statistics of 1917. Other regular censuses include:

Wealth, debt and taxation; taken every tenth year; latest statistics are for fiscal year ending June 30, 1913.

Manufacturing industries; taken every fifth year; next report will relate to calendar year 1914.

Agriculture; taken at ten-year intervals; next census will be taken late in fall of 1915 and will relate to the crops of that year.

Religious bodies; taken every tenth year; next census will be taken in 1916.

Water transportation on coast and inland waters of the United States; taken every tenth year; next census will cover the year 1916.

The annual reports issued by the bureau include mortality and birth statistics; financial statistics of cities with a population of 30,000 or more; statistics relating to cotton production and consumption and statistics showing the amount of tobacco of various kinds on hand on April 1 and Oct. 1 of each year.

Special reports issued include studies of racial classes of population; population of metropolitan districts; Indian population; negro population; supplementary occupation statistics, embracing occupations of adults and children, occupations of women, occupations of children, occupations of the foreign born, and unemployment; fecundity of women; general statistics of cities; statistical atlas; plantation study in the southern states; age of the farmer in relation to tenure and size of farm, stability of farm population; inmates of institutions (prisoners and juvenile delinquents, paupers in almshouses, insane and feeble-minded), the blind and the deaf, and special monographs.

UNITED STATES ARSENALS.

The largest of the United States arsenals are located at Rock Island, Ill., and Springfield, Mass. Others are at Pittsburgh, Pa.; Augusta, Ga.; Benicia, Cal.; Columbia, Tenn.; Fort Monroe, Va.; Philadelphia, Pa.; Indianapolis, Ind.; Governor's island, N. Y.; Jefferson barracks,

Mo.; Sandy Hook, N. Y.; San Antonio, Tex.; Dover, N. J.; Watertown, Mass., and Watervliet, N. Y. Some of the above are merely powder depots, the principal manufacturing plants being at Rock Island, Springfield and Watervliet. The navy yards are also arsenals.

RANK OF AMERICAN PORTS IN FOREIGN TRADE.

The following table shows the total trade of the ten leading American customs districts as indicated by the commerce passing through the custom houses at their leading ports, with comparisons covering the fiscal years 1914 and 1915. The low position of certain great centers of trade and industry is due to the fact that imports destined for consumption in their area are to a large extent credited to the exterior ports of first arrival, while exports the product of one locality are often sold first to other domestic jobbing centers or forwarded to agents located on the seaboard or frontier, where, upon shipment abroad, they are credited in the official trade accounts. Chicago, St. Louis, Cleveland, Kansas City, Los Angeles, Portland (Ore.), Minneapolis, St. Paul, Louisville, Indianapolis, Omaha, Pittsburgh and other great trade centers fall within this class.

THE GENERAL EDUCATION BOARD.

Organized Feb. 27, 1902.

Chairman—Frederick T. Gates.
Secretary—Wallace Buttrick.
Assistant secretaries—E. C. Sage, Abraham Flexner.

Treasurer—L. G. Myers.
Assistant treasurer—L. M. Dashiell.
Members of Board—Frederick T. Gates, Walter H. Page, J. D. Rockefeller, Jr., Albert Shaw, Wallace Buttrick, Starr J. Murphy, Edwin A. Alderman, Hollis B. Frissell, Harry Pratt Judson, Charles W. Eliot, Andrew Carnegie, Edgar L. Marston, Wickliffe Rose, Jerome D. Greene, Hanson Phelps Stokes, Jr., Abraham Flexner, George E. Vincent.

Offices—61 Broadway, New York, N. Y.
The general education board was informally organized Feb. 27, 1902, at the suggestion of John D. Rockefeller's committee on benevolence and was given a charter by congress and formally organized in January, 1903. The plan was designed and adapted to assist Mr. Rockefeller in distributing his gifts to education and to afford a medium through which other men of means might contribute to the same. The board, a few days after its initial meeting, received from Mr. Rockefeller the sum of \$1,000,000, the use of which was to be confined to the study and promotion of education in the southern states.

June 30, 1905, the board was notified that Mr. Rockefeller would donate \$10,000,000, the principal of which was to be held in perpetuity as a foundation for education, the income to be used for the benefit of institutions of learning in such manner as might be deemed best adapted to promote a comprehensive system of higher education in the United States. In 1907 Mr. Rockefeller gave the board \$32,000,000 and in 1909 added \$10,000,000 more to the fund. The board was authorized to distribute the principal of the fund, and all other endowment funds hitherto con-

of education within the United States of America, without distinction of race, sex or creed."

The first comprehensive report of the work of the board, covering its activities since its organization twelve years ago, was issued Jan. 18, 1915. It gives details showing that, using the board as a medium, John D. Rockefeller has provided more than \$73,000,000 for the cause of education.

Including the funds given through the board, and the funds still in its hands, and as a result of the efforts of the board in inducing others to give, the total sum of \$17,362,710.24 has been dedicated to the cause of education in the United States. The funds supplied by Mr. Rockefeller himself have been utilized as follows:

Appropriations by the board directly \$15,589,569.90	
Appropriations at the specific instance of Mr. Rockefeller, but paid through the board to the University of Chicago.....	13,554,343.99
Appropriations through the board to the Rockefeller Institute for Medical Research.....	10,267,022.10
Funds still in the hands of the board and available for its purposes.....	33,939,156.89
Total.....	\$73,350,092.88

Of the foregoing \$200,000 and accrued interest was contributed by Miss Anna T. Jeanes.

The policy of the board has been to use its funds with a view to inducing others to co-operate for the same general purposes. Thus the contributions of the board for nearly all purposes have been supplemented by other gifts secured through the leverage of the appropriation of the board itself. The sums appropriated by the board since its establishment, together with these supplemental sums, are shown in the following table:

	By board.	By others.	Total.
To colleges and universities.....	\$10,582,591.80	\$39,801,732.00	\$50,384,323.80

tributed by Mr. Rockefeller, whenever in the discretion of the members or their successors it should be deemed advisable to do so.

The charter of the board provides that the object of the corporation shall be "the promotion

Thus the sums *appropriated to education through the general education board, together with the supplemental amounts provided by others, aggregate for the period covered by the report \$17,362,710.24.

Secretary—Henry A. Vale, 2415 20th street, Washington, D. C.

Executive and Disbursing Officer—Col. William W. Harts, U. S. A.

The Lincoln memorial commission was created by an act of congress approved Feb. 9, 1911, to devise and construct a memorial of Abraham Lincoln in the city of Washington, D. C. A design submitted by Henry Bacon, a New York architect, was formally accepted by congress Feb. 9, 1913. The memorial, which will stand in Potomac park, is to be a colonnaded edifice containing a statue of Abraham Lincoln, a memorial of the Gettysburg speech, a memorial of the second inaugural address and a symbol of the union of the states. Its cost is limited to \$2,000,000. Ground was broken Feb. 12, 1914. The salary of the special resident commissioner is \$5,000 a year.

THE SHERMAN ANTITRUST LAW.

Passed by the 51st congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories, and any state or states of the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition

setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

THE MONROE AND

The "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power."

*** We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

DRAGO DOCTRINE.

When in the winter of 1902-03 Germany, Britain and Italy blockaded the ports of Ven-

ezuela in attempt to make the latter country settle up its debts Dr. L. F. Drago, a noted jurist of Argentina, maintained that force cannot be used by one power to collect money owing to its citizens by another power. Prominence was given to the contention by the fact that it was officially upheld by Argentina and favored by other South American republics. The principle embodied has become generally known as the "Drago doctrine."

LODGE RESOLUTION.

In connection with the reported attempt of Japan to obtain land for the establishment of a naval base in Magdalena bay, on the western coast of Mexico, the senate of the United States adopted the following resolution Aug. 2, 1912:

"Resolved, That when any harbor or other place in the American continents is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such relation to another government, not American, as to give that government practical power of control for national purposes."

NONCONTIGUOUS POSSESSIONS OF THE UNITED STATES.

THE PHILIPPINE ISLANDS.

The Philippine islands were ceded to the United States by Spain Dec. 10, 1898. Maj.-Gen. Merritt was the first military governor. He was succeeded in August, 1899, by Maj.-Gen. E. S. Otis, who in turn was followed in May, 1900, by Maj.-Gen. Arthur MacArthur. The last named remained in office until July 4, 1901, when the military authority was transferred to Gen. A. R. Chaffee. By order of the president Gen. Chaffee was relieved of his duties as military governor July 4, 1902, and the office terminated. The Philippine commission was at the same time made the superior authority. Sept. 2 the islands were divided into three military departments, to be known as the department of Luzon, the department of Visayas and the department of Mindanao.

July 1, 1902, congress passed an act providing temporarily for the government of the Philippines, providing for the election by popular vote, two years after a census of the islands had been taken and published, of delegates to an assembly consisting of not more than 100 members nor less than fifty, apportioned among the provinces as nearly as possible according to population. This assembly should, together with the Philippine commission appointed by the president of the United States, exercise the legislative power heretofore exercised by the commission alone, the members of the commission acting as an upper house and the elected assemblymen as a lower house. The members of the assembly were to hold office two years and annual sessions of the legislature not exceeding ninety days in length were to be held.

The first election was held July 30, 1907, when eighty members of the legislature were chosen, the total vote being 87,893. The first session was formally opened Oct. 16 by William H. Taft, United States secretary of war, the first civil governor of the islands after they came into American possession. Sergio Osmena was elected president.

Officials and Salaries—The Philippine commission consisted in September, 1915, of Francis B. Harrison of New York, Henderson S. Martin of Kansas, Clinton L. Riggs of Maryland, Winfred T. Denison of New York, Rafael Palma, Victorino Mapa, Jaime C. de Veyra, Vicente Ilustre and Vicente Sison of the Philippines. The officers in 1915 were:

Imports and Exports—The total imports of the Philippine islands in the fiscal year 1914 amounted to \$56,011,570; total exports, \$51,238,048.

ISLAND OF PORTO RICO.

Porto Rico, according to the decision of the United States Supreme court in the insular cases May 27, 1901, is a territory appurtenant and belonging to the United States, but not a part of the United States within the revenue clause of the constitution. The island was ceded to the United States by Spain Dec. 10, 1898, and was under military rule until the Foraker law went into effect May 1, 1900. In accordance with the third section of that act, the legislative assembly of Porto Rico having put into operation a system of local taxation to meet the necessities of government, President McKinley on the 25th of July, 1901—the anniversary of the landing of American troops on the island in 1898—proclaimed free trade between the United States and Porto Rico.

Government—Civil government, under the provisions of the Foraker act, was established May 1, 1900. The upper house consists of eleven

members, six of whom are "cabinet" officers appointed by the president; the lower house is made up of thirty-five delegates elected by the people every two years. The governor, who is appointed by the president, has practically the same duties as the governor of any other territory of the United States. The present officers are: Governor, Arthur Yager; secretary, Martin Travieso; treasurer, Allan H. Richardson; commissioner of education, Paul G. Miller; attorney-general, Howard L. Kern; auditor, J. W. Bonner; commissioner of interior, Manuel Domenech; director of labor, charities and correction, Manuel Camunas; United States district judge, Peter J. Hamilton; resident commissioner in the United States, Luis Munoz Rivera.

Area and Population—The area of Porto Rico is 3,435 square miles and the population in 1910 was 1,118,012, of which 65.5 per cent was white, 30 per cent mulatto and 4.5 per cent black. The cities having more than 5,000 inhabitants in 1910 were: San Juan, 48,716; Ponce, 35,005; Mayaguez, 15,563; Arecibo, 9,612; Aguadilla, 6,125; Yauco, 6,589; Caguas, 10,354; Guayama, 8,321.

Commerce—For the year ended June 30, 1915, the total domestic exports from Porto Rico to foreign countries were \$700,118, and to the United States, \$42,308,350. Foreign imports amounted to \$2,954,465 and imports from the United States amounted to \$30,149,761. Of the exports Spain took \$1,875,806; Cuba, \$2,736,940; France, \$815,282; Germany, \$21,369; Austria-Hungary, \$1,630.

The leading articles of export are coffee, oranges, brown sugar and tobacco.

THE SMITHSONIAN INSTITUTION IN WASHINGTON.

The Smithsonian Institution was established by statute in 1846, under the terms of the will of James Smithson, who bequeathed his fortune in 1826 to the United States for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian building, was erected in Washington, D. C., on land given by the United States. The institution is legally an establishment having as its members the president and vice-president of the United States, the chief justice and the president's cabinet. It is governed by a board of regents consisting of the vice-president, the chief justice, three members of the United States senate, three members of the house of representatives and six citizens appointed by

joint resolution of congress. It is under the immediate direction of the secretary of the Smithsonian institution, who is the executive officer of the board and the director of the institution's activities. The institution aids investigators by making grants for research and exploration, providing for lectures, initiating scientific projects and publishing scientific papers. It has administrative charge of the national museum, the national gallery of art, the international exchange service, the national zoological park, the astrophysical observatory and the regional bureau for the international catalogue of scientific literature. The institution's original endowment of \$541,000 has been increased by gifts and accumulated interest. The secretary of the institution is Charles D. Walcott.

JAPANESE-CHINESE RELATIONS.

Early in January, 1915, the Japanese government decided that the time was opportune for determining the empire's future relations with the Chinese republic. Accordingly Eiki Hiroki, the Japanese minister in Peking, presented to the Chinese foreign minister, Lu Cheng Hsiang, the following demands with the request that they should not be made public:

GROUP 1.

Designed to preserve peace in the far east and to strengthen the friendly relations of the two countries.

Article 1. China shall recognize the transfer of all the rights in Shantung acquired and enjoyed by Germany in accordance with treaty stipulations or other rights with reference to China, regarding which Japan expects to come to an agreement with Germany eventually.

Art. 2. China shall not lease to other countries any territory or island on the coast of Shantung.

Art. 3. China shall grant to Japan the right to construct a railway from Yental or Lungkow to connect with the Kiaochau-Tsinan line.

Art. 4. China shall open without delay the principal important cities of Shantung to trade.

GROUP 2.

Designed to secure to Japan a position of special interest in south Manchuria and east Mongolia.

Article 1. The lease of Port Arthur and Dairen, together with the south Manchurian railway and the Mukden-Antung railway, shall be extended to ninety-nine years.

Art. 2. Japanese subjects shall have the right to rent and purchase land in south Manchuria and east Mongolia for uses connected with manufacture or agriculture.

Art. 3. Japanese subjects shall have the right to go freely to south Manchuria and east Mongolia for purposes of residence and trade.

Art. 4. The right to open and operate mines in south Manchuria and east Mongolia shall be granted to Japanese subjects.

Art. 5. China shall obtain the consent of the Japanese government to the actions of the two following kinds:

(a) Permitting citizens or subjects of other countries to build railroads in south Manchuria or east Mongolia, or negotiating for loans.

(b) Hypothecating the various revenues of south Manchuria and east Mongolia as security for foreign loans.

Art. 6. China shall consult Japan before employing advisers or instructors for conducting the administrative, financial or military affairs of south Manchuria and east Mongolia.

Art. 7. Japan shall have control of the Kirin-Changchun railway for ninety-nine years.

GROUP 3.

Article 1. China and Japan shall agree to act jointly, not independently, in the contemplated formation of the Han-Yeh-Ping company.

Art. 2. Without joint consent foreigners shall not be permitted to open and operate mines in the neighborhood of the Han-Yeh-Ping company's property and anything affecting the company directly or indirectly shall be decided jointly.

GROUP 4.

Designed to protect effectively the territorial integrity of China.

Article 1. China shall not alienate or lease to other countries any port, harbor or island on the coast of China.

GROUP 5.

Article 1. The central government of China shall employ influential Japanese subjects as advisers for conducting administrative, financial and military affairs.

Art. 2. Japanese hospitals, missions and schools established in the interior shall have the right to hold land in China.

Art. 3. China and Japan shall jointly police the important places in China or employ a majority of Japanese in the police department of China.

Art. 4. China shall purchase from Japan at least half the arms and ammunition used in the

whole country or establish jointly in Japan factories for the manufacture of arms.

Art. 5. China shall permit Japan to build railroads connecting Wuchang with Kiukiang and Nanchang, Nanchang with Hangchow and Nanchang with Chiaochoan (Swatow).

Art. 6. In case the province of Fukien requires foreign capital for railway construction, mining, harbor improvements and shipbuilding, Japan shall be first considered.

Art. 7. Japan shall have the right to propagate religious doctrines in China.

The presentation of these demands, the substance of which quickly became known to the public, caused excitement and anger in China, but the republic being without any effective army or navy was compelled to enter upon negotiations with Japan. These were protracted owing to the unwillingness of the Chinese to accept some of the most humiliating of the demands and to the determination of the Japanese to force an agreement upon substantially all of the articles as presented. China appealed to the representatives of Great Britain, Russia and the United States for protection, but received little satisfaction. The United States contented itself with letting it be understood that it had no thought of surrendering any of its treaty rights with China or to permit any infringement upon the open door principle to which all the nations were committed. Japan finally made some concessions in its demands and then on May 7 presented an ultimatum giving China until May 9 to accept the revised demands. In the meantime military and naval preparations were openly made by the Tokyo authorities and it was understood that in case Japan's demands were rejected force would be used. China accepted the terms of the ultimatum within the time specified and May 25 treaties were signed dealing with matters relating to Shantung, south Manchuria and eastern inner Mongolia. Following are the important points in the agreement reached: In group 1 articles 1 and 2 stand as in the original demands. Article 3 provides that China shall construct a railway from Chifu or Lungkow to join the Kiaochau-Chinanfu railway with Japanese capital. Article 4 provides that China must open numerous treaty ports in Shantung after a consultation with Japan.

In group 2 article 1 stands as in the original. Article 2 provides that the Japanese shall be permitted to lease land in south Manchuria, temporarily or perpetually, for trading, industrial and agricultural purposes. By the first clause of article 3 the Japanese shall be permitted freely to reside, travel, trade and engage in industrial pursuits in Manchuria. The second clause provides that the Japanese will submit only to police and taxation regulations approved by Japan. Civil and criminal cases shall be tried by the authorities representing the same nationality as the defendant; land disputes between Japanese and Chinese shall be tried by the joint Chinese and Japanese authorities according to the Chinese laws and customs.

Article 4 provides that Japanese subjects shall be given the right to work in nine mining areas. Article 5 gives Japan the option of constructing any of the Manchurian railways which China may wish to build in the future, and also an option on Chinese loans, with Manchurian taxes as security.

Article 6 gives preference to the appointment of Japanese political financial and military advisers. Article 7, which relates to the control and administration of the Kirin-Changchun railway, stands virtually as in the original demands. Article 8 continues in force former Sino-Japanese treaties regarding Manchuria, except where the present treaty otherwise provides.

Inner Mongolian group—Article 1—Japan must be consulted before any foreign loan can be secured by the Mongolian taxes. Article 2—Japan must be consulted before any foreign loan can be contracted for railway construction in the province. Article 3—Treaty ports must be opened, subject to consultation with Japan. Ar-

ticle 4—The Japanese jointly with the Chinese may undertake agricultural and incidental industrial enterprises.

Group 3, relating to the Han-Yeh-Ping company—China consents to the company becoming a jointly owned Sino-Japanese concern, and engages not to attempt to thwart the consummation of this plan.

Group 4 (known as the special group)—China engages to proclaim that hereafter she will neither cede nor lease any coastal territory to any power.

Group 5 (general group)—Articles 1, 2, 4, 5 and 7 are regarded as unfinished business, China pledging herself to a discussion of these at some

future date. Article 6 has been displaced by pledges that China shall undertake no military or naval preparations nor authorize foreigners to undertake such preparations on the Fukien coast in the future.

Identical notes from the United States to Japan and China were delivered about May 15 to the foreign offices in Tokyo and Peking notifying them that the American government could not recognize any agreement or undertaking impairing the treaty rights of the United States and its citizens in China, the political or territorial integrity of the republic of China or the international policy relative to China commonly known as the open door policy.

EXPENSES OF OCEAN STEAMSHIPS.

In a speech on the ship purchase bill in the United States senate Jan. 22, 1915, Senator Henry Cabot Lodge gave some interesting figures on the cost of running the largest Atlantic liners. The statistics were for German vessels alone, but they would apply to other ships of the same size. The figures in each case are for one round trip between the United States and Europe.

LORIMER ELECTION CASE CHRONOLOGY.

William Lorimer chosen United States senator by Illinois legislature May 26, 1909.
Validity of election challenged in United States senate Jan. 9, 1911.
Beveridge resolution declaring Lorimer not legally elected defeated in senate by a vote of 46 to 40 March 1, 1911.
Senate committee in Illinois legislature reports, after investigation, that in its opinion the election of Lorimer would not have occurred but for bribery and corruption and that a new investigation by the United States senate is demanded. Report made May 17, 1911.
United States senate by a vote of 48 to 20 decides, June 1, 1911, to reopen Lorimer investigation.

Senate investigation ended Feb. 9, 1912.
Majority and minority reports submitted by investigating committee to senate May 20, 1912; majority report finds that the election was not brought about by corrupt means; minority report declares that at least ten of the Lorimer votes were corruptly cast.
Resolution offered by Senator Luke Lea of Tennessee (May 20) declaring that corrupt methods and practices were employed in the election of William Lorimer to the senate of the United States from the state of Illinois, and that his election therefore was invalid.
Lea resolution adopted by United States senate by a vote of 55 to 23, July 14, 1912.

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. When any cadet has completed the course of

four years satisfactorily he is eligible for promotion and commission as a second lieutenant in any arm or corps in the army in which there may be a vacancy, the duties of which he may have been judged competent to perform.

Appointments—Each congressional district and territory, including

Porto Rico, Alaska and Hawaii, is entitled to have one cadet at the academy. The District of Columbia has two. Each state is also entitled to have two cadets from the state at large and forty are allowed from the United States at large. The law provides that for six years from July 1, 1910, whenever any cadet shall have finished three years of his course at the academy his successor may be admitted. The appointment from a congressional district is made upon the recommendation of the representative in congress from that district and those from the state at large upon the recommendations of the senators of the state. The appointments for the United States at large are made by the president upon his own selection. The appointments from the District of Columbia are made on the recommendation of the district commissioner and that from Porto Rico on the recommendation of the resident commissioner. Appointments are made

one year in advance of admission. For each candidate appointed two alternates should be nominated. Four cadets from the Philippines are admitted.

Examinations—On the second Tuesday in January of each year the candidate selected for appointment must appear for mental and physical examination before boards of army officers at such places as the war department may designate. Candidates who pass will be admitted to the academy on March 1 following.

Mental Requirements—Each candidate must show that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, descriptive and physical geography and general and United States history.

Physical Requirements—No candidate will be admitted who is under 17 or over 22 years of age, or less than five feet four inches in height at the age of 17, or five feet five inches at the age of 18 and above, or who is deformed or afflicted with any disease or infirmity which would render him unfit for military service. Candidates must be unmarried.

Pay—The pay of a cadet is \$600 a year and one ration a day, or commutation therefor at 30 cents a day. The total is \$709.50, to begin with his admission to the academy. No cadet is allowed to receive money or other supplies from his parents or from any other person without the sanction of the superintendent.

Enlistment—Before receiving his warrant of appointment a candidate for admission is required to sign an agreement to serve in the army of the United States eight years from the time of his admission to the academy.

UNITED STATES NAVAL ACADEMY.

Annapolis, Md.

The United States naval academy is a school for the practical and theoretical training of young men for the naval service of the United States. The students are styled midshipmen. The course

of study is six years—four years at the academy and two years at sea—at the expiration of which time the examination for final graduation takes place. Midshipmen who pass are appointed to fill vacancies in the lower grade of the line of the navy, and occasionally to fill vacancies in the marine corps and in certain of the staff corps of the navy.

Appointments—Two midshipmen are allowed for each senator, representative and delegate in congress, two for the District of Columbia and

five each year from the United States at large. The appointments from the District of Columbia and five each year at large are made by the president. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the president on the recommendation of the governor of Porto Rico. Candidates must be actual residents of the districts from which they are nominated.

Examinations—Two examinations for the admission of midshipmen are held each year. The first is held on the third Tuesday in April under the supervision of the civil service commission at certain specified points in each state and territory. All those qualifying mentally, who are entitled to appointment in order of nomination, will be notified by the superintendent of the naval academy when to report at the academy

for physical examination, and if physically qualified will be appointed. The second and last examination is held on the third Tuesday in June at Annapolis, Md. Alternates are given the privilege of reporting for mental examination at the same time as the principals. Examination papers are all prepared at the academy and the examinations of candidates are finally passed upon by the academic board. Certificates from colleges and high schools will not be accepted in lieu of the entrance examinations at the naval academy.

Mental Requirements—Candidates will be examined in punctuation, spelling, arithmetic, geography, English grammar, United States history, world's history, algebra through quadratic equations and plane geometry (five books of Chauvenet's geometry or an equivalent).

Physical Requirements—All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. A candidate is eligible for appointment the day he becomes 16 and is ineligible on the day he becomes 20 years of age. Candidates are required to be of good moral character, physically sound, well formed and of robust constitution. The height of candidates for admission must not be less than five feet two inches between the ages of 16 and 18 years, and not less than five feet four inches between the ages of 18 and 20 years. The minimum weight at 16 years is 105 pounds, with an increase of five pounds for each additional year or fraction of a year over one-half. Candidates must be unmarried.

Pay—The pay of a midshipman is \$600 a year, beginning at the date of his admission. Midshipmen must supply themselves with clothing, books, etc., the total expense of which amounts to \$280.64. Traveling expenses to the academy are paid by the government.

Enlistment—Each midshipman on admission is required to sign articles by which he binds himself to serve in the United States navy eight years (including his time of probation at the naval academy).

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS.

Established by act of Congress March 21, 1866.

Names and Location of Branches—Central, Dayton, O.; Northwestern, Milwaukee, Wis.; Southern, Hampton, Va.; Eastern, Togus, Me.; Western, Leavenworth, Kas.; Marion, Marion, Ind.; Pacific, Santa Monica, Cal.; Danville, Danville, Ill.; Mountain, Johnson City, Tenn.; Battle Mountain Sanitarium, Hot Springs, S. D.

Board of Managers—The president of the United States, the chief justice of the Supreme court, the secretary of war ex officio, Washington, D. C.; president, Col. Frederick J. Close, 346 Broadway, New York, N. Y.; Col. Henry H. Markham, Pasadena, Cal., first vice-president; Capt. Thomas S. Bridgman, Buckfield, Me., second vice-president; Gen. Geo. H. Wood, Dayton, O., secretary; Maj. James W. Wadsworth, Geneseo, N. Y.; James S. Catherwood, Hoopeston, Ill.; Capt. John C. Nelson, Logansport, Ind. General treasurer—Maj. Moses Harris. Inspector-general and chief surgeon—Col. James E. Miller.

REQUIREMENTS FOR ADMISSION.

1. Honorable discharge from the United States service.
2. Disability which prevents the applicant from earning a living by labor.
3. Applicants for admission will be required to abide by all the rules and regulations made by the board of managers, perform all the duties required of them and obey all the lawful orders of the officers of the home.
4. A soldier or sailor to be admitted must forward with his application his discharge taper, his pension certificate if he is a pensioner and his discharge from a state home if he has been an inmate of such home. These papers are retained at the branch to which he is admitted to prevent their loss or fraud, but are returned to him when he is discharged. Soldiers or sailors whose pensions exceed \$16 a month are not admitted to the home except for special reasons.

The National Home for Disabled Volunteer Soldiers is supported by the United States government. The annual appropriation for that purpose is about \$4,000,000.

STATE SOLDIERS' HOMES.

There are a number of state homes for disabled volunteer soldiers who, for various reasons, are unable to obtain admission to the national homes. The federal government contributes toward the support of the state homes the sum of

\$100 for each soldier, based upon the average attendance for the year; the remainder of the expenses is paid by the states themselves. Some of these homes are on the cottage plan. Following is a list of the state homes:

California—Yountville.	New Hampshire—Tilton.
Colorado—Monte Vista.	New Jersey—Kearny and Vineland.
Connecticut—Noroton Heights.	New York—Bath and Oxford.
Idaho—Boise.	North Dakota—Lisbon.

Massachusetts—Chelsea.	S. Dakota—Hot Springs.
Michigan—Grand Rapids.	Vermont—Bennington.
Minnesota—Minneapolis.	Washington—Orting and Port Orchard.
Missouri—St. James.	Wisconsin—Waupaca.
Montana—Columbus Falls.	Wyoming—Cheyenne.
Nebraska—Grand Island and Milford.	

HOME FOR REGULAR ARMY SOLDIERS.

The United States maintains a home for disabled and discharged soldiers of the regular army at Washington, D. C. All soldiers who have served twenty years in the army and all soldiers who have incurred such disability, by wounds, disease or injuries in the line of duty while in the regular army as units them for further service are entitled to admission to the home. The home is in charge of a board of commissioners, consisting of the governor of the home, the adjutant-general of the army, the judge-advocate, the commissary-general, the quartermaster-general, the chief of engineers and the surgeon-general. The present governor is Lieut.-Gen. S. B. M. Young (retired).

CONFEDERATE SOLDIERS' HOMES.

Confederate veterans of the civil war have a home at Beauvoir, near Biloxi, Miss. The residence there of Jefferson Davis in his last years was secured in 1902 as a refuge for helpless old southern soldiers by the United Sons of Confederate Veterans. It is supported by that society and the United Daughters of the Confederacy. Another home for confederate veterans was opened in Washington, D. C., May 24, 1913, by the women of the Southern Relief association.

TELEPHONE TALK ACROSS CONTINENT.

Conversation by telephone was carried on Jan. 25, 1915, between Maj. Henry Lee Higginson in Salem, Mass., and Thomas A. Watson in San Francisco, Cal., a distance of 3,500 miles. President Wilson in Washington, D. C., also talked with President Moore of the Panama-Pacific exposition in San Francisco. While Messrs. Higginson and Watson were talking President Vail

of the American Bell Telephone company cut on the line from Jekyll Island, Ga., increasing the circuit to 4,700 miles, the longest ever successfully operated. Alexander Graham Bell, inventor of the telephone, took part in the transcontinental conversation and was congratulated by President Wilson on the achievement.

HURRICANE IN LOUISIANA AND MISSISSIPPI.

Louisiana and Mississippi were visited by an extremely destructive tropical hurricane Sept. 29, 1915. Fatalities occurred all along the gulf coast, the delta section and for some distance in the interior. New Orleans suffered severely and for a time was cut off from communication except by wireless for many hours. It was estimated that the total number of dead in the area visited by the storm was 549, with damage to property approximating \$12,000,000.

LOSS OF AMERICAN SUBMARINE F-4.

While a flotilla of American submarines stationed at Honolulu, Hawaii, were engaged in target practice near the harbor entrance March 25, 1915, the F-4 was seen to submerge at 9:15 a. m. After several hours had passed without its reappearing on the surface a search was made and the vessel was located on the bottom of the ocean some 300 feet below the surface. Efforts were made immediately to raise the craft and, these failing, it was dragged by means of grappling irons to shallower water. Divers were employed to fasten chains to the submarine, but the attempts to get it to the surface proved in vain for a long time. It was not until

late in August that the craft was refloated and towed into Honolulu harbor. The bodies of the officers and crew were badly decomposed and only a few could be identified. The accident, so far as could be learned, was caused either by an explosion of the batteries or by the evolution of chlorine gas. Lieut. Alfred L. Ede was in command of the vessel and the crew numbered twenty men, all of whom were lost. The F-4 was launched at Seattle, Wash., Jan. 6, 1912, and cost \$500,000. It was 142 feet 7 inches long, 16 feet 10 inches deep, 15 feet 3 inches beam and had a displacement of 400 tons.

SERVICE PENSIONS.

The act of May 11, 1912, grants pensions according to the length of service to persons who served ninety days or more in the military or naval service of the United States during the civil war and were honorably discharged, who have reached certain ages, at rates as indicated in the following table:

Age.	90 days.	6 mos.	1 yr.	1½ yrs.	2 yrs.	2½ yrs.	3 yrs.
62..	\$13.00	\$13.50	\$14.00	\$14.50	\$15.00	\$15.50	\$16.00

70..	18.00	19.00	20.00	21.50	23.00	24.00	25.00
75..	21.00	22.50	24.00	27.00	30.00	30.00	30.00

It also grants pensions at the maximum rate, \$20 per month, without regard to age or length of service, to persons who served in the military or naval service during the civil war and received honorable discharges, who were wounded in battle or in line of duty and are now unfit for manual labor by reason thereof or who from dis-

ease or other causes incurred in line of duty resulting in their disabilities are now unable to perform manual labor.

It also provides a rate of \$30 a month for surviving soldiers and sailors of the Mexican war who served sixty days or more and were honorably discharged.

PENSIONS GRANTED BY SPECIAL ACTS OF CONGRESS SINCE MARCH 4, 1861.

HISTORICAL.

There are now no pensioners on account of the revolutionary war on the roll. Mrs. Phoebe M. Palmeto, who was pensioned by a special act of congress as the daughter of Jonathan Wooley, who served in a New Hampshire company, died at Brookfield, N. Y., April 25, 1911, aged 90 years. The last widow pensioner of that war was Esther S. Damon of Plymouth Union, Vt., who died Nov. 11, 1906, aged 92 years. The last survivor of the revolution was Daniel F. Bakeman, who died at Freedom, Cataugaus county, N. Y., April 5, 1869, aged 109 years 6 months and 8 days.

The last surviving pensioned soldier of the war of 1812 was Hiram Cronk of Ava, N. Y., who died May 13, 1905, aged 105 years and 16 days. The names of 39 widows of the war of 1812 remained on the pension roll June 30, 1913.

The estimated total number of original enlistments on the federal side in the civil war was 2,213,365. The number of soldiers surviving at the close of the fiscal year June 30, 1915, assuming that they were all on the pension roll, was 396,370. The deaths, therefore, up to that date had been 1,816,995.

REVOLUTIONS IN HAITI.

Dr. Rosalvo Bobo, twice expelled from Haiti for fomenting revolutions, engaged in another attempt to overthrow the president, Gen. Vilbrun Guillaume, in June, 1915, but was defeated by the government troops and compelled to take refuge in the interior of the island. Many arrests were made, but the revolutionists continued at work. Learning that they were making progress, President Guillaume had seventy or more of those under arrest, including Gen. Orestes Zamor, a former president of Haiti, executed by Gen. Oscar, governor of Port au Prince, July 27. The infuriated friends of the victims, assisted by a regiment of disaffected soldiers, attacked the presidential palace and partly destroyed it. Gen. Oscar took refuge in the Dominican legation, but the mob invaded the building, seized the governor, dragged him before the door and shot him to death. President Guillaume, who sought safety in the French legation, met the same fate, being dragged out, shot to death and his body dismembered by the friends and relatives of the murdered prisoners.

Rear-Admiral William B. Caperton, U. S. N., arrived on the cruiser Washington at Port au Prince at noon on the 28th and immediately landed marines and bluejackets to preserve order in the Haitian capital and at Cape Haitien. On the evening of the 29th the Americans were attacked by rebels in the outskirts of Port au Prince, and in the fight which followed two seamen and six natives were killed. French troops were landed to protect the French legation and more marines were sent from Guantanamo, Cuba,

and Philadelphia, Pa., until by Aug. 4 Admiral Caperton had 1,300 men under his command available for an emergency. Measures to secure peace were made by a committee of natives and Americans, the affairs of the republic being temporarily administered under the direction of Admiral Caperton.

Gen. Auguste with 200 followers attacked St. Marc Aug. 7, but was defeated by a Haitian committee of safety. The general himself and four of his men were killed. Aug. 12 the national assembly at Port au Prince elected M. D'Artigue, president of the republic. He was formally recognized by the American government Sept. 17 after the Haitian congress had accepted a treaty demanded by the American government giving the United States control over the customs revenue and other internal affairs of the island republic for a period of ten years. The convention provides for the establishment of a Haitian receivership of customs under American control; the establishment of a native Haitian constabulary under American officers and the establishment of American control over the finances of Haiti to the extent necessary to prevent speculation and safeguard the interests of the American people.

Some of the Haitian custom houses were taken over by Rear-Admiral Caperton before the treaty was signed and the supervision of the others was assumed later. Rebels continued to give trouble at various places, but the marines kept them under control. At Gonaives Sept. 19 sixteen natives were killed in an encounter with the Americans.

WEATHER FORECASTS AND SIGNALS.

The operations of the weather bureau of the department of agriculture are based on observations of the weather taken at about 200 observatories throughout the United States at the same moment of time and telegraphed daily to Washington, D. C., and to other important cities. These observations, comprising barometric pressure, temperature, precipitation, winds and clouds, are entered upon outline charts of the United States by means of symbols, forming the "daily weather map," from which the forecasts are made. These forecasts are issued every day for every state in the union, and whenever necessary special warnings are sent out of storms,

frosts, cold waves, heavy snows and floods. In addition to the main office in Washington, there are subordinate forecast centers in Chicago, New Orleans, Denver, San Francisco and Portland, Ore. Weather forecasts for a week in advance are now sent out from Washington.

The forecasts are first telegraphed to about 2,300 principal distributing points, whence they are further disseminated by telegraph, telephone and through the mail by means of forecast cards, rural free delivery slips and newspapers.

It is estimated that the total number of persons in the United States to whom the weather forecasts are available is more than 4,000,000.

WEATHER FLAGS.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain

about stationary. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts.

Small craft. Northwest winds. Southwest winds. Northeast winds. Southeast winds. "Hurricane" signal.

STORM-WARNING FLAGS.

Small craft warning—A red pennant indicates that moderately strong winds are expected.

Storm warnings—A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly; white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

The national holidays, such as July 4, New Year's, etc., are such by general custom and observance and not because of congressional legislation. Congress has passed no laws establishing holidays for the whole country. It has made Labor day a holiday in the District of Columbia, but the law is of no effect elsewhere. It has also designated the second Sunday in May as "Mothers' Day."

FIRE PREVENTION DAY.

The fire insurance and fire prevention committees of the Safety First Federation of America announced Aug. 20, 1915, that they had selected Oct. 1 as the date of the annual national fire prevention day. The committees were composed of representatives from all parts of the United States and Canada.

FOOT AND MOUTH DISEASE.

[From reports of bureau of animal industry, U. S. department of agriculture (1915).]

Foot and mouth disease, also known as aphthous fever, epizootic aphthæ and eczema contagiosa, is an acute, highly communicable disease chiefly confined to cloven footed animals and characterized by an eruption of vesicles or blisters on the mucous membrane of the mouth and on the skin between the toes and above the hoofs. The vesicles rupture, forming erosions and ulcerations; there are also salivation, tenderness of the affected parts, loss of appetite, lameness, emaciation and diminution in the quantity of milk secreted. While it may be regarded as essentially a disease of cattle, hogs would seem to be as easy a prey. Almost in the same grade of receptivity are sheep and goats. Horses, dogs, cats and even poultry may occasionally become infected with the disease, the last three being particularly dangerous as carriers of the contagion. Man himself is not immune.

As with other communicable diseases, the source and origin of foot and mouth disease have given rise to much speculation. It is now conceded that foot and mouth disease is propagated by a specific virus and that every outbreak starts from some pre-existing outbreak. Experiments have shown that the virus will pass through standard germ-proof filters, thus indicating its minute size and the reason it has not been detected by the staining methods. The contagion may be found in the serum of the vesicles on the mouth, feet and udder; in the saliva, milk and various secretions and excretions; also in the blood during the rise of temperature. A wide distribution of the virus and a rapid infection of a herd are the result. Animals may be infected directly, as by licking, and in calves by sucking, or indirectly by such things as infected manure, hay, utensils, drinking troughs,

railway cars, animal markets, barnyards and pastures.

Foot and mouth disease has appeared in the United States on six different occasions—1870, 1880, 1884, 1902, 1903 and 1914. The latest invasion was discovered in the vicinity of Niles, Mich., in October, 1914, after it had evidently been under way since August of the same year. This was the most serious and extensive outbreak ever known in this country. It was found in twenty-one states and the District of Columbia. Illinois had the largest infected area and the largest number of animals infected, the disease appearing in some fifty counties. Next in order came Pennsylvania, Michigan and Ohio. Stockyards in Chicago and other places which were found to be infected were closed temporarily and disinfected.

Officials of the department of agriculture in Washington reported in April that more than 124,000 animals had been killed because of the epidemic at a cost of between \$5,000,000 and \$6,000,000, the expense of which had been shared equally by the federal and state governments. Congress before the close of its session in March appropriated \$2,500,000 for the eradication of the disease and to aid in paying for the losses. Energetic efforts to stamp out the disease were made by both federal and state officers and in May it seemed as if the measures taken had been successful. In Illinois, however, there was a recurrence of the epidemic in August. The first affected herd was found on a farm in Wheeling township, A. Cook county, Aug. 8, and later others were found in a number of other counties. Steps were at once taken to eradicate the disease by slaughtering all infected animals and enforcing a strict quarantine in all localities in which cases had been discovered.

IMMIGRATION LAW OF THE UNITED STATES.

The immigration law provides for a poll tax of \$4 for every alien entering the United States. This tax is not levied upon aliens who shall enter the United States after an uninterrupted residence of at least one year immediately preceding such entrance in Canada, Newfoundland, Cuba or Mexico, nor upon aliens in transit through the United States, nor upon aliens arriving in Guam, Porto Rico or Hawaii.

Whenever the president shall be satisfied that passports issued by any foreign government to its citizens to go to any country other than the United States or to any insular possession of the United States or to the Canal Zone are being used for the purpose of enabling the holders to come to the continental territory of the United States to the detriment of labor conditions therein, the president may refuse to permit such citizens of the country issuing such passports to enter the continental territory of the United States from such other country or from such insular possessions or from the Canal Zone.

The following classes are excluded from admission into the United States: All idiots, imbeciles, feeble-minded persons, epileptics, insane persons and persons who have been insane within five years; persons who have had two or more attacks of insanity at any time previously; paupers; persons likely to become a public charge; professional beggars; persons afflicted with tuberculosis or with a loathsome or dangerous contagious disease; persons who have committed a felony or other crime involving moral turpitude; polygamists or persons who believe in the practice of polygamy; anarchists or persons who believe in or advocate the overthrow by force or violence of the government of the United States, or of all governments or of all forms of law, or the assassination of public officials; prostitutes, or women and girls coming into the United States for any immoral purpose; contract laborers who have been induced to migrate to this country by offers of employment or in consequence of agreements of any kind, verbal or written, express or implied, to perform labor in this country of any kind, skilled or unskilled; any person whose ticket or passage is paid for

with the money of another, or who is assisted by others to come, unless it is satisfactorily shown that such person does not belong to one of the foregoing excluded classes and that said ticket or passage was not paid for by any corporation, society, municipality or foreign government, directly or indirectly; all children under 16 years of age unaccompanied by one or both of their parents, at the discretion of the secretary of labor. Nothing in the act shall exclude, if otherwise admissible, persons convicted of an offense purely political, not involving moral turpitude. Skilled labor may be imported if labor of like kind unemployed cannot be found in this country. The provisions of the law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, clergymen, professors for colleges or seminaries, persons belonging to any recognized learned profession or persons employed strictly as personal or domestic servants.

It is unlawful to assist or encourage the importation or migration of any alien by promise of employment through advertisements printed in any foreign country. This, however, does not apply to states or territories advertising the inducements they offer to immigration thereto.

All aliens brought to this country in violation of law shall be immediately sent back by the owners of the vessels bringing them. Any alien entering the United States in violation of law and such as become public charges from causes existing prior to their landing shall be deported at any time within three years after their arrival.

No person who disbelieves in or who is opposed to all organized government, or who is a member of or affiliated with any organization entertaining and teaching such belief in or opposition to all organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally of the government of the United States, or of any other organized government, because of his or their official character, shall be permitted to enter the United States.

ARCTIC AND ANTARCTIC EXPLORATION.

STEFANSSON FINDS NEW LAND.

Vilhjalmur Stefansson, commander of the Canadian government expedition engaged in exploring the arctic regions north of Alaska and British Columbia, reported in the fall of 1915 that he had discovered new land at 77 degrees 43 minutes north and 115 degrees 43 minutes west. In a letter dated Herschel Island, Aug. 22, and sent via Nome, Alaska, Sept. 16, he said that the land was first sighted June 18 and that he and his companions, Storkensen, Andreassen and Thomson, explored about 100 miles of the coast line, but that mountains were seen for at least fifty miles farther east. From a height of 2,000 feet twenty miles inland still higher hills were seen in all directions from north to east, extending for a distance estimated at more than fifty miles. Caribou and other arctic animals, except bears, were abundant. The new land lies to the north and northeast of Prince Patrick Island at a distance of about 100 miles.

Mr. Stefansson's original plan was to have used the steam whaler Karluk to explore Beaufort sea and the waters west of the American arctic archipelago, but that ship was crushed in the ice. The leader of the expedition consequently determined to accomplish the same purpose by traveling over the ice with dogs and sledges. He bought a small trading schooner, North Star, to assist his remaining ship, the gasoline schooner Mary Sachs, in carrying supplies to the points where they were needed. In the spring of 1914 Stefansson, with two companions, made a journey of some 700 miles from Martin Point, Alaska, to the coast of Banks Island. The summer was spent in shooting caribou for the winter supply of meat. The party passed the winter of 1914-1915 at Cape Kellett on the southwestern coast of Banks Island.

The ice journey of 1915, which led to the discovery of the new land, was begun Feb. 21 when the party left the base at Cape Kellett, but delays of various kinds were experienced, such as open lanes of water, adverse currents and accidents to the equipment, and it was June 15 before the northern tip of Melville Island was reached. There was but little time to investigate the new land, which was reached a few days later, as the warm weather was causing the ice to break up. On his return trip to Cape Kellett Mr. Stefansson followed the west coast of Melville Island and traveled diagonally across Banks Island. A great deal of new charting was accomplished on both the outward and homeward journeys.

Mr. Stefansson announced in his letter that he planned to establish a base on Banks or Prince Patrick Island, spend the winter there and then make a further investigation of the new land in 1916. Before his letter was received at Nome in September it was generally supposed that he and his companions had perished and much relief was felt when the news came that they were all well and had suffered no great hardships. The expedition, which started in 1913, was financed by the Canadian government, and all land discovered in the course of the exploration consequently belongs to the dominion.

SHACKLETON ANTARCTIC EXPEDITION.

Word was received from Sir Ernest Shackleton, leader of the British expedition having for its object the crossing of the south polar area from the Weddell sea to the Ross sea that the ice conditions were such in November of 1914 that he saw no hope of getting through that season and he and his party would probably not be heard from again until March, 1916, when it might be expected in New Zealand. Sir Ernest wrote from South Georgia and his letter was dated Nov. 30, 1914. In this communication he said that the party which would probably cross the antarctic continent with him would be made up of Frank Wild, second in command; Tom Green, in charge of sledges; George Marston, in charge of general stores; F. Hurley and Dr. Macklin, surgeon. The plan was to sail from South Georgia on the *Endurance* (formerly the *Polaris*) in December

and make a landing about the end of the month. The vessel would probably spend the winter at Filcheney's landing and sail for South Georgia about Feb. 1, 1916, with the members of the shore party not making the transcontinental journey. The *Aurora*, carrying the expedition which was to meet the Shackleton party, was to winter in the Ross sea and be ready to take the explorers to New Zealand in the event that they succeeded in their attempt to cross the south polar continent.

MAC MILLAN EXPEDITION.

Dr. Donald B. MacMillan, who sailed at the head of a party of scientists for the arctic regions July 5, 1913, reported in May, 1915, that Crocker land, which members of the Peary expedition thought they saw in 1906, has no existence in fact. He, in company with Ensign Fitzhugh Green and two Eskimos, reached the supposed site of this land April 23, 1915, but found no sign of land there. The party frequently saw mirages in that vicinity which greatly resembled land, and it was probably something of this kind which deceived Peary. Dr. MacMillan picked up at various points records left by Dr. Kane, Commander Nares and Robert Peary, and a cache of milk and pemmican left by Capt. Sverdrup. The work of the expedition planned for 1915 included exploration of the region south of Ellef and Amund Ringnes land and the Greely fiord and Lake Hazen region in Grant land.

RUSSIAN EXPLORERS RETURN.

Commander Wilkitzky, the Russian explorer who discovered Nicholas II. land north of Cape Chelyuskin in 1913, arrived at Archangel, Russia, Sept. 18, 1915, after doing much valuable work in charting the arctic coast of Russia. Capt. Otto Sverdrup, the Norwegian explorer, who had been searching for the Russians, Rusanoff and Brustloff, arrived at Archangel at the same time.

NEW BIRD RESERVATIONS.

Two national bird reservations were created by executive order in 1915—Mille Lacs, a small island in the lake of the same name in Mille Lacs county, Minnesota (May 14, 1915), and Big Lake, in Mississippi county, Arkansas (Aug. 2, 1915). The Blackbeard island reservation in Georgia, created in 1914, was abandoned as a national bird reservation on account of lack of adequate appropriation for its maintenance.

FEDERAL TRADE COMMISSION.

Appointed by President Wilson, Feb. 22, 1915.

Members.	Term.	Salary.
Joseph E. Davies* (Wis.)	7 years	\$10,000
Edward N. Hurley* (Ill.)	6 years	10,000
William J. Harris* (Ga.)	5 years	10,000
Will H. Parry† (Wash.)	4 years	10,000
George Rublee† (N. H.)	3 years	10,000

*Democrats. †Progressives.

Officers (1915).—Chairman, Joseph E. Davies; vice-chairman, Edward N. Hurley.

Duties—The act creating the federal trade commission declares unfair methods of competition in commerce to be unlawful. The commission is empowered to prevent persons, partnerships or corporations, except banks and common carriers, from using such methods. It gives

hearings to persons or corporations suspected or accused of using unfair methods of competition and if it finds that such methods are used orders their discontinuance. If the orders are not obeyed the commission applies to the United States Circuit Court of Appeals for their enforcement. The commission also has the power to compile information as to the business methods of any corporation engaged in business, except banks and common carriers, and its relations to other corporations or individuals, to investigate violations of the anti-trust acts and to investigate trade conditions in foreign countries which may affect the foreign trade of the United States.

ROCKY MOUNTAIN NATIONAL PARK.

The act sets aside a tract of land consisting of 230,000 acres in Grand, Boulder and Larimer counties, Colorado, as a public park for the benefit and enjoyment of the people of the United States, under the name of the Rocky Mountain National park. The park is to be under the ex-

clusive control of the secretary of the interior.

It is made his duty to make such reasonable rules for the care, management and improvement of the tract as he may deem necessary, the regulations being primarily aimed at the freest use of the park for recreation purposes by the public and for the preservation of the natural conditions and scenic beauties thereof. He may in his discretion lease parcels of ground, not to exceed twenty acres in any one place, to any persons or company for not to exceed twenty years whenever such ground is necessary for the erection of establishments for the accommodation of visitors. (Approved Jan. 26, 1915.)

ELLEN WILSON MEMORIAL HOMES.

George Foster Peabody, Hugh C. Wallace, Arthur Jeffrey Parsons, Walter S. Ufford, Archibald Hopkins, Julia C. Lathrop, Grace V. Bicknell and Charlotte Everett Hopkins, their associates and successors, have created a body corporate and politic in the District of Columbia, by the name, title and style of the Ellen Wilson Memorial Homes, and by that name shall have perpetual succession, and it shall be lawful for the corporation to have a common seal, sue and be sued, plead and be impleaded, and have and exercise all the rights, privileges and immunities for the purposes of the corporation created, which purposes are declared to be to acquire, hold, improve, rent, mortgage, sell and convey real estate within the District of Columbia for building, in memory of the late Mrs. Woodrow Wilson, one or more blocks of sanitary houses for the working classes and renting the same at a rental sufficiently low to cause the abandonment of dilapidated and insanitary houses as an object lesson in the housing of the working classes, under good conditions and at reasonable rates. The value of any and all property so acquired shall not exceed the sum of \$500,000. (Approved March 3, 1915.)

PANAMA-PACIFIC COINS.

The secretary of the treasury shall cause to be coined at the mint at San Francisco not exceeding 3,000 gold coins of the denomination of \$50 each, 10,000 gold coins of the denomination of \$2.50 each, 25,000 gold coins of the denomination of \$1 each and not exceeding 200,000 silver coins of the denomination of 50 cents each, all of legal weight and fineness, said coins to be struck in commemoration of the Panama-Pacific International exposition. The words, devices and designs upon said coins shall be determined and prescribed by the secretary of the treasury, and all provisions of law relative to the coinage and legal tender value of all other gold and silver coins shall be applicable to the coins issued in accordance with the provisions of this act, and one-half of the issue of \$50 gold coins herein authorized shall be similar in shape to the octagonal \$50 gold pieces issued in California in 1851, and the entire issue of said \$50, \$2.50 and \$1 coins herein authorized shall be sold and delivered by the secretary of the treasury to the Panama-Pacific International Exposition company at par, under rules and regulations and in amounts to be prescribed by him. The coinage shall be executed as soon as may be and the delivery of said coins to begin not later than the day of the opening of the exposition. Said 50 cent coins herein authorized shall be issued only upon the request of the Panama-Pacific International Exposition company, and shall be delivered to it by the secretary of the treasury, at par, during the period when said Panama-Pacific International exposition shall be officially open. (Approved Jan. 16, 1915.)

INCREASE OF THE NAVY.

The naval appropriation bill provides: For the purpose of further increasing the naval establishment of the United States the president is authorized to have constructed two first class battle ships, carrying as heavy armor and as powerful armament as any vessel of their class, to have the highest practicable speed and greatest desirable radius of action, and to cost, exclusive

of armor and armament, not to exceed \$7,800,000 each.

Six torpedo boat destroyers, to have a speed of not less than thirty knots per hour and to cost, exclusive of armor and armament, not to exceed \$925,000 each.

Provided, That three of the torpedo boat destroyers authorized shall be built on the Pacific coast. Provided further, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

Two submarines to be of seagoing type to have a surface speed of twenty-five knots or more if possible, but not less than twenty knots, to cost, exclusive of armor and armament, not exceeding \$1,500,000 each, and sixteen submarines to cost, exclusive of armor and armament, not exceeding \$550,000 each, and the sum of \$4,090,000 is appropriated for these purposes.

Five of the submarine torpedo boats authorized shall be built on the Pacific coast, provided the cost of construction there does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific.

One oil fuel ship, to cost, exclusive of armor and armament, not to exceed \$1,140,000.

The sum of \$20,664,449 is appropriated for the construction and machinery, and for armor and equipment, \$18,957,998. The total amount appropriated for the increase of the navy is \$45,053,801. (Approved March 3, 1915.)

THANKS TO AND PROMOTION OF PANAMA CANAL BUILDERS.

The thanks of congress are extended to the following officers of the army and navy of the United States who as members of the late Isthmian canal commission have rendered distinguished service in constructing the Panama canal, to wit: Col. George W. Goethals, chairman and chief engineer; Brig.-Gen. William C. Gorgas, sanitary expert; Col. H. F. Hodges, Lieut.-Col. William L. Sibert and Commander H. H. Rousseau.

The president is authorized by and with the advice and consent of the senate to advance in rank Col. George W. Goethals to the grade of major-general of the line, United States army; Brig.-Gen. William C. Gorgas to the rank of major-general in the medical department, United States army; Col. H. F. Hodges and Lieut.-Col. William L. Sibert to the grade of brigadier-general of the line, United States army, and Commander H. H. Rousseau to the grade of rear-admiral of the lower line, United States navy.

Such officers of the army and navy as were detailed for duty with the isthmian canal commission on the Isthmus of Panama for more than three years and who shall not have been advanced in rank by any other provision of this bill shall be advanced one grade in rank upon retirement: Provided, that any officer of the army or navy now on the retired list with similar service shall be immediately advanced one grade in rank on the retired list of the army and navy.

The president is further authorized by and with the advice and consent of the senate to appoint such officers of the public health service as were detailed for duty with the isthmian canal commission on the Isthmus of Panama for more than three years to the grade next above that at present held by such officers. (Approved March 4, 1915.)

[The appointments authorized by the act were made by the president and approved by the senate in open session on the same day that the act was passed—March 4, 1915.]

GRADES OF ADMIRAL AND VICE-ADMIRAL RE-ESTABLISHED.

The naval appropriation bill of 1915 provides: That hereafter the commander-in-chief of the United States Atlantic fleet, the commander-in-chief of the United States Pacific fleet and the commander-in-chief of the Asiatic fleet, respectively, shall each, after being designated as such commander-in-chief by the president, and from the date of assuming command of such fleet until

his relinquishment of such command, have the rank and pay of an admiral, and in each of the above named fleets the officer serving as second in command thereof shall each, after being designated as such second in command by the president, and from the date of assuming duty as such second in command until his relinquishment of such duty, have the rank and pay of a vice-admiral, and the grades of admiral and vice-admiral in the navy are hereby re-established and authorized. The annual pay of an admiral shall be \$10,000 and of a vice-admiral \$9,000: Provided, that in time of peace officers to serve as commander-in-chief and as second in command of the three said fleets shall be designated from among the rear-admirals on the active list of the navy: Provided further, that nothing herein contained shall create any vacancy in any grade in the navy nor increase the total number of officers allowed by existing law, and that when an officer is detached from duty as such commander-in-chief or as such second in command as above provided, he shall return to his regular rank in the list of rear-admirals and shall thereafter receive only the pay and allowances of such regular rank. (Approved March 3, 1915.)

[Under the authority conferred upon him by the foregoing section of the naval appropriation bill President Wilson, March 10, 1915, designated as admirals Frank F. Fletcher, commander-in-chief of the United States Atlantic fleet; Thomas B. Howard, commander-in-chief of the United States Pacific fleet, and Walter C. Cowies, commander-in-chief of the United States Asiatic fleet. The title of George Dewey, as "admiral of the navy," was not affected by the change of grades.]

ENFORCEMENT OF NEUTRALITY.

Resolved by the senate and house of representatives of the United States of America in congress assembled, That, from and after the passage of this resolution, and during the existence of a war to which the United States is not a party and in order to prevent the neutrality of the United States from being violated by the use of its territory, its ports or its territorial waters as the base of operations for the armed forces of a belligerent, contrary to the obligations imposed by the law of nations, the treaties to which the United States is a party or contrary to the statutes of the United States, the president be and he is hereby authorized and empowered to direct the collectors of customs under the jurisdiction of the United States to withhold clearance from any vessel, American or foreign, which he has reasonable cause to believe to be about to carry fuel, arms, ammunition, men or supplies to any warship, or tender or supply ship of a belligerent nation, in violation of the obligations of the United States as a neutral nation. In case any such vessel shall depart or attempt to depart from the jurisdiction of the United States without clearance for any of the purposes above set forth, the owner or master or person or persons having charge or command of such vessel shall severally be liable to a fine of not less than \$2,000 nor more than \$10,000, or to imprisonment not to exceed two years, or both, and, in addition, such vessel shall be forfeited to the United States. That the president of the United States be and he is hereby authorized and empowered to employ such part of the land or naval forces of the United States as shall be necessary to carry out the purposes of this resolution. That the provisions of this resolution shall be deemed to extend to all land and water, continental or insular, within the jurisdiction of the United States. (Approved March 4, 1915.)

STANDARD BARREL.

The standard barrel for fruits, vegetables and other dry commodities other than cranberries shall be of the following dimensions when measured without distention of its parts: Length of stave, twenty-eight and one-half inches; diameter of heads, seventeen and one-eighth inches; distance between heads, twenty-six inches; circumference of bulge, sixty-four inches, outside measurement, and the thickness of staves not

greater than four-tenths of an inch: Provided, that any barrel of a different form having a capacity of 7,056 cubic inches shall be a standard barrel. The standard barrel for cranberries shall be of the following dimensions when measured without distention of its parts: Length of staves, twenty-eight and one-half inches; diameter of heads, sixteen and one-fourth inches; distance between heads, twenty-five and one-fourth inches; circumference of bulge, fifty-eight and one-half inches, outside measurement, and the thickness of staves not greater than four-tenths of an inch.

It shall be unlawful to sell or expose for sale in any state, territory or the District of Columbia, or to ship from any state, territory or the District of Columbia to any other state, territory or the District of Columbia or to a foreign country, a barrel containing fruits or vegetables or any other dry commodity of less capacity than the standard barrels defined in the first section of the act or subdivisions thereof known as the third, half and three-quarters barrel, and any person guilty of a willful violation of any of the provisions of this act shall be deemed guilty of a misdemeanor and be liable to a fine not to exceed \$500 or imprisonment not to exceed six months, in the court of the United States having jurisdiction: Provided, however, that no barrel shall be deemed below standard within the meaning of the act when shipped to any foreign country and constructed according to the specifications or directions of the foreign purchaser if not constructed in conflict with the laws of the foreign country to which the same is intended to be shipped.

Reasonable variations shall be permitted and tolerance shall be established by rules and regulations made by the director of the bureau of standards and approved by the secretary of commerce. Nothing in the act shall apply to barrels used in packing or shipping commodities sold exclusively by weight or numerical count. This act shall be in force and effect from and after the first day of July, 1916. (Approved March 4, 1915.)

WELFARE OF AMERICAN SEAMEN.

The purpose of the law is given in its title, which is: "An act to promote the welfare of American seamen in the merchant marine of the United States; to abolish arrest and imprisonment as a penalty for desertion and to secure the abrogation of treaty provisions in relation thereto, and to promote safety at sea." The act goes into minute detail as to the duties, conditions of work, payment, treatment and discharge of seamen. Among other things it provides that every sailor shall be paid on demand one-half part of the wages he shall have earned at every port where the vessel touches, but not more than once in five days; that every part of a vessel appropriated for the use of the crew shall have sixteen feet of floor or deck space to each man; that each seaman shall have a separate berth; that there shall be a compartment for hospital purposes; that flogging and all forms of corporal punishment shall be abolished; that no advance payment of wages shall be made to any seaman or to any other person for the shipment of seamen; and that no vessel of 100 gross tons and upward navigating the oceans and the great lakes shall leave any port of the United States unless she has on board a crew not less than 75 per cent of which are able to understand any order given, nor unless 40 per cent in the first year, 45 per cent in the second, 50 per cent in the third, 55 per cent in the fourth year after the passage of the act, and thereafter 65 per cent of the deck crew are of a rating not less than able seaman.

The act gives in detail the number and kind of lifeboats, pontoon rafts and other safety appliances to be carried by ships on the ocean and great lakes and provides that for each lifeboat or raft there shall be a certain number of certified lifeboat men. Life jackets and life buoys shall be of approved material and construction. In the judgment of congress articles in treaties and conventions of the United States, in so far

as they provide for the arrest and imprisonment of officers and seamen deserting or charged with desertion from merchant vessels of the United States in foreign countries, and for the arrest and imprisonment of officers and seamen deserting or charged with desertion from merchant vessels of foreign nations in the United States and the territories and possessions thereof, and for the co-operation, aid and protection of competent legal authorities in effecting such arrest or imprisonment and any other treaty provision in conflict with the provisions of this act, ought to be terminated and to this end the president be and he is hereby requested and directed within ninety days after the passage of the act to give notice to the several governments, respectively, that so much as described of all such treaties and conventions will terminate on the expiration of such periods after notices have been given as may be required in such treaties and conventions.

Upon the expiration after notice of the periods required and of one year in the case of the independent state of the Congo, so much as described in each and every one of said articles shall be deemed and held to have expired and to be of no force and effect and thereupon section 5280 and so much of section 4081 of the revised statutes as relates to the arrest or imprisonment of officers and seamen deserting or charged with desertion from merchant vessels of foreign nations in the United States and territories and possessions thereof and for the co-operation, aid and protection of competent legal authorities in effecting such arrest or imprisonment, shall be and is repealed.

The act shall take effect as to all vessels of the United States eight months after its passage and as to foreign vessels twelve months after its passage, except that such parts as are in conflict with articles of any treaty or convention with any foreign nation shall take effect as regards the vessels of such foreign nation on the expiration of the period fixed in the notice of abrogation of the said articles. (Approved March 4, 1915.)

IMPROVEMENT OF FOREIGN SERVICE.

Hereafter all appointments of secretaries in the diplomatic service and of consuls-general and consuls shall be by commission to the offices of secretary of embassy or legation, consul-general or consul and not by commission to any particular post, and such officers shall be assigned to posts and transferred from one post to another by order of the president as the interests of the service may require. Provided, that any such officer may be assigned for duty in the department of state without loss of grade, class or salary, such assignment to be for a period of not more than three years unless the public interests demand further service, when such assignment may be extended for a period not to exceed one year and no longer: Provided further, that no secretary, consul-general or consul shall be promoted to a higher class except upon the nomination of the president with the advice and consent of the senate.

Secretaries in the diplomatic service and consuls-general and consuls shall hereafter be graded and classified as follows, with the salaries of each class herein affixed thereto.

SECRETARIES.

Secretary of class one, \$3,000.
Secretary of class two, \$2,625.
Secretary of class three, \$2,000.
Secretary of class four, \$1,500.
Secretary of class five, \$1,200.

CONSULS-GENERAL.

Consul-general of class one, \$12,000.
Consul-general of class two, \$8,000.
Consul-general of class three, \$6,000.
Consul-general of class four, \$5,500.
Consul-general of class five, \$4,500.

CONSULS.

Consul of class one, \$3,000.
Consul of class two, \$6,000.
Consul of class three, \$5,000.
Consul of class four, \$4,500.
Consul of class five, \$4,000.

Consul of class six, \$3,500.
 Consul of class seven, \$3,000.
 Consul of class eight, \$2,500.
 Consul of class nine, \$2,000.

Section 1674 of the revised statutes is amended to read as follows:

"Sec. 1674. That the official designations employed throughout this title shall be deemed to have the following meanings, respectively:

"First. 'Consul-general' and 'consul' shall be deemed to denote full, principal and permanent consular officers as distinguished from subordinates and substitutes.

"Second. 'Consular agent' shall be deemed to denote consular officers subordinate to such principals exercising the powers vested in them and performing the duties prescribed for them by regulation of the president at posts or places different from those at which such principals are located, respectively.

"Third. 'Vice-consuls' shall be deemed to denote consular officers subordinate to such principals exercising and performing the duties within the limits of their consulates at the same or at different points and places from those at which the principals are located, except that when vice-consuls take charge of consulates-general or consulates when the principal officers shall be temporarily absent or relieved from duty they shall be deemed to denote consular officers who shall be substituted, temporarily, to fill the places of said consuls-general or consuls.

"Fourth. 'Consular officer' shall be deemed to include consuls-general, consuls, vice-consuls, interpreters in consular offices, student interpreters and consular agents and none others.

"Fifth. 'Diplomatic officer' shall be deemed to include ambassadors, envoys extraordinary, ministers plenipotentiary, ministers resident, commissioners, charge d'affaires, agents, secretaries of embassy and legation and secretaries in the diplomatic service and none others."

The offices of vice-consul-general, deputy consul-general and deputy consul are abolished.

No ambassador, minister, minister resident, diplomatic agent, or secretary in the diplomatic service of any grade or class shall while he holds his office, be interested in or transact any business as a merchant, factor, broker or other trader, or as an agent for any such person to, from or within the country or countries to which he or the chief of his mission, as the case may be, is accredited, either in his own name or in the name or through the agency of any other person, nor shall he in such country or countries practice as a lawyer for compensation or be interested in the fees or compensation of any lawyer so practicing. (Approved Feb. 5, 1915.)

UNITED STATES NAVAL RESERVE.

The naval appropriation bill of 1915 provides: There is hereby established a United States naval reserve, which shall consist of citizens of the United States who have been or may be entitled to be honorably discharged from the navy after not less than one four-year term of enlistment or after a term of enlistment during minority. The naval reserve shall be organized under the bureau of navigation and shall be governed by the article for the government of the navy and by the naval regulations and instructions. Whenever actively employed with the navy its members shall be employed as members of the naval reserve and shall be held and considered to be in all respects in the same status as enlisted men of the navy on active duty, except that they shall not be advanced in rating in time of peace. When not actively employed with the navy, members of the naval reserve shall not be entitled to any pay, bounty, gratuity or pension except the pay expressly provided for members of the naval reserve by the provisions of this act, nor shall they be entitled to retirement by reason of such service in the naval reserve.

Enlistments in the naval reserve shall be made in the rating in which last honorably discharged from the navy for a period of four years unless sooner discharged by competent authority. No man shall be first enlisted in the naval reserve after eight years from the date of his last dis-

charge from the navy nor unless he be found to be physically fit to perform the duties of the rating in which last discharged, nor shall any man whose last service in the navy was terminated by any means other than by an honorable discharge be eligible for enlistment in the naval reserve. Re-enlistments in the naval reserve shall be made under such regulations as may be prescribed by the secretary of the navy.

Enlistments in the naval reserve shall be made in two classes. Class one shall consist of those men who enlist in the naval reserve within four months from the date of their last honorable discharge from the navy. Class two shall consist of those men who enlist in the naval reserve after four months and within eight years from the date of their last honorable discharge from the navy.

In addition to the enlistments in the naval reserve above provided, the secretary of the navy is authorized to transfer to the naval reserve at the expiration of an enlistment any enlisted man of the navy who may, after two years from the date of approval of this act, complete service in the navy of sixteen or twenty or more years and be entitled at the expiration of his enlistment to an honorable discharge. Such transfers shall only be made upon voluntary application and in the rating in which then serving and the men so transferred shall be continued in the naval reserve until discharged by competent authority.

Members of the naval reserve of class one and men transferred to the naval reserve shall be required to keep on hand such part of the uniform clothing outfit as may be prescribed by the secretary of the navy and all members of the naval reserve shall be issued a distinctive badge or button which may be worn with civilian dress.

Members of class one who have served less than eight years in the navy shall be paid at the rate of \$30 per annum, and those who have served eight or more years, and less than twelve years in the navy shall be paid at the rate of \$60 per annum, and those who have served twelve or more years in the navy, \$100 per annum. All members of the naval reserve of class two shall be paid at the rate of \$12 per annum and when first called into active service on board a vessel of the navy shall receive an allowance for an outfit of clothing not exceeding \$30 in value, to be expended under regulations prescribed by the secretary of the navy.

Members of the naval reserve who have, when transferred to the naval reserve, completed service in the navy of sixteen or twenty or more years shall be paid at the rate of one-third and one-half, respectively, of the base pay plus permanent additions thereto, which they were receiving at the close of their last service in the navy.

Members of the naval reserve may in time of peace be required to perform not less than one month's active service on board a vessel of the navy during each year of service in the naval reserve, and such active service shall not exceed two months in any one year: Provided, that the unpaid active service with the navy may be required at any time after contract in the naval reserve. In time of war they may be required to perform active service with the navy throughout the war, not to exceed the term of enlistment in the case of those enlisted in the naval reserve. Any pay which may be due any member of the naval reserve shall be forfeited when so ordered by the secretary of the navy upon the failure, under such conditions as may be prescribed by the secretary of the navy, of such man to report for muster and inspection.

Those members of the naval reserve of class one and those members who have been transferred to the naval reserve who re-enlist in the navy within four months from the date of their discharge from the naval reserve shall not be entitled to a gratuity of four months' pay, but their re-enlistment in the navy shall be held and considered to have been made within four months from the date of discharge from the navy for the purpose of continuous service pay. The period of time during which members of the naval reserve

were actively employed with the navy while enlisted in the naval reserve shall, for the purposes of retirement, be counted as active service in the navy in the case of those who re-enlist in the navy after service in the naval reserve.

The secretary of the navy is authorized in time of war, or when, in the opinion of the president, war is threatened, to call any enlisted man on the retired list into active service for such duty as he may be able to perform. While so employed such enlisted men shall receive the same pay and allowances they were receiving when placed on the retired list: Provided, that enlisted men on the retired list shall not be eligible for enlistment in or transfer to the naval reserve.

The sum of \$130,000 is hereby appropriated to carry into effect the foregoing provisions relating to a naval reserve. (Approved March 3, 1915.)

COAST GUARD CREATED.

There shall be established in lieu of the existing revenue cutter service and the life saving service, to be composed of those two existing organizations, with the existing offices and positions and the incumbent officers and men of those two services, the coast guard, which shall constitute a part of the military forces of the United States and which shall operate under the treasury department in time of peace and operate as a part of the navy, subject to the orders of the secretary of the navy, in time of war or when the president shall so direct. When subject to the secretary of the navy in time of war the expense of the coast guard shall be paid by the navy department: Provided, that no provision of this act shall be construed as giving any officer of either the coast guard or the navy, military or other control at any time over any vessel, officer or man of the other service except by direction of the president.

In the coast guard there shall be a captain commandant, senior captains, captains, first lieutenants, second lieutenants, third lieutenants, engineer in chief, captains of engineers, first lieutenants of engineers, second lieutenants of engineers, third lieutenants of engineers and constructors, cadet and cadet engineers, warrant officers, petty officers and other enlisted men, all of said offices, respectively, corresponding to the present offices of the revenue cutter service, which are transferred to the coast guard, and all the present incumbents, officers and enlisted men are also transferred to corresponding positions in the coast guard; a general superintendent, assistant general superintendent, district superintendents, keepers and surfmen, which offices and positions shall be transferred from the corresponding positions in the existing life saving service and be made like positions in the coast guard, and all the incumbent officers and surfmen shall be transferred to such corresponding positions in the coast guard, in which the superintendents shall be commissioned as such, keepers shall be warrant officers and surfmen shall be enlisted men, of which enlisted men the number one surfmen shall be petty officers.

There shall be in the administrative service of the coast guard two chiefs of division, to be appointed by the secretary of the treasury, with annual salary of \$3,000 each, together with such clerical and technical positions and the incumbents therein as it may be necessary to transfer from the two existing organizations to the coast guard. There may be such other clerical and technical assistance as may from time to time be authorized by congress.

Except as herein modified all existing laws relating either to the present life saving service or the present revenue cutter service shall remain of force as far as applicable to the coast guard and the offices, positions, operations and duties shall in all respects be held and construed to impose the same duties upon the positions and their incumbents in the coast guard as are now imposed upon the corresponding positions and incumbents in the said two existing organizations. The provisions of the act entitled "An act to regulate enlistments and punishments in the United States

revenue cutter service," approved May 26, 1906, shall apply to and govern the coast guard.

All duties now performed by the revenue cutter service and life saving service shall continue to be performed by the coast guard, and all such duties, together with all duties that may hereafter be imposed upon the coast guard, shall be administered by the captain commandant, under the direction of the secretary of the treasury, and all funds and appropriations now provided by law for the revenue cutter service and for the life saving service shall be available for like purposes under the coast guard hereby created.

All existing laws affecting rank, pay and allowances in the present life saving service and the present revenue cutter service shall apply to the corresponding positions in the coast guard and the officers and men transferred thereto and their successors. This shall include all laws and regulations which now give to the enlisted men of the existing revenue cutter service increased pay of \$1 per month for each three years' service, allowances for uniforms and all other allowances or gratuities due to enlisted men, which are hereby made applicable to the enlisted men of the coast guard who were formerly surfmen in the life saving service.

The provisions of sections 3, 4, 5, 6, 7, 8 and 9 of the act of April 12, 1902, in so far as they provide for the retirement of officers of the revenue cutter service, are hereby extended to include commissioned officers, warrant officers and enlisted men of the coast guard. A commissioned officer, warrant officer or enlisted man who has served thirty years, upon suitable application and as to commissioned officers upon approval by the secretary of the treasury, may be retired from active service and receive 75 per centum of the duty pay, salary and increase of his grade or rating: Provided, that such commissioned officer, warrant officer or enlisted man may be assigned to such duties as he may be able to perform. The commissioned officers, warrant officers and petty officers of the coast guard shall receive 10 per centum increase of pay for every five years of service, such increase not to exceed 40 per centum of the pay of their grade or rating subject to the limitations of existing laws governing longevity pay: Provided further, that in computing length of service for any purpose all creditable service in the army, navy, marine corps, revenue cutter service and life saving service shall be included counting part of a year as a whole year where stations were operated only part of a year: And provided further that no person shall receive for the same time retired pay and the extra pay allowed under section 7 of the act of May 4, 1882. The provisions of section 3 of the act of March 26, 1908, increasing the efficiency of the personnel of the life saving service shall apply to the death of any officer, warrant officer or enlisted man on the active list in the coast guard: Provided, that no pension shall be allowed or paid to any commissioned officer, warrant officer or enlisted man in the coast guard either on the active or retired list.

Hereafter, whenever a vacancy occurs in the grade of keeper of a life saving station or house of refuge it shall be filled by promotion and no appointment from the grade of surfman, and whenever a vacancy shall occur in the grade of district superintendent the vacancy shall be filled by promotion and appointment from the grade of keeper: Provided, that the district superintendents shall be the chief officers and first in authority in their respective districts, subject to the authority of the captain commandant.

When the organization of the coast guard shall have been perfected the president is authorized to retire the general superintendent on 75 per centum of his present salary, and no further appointment shall be made to such office. At the same time the office of assistant general superintendent shall be abolished.

The captain commandant of the coast guard shall submit to the secretary of the treasury, for transmission to congress, an annual report of the expenditures of the moneys appropriated for the maintenance of the coast guard and of the operations of the coast guard during the year.

Any person using any vessel in the coast guard service for private purposes, in violation of law, shall upon conviction thereof be fined \$1,000. (Approved Jan. 23, 1915.)

OPIMUM REGISTRATION LAW.

HARRISON ANTINARCOTIC ACT.

On and after March 1, 1915, every person who produces, imports, manufactures, compounds, deals in, dispenses, sells, distributes or gives away opium or coca leaves or any compound, manufacture, salt, derivative or preparation thereof shall register with the collector of internal revenue of the district his name or style, place of business and place or places where such business is to be carried on. At the time of such registry and on or before July 1, annually, thereafter, every such person shall pay to the collector a special tax at the rate of \$1 per annum. Employees of persons so registered and taxed are not required to register or pay the tax; officials of the government, of the states and of counties and municipalities making purchases of opium drugs for hospitals or prisons are also exempt.

It shall be unlawful for any person to sell, barter, exchange or give away any of the aforesaid drugs except in pursuance of a written order of the person to whom such article is sold, bartered, exchanged or given, on a form to be issued in blank for that purpose by the commissioner of internal revenue. Every person who shall accept any such order and in pursuance thereof shall sell, barter, exchange or give away any of the drugs shall preserve such order for a period of two years in such a way as to be readily accessible to inspection by any officer, agent or employee of the treasury department duly authorized for that purpose, and the state, territorial, district, municipal and insular officials named in the act. Every person who shall give an order as herein provided to any other person for any of the aforesaid drugs shall, at or before the time of giving such order, make or cause to be made a duplicate thereof on a form to be issued in blank for that purpose by the commissioner of internal revenue, and in case of the acceptance of such order shall preserve such duplicate for said period of two years in such a way as to be readily accessible to inspection by the officers, agents, employees and officials hereinbefore mentioned. Nothing contained in this section shall apply—

(a) To the dispensing or distribution of any of the aforesaid drugs to a patient by a physician, dentist or veterinary surgeon registered under this act in the course of his professional practice only: Provided, that such physician, dentist or veterinary surgeon shall keep a record of all such drugs dispensed or distributed, showing the amount dispensed or distributed, the date and the name and address of the patient to whom such drugs are dispensed or distributed, except such as may be dispensed or distributed to a patient upon whom such physician, dentist or veterinary surgeon shall personally attend, and such record shall be kept for a period of two years from the date of dispensing or distributing such drugs, subject to inspection, as provided in this act.

(b) To the sale, dispensing or distribution of any of the aforesaid drugs by a dealer to a consumer under and in pursuance of a written prescription issued by a physician, dentist or veterinary surgeon registered under this act: Provided, however, that such prescription shall be dated as of the day on which signed and shall be signed by the physician, dentist or veterinary surgeon who shall have issued the same: And provided further, that such dealer shall preserve such prescription for a period of two years from the day on which such prescription is filled in such a way as to be readily accessible to inspection by the officers, agents, employees and officials hereinbefore mentioned.

(c) To the sale, exportation, shipment or delivery of any of the aforesaid drugs by any person within the United States or any territory or the District of Columbia or any of the insular possessions of the United States to any person in any foreign country regulating their entry in

accordance with such regulations for importation thereof into such foreign country as are prescribed by said country, such regulations to be promulgated from time to time by the secretary of state of the United States.

(d) To the sale, barter, exchange or giving away of any of the aforesaid drugs to any officer of the United States government or of any state, territorial, district, county or municipal or insular government lawfully engaged in making purchases thereof for the various departments of the army and navy, the public health service and for government, state, territorial, district, county or municipal or insular hospitals or prisons.

The commissioner of internal revenue, with the approval of the secretary of the treasury, shall cause suitable forms to be prepared for the purposes above mentioned, and shall cause the same to be distributed to collectors of internal revenue for sale by them to those persons who shall have registered and paid the special tax as required by this act in their districts, respectively, and no collector shall sell any of such forms to any persons other than a person who has registered and paid the special tax as required by this act in his district. The price at which such forms shall be sold shall not exceed \$1 per 100.

The provisions of this act shall apply to the United States, the District of Columbia, the territory of Alaska, the territory of Hawaii, the insular possessions of the United States and the Canal Zone. Internal revenue collected hereunder in Porto Rico and the Philippine Islands shall accrue to the general governments thereof.

Any person registered in any internal revenue district under the provisions of the act shall, whenever required to do so, give the internal revenue collector of the district a true statement, verified by affidavit, of the quantity of the aforesaid drugs received by him in the district during such period immediately preceding the demand of the collector, not exceeding three months, as the collector may determine; the names of the persons from whom the drugs were received, the quantity in each instance and the date when received.

It shall be unlawful for any person who shall not have registered and paid the special tax to send, ship, carry or deliver any of the aforesaid drugs from one state or territory to any person in any other state or territory of the United States. This does not apply to common carriers engaged in transporting such drugs or to any person who shall deliver any such drug, which has been prescribed or dispensed by a physician, dentist or veterinarian required to be registered under the act.

The duplicate order forms and the prescriptions required to be preserved and the statements filed in the office of the collector of the district shall be open to inspection by officers and employees of the treasury department authorized for that purpose, and such officials of any state or territory, or of any organized municipality therein, or of the District of Columbia, or any insular possession of the United States, as shall be charged with the enforcement of any law or municipal ordinance regulating the sale, prescribing, dispensing, dealing in or distribution of the aforesaid drugs. Each collector of internal revenue is authorized to furnish, upon written request, certified copies of any of the said statements or returns filed in his office to any of such officials as shall be entitled to inspect the statements or returns upon the payment of a fee of \$1 for each 100 words or fraction thereof in the copy or copies so requested. Any person who shall disclose the information contained in the statements or returns or in the duplicate order forms, except as expressly provided and except for the purpose of enforcing the provisions of this act, shall on conviction be fined or imprisoned as provided by the act. Collectors of internal revenue are authorized to furnish upon written request to any person a certified copy of the names of any or all persons who may be listed in their respective collection districts as special taxpayers under the provisions of this act, upon payment of a fee of \$1 for each 100 names or fraction thereof in the copy so requested.

The provisions of this act shall not be construed to apply to the sale, distribution, giving away, dispensing or possession of preparations and remedies which do not contain more than two grains of opium, or more than one-fourth of a grain of morphine, or more than one-eighth of a grain of heroin, or more than one grain of codeine, or any salt or derivative of any of them, in one fluid ounce, or, if a solid or semisolid preparation, in one avoirdupois ounce; or to liniments, ointments or other preparations which are prepared for external use only, except liniments, ointments and other preparations which contain cocaine or any of its salts or alpha or beta eucaine or any of their salts or any synthetic substitute for them. Provided, that such remedies and preparations are sold, distributed, given away, dispensed or possessed as medicines and not for the purpose of evading the intentions and provisions of the act. The provisions of this act shall not apply to preparations of coca leaves which do not contain cocaine.

It shall be unlawful for any person not registered under the provisions of this act, and who has not paid the special tax provided for by this act, to have in his possession or under his control any of the aforesaid drugs, and such possession or control shall be presumptive evidence of a violation of the provisions of the act. Provided, that this shall not apply to any employee of a registered person or to a nurse under the supervision of a physician, dentist or veterinary surgeon registered under this act, having such possession or control by virtue of his employment or occupation and not on his own account, or to the possession of any of the aforesaid drugs which has or have been prescribed in good faith by a physician, dentist or veterinary surgeon registered under this act, or to any United States, state, county, municipal, district, territorial or insular officer or official who has possession of any said drugs, by reason of his official duties, or to a warehouseman holding possession for a person registered and who has paid the taxes under this act, or common carriers engaged in transporting such drugs.

Any person who violates or fails to comply with any of the requirements of this act shall on conviction be fined not more than \$2,000 or be imprisoned not more than five years, or both, in the discretion of the court.

The sum of \$150,000, or so much thereof as may be necessary is hereby appropriated for the purpose of carrying into effect the provisions of this act. (Approved Dec. 21, 1914.)

RULES FOR PHYSICIANS, DENTISTS AND VETERINARY SURGEONS.

The commissioner of internal revenue is authorized to prepare rules and regulations for carrying the provisions of the foregoing act into effect. The following is an extract from these regulations:

Art. 10. Under the exempting provisions of section 2 of the act, no written order is required for the "dispensing or distribution of any of the aforesaid drugs to a patient by a physician, dentist or veterinary surgeon, registered under this act, in the course of his professional practice only." A record, however, is required to be kept of all such drugs so dispensed or distributed (except such as may be dispensed or distributed to a patient upon whom such physician, dentist or veterinary surgeon shall personally attend—i. e., personally visit) and must show:

1. The date when any such drug is dispensed or distributed;
2. The kind and quantity dispensed or distributed in each case, and
3. The name and residence of the patient to whom such drug was dispensed or distributed.

The record so kept must be preserved for a period of two years from the date of dispensing or distributing and will be subject to inspection as provided in section 5 of the act. Each physician, dentist and veterinary surgeon must supply himself with a suitable blank book for such record.

Art. 11. A like exemption to that above noted is made as to drugs dispensed or distributed under and in pursuance of a written prescription

issued by a physician, dentist or veterinary surgeon, duly registered under this act. But all such prescriptions covering such drugs, not specifically exempt by section 5 of the act, must be dated and signed as of the day when issued; must be preserved for a period of two years from the time when filled, and must be readily accessible to the inspecting officers above referred to.

Art. 12. Under the authority conferred by section 1 of the act named, for the issuing of regulations necessary for carrying the provisions of the act into effect, physicians and surgeons writing any such prescriptions are hereby required to sign their name in full to the same, to state therein their registry number and the location of their office and the name and address of the person for whom such prescriptions are written. Druggists and apothecaries must refuse to fill any such prescription unless signed as herein required, nor must prescriptions for such drugs be filled by any druggist or apothecary if he has reason to suspect that it was fraudulently issued or obtained.

The dispensing of such drugs by druggists or apothecaries except on physicians' original prescriptions or on original orders issued to persons who have duly registered, will be in violation of the act. Refilling of prescriptions or orders is therefore prohibited.

THE SHIPPING BILL.

The feature of the third session of the 63d congress was the attempt to pass a bill authorizing the government to own and operate merchant vessels in the foreign trade of the United States. The measure was earnestly advocated by President Wilson and was laid before the senate Jan. 4, 1915. It met with vigorous opposition, several republican senators announcing that they would use every every available parliamentary device to defeat it on the ground that it could not be properly debated in the short period remaining before the close of the session, especially in view of the fact that much of the work had to be required for passing the annual appropriation bills. Jan. 6 a substitute for the original bill was reported by the committee on commerce as being more explicit than the first draft, though practically identical with it as to all features of importance. Jan. 7 the bill was laid aside for an appropriation bill, but Jan. 18 it was finally taken up as the main business of the senate and was considered continuously for five days. The speeches were all by republicans opposing the measure.

Opposition developed also in the ranks of the democratic senators and a number of caucuses were held in an effort to arrive at a compromise which would enable the senate, which practically was tied, to pass the bill. The result was the submission, Jan. 25, of a second substitute by the committee on commerce. This made further changes in the verbiage of several of the sections, particularly those relating to the formation and composition of the federal shipping board and corporation. The amended bill was opposed as energetically as were the original and first substitute measures. The administration senators, led by William J. Stone, tried to get a vote on the bill by keeping it almost continuously before the senate, the daily sessions lasting usually until late in the evening. Owing to the absence of any cloture the republicans were able to carry on a successful "filibuster," though the physical endurance of some of the speakers was put to a severe test. One session, that ending on the evening of Feb. 10, lasted without intermission day and night for fifty-four hours. Then the republican senators, with the assistance of Messrs. Bankhead (Ala.), Camden (Ky.), Clarke, (Ark.), Hitchcock (Neb.), O'Gorman (N. Y.) and Vardaman (Miss.), democrats, and Messrs. Norris (Neb.) and Kenyon (Iowa), republican progressives, forced an adjournment. La Follette (Wis.), republican, voted with the administration democrats.

Finding that they could not force the shipping bill through the senate another plan was adopted to get action. This was to attach the measure to the Weeks bill, which provided for the ac-

quiring of a fleet of naval auxiliaries to be utilized as merchant vessels in commerce with South America. This had been passed by the senate and was pending before the house committee on naval affairs. If it could be passed by the house with the ship purchase bill as a rider it would come before the senate in the form of a conference report without being subject to amendment or other parliamentary disadvantages.

Feb. 16 the house committee on rules brought in a privileged resolution discharging the naval committee from further consideration of the Weeks bill, directing the house to proceed immediately to the consideration of the same and limiting the amendments to certain minor changes and the addition of twelve new sections embodying the ship purchase bill in its perfected form. The resolution allowed six hours of debate, after which a vote was to be had upon the final passage of the bill without intervening motions other than one to recommit. The resolution was adopted by a vote of 181 yeas to 126 nays, 112 not voting and 4 answering "present." At the close of the debate the Weeks bill, as amended by the ship purchase sections, was passed by a vote of 215 yeas to 121 nays, 89 not voting and 7 answering "present." Conference committees were subsequently appointed by both houses. The conferees agreed Feb. 26 to a report which was presented in the house March 2, but the point of order was raised against it that the conferees had gone beyond their jurisdiction in extending the time before the first four sections (the Weeks bill) of the measure should take effect from two years to three years. The speaker sustained the point of order and the bill was sent back to conference. The matter came up briefly in the senate March 3 on a resolution by Senator Fletcher that the senate insist upon its disagreement to the amendments of the house. Mr. Weeks then announced that more than a score of republican senators had indicated to him their wish to speak from one to several hours on the bill, whereupon Mr. Fletcher, who introduced the original shipping bill, said that he realized that this meant the defeat of the measure and that under the circumstances he did not feel justified in continuing the struggle. He therefore withdrew his resolution, thus ending the attempt to get the shipping bill enacted into law.

The full text of the Weeks bill as amended by the addition of sections 5 to 17 inclusive, embodying the shipping bill, is appended. It should be said that this latter was the measure which Senator Gore of Oklahoma had introduced as an amendment or of substitute for the second substitute or caucus shipping bill on which the senate had been deadlocked. It was similar in most respects, but provided that the shipping board and corporation should be temporary and not permanent:

Be it enacted, etc., That the secretary of the navy is hereby authorized to establish one or more United States navy mail lines, by employing such vessels of the navy as in his discretion are available, without impairment to the paramount duties of the navy and as are necessary and appropriate, for the purpose of establishing and maintaining regular communication between the east or west coast or both coasts of the United States and either or both coasts of South America and between the United States and the countries of Europe. The vessels so employed shall carry United States mail, passengers and freight under such regulations and at such rate or rates as the secretary of the navy may prescribe. Such civilians, such officers of the naval auxiliary service and such officers and enlisted men of the navy, including officers on the retired list, as the secretary of the navy may deem necessary, shall be employed in the business of the said mail line or lines, and retired officers of the navy so employed at sea or on shore shall, in all respects, be held and considered to be in an active duty status, and shall receive the pay and allowances of officers of the active list of the same rank and length of service: Provided, that officers placed on the retired list on account of wounds or disability incident to the service, or on account of age or after

thirty years' service, shall not be ordered to such duty without their consent.

The enlisted strength of the navy, as now or hereafter authorized by law, is hereby increased by the number of men required to man the vessels so employed, and the secretary of the navy is hereby authorized to enlist such number of men in the navy for such terms of enlistment, not to exceed four years, as may be desirable, and to distribute the number of men so enlisted among the various ratings of the navy.

Sec. 2. That in addition to and as a part of the line of the navy there is hereby established an active reserve list. Line officers placed on the active reserve list under the provisions of this act shall be held to be in an active duty status in all respects, except that officers on the active reserve list shall not be advanced on the active reserve list except for eminent and conspicuous conduct in battle or extraordinary heroism, when their advancement thereon for these causes shall be governed by the provisions of law governing the advancement of officers on the active list for like causes. All laws now in effect with reference to the retirement of officers on the active list are hereby extended to include officers on the active reserve list.

Sec. 3. That sections 8 and 9 of the act approved March 3, 1899, entitled "An act to reorganize and increase the efficiency of the personnel of the navy and marine corps of the United States," as amended by the act approved Aug. 22, 1912, entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1913, and for other purposes," are so far amended that officers who hereafter volunteer or are selected for retirement as therein provided shall be held and considered to have volunteered for transfer to the active reserve list, or shall be selected for transfer to the active reserve list, respectively, and the transfer of such officers to the active reserve list in lieu of their retirement shall be made subject to the restrictions imposed by the provisions of the said sections as amended.

Sec. 4. That in addition to such part of existing appropriations as may be available for the expenses of operating the line or lines herein provided for, the sum of \$100,000 is hereby appropriated, to be paid out of any money in the treasury of the United States not otherwise appropriated, to be expended in the discretion of the secretary of the navy for the purpose of organizing, inaugurating and carrying on the traffic provided for in this act and in defraying the operating expenses incident thereto: Provided, that all money received for the transportation of mail, passengers and freight, as provided in section 1 of this act, and for such other services as may be incident to the operation of said line or lines, is hereby made available, in addition to the aforesaid sum of \$100,000 herein appropriated for expenses incident to the proper conduct of the business contemplated in this act: Provided further, that any sum of money herein appropriated which remains unexpended at the end of the third fiscal year after the passage of this act and at the end of each fiscal year thereafter shall be covered into the treasury of the United States.

Sec. 5. That the United States, acting through the shipping board hereinafter created, may subscribe to the capital stock of a corporation of the District of Columbia. Said corporation shall have for its object the purchase, construction, equipment, maintenance and operation of merchant vessels to meet the requirements of the foreign commerce of the United States, or to charter vessels for such purposes and to make charters or leases of any vessel or vessels owned by such corporation to any other corporation organized under the laws of a state, a majority of the stock being owned by citizens of the United States, firm or individual, citizen or citizens of the United States, to be used for such purposes, and shall have power to carry out said objects and purposes: Provided, that the terms and conditions of such charter parties shall first be approved by the shipping board, the initial capital stock of which corporation shall not be over \$10,000,000 of the par value of \$100 per share: And

provided further, that said corporation shall make no charter or lease of any vessel to any corporation, firm or individual for a longer period than twelve months, and said corporation shall specify in the charter or lease the rates, charges and fares to be observed by such corporation, firm or individual chartering or leasing any such vessel or vessels as a maximum to be charged during the life of such charter or lease, and there shall be contained in said charter or lease a provision terminating the same whenever the charterer or the lessee shall violate any of its provisions. It is hereby made the duty of such corporation to take such steps as may be necessary to terminate any such charter or lease whenever the corporation, firm or individual party to such charter or lease shall violate the provisions of the same.

The members of said shipping board, as incorporators, may, for the purpose of carrying out the provisions of this act, form a corporation of the District of Columbia, by making and filing a certificate of incorporation, as provided in subchapter 4 of chapter 18 of an act entitled "An act to establish a code of laws for the District of Columbia," approved March 3, 1901.

The corporation so formed, its officers and trustees and stockholders, shall possess all the powers conferred and perform all the duties imposed by said subchapter 4, except as the same are by this act limited or qualified.

The powers of said corporation shall be limited to the purposes of this act and to such as are necessarily incident thereto.

Said corporation may sue and be sued in any district court of the United States, and may remove to said courts any cause brought against it in any other court.

Said corporation may require any officer or employee to give security for the faithful performance of his duties.

Persons subscribing to the stock of said company shall pay for the same in full at the time of subscription.

The stock owned by the United States shall be voted by the shipping board or its duly selected representative.

The officers and trustees of said corporation shall be citizens of the United States, but need not be citizens of the District of Columbia. Such officers and trustees shall be subject to removal at any time by vote of a majority of the stock at any meeting thereof.

Said corporation and its capital stock shall, so long as the United States owns a majority of said stock, be free from all public taxes.

At no time shall less than 51 per cent of the stock of said corporation be held by the United States unless the United States shall dispose of all of its stock.

Congress reserves the right to alter, amend or repeal this act.

Sec. 6. That the United States shall subscribe to 51 per cent of the initial capital stock of such corporation at par and the remainder thereof may be offered for public subscription at not less than par and the United States may then further subscribe at par for an amount of such stock not taken by public subscription, but the shipping board may cause such corporation to begin business as soon as 51 per cent of such stock has been subscribed and paid for by the United States. The shipping board, with the approval of the president, may consent to or may cause an increase of the capital stock from time to time as the interests of the corporation may require, but without authority of congress the portion of such increase to be paid for by the United States shall not exceed \$10,000,000, neither shall the proportion of stock held by the United States at any time be less than 51 per cent: Provided, that a sufficient number of the shares of stock of said corporation shall be set apart for holding by the persons for whom the stock of the United States may be voted as trustees, and such shares shall be issued or transferred to such persons to qualify them as trustees of such corporation, and such shares shall be transferred to the successor or successors of any such person or persons.

Sec. 7. That the United States, through the

shipping board and with the approval of the president, is authorized to purchase or construct vessels suitable in the judgment of the shipping board for the purposes of such corporation with a view to transferring them to such corporation, and for this purpose the secretary of the treasury, upon the request of the shipping board and the approval of the president, may issue and sell or use for such purchases or construction any of the bonds of the United States now available in the treasury of the United States under the act of Aug. 5, 1909, the act of Feb. 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama canal, to a total amount not to exceed \$30,000,000, for the purpose of purchasing or constructing such vessels: Provided, that any Panama canal bonds issued and sold or used under the provisions of this section or other existing authority may be made payable at such time after issue as the secretary of the treasury, in his discretion, may deem advisable and fix, instead of fifty years after date of issue, as in said act of Aug. 5, 1909, not exceeding fifty years: Provided further, that payments for such purchases or construction from the proceeds of sales of bonds or delivery of bonds in payment thereof shall be made only as ordered and directed by the shipping board. And provided further, that in making purchases of ships during the continuance of the present European war no purchases shall be made in a way which will disturb the conditions of neutrality.

Sec. 8. That the shipping board is authorized to transfer the vessels purchased or constructed as herein provided to any such corporation in which the United States has become a stockholder as hereinbefore provided, and such corporation shall issue to the United States in payment thereof its gold bonds, bearing interest at not less than four per cent per annum, and upon such further terms and conditions as may be prescribed by the shipping board, such bonds to be secured by a first mortgage lien upon such vessels, severally, thus transferred: Provided, that the amount of bonds received by the United States in payment for such vessels shall not be less, at the then par value, than the total amount expended by the United States in the purchase or construction of such vessels, and the same may be sold by the secretary of the treasury, in his discretion, and with the approval of the president, to reimburse the treasury for expenditures made in the purchase or construction of vessels: And provided further, that said corporation shall not issue any bonds in excess of \$40,000,000, or incur any liabilities other than stock issues in excess of \$10,000,000. Such corporation shall make suitable provision for sinking fund and for the depreciation charges under the rules and regulations to be prescribed by such shipping board, and all vessels acquired under this act or in which the United States shall otherwise be interested as owner, in whole or in part, or upon which the United States shall have or hold any mortgage, pledge, lien or other security, shall, when and while employed solely as merchant vessels, be in all respects subject to said laws, regulations and liabilities governing merchant vessels in like manner and to the same extent as merchant vessels in private ownership when duly registered under the laws of the United States.

All rules and regulations relating to or which affect shipping, navigation or water-borne commerce of the United States heretofore made or published by authority of law shall only be and remain in force until midnight on the 31st day of December, 1915, and by proclamation of the president shall cease to have any force or validity at any prior date when new shipping rules and regulations shall, as provided hereby, take the place of those now in existence.

The shipping board herein provided for shall propose such rules and regulations applicable to the shipping and water-borne commerce of the United States in lieu of those now in force and covering matters of like character as they may determine suited to the present needs of such shipping and commerce, which, when approved by the president and published, shall apply and be-

come of full force and effect, in lieu of such rules and regulations as are now applicable thereto. In the rules and regulations hereby authorized to be adopted and put into force different classes of shipping, navigation and water-borne commerce may be appropriately and differently treated and provided for. Such rules and regulations when promulgated may be modified, changed or amended by the shipping board.

Sec. 9. That vessels purchased or constructed by such shipping board and conveyed to such corporation as herein provided shall be entitled to registry under the laws of the United States, and shall be deemed vessels of the United States and entitled to the benefits and privileges appertaining to such vessels, except such vessels shall engage only in trade with foreign countries or with Alaska, the Philippine Islands, the Hawaiian Islands and the islands of Porto Rico, Guam and Tutulla: Provided, that the above restrictions shall not apply to such of said vessels as are built in the United States. Such vessels shall be subject to the navigation laws of the United States, except as herein provided.

Sec. 10. That the secretary of the treasury and the secretary of commerce and three additional members, two of whom shall be of practical experience in the management and operation of steamships in the foreign trade, are hereby constituted a board to be known as the shipping board, with full power, subject to the approval of the president, to vote the stock of the United States in said corporation, either as a body or by one or more of its members duly authorized by a majority, and to do all things necessary, whether specifically enumerated or not, to carry out the purposes of this act and protect the interest of the United States, said three additional members to be appointed by the president, by and with the advice and consent of the senate. The salary of each of the three additional members of said board so appointed shall be \$6,000 per annum.

Sec. 11. That, with the approval of the congress, such shipping board may at any time sell the stock of such corporation owned by the United States.

Sec. 12. That the president of the United States is hereby authorized to charter, lease or transfer such naval auxiliaries belonging to the naval establishment of the United States as are suitable for commercial use, and which are not required for use in the navy in time of peace, and vessels belonging to the war department suitable for commercial uses and not required for military transports in time of peace, and to direct or cause to be chartered, leased or transferred vessels now owned and operated by the Panama Railroad company to any corporation now or hereafter organized as in this act provided, upon such terms and conditions as the shipping board, with the approval of the president of the United States, shall prescribe. The vessels purchased or constructed by the United States through the shipping board, with the approval of the president of the United States, shall be of a type, as far as the commercial requirements of the foreign trade of the United States may permit, suitable for use as naval auxiliaries in the naval establishment of the United States.

Sec. 13. That the president of the United States, upon giving to any such corporation in which the United States shall be a stockholder, through its president, vice-president, secretary or manager, notice in writing for such reasonable length of time as in his judgment the circumstances require and will permit of his intentions so to do, may take possession, absolutely or temporarily, for use as naval auxiliaries of any vessel or vessels owned or leased by or otherwise in the possession of said corporation, and said corporation shall be entitled to a reasonable price or rental therefor, to be fixed by the shipping board with the approval of the president: Provided, that if in the judgment of the president an emergency exists requiring such action he may take possession of any such vessel or vessels without notice.

Sec. 14. That the shipping board shall make

to congress at the beginning of each regular session a report of expenditures and receipts under this act and of the operations of any corporation in which the United States may have become a stockholder hereunder.

Sec. 15. That for the purpose of carrying out the provisions of this act there is hereby appropriated out of any money in the treasury of the United States not otherwise appropriated, the sum of \$10,000,000, or in lieu of such appropriation the secretary of the treasury may sell Panama canal bonds to the amount of \$10,000,000 in addition to those provided for in section 7, and on the same terms, and set apart and use the proceeds thereof for such purposes.

Sec. 16. That two years from and after the conclusion of the present European war, that fact to be determined by the president, the corporation and the shipping board shall turn over and transfer all vessels purchased or constructed under the provisions of this act to the navy department, and the secretary of the navy shall have the right, with the approval of the president, to lease or charter any of such vessels not needed for naval or military purposes to any firm, individual or corporation for use as merchant vessels.

That the secretary of the navy shall in such leases provide for their cancellation whenever such vessels may be required for naval or military purposes.

That all leases made under this section of the act shall be subject to all of the provisions of section 5 of this act relating to maximum rates and charges and terms and conditions of forfeiture.

That when the vessels, land, piers, leases for land or piers and other property held by the corporation are disposed of as herein provided the corporation herein provided for shall be dissolved and said shipping board abolished.

Sec. 17. That sections 1, 2, 3 and 4 of this act shall not take effect until two years from and after the conclusion of the present European war, that fact to be determined by the president.

The main argument in favor of the shipping bill was that it would build up an American merchant marine and that it would result in a reduction of ocean freight rates. Among the reasons urged by Senators Root, Lodge, Gallinger and others against the measure were these:

It would involve the government in a heavy immediate expense without much prospect of any ultimate gain.

It would destroy all chance of building up a permanent American merchant marine, as private individuals and corporations would not be able to compete with government owned ships.

It would almost inevitably lead to international complications, as the purchase or leasing of interned merchant ships, such as those of the Hamburg-American and North German Lloyd lines, would be equivalent to the purchase of trouble.

It would reverse the policy of the United States and "embark the government in a business far more extreme than would the ownership of railroads or telegraph lines."

It would put the government in the position of raising money by taxation of all the people to carry on a business that individual enterprise had not carried on.

Most of the opposition of the democrats dissenting from the views of the administration was based upon the public ownership feature of the shipping bill, they regarding it as wrong in principle and dangerous in application.

SHIPPING INVESTIGATION.

Feb. 15 the senate agreed to a resolution offered by Senator Burton of Ohio and amended by the committee on contingent expenses to appoint a committee to ascertain whether officers of the government had made overtures for the purchase of interned merchant ships by the United States, whether tenders of sale of such ships had been made to the government and what efforts had been made by the shipping trust or others to defeat the ship purchase bill. The vice-president appointed as such committee Senators Walsh (Mont.), Simmons (N. C.), Reed (Mo.), Burton (O.) and Sutherland (Utah).

IMMIGRATION BILL VETO.

Feb. 4, 1914, the house of representatives by a vote of 252 yeas to 126 nays passed a bill to regulate the admission and residence of aliens in the United States. The measure was passed by the senate Jan. 2, 1915, by a vote of 50 to 7, but was vetoed by President Wilson Jan. 28. An effort was made in the house to pass the bill over the veto Feb. 4, but as the vote of 261 yeas to 136 nays, with two voting present, fell short of the required two-thirds of those present and voting, the bill failed of passage. The main reason for the veto, as it also was for a similar veto by President Taft, Feb. 14, 1913, was the clause providing for a literacy test. This clause provided for the exclusion of—

"All aliens over 16 years of age, physically capable of reading, who cannot read the English language or some other language or dialect, including Hebrew or Yiddish: Provided, that any admissible alien or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over 55 years of age, his wife, his mother, his grandmother or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not, and such relative shall be permitted to enter. That for the purpose of ascertaining whether aliens can read the immigrant inspectors shall be furnished with slips of uniform size, prepared under the direction of the secretary of labor, each containing not less than thirty nor more than forty words in ordinary use, printed in plainly legible type in the various languages and dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made, and shall be required to read the words printed on the slip in such language or dialect. No two aliens coming in the same vessel or other vehicle of carriage or transportation shall be tested with the same slip. That the following classes of persons shall be exempt from the operation of the literacy test, to wit: All aliens who shall prove to the satisfaction of the proper immigration officer or to the secretary of labor that they are seeking admission to the United States solely for the purpose of escaping from religious persecution; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: Provided, that nothing in this act shall exclude, if otherwise admissible, persons convicted of an offense purely political, not involving moral turpitude."

President Wilson's veto message was as follows:

"To the house of representatives:

"It is with unaffected regret that I find myself constrained by clear conviction to return this bill (H. R. 6660, 'An act to regulate the immigration of aliens to and the residence of aliens in the United States') without my signature. Not only do I feel it to be a very serious matter to exercise the power of veto in any case, because it involves opposing the single judgment of the president to the judgment of a majority of both the houses of the congress, a step which no man who realizes his own liability to error can take without great hesitation, but also because this particular bill is in so many important respects admirable, well conceived and desirable. Its enactment into law would undoubtedly enhance the efficiency and improve the methods of handling the important branch of the public service to which it relates. But candor and a sense of duty with regard to the responsibility so clearly imposed upon me by the constitution in matters of legislation leave me no choice but to dissent.

"In two particulars of vital consequence this bill embodies a radical departure from the traditional and long established policy of this country, a policy in which our people have conceived the very character of their government to be expressed, the very mission and spirit of the nation in respect of its relations to the peoples of the world outside their borders. It seeks to all

but close entirely the gates of asylum which have always been open to those who could find nowhere else the right and opportunity of constitutional agitation for what they conceived to be the natural and inalienable rights of men, and it excludes those to whom the opportunities of elementary education have been denied, without regard to their character, their purposes or their natural capacity.

"Restrictions like these, adopted earlier in our history as a nation, would very materially have altered the course and cooled the humane ardors of our politics. The right of political asylum has brought to this country many a man of noble character and elevated purpose who was marked as an outlaw in his own less fortunate land, and who has yet become an ornament to our citizenship and to our public councils. The children and the compatriots of these illustrious Americans must stand amazed to see the representatives of their nation now resolved, in the fullness of our national strength and at the maturity of our great institutions, to risk turning such men back from our shores without test of quality or purpose. It is difficult for me to believe that the full effect of this feature of the bill was realized when it was framed and adopted, and it is impossible for me to assent to it in the form in which it is here cast.

"The literacy test and the tests and restrictions which accompany it constitute an even more radical change in the policy of the nation. Hitherto we have generously kept our doors open to all who were not unfitted by reason of disease or incapacity for self-support or such personal records and antecedents as were likely to make them a menace to our peace and order or to the wholesome and essential relationships of life. In this bill it is proposed to turn away from tests of character and of quality and impose tests which exclude and restrict, for the new tests here embodied are not tests of quality or of character or of personal fitness, but tests of opportunity. Those who come seeking opportunity are not to be admitted unless they have already had one of the chief of the opportunities they seek, the opportunity of education. The object of such provisions is restriction, not selection.

"If the people of this country have made up their minds to limit the number of immigrants by arbitrary tests and so reverse the policy of all the generations of Americans that have gone before them, it is their right to do so. I am their servant and have no license to stand in their way. But I do not believe that they have. I respectfully submit that no one can quote their mandate to that effect. Has any political party ever avowed a policy of restriction in this fundamental matter, gone to the country on it and been commissioned to control its legislation? Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out upon this policy and the people pronounce their wish. The matter is too fundamental to be settled otherwise.

"I have no pride of opinion in this question. I am not foolish enough to profess to know the wishes and ideals of America better than the body of her chosen representatives know them. I only want instruction direct from those whose fortunes, with ours and all men's, are involved.

"WOODROW WILSON.

"The White House, Jan. 28, 1915."

PROHIBITION AMENDMENT.

In the house of representatives Dec. 22, 1914, a vote was taken on the following resolution for a proposed amendment to the constitution offered by Richmond P. Hobson of Alabama:

"Section 1. The sale, manufacture for sale, transportation for sale, exportation for sale and importation for sale of intoxicating liquors for beverage purposes in the United States and all territory subject to the jurisdiction thereof are forever prohibited.

"Sec. 2. Congress shall have power to provide in favor of the manufacture, sale, importation and transportation of intoxicating liquors for sacramental, medicinal, mechanical, pharmaceutical or scientific purposes or for use in the arts, and shall have power to enforce this article by all needed legislation."

The vote for the resolution was 197 for to 189 against, but as its adoption required a two-thirds vote in its favor it failed of passage by sixty-one votes.

WOMAN SUFFRAGE AMENDMENT.

The following joint resolution offered by Representative Frank W. Mondell of Wyoming came up for action in the house Jan. 12, 1915:

"Resolved, by the senate and house of representatives of the United States of America in congress assembled (two-thirds of each house concurring therein), That the following article be proposed

to the legislatures of the several states as an amendment to the constitution of the United States, which, when ratified by three-fourths of said legislatures, shall be valid as part of said constitution, namely:

"Article —, Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any state on account of sex.

"Sec. 2. Congress shall have power, by appropriate legislation, to enforce the provisions of this article."

The vote on the resolution was 174 yeas to 294 nays, with forty-six members not voting. It required a two-thirds vote for passage. While eighty-one democrats voted for the resolution, 163 voted against it. The democratic vote of the southern states was almost solidly against the proposition.

IMPEACHMENT CASES IN THE UNITED STATES.

BEFORE UNITED STATES SENATE.

The senate has sat as a court of impeachment in the cases of the following accused officials, with the result stated:

William Blount, senator from Tennessee, in 1799; charges dismissed for want of jurisdiction. Blount having resigned previously.

John Pickens, judge of the United States District court for New Hampshire; removed from office in 1804.

Samuel Chase, associate justice of the Supreme court of the United States; acquitted 1805.

James H. Peck, judge of the United States District court for Missouri; acquitted 1831.

West H. Humphreys, judge of the United States District court for Tennessee; removed from office, 1862.

Andrew Johnson, president of the United States; acquitted 1868.

William W. Belknap, secretary of war; acquitted 1876.

Charles Swayne, judge of the United States District court for the northern district of Florida; acquitted 1905.

Robert W. Archbald, associate judge of the United States Commerce court; convicted 1913.

AGAINST GOVERNORS.

Eight governors in the United States have faced impeachment proceedings. These men and the results that followed were:

Charles Robinson, Kansas, 1862; acquitted.

Harrison Reed, Florida, 1868; charges dropped.

William W. Holden, North Carolina, 1870; removed.

Powell Clayton, Arkansas, 1871; charges dropped.

David Butler, Nebraska, 1871; removed.

Henry C. Warmoth, Louisiana, 1872; term expired and proceedings dropped.

Adelbert Ames, Mississippi, 1876; resigned.

William Sulzer, New York, 1913; removed.

SPEED ON THE TYPEWRITER.

Miss Mary B. Owen of Passaic, N. J., won the eastern professional typewriting speed record in a contest held in Boston, Mass., April 12, 1915, by averaging 130 words a minute for one hour, notwithstanding deductions of five words for each forty-four errors. The performance was declared to be a new world's record. William F. Oswald on the same occasion made a record of 130 words a minute for half an hour of continuous work, winning the sectional amateur title.

SUPREME COURT LABOR DECISIONS.

KANSAS COERCION CASE.

Following is the full text of the decision of the United States Supreme court, announced Jan. 25, 1915, in the case of T. B. Coggage vs. the state of Kansas, involving a construction of the Kansas act of March 13, 1903, relating to the coercion of employes. The facts are enumerated in the decision itself:

SUPREME COURT OF THE UNITED STATES.

No. 48. October term, 1914.

T. B. Coggage, plaintiff in error, vs. the state of Kansas. Error to the Supreme court of the state of Kansas.

[Jan. 25, 1915.]

Mr. Justice Pitney delivered the opinion of the court.

In a local court in one of the counties of Kansas, plaintiff in error was found guilty and adjudged to pay a fine, with imprisonment as the alternative, upon an information charging him with a violation of an act of the legislature of that state, approved March 13, 1903, being chapter 222 of the session laws of that year, found also as sections 4674 and 4675 gen. stat., Kansas, 1909. The act reads as follows:

"An act to provide a penalty for coercing or influencing or making demands upon or requirements of employes, servants, laborers and persons seeking employment.

"Be it enacted, etc.:

"Section 1. That it shall be unlawful for any individual or members of any firm, or any agent, officer or employee of any company or corporation, to coerce, require, demand or influence any person or persons to enter into any agreement, either written or verbal, not to join or become or remain a member of any labor organization or association, as a condition of such person or persons securing employment, or continuing in the employment of such individual, firm or corporation.

"Sec. 2. Any individual or member of any firm or any agent, officer or employee of any company or corporation violating the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in a sum not less than \$50 or imprisoned in the county jail not less than thirty days."

The judgment was affirmed by the Supreme court of the state, two justices dissenting (87 Kan., 752), and the case is brought here upon the ground that the statute, as construed and applied in this case, is in conflict with that provision of the fourteenth amendment to the constitution of the United States which declares that no state shall deprive any person of liberty or property without due process of law.

The facts, as recited in the opinion of the Supreme court, are as follows: About July 1, 1911, one Hedges was employed as a switchman by the St. Louis & San Francisco Railway company, and was a member of a labor organization called the Switchmen's Union of North America. Plaintiff in error was employed by the railway company as superintendent, and as such he requested Hedges to sign an agreement, which he presented to him in writing at the same time informing him that if he did not sign it he could not remain in the employ of the company. The following is a copy of the paper thus presented:

Fort Scott, Kas., —, 1911.

Mr. T. B. Coggage, superintendent Frisco lines, Fort Scott:

We, the undersigned, have agreed to abide by your request, that is, to withdraw from the Switchmen's union, while in the service of the Frisco company.

(Signed)

Hedges refused to sign this, and refused to withdraw from the labor organization. Thereupon plaintiff in error, as such superintendent, discharged him from the service of the company.

At the outset, a few words should be said respecting the construction of the act. It uses the term "coerce" and some stress is laid upon this in the opinion of the Kansas Supreme court. But, on this record, we have nothing to do with

any question of actual or implied coercion or duress, such as might overcome the will of the employe by means unlawful without the act. In the case before us the state court treated the term "coerce" as applying to the mere insistence by the employer or its agent upon its right to prescribe terms upon which alone it would consent to a continuance of the relationship of employer and employe. In this sense we must understand the statute to have been construed by the court, for in this sense it was enforced in the present case; there being no finding, nor any evidence to support a finding, that plaintiff in error was guilty in any other sense. The entire evidence included in the bill of exceptions returned with the writ of error, and we have examined it to the extent necessary in order to determine the federal right that is asserted (Southern Pacific company vs. Schuyler, 227 U. S. 601, 611, and cases cited). There is neither finding nor evidence that the contract of employment was other than a general or indefinite hiring, such as is presumed to be terminable at the will of either party. The evidence shows that it would have been to the advantage of Hedges, from a pecuniary point of view and otherwise, to have been permitted to retain his membership in the union, and at the same time to remain in the employ of the railway company. In particular, it shows (although no reference is made to this in the opinion of the court) that as a member of the union he was entitled to benefits in the nature of insurance to the amount of \$1,500, which he would have been obliged to forego if he had ceased to be a member. But, aside from this matter of pecuniary interest, there is nothing to show that Hedges was subjected to the least pressure or influence, or that he was not a free agent, in all respects competent, and at liberty to choose what was best from the standpoint of his own interests. Of course, if plaintiff in error, acting as the representative of the railway company, was otherwise within his legal rights in insisting that Hedges should elect whether to remain in the employ of the company or to retain his membership in the union, that insistence is not rendered unlawful by the fact that the choice involved a pecuniary sacrifice to Hedges. *Silliman vs. United States*, 101 U. S. 465, 470, 471; *Hackley vs. Hendley*, 45 Mich. 569, 576; *Emery vs. Lowell*, 127 Mass. 138, 141; *Custin vs. City of Virqua*, 67 Wis. 314, 320. And if the right that plaintiff in error exercised is founded upon a constitutional basis it cannot be impaired by merely applying to its exercise the term "coercion." We have to deal, therefore, with a statute that, as construed and applied, makes it a criminal offense punishable with fine or imprisonment for an employer or his agent to merely prescribe, as a condition upon which one may secure certain employment or remain in such employment, (the employment being terminable at will) that the employe shall enter into an agreement not to become or remain a member of any labor organization while so employed; the employe being subject to no incapacity or disability, but on the contrary free to exercise a voluntary choice.

In *Adair vs. United States*, 208 U. S. 151, this court had to deal with a question not distinguishable in principle from the one now presented. Congress, in section 10 of an act of June 1, 1893, entitled "An act concerning carriers engaged in interstate commerce and their employes" (30 Stat. 424, 428, ch. 370), had enacted "That any employer subject to the provisions of this act and any officer, agent or receiver of any such employer, who shall require any employe, or any person seeking employment, as a condition of such employment, to enter into an agreement, either written or verbal, not to become or remain a member of any labor corporation, association or organization, or shall threaten any employe with loss of employment, or shall unjustly discriminate against any employe because of his membership in such a labor corporation, association or organization, is hereby declared to be guilty of a misdemeanor, and, upon conviction

thereof * * * shall be punished for each offense by a fine of not less than \$100 and not more than \$1,000. Adair was convicted upon an indictment charging that he, as agent of a common carrier subject to the provisions of the act, unjustly discriminated against a certain employee by discharging him from the employ of the carrier because of his membership in a labor organization. The court held that portion of the act upon which the conviction rested to be an invasion of the personal liberty as well as the right of property guaranteed by the fifth amendment, which declares that no person shall be deprived of liberty or property without due process of law. Speaking by Mr. Justice Harlan, the court said (p. 174): "While, as already suggested, the right of liberty and property guaranteed by the constitution against deprivation without due process of law is subject to such reasonable restraints as the common good or the general welfare may require, it is not within the functions of government—at least in the absence of contract between the parties—to compel any person in the course of his business or against his will to accept or retain the personal services of another, or to compel any person, against his will, to perform personal services for another. The right of a person to sell his labor upon such terms as he deems proper is, in its essence, the same as the right of the purchaser of labor to prescribe the conditions upon which he will accept such labor from the person offering to sell it. So the right of the employee to quit the service of the employer, for whatever reason, is the same as the right of the employer, for whatever reason, to dispense with the services of such employee. It was the legal right of the defendant Adair—however unwise such a course might have been—to discharge the employee because of his being a member of a labor organization, as it was the legal right of the employee, if he saw fit to do so—however unwise such a course on his part might have been—to quit the service in which he was engaged because the defendant employed some persons who were not members of a labor organization. In all such particulars the employer and the employee have equality of right, and any legislation that disturbs that equality is an arbitrary interference with the liberty of contract which no government can legally justify in a free land."

Unless it is to be overruled, this decision is controlling upon the present controversy; for if congress is prevented from arbitrary interference with the liberty of contract because of the "due process" provision of the fifth amendment, it is too clear for argument that the states are prevented from the like interference by virtue of the corresponding clause of the fourteenth amendment, and hence if it be unconstitutional for congress to deprive an employer of liberty or property for threatening an employee with loss of employment or discriminating against him because of his membership in a labor organization, it is unconstitutional for a state to similarly punish an employer for requiring his employee as a condition of securing or retaining employment, to agree not to become or remain a member of such an organization while so employed.

It is true that, while the statute that was dealt with in the Adair case contained a clause substantially identical with the Kansas act now under consideration—a clause making it a misdemeanor for an employer to require an employee or applicant for employment, as a condition of such employment, to agree not to become or remain a member of a labor organization—the conviction was based upon another clause, which related to discharging an employee because of his membership in such an organization, and the decision, naturally, was confined to the case actually presented for decision. In the present case, the Kansas Supreme court sought to distinguish the Adair decision upon this ground. The distinction, if any there be, has not previously been recognized as substantial so far as we have been able to find. The opinion in the Adair case, while carefully restricting the decision to the precise matter involved, cited (208 U. S. on page 175), as the first in order of a number of decisions supporting the conclusion of

the court, a case (People vs. Marcus, 185 N. Y. 257) in which the statute denounced as unconstitutional was in substance the counterpart of the one with which we are now dealing.

But, irrespective of whether it has received judicial recognition, is there any real distinction? The constitutional right of the employer to discharge an employee because of his membership in a labor union being granted, can the employer be compelled to resort to this extreme measure? May he not offer to the employee an option, such as was offered in the instant case, to remain in the employment if he will retire from the union; to sever the former relationship only if he prefers the latter? Granted the equal freedom of both parties to the contract of employment, has not each party the right to stipulate upon what terms only he will consent to the inception or to the continuance of that relationship? And may he not insist upon an express agreement instead of leaving the terms of the employment to be implied? Can the legislature in effect require either party at the beginning to act covertly, concealing essential terms of the employment—terms to which, perhaps, the other would not willingly consent—and revealing them only when it is proposed to insist upon them as a ground for terminating the relationship? Supposing an employer is unwilling to have in his employ one holding membership in the labor union, and has reason to suppose that the man may prefer membership in the union to the given employment without it—we ask, can the legislature oblige the employer in such case to refrain from dealing frankly at the outset? And is not the employer entitled to insist upon equal frankness in return? Approaching the matter from a somewhat different standpoint, is the employee's right to be free to join a labor union any more sacred or more securely founded upon the constitution than his right to work for whom he will, or to be idle if he will? And does not the ordinary contract of employment include an insistence by the employer that the man shall agree, as a condition of the employment, that he will not be idle and will not work for whom he pleases, but will serve his present employer, and him only, so long as the relation between them shall continue? Can the right of making contracts be enjoyed by all except by parties coming together in an agreement that requires each party to forego, during the time and for the purpose covered by the agreement, any inconsistent exercise of his constitutional rights?

These queries answer themselves. The answers, as we think, lead to a single conclusion: Under constitutional freedom of contract, whatever either party has the right to treat as sufficient ground for terminating the employment, where there is no stipulation on the subject, he has the right to provide against by insisting that a stipulation respecting it shall be a *sine qua non* of the inception of the employment, or of its continuance, if it be terminable at will. It follows that this case cannot be distinguished from Adair vs. United States.

The decision in that case was reached as the result of elaborate argument and full consideration. The opinion states (208 U. S. 171): "This question is one of importance, and has been examined with care and deliberation. And the court has reached a conclusion which in its judgment is consistent with both the words and spirit of the constitution, and is sustained as well by sound reason." We are now asked, in effect, to overrule it, and in view of the importance of the issue we have re-examined the question from the standpoint of both reason and authority. As a result we are constrained to reaffirm the doctrine there applied. Neither the doctrine nor this application of it is novel: we will endeavor to restate some of the grounds upon which it rests. The principle is fundamental and vital. Included in the right of personal liberty and the right of private property—partaking of the nature of each—is the right to make contracts for the acquisition of property. Chief among such contracts is that of personal employment by which labor and other services are exchanged for money or other forms of property.

If this right be struck down or arbitrarily interfered with, there is substantial impairment of liberty in the long established constitutional sense. The right is as essential to the laborer as to the capitalist, to the poor as to the rich; for the vast majority of persons have no other honest way to begin to acquire property, save by working for money.

An interference with this liberty so serious as that now under consideration, and so disturbing of equality of right, must be deemed to be arbitrary, unless it be supportable as a reasonable exercise of the police power of the state. But, notwithstanding the strong general presumption in favor of the general validity of state laws, we do not think the statute in question, as construed and applied in this case, can be sustained as a legitimate exercise of that power. To avoid possible misunderstanding, we should here emphasize what has been said before—that so far as its title or enacting clause expresses a purpose to deal with coercion, compulsion, duress or other undue influence, we have no present concern with it, because nothing of that sort is involved in this case. As has been many times stated, this court deals not with moot cases or abstract questions, but with the concrete case before it (*California vs. San Pablo, etc., railroad*, 149 U. S. 308, 314; *Richardson vs. McChesney*, 218 U. S. 487, 492; *Missouri, Kansas & Texas railway vs. Cade*, 233 U. S. 642, 648). We do not mean to say, therefore, that a state may not properly exert its police power to prevent coercion on the part of employers toward employees or vice versa. But in this case the Kansas court of last resort has held that Coppage, the plaintiff in error, is a criminal punishable with fine or imprisonment under this statute simply and merely because, while acting as the representative of the railroad company and dealing with Hedges, an employee at will and a man of full age and understanding, subject to no restraint or disability, Coppage insisted that Hedges should freely choose whether he would leave the employ of the company or would agree to refrain from association with the union while so employed. This construction is, for all purposes of our jurisdiction, conclusive evidence that the state of Kansas intends by this legislation to punish conduct such as that of Coppage, although entirely devoid of any element of coercion, compulsion, duress or undue influence, just as certainly as it intends to punish coercion and the like. But when a party appeals to this court for the protection of rights secured to him by the federal constitution the decision is not to depend upon the form of the state law, nor even upon its declared purpose, but rather upon its operation and effect as applied and enforced by the state, and upon these matters this court cannot, in the proper performance of its duty, yield its judgment to that of the state court (*St. Louis Southwestern railway vs. Arkansas*, 235 U. S. 350, 362, and cases cited). Now, it seems to us clear that a statutory provision which is not a legitimate police regulation cannot be made such by being placed in the same act with a police regulation or by being enacted under a title that declares a purpose which would be a proper object for the exercise of that power. "Its true character cannot be changed by its collocation," as Mr. Justice Grier said in the *Passenger Cases*, 7 How. 458. It is equally clear, we think, that to punish an employer or his agent for simply proposing certain terms of employment, under circumstances devoid of coercion, duress or undue influence, has no reasonable relation to a declared purpose of repressing coercion, duress and undue influence. Nor can a state, by designating as "coercion" conduct which is not such in truth, render criminal any normal and essentially innocent exercise of personal liberty or of property rights; for to permit this would deprive the fourteenth amendment of its effective force in this regard. We, of course, do not intend to attribute to the legislature or the courts of Kansas any improper purpose or any want of candor, but only to emphasize the distinction between the form of the statute and its effect as applied in the present case.

Laying aside, therefore, as immaterial for present purposes, so much of the statute as indicates a purpose to repress coercive practices, what possible relation has the residue of this act to the public health, safety, morals or general welfare? None is suggested, and we are unable to conceive of any. The act, as the construction given to it by the state court shows, is intended to deprive employers of a part of their liberty of contract, to the corresponding advantage of the employed and the upbuilding of the labor organizations. But no attempt is made, or could reasonably be made, to sustain the purpose to strengthen these voluntary organizations, any more than other voluntary associations of persons, as a legitimate object for the exercise of police power. They are not public institutions, charged by law with public or governmental duties, such as would render the maintenance of their membership a matter of direct concern to the general welfare. If they were, a different question would be presented.

As to the interest of the employed, it is said by the Kansas Supreme court to be a matter of common knowledge that "employees, as a rule, are not financially able to be as independent in making contracts for the sale of their labor as are employers in making a contract of purchase thereof." No doubt, wherever the right of private property exists, there must and will be inequalities of fortune, and thus it naturally happens that parties negotiating about a contract are not equally unhampered by circumstances. This applies to all contracts, and not merely to that between employer and employee. Indeed, a little reflection will show that wherever the right of private property and the right of free contract coexist, each party when contracting is inevitably more or less influenced by the question whether he has much property or little or none; for the contract is made to the very end that each may gain something that he needs or desires more urgently than that which he proposes to give in exchange. And since it is self-evident that, unless all things are held in common, some persons must have more property than others, it is from the nature of things impossible to uphold freedom of contract and the right of private property without at the same time recognizing as legitimate those inequalities of fortune that are the necessary result of the exercise of those rights. But the fourteenth amendment, in declaring that a state shall not "deprive any person of life, liberty or property without due process of law," gives to each of these an equal sanction; it recognizes "liberty" and "property" as coexistent human rights, and debars the states from any unwarranted interference with either.

And since a state may not strike them down directly it is clear that it may not do so indirectly, as by declaring in effect that the public good requires the removal of those inequalities that are but the natural and inevitable result of the exercise of the rights which the police power is in order to remove the inequalities without other object in view. The police power is broad and not easily defined, but it cannot be given the wide scope that is here asserted for it without in effect nullifying the constitutional guaranty.

We need not refer to the numerous and familiar cases in which this court has held that the power may properly be exercised for preserving the public health, safety, morals or general welfare, and that such police regulations may reasonably limit the enjoyment of personal liberty, including the right of making contracts. They are reviewed in *Holden vs. Hardy*, 169 U. S. 366, 391; *Chicago, Burlington & Quincy Railroad Company vs. McGuire*, 219 U. S. 549, 566; *Eric Railroad Company vs. Williams*, 233 U. S. 685, and other recent decisions. An evident and controlling distinction is this: That in those cases it has been held permissible for the states to adopt regulations fairly deemed necessary to secure some object directly affecting the public welfare, even though the enjoyment of private rights of liberty and property be thereby incidentally hampered; while in that portion of the Kansas statute which is now under consideration—that is to say, aside from coercion, etc.—there is no object

or purpose, expressed or implied, that is claimed to have reference to health, safety, morals or public welfare, beyond the supposed desirability of leveling inequalities of fortune by depriving one who has property of some part of what is characterized as his "financial independence." In short, an interference with the normal exercise of personal liberty and property rights is the primary object of the statute and not an incident to the advancement of the general welfare. But, in our opinion, the fourteenth amendment declares the states from striking down personal liberty or property rights, or materially restricting their normal exercise, excepting so far as may be incidentally necessary for the accomplishment of some other and a paramount object, and one that concerns the public welfare. The mere restriction of liberty or of property rights cannot of itself be denominated "public welfare" and treated as a legitimate object of the police power; for such restriction is the very thing that is inhibited by the amendment.

It is said in the opinion of the state court that membership in a labor organization does not necessarily affect a man's duty to his employer; that the employer has no right, by virtue of the relation, "to dominate the life nor to interfere with the liberty of the employee in matters that do not lessen or deteriorate the service," and that "the statute implies that labor unions are lawful and not inimical to the rights of employers." The same view is presented in the brief of counsel for the state, where it is said that membership in a labor organization is the "personal and private affair" of the employee. To this line of argument it is sufficient to say that it cannot be judicially declared that membership in such an organization has no relation to a member's duty to his employer; and, therefore, if freedom of contract is to be preserved, the employer must be left at liberty to decide for himself whether such membership by his employee is consistent with the satisfactory performance of the duties of the employment.

Of course we do not intend to say, nor to intimate, anything inconsistent with the right of individuals to join labor unions, nor do we question the legitimacy of such organizations so long as they conform to the laws of the land as others are required to do. Conceding the full right of the individual to join the union, he has no inherent right to do this and still remain in the employ of one who is unwilling to employ a union man any more than the same individual has a right to join the union without the consent of that organization. Can it be doubted that a labor organization—a voluntary association of workmen—has the inherent and constitutional right to deny membership to any man who will not agree that during such membership he will not accept or retain employment with nonunion men? Or that a union man has the constitutional right to decline proffered employment unless the employer will agree not to employ any nonunion man? (In all cases we refer, of course, to agreements made voluntarily and without coercion or duress as between the parties. And we have no reference to questions of monopoly or interference with the rights of third parties or the general public. These involve other considerations, respecting which we intend to intimate no opinion. See *Curran vs. Galen*, 152 N. Y. 33; 216 N. E. 297; *Jacobs vs. Cohen*, 183 N. Y. 207, 213, 214; 76 N. E. 5; *Plant vs. Woods*, 176 Mass. 492; 57 N. E. 1011; *Berry vs. Donovan*, 183 Mass. 353; 74 N. E. 603; 3 Ann. Cas. 738; *Brennan vs. United Hatters*, 73 N. J. Law 729, 738; 65 Atl. 165, 169; 9 Ann. Cas. 698, 702.) And can there be one rule of liberty for the labor organization and its members and a different and more restrictive rule for employers? We think not, and since the relation of employer and employee is a voluntary relation, as clearly as is that between the members of a labor organization, the employer has the same inherent right to prescribe the terms upon which he will consent to the relationship, and to have them fairly understood and expressed in advance.

When a man is called upon to agree not to

become or remain a member of the union while working for a particular employer he is in effect only asked to deal openly and frankly with his employer, so as not to retain the employment upon terms to which the latter is not willing to agree. And the liberty of making contracts does not include a liberty to procure employment from an unwilling employer, or without a fair understanding. Nor may the employer be foreclosed by legislation from exercising the same freedom of choice that is the right of the employee.

To ask a man to agree, in advance, to refrain from affiliation with the union while retaining a certain position of employment is not to ask him to give up any part of his constitutional freedom. He is free to decline the employment on those terms, just as the employer may decline to offer employment on any other; for "it takes two to make a bargain." Having accepted employment on those terms, the man is still free to join the union when the period of employment expires, or, if employed at will, then at any time upon simply quitting the employment. And, if bound by his own agreement to refrain from joining during a stated period of employment, he is in no different situation from that which is necessarily incident to term contracts in general. For constitutional freedom of contract does not mean that a party is to be of free offer making a contract as before; he is not free to break it without accountability. Freedom of contract, from the very nature of the thing, can be enjoyed only by being exercised, and each particular exercise of it involves making an engagement which, if fulfilled, prevents for the time any inconsistent course of conduct.

So much for the reason of the matter; let us turn again to the adjudicated cases.

The decision in the *Adair* case is in accord with the almost unbroken current of authorities in the state courts. In many states enactments not distinguishable in principle from the one now in question have been passed, but, except in two instances (one, the decision of an inferior court in Ohio, since repudiated; the other, the decision now under review) we are unable to find that they have been judicially enforced. It is not too much to say that such laws have by common consent been treated as unconstitutional, for while many courts of last resort have adjudged them void, we have found no decision by such a court sustaining legislation of this character, excepting that which is now under review. The single previous instance in which any court has upheld such a statute is *Davis vs. State of Ohio* (1893), 30 Ohio Law Bull. 342; Ohio Dec. Reprint, 894; where the Court of Common Pleas of Hamilton county sustained an act of April 14, 1892 (39 Ohio Laws 269), which declared that any person who coerced or attempted to coerce employees by discharging or threatening to discharge them because of their connection with any lawful labor organization should be guilty of a misdemeanor and upon conviction fined or imprisoned. We are unable to find that this decision was ever directly reviewed, but in *State of Ohio vs. Bateman* (1900), 10 Ohio Dec. 68; 7 Ohio N. P. 487, its authority was repudiated on the ground that it had been in effect overruled by subsequent decisions of the State Supreme court, and the same statute was held unconstitutional.

The right that plaintiff in error is now seeking to maintain was held by the Supreme court of Kansas, in an earlier case, to be within the protection of the fourteenth amendment and therefore beyond legislative interference. In *Brick company vs. Perry*, 69 Kan. 297; 26 Pac. 848; 66 L. R. A. 185; 1 A. & E. Ann. Cas. 936; the court had under consideration chapter 120 of the laws of 1897 (Gen. Stat. 1901, secs. 2425, 2426), which declared it unlawful for any person, company or corporation, or agent, officer, etc., to prevent employees from joining and belonging to any labor organization, and enacted that any such person, company or corporation, etc., that coerced or attempted to coerce employees by discharging or threatening to discharge them because of their connection with such labor organization should be deemed guilty of a misdemeanor, and upon con-

viction subjected to a fine and should also be liable to the person injured in punitive damages. It was attacked as violative of the fourteenth amendment, and also of the bill of rights of the state constitution.* The court held it unconstitutional, saying: "The right to follow any lawful vocation and to make contracts is as completely within the protection of the constitution as the right to hold property free from unwarranted seizure or the liberty to go when and where one will. One of the ways of obtaining property is by contract. The right, therefore, to contract cannot be infringed by the legislature without violating the letter and spirit of the constitution. Every citizen is protected in his right to work where and for whom he will. He may select not only his employer but also his associates. He is at liberty to refuse to continue to serve one who has in his employ a person, or an association of persons, objectionable to him. In this respect the rights of the employer and employee are equal. Any act of the legislature that would undertake to impose on an employer the obligation of keeping in his service one whom, for any reason, he should not desire would be a denial of his constitutional right to make and terminate contracts and to acquire and hold property. Equally so would be an act the provisions of which should be intended to require one to remain in the service of one whom he should not desire to serve. * * * The business conducted by the defendant was its property, and in the exercise of this ownership it is protected by the constitution. It could abandon or discontinue its operation at pleasure. It had the right, beyond the possibility of legislative interference, to make any contract with reference thereto not in violation of law. In the operation of its property it may employ such persons as are desirable, and discharge, without reason, those who are undesirable. It is at liberty to contract for the services of persons in any manner that is satisfactory to both. No legislative restrictions can be imposed upon the lawful exercise of these rights."

In *Railway company vs. Brown*, 80 Kan. 312; 102 Pac. 459, the same court passed upon chapter 144 of the laws of 1897 (Gen. Stat. 1901, secs. 2421-2424), which required the employer upon the request of a discharged employee to furnish in writing the true cause or reason for such discharge. The railway company did not meet this requirement, its "service letter," as it was called, stating only that Brown was discharged "for cause," which the court naturally held was not a statement of the cause. The law was held unconstitutional, upon the ground (80 Kan. 315) that an employer may discharge his employee for any reason or for no reason, just as an employee may quit the employment for any reason or for no reason; that such action on the part of employer or employee, where no obligation is violated, is an essential element of liberty in action, and that one cannot be compelled to give a reason or cause for an action for which he may have no specific reason or cause, except, perhaps, a mere whim or prejudice.

In the present case the court did not repudiate or overrule these previous decisions, but on the contrary cited them as establishing the right of the employer to discharge his employee at any time, for any reason, or for no reason, being responsible in damages for violating a contract as to the time of employment and as establishing, conversely, the right of the employee to quit the employment at any time, for any reason or without any reason, being likewise responsible in damages for a violation of his contract with the

employer. The court held the act of 1903 that is now in question to be distinguishable from the act of 1897, upon grounds sufficiently indicated and answered by what we have already said.

In five other states the courts of last resort have had similar acts under consideration, and in each instance have held them unconstitutional. In *State vs. Julow* (1895), 129 Mo. 163; 31 S. W. 751; 29 L. R. A. 257; 50 Am. St. Rep. 443; the Supreme court of Missouri dealt with an act (Missouri Laws 1893, p. 187), that forbade employers, on pain of fine or imprisonment, to enter into any agreement with an employee requiring him to withdraw from a labor union or other lawful organization, or to refrain from joining such an organization, or to "by any means attempt to compel or coerce any employee into withdrawing from any lawful organization or society." In *Gillespie vs. the People* (1900), 188 Ill. 176; 58 N. E. 1007; 52 L. R. A. 283; 80 Am. St. Rep. 176; the Supreme court of Illinois held unconstitutional an act (Hurd's Stat., 1899, p. 844) declaring it criminal for any individual or member of any firm, etc., to prevent or attempt to prevent employees from forming, joining or continuing in any lawful labor organization, and that any such person "that coerces or attempts to coerce employees by discharging or threatening to discharge them because of their connection with such lawful labor organization" should be guilty of a misdemeanor. In *State ex rel. Zillmer vs. Kreutzberg* (1902), 114 Wis. 530; 90 N. W. 1098; 58 L. R. A. 748; 91 Am. St. Rep. 934; the court had under consideration a statute (Wisconsin Laws, 1899, ch. 332), which, like the Kansas act now in question, prohibited the employer or his agent from coercing the employee to enter into an agreement not to become a member of a labor organization, as a condition of securing employment or continuing in the employment, and also rendered it unlawful to discharge an employee because of his being a member of any labor organization. The decision related to the latter prohibition, but this was denounced upon able and learned reasoning that has a much wider reach. In *People vs. Marcus* (1906), 185 N. Y. 257; 77 N. E. 1073; 7 L. R. A. N. S. 282; 113 Am. St. Rep. 902; 7 A. & E. Ann. Cas. 118; the statute dealt with (N. Y. Laws, 1887, ch. 658), as we have already said, was in substance identical with the Kansas act. These decisions antedated *Adair vs. United States*. They proceed upon broad and fundamental reasoning, the same in substance that was adopted by this court in the *Adair* case, and they are cited with approval in the opinion (208 U. S. 175). A like result was reached in *State ex rel. Smith vs. Daniels* (1912), 113 Minn. 155; 136 N. W. 584; with respect to an act that, like the Kansas statute, forbade an employer to require an employee or person seeking employment, as a condition of such employment, to make an agreement that the employee would not become or remain a member of a labor organization. This was held invalid upon the authority of the *Adair* case. And see *Goldfield Consolidated Mines Co. vs. Goldfield Miners' Union*, 159 Fed. 500, 513.

Upon both principle and authority, therefore, we are constrained to hold that the Kansas act of March 13, 1903, as construed and applied so as to punish with fine or imprisonment an employer or his agent for merely prescribing, as a condition upon which one may secure employment under or remain in the service of such employer, that the employee shall enter into an agreement not to become or remain a member of any labor organization while so employed, is repugnant to the "due process" clause of the fourteenth amendment, and therefore void.

Judgment reversed, and the cause remanded for further proceedings not inconsistent with this opinion.

MR. JUSTICE HOLMES DISSENTING.

I think the judgment should be affirmed. In present conditions a workman not unnaturally may believe that only by belonging to a union can he secure a contract that shall be fair to him. *Holden vs. Hardy*, 169 U. S. 366, 397. *Chicago, Burlington & Quincy R. R. Co. vs. McGuire*, 219 U. S. 549, 570. If that belief, whether right

or wrong, may be held by a reasonable man, it seems to me that it may be enforced by law in order to establish the equality of position between the parties in which liberty of contract begins. Whether in the long run it is wise for the workmen to enact legislation of this sort is not my concern, but I am strongly of opinion that there is nothing in the constitution of the United States to prevent it, and that *Adair vs. United States*, 208 U. S. 161, and *Lochner vs. New York*, 198 U. S. 45, should be overruled. I have stated my grounds in those cases and think it unnecessary to add others that I think exist. See further *Vegeahn vs. Guntner*, 167 Mass. 92, 104, 108; *Plant vs. Woods*, 176 Mass. 492, 505. I still entertain the opinions expressed by me in Massachusetts.

MR. JUSTICE DAY DISSENTING.

The character of the question here involved sufficiently justifies, in my opinion, a statement of the grounds which impel me to dissent from the opinion and judgment in this case. The importance of the decision is further emphasized by the fact that it results not only in invalidating the legislation of Kansas, but before the court, but necessarily decrees the same fate to like legislation of other states of the union.* This far reaching result is attained because the statute is declared to be an infraction of the constitutional protection afforded under the fourteenth amendment to the federal constitution, which declares that no person shall be deprived of life, liberty or property without due process of law. The right of contract, it is said, is part of the liberty of the citizen, and to abridge it, as is done in this case, is declared to be beyond the legislative authority of the state.

That the right of contract is a part of individual freedom within the protection of this amendment, and may not be arbitrarily interfered with, is conceded. While this is true, nothing is better settled by the repeated decisions of this court than that the right of contract is not absolute and unyielding, but is subject to limitation and restraint in the interests of the public health, safety and welfare, and such limitations may be declared in legislation of the state. It would unduly extend what I purpose to say in this case to refer to all the cases in which this doctrine has been declared. One of them is: *Friskie vs. United States*, 157 U. S. 160. In that case it was declared, and in varying form has been repeated many times since:

"While it may be conceded that, generally speaking, among the inalienable rights of the citizen is that of the liberty of contract, yet such liberty is not absolute and universal. It is within the undoubted power of government to restrain some individuals from all contracts, as well as all individuals from some contracts. It may deny to all the right to contract for the purchase or sale of lottery tickets; to the minor the right to assume any obligations, except for the necessities of existence; to the common carrier the power to make any contract releasing himself from negligence and, indeed, may restrain all engaged in any employment from any contract in the course of that employment which is against public policy. The possession of this power by government in no manner conflicts with the proposition that, generally speaking, every citizen has a right freely to contract for the price of his labor, services or property."

See also *Holden vs. Hardy*, 169 U. S. 366, 391; *Atkin vs. Kansas*, 191 U. S. 207; *Muller vs. Oregon*, 208 U. S. 412, 421; *McLean vs. Arkansas*, 211 U. S. 539; *Chicago, Burlington & Quincy Railroad company vs. McGuire*, 219 U. S. 549; *Atlantic Coast Line vs. Riverside Mills*, 219 U. S. 186, 202; *Erie Railroad company vs. Williams*, 233 U. S.

685, 699. The Erie railroad case is a very recent deliverance of this court upon the subject, wherein it was declared:

"But liberty of making contracts is subject to conditions in the interest of the public welfare, and which shall prevail—principle or condition—cannot be defined by any precise and universal formula. Each instance of asserted conflict must be determined by itself, and it has been said many times that each act of legislation has the support of the presumption that it is an exercise in the interest of the public. The burden is on him who attacks the legislation, and it is not sustained by declaring a liberty of contract. It can only be sustained by demonstrating that it conflicts with some constitutional restraint or that the public welfare is not subserved by the legislation. The legislature is, in the first instance, the judge of what is necessary for the public welfare, and a judicial review of its judgment is limited. The earnest conflict of serious opinion does not suffice to bring it within the range of judicial cognizance. *Chicago, Burlington & Quincy Railroad company vs. McGuire*, 219 U. S. 549, 555; *German Alliance Insurance company vs. Kansas*, 233 U. S. 389.

It is therefore the theory, established doctrine of this court that liberty of contract may be circumscribed in the interest of the state and the welfare of its people. Whether a given exercise of such authority transcends the limits of legislative authority must be determined in each case as it arises. The preservation of the police power of the states, under the authority of which the great mass of legislation has been enacted, which has for its purpose the promotion of the health, safety and welfare of the public, is of the utmost importance. This power was not surrendered by the states when the federal constitution was adopted, nor taken from them when the fourteenth amendment was ratified and became a fundamental law of the union. *Barbier vs. Connolly*, 113 U. S. 27.

Of the necessity of such legislation the local legislature is itself the judge, and its enactments are only to be set aside when they involve such palpable abuse of power and lack of reasonableness to accomplish a lawful end that they may be said to be merely arbitrary and capricious, and hence out of place in a government of laws and not of men, and irreconcilable with the conception of due process of law. *McGhee on "Due Process of Law,"* page 306, and cases from this court therein cited.

By this it is not meant that legislative power is beyond judicial review. Such enactments as are arbitrary and unreasonable and thus exceed the exercise of legislative authority in good faith may be declared invalid when brought in review by proper judicial proceedings. This is necessary to the assertion and maintenance of the supremacy of the constitution.

Conceding then that the right of contract is a subject of judicial protection within the authority given by the constitution of the United States, the question here is, Was the power of the state so arbitrarily exercised as to render its action unconstitutional and therefore void? It is said that this question is authoritatively determined in this court. In the case of *Adair vs. United States*, 208 U. S. 161. In that case, a statute passed by the congress of the United States, under the supposed sanction of the power to regulate interstate commerce, was before this court, and it was there decided that the right of contract protected by the fifth amendment to the constitution, providing that no person shall be deprived of life, liberty or property without due process of law, avoided a statute which undertook to make it a crime to discharge an employe simply because of his membership in a labor organization. The features of the statute which is here involved, making it an offense to require any employe, or any person seeking employment, as a condition of such employment, to enter into an agreement, either written or verbal, not to become a member of any labor corporation, association or organization—a provision exactly similar to that of the Kansas statute now under consideration—was not before the court upon the

*Statutes like the Kansas statute have been passed in California, Colorado, Connecticut, Indiana, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, Oklahoma, Oregon, Pennsylvania, Porto Rico and Wisconsin. Bulletin of the Bureau of Labor Statistics No. 148, volumes 1 and 2; Labor Laws of the United States.

charge made or the facts shown, and this proviso was neither considered nor decided upon in reaching the conclusion that an employer could not be made a criminal because he discharged an employe simply because of his membership in a labor organization. In the course of the opinion this fact was more than once stated, and the question before the court declared to be:

"May congress make it a criminal offense against the United States—as by the tenth section of the act of 1898 it does—for an agent or officer of an interstate carrier, having full authority in the premises from the carrier, to discharge an employe from service simply because of his membership in a labor organization?"

Such was the question before the court, and that there might be no mistake about it, at the close of the opinion, the part of the act upon which the defendant in that case was convicted was declared to be separable from the other parts of the act, and that feature of the statute the only subject of decision. Mr. Justice Harlan, concluding the opinion of the court, said:

"We add that since the part of the act of 1898 upon which the first count of the indictment is based, and upon which alone the defendant was convicted, is severable from its other parts, and as what has been said is sufficient to dispose of the present case, we are not called upon to consider other and independent provisions of the act, such, for instance, as the provisions relating to arbitration. This decision is therefore restricted to the question of the validity of the particular provision in the act of congress making it a crime against the United States for an agent or officer of an interstate carrier to discharge an employe from its service because of his being a member of a labor organization."

In view of the feature of the statute involved, the charge made, and this express reservation in the opinion of the court as to other features of the statute, I am unable to agree that that case involved or decided the one now at bar.

There is nothing in the statute now under consideration which prevents an employer from discharging one in his service at his will. The question now presented is, may an employer, as a condition of present or future employment, require an employe to agree that he will not exercise the privilege of becoming a member of a labor union, should he see fit to do so? In my opinion, the cases are entirely different, and the decision of the questions controlled by different principles. The right to join labor unions is undisputed, and has been the subject of frequent affirmation in judicial opinions. Acting within their legal rights, such associations are as legitimate as any organization of citizens formed to promote their common interest. They are organized under the laws of many states, by virtue of express statutes passed for that purpose, and, being legal and acting within their constitutional rights, the right to join them, as against coercive action to the contrary, may in the legitimate subject of protection be the exercise of the police authority of the states. This statute, passed in the exercise of that particular authority called the police power, the limitations of which no court has yet undertaken precisely to define, has for its avowed purpose the protection of the exercise of a legal right, by preventing an employer from depriving the employe of it as a condition of obtaining employment. I see no reason why a state may not, if it chooses, protect this right as well as other legal rights.

But it is said that the contrary must necessarily result, if not from the precise matter decided in the Adair case, then from the principles therein laid down, and that it is the logical result of that decision that the employer may, as a condition of employment, require an obligation to forego the exercise of any privileges because of the exercise of which an employe might be discharged from service. I do not concede that this result follows from anything decided in the Adair case. That case dealt solely with the right of an employer to terminate relations of employment with an employe and involved the constitutional protection of his right to do so, but did not deal

with the conditions which he might exact or impose upon another as a condition of employment.

The act under consideration is said to have the effect to deprive employers of a part of their liberty of contract, for the benefit of labor organizations. It is urged that the statute has no object or purpose, express or implied, that has reference to health, safety, morals or public welfare, beyond the supposed desirability of leveling inequalities of fortune by depriving him who has property of some part of his "financial independence."

But this argument admits that financial independence is not independence of law or of the authority of the legislature to declare the policy of the state as to matters which have a reasonable relation to the welfare, peace and security of the community.

This court has many times decided that the motives of legislators in the enactment of laws are not the subject of judicial inquiry. Legislators, state and federal, are entitled to the presumption that their action has been in good faith and because of conditions which they deem proper and sufficient to warrant the action taken. Speaking for this court in *ex parte McCordle*, 7 Wall. 506, 514, Chief Justice Chase summed up the doctrine in a sentence when he said: "We are not at liberty to inquire into the motives of the legislature; we can only examine into its power under the constitution." In *Cooley's "Constitutional Limitations,"* 7 Ed. 257, that eminent author says: "They (the courts) must assume that legislative discretion has been properly exercised. If evidence was required, it must be supposed that it was before the legislature when the act was passed, and if any special finding was required to warrant the passage of the particular act, it would seem that the passage of the act itself might be held equivalent to such finding." "The rule is general with reference to the enactments of all legislative bodies that the courts cannot inquire into the motives of the legislators in passing them, except as they may be disclosed on the face of the acts, or inferable from their operation, considered with reference to the condition of the country and existing legislation. The motives of the legislators, considered as the purposes they had in view, will always be presumed to be to accomplish that which follows as the natural and reasonable effect of their enactments. Their motives, considered as the moral inducements for their votes, will vary with the different members of the legislative body. The diverse character of such motives, and the impossibility of penetrating into the hearts of men and ascertaining the truth, precludes all such inquiries as impracticable and futile." *Soon Hing vs. Crowley*, 113 U. S. 703, 710. "We must assume that the legislature acts according to its judgment for the best interests of the state. A wrong intent cannot be imputed to it." *Florida Central, etc., Railroad company vs. Reynolds*, 133 U. S. 471, 480.

The act must be taken as an attempt of the legislature to enact a statute which it deemed necessary to the good order and security of society. It imposes a penalty for "coercing or influencing or making demands upon or requirements of employes, servants, laborers and persons seeking employment." It was in the light of this avowed purpose that the act was interpreted by the Supreme court of Kansas, the ultimate authority upon the meaning of the terms of the law. Of course, if the act is necessarily arbitrary and therefore unconstitutional, mere declarations of good intent cannot save it, but it must be presumed to have been passed by the legislative branch of the state government in good faith and for the purpose of reaching the desired end. The legislature may have believed, acting upon conditions known to it, that the public welfare would be promoted by the enactment of a statute which should prevent the compulsory exaction of written agreements to forego the acknowledged legal right here involved, as a condition of employment in one's trade or occupation.

It would be impossible to maintain that because one is free to accept or refuse a given employment, or because one may at will employ or

refuse to employ another, it follows that the parties have a constitutional right to insert in an agreement of employment any stipulation they choose. They cannot put in terms that are against public policy either as it is deemed by the courts to exist at common law or as it may be declared by the legislature as the arbiter within the limits of reason of the public policy of the state. It is no answer to say that the greater includes the less and that because the employer is free to employ, or the employee to refuse employment, they may agree as they please. This matter is easily tested by assuming a contract of employment for a year and the insertion of a condition upon which the right of employment should continue. The choice of such conditions is not to be regarded as wholly unrestricted because the parties may agree or not as they choose. And if the state may prohibit a particular stipulation in an agreement because it is deemed to be opposed in its operation to the security and well being of the community, it may prohibit it in any agreement whether the employment is for a term or at will. It may prohibit the attempt in any way to bind one to the objectionable undertaking.

Would any one contend that the state might not prohibit the imposition of conditions which should require an agreement to forego the right on the part of the employee to resort to the courts of the country for redress in case of disagreement with his employer? While the employee might be discharged in case he brought suit against an employer if the latter so willed, it by no means follows that he could be required, as a condition of employment, to forego a right so obviously fundamental as the one supposed. It is therefore misleading to say that the right of discharge necessarily embraces the right to impose conditions of employment which shall include the surrender of rights which it is the policy of the state to maintain.

Take another illustration: The right to exclude a foreign corporation from carrying on a purely domestic business in the state has been distinctly recognized by decisions of this court; yet it has been held, and is now settled law, that it is beyond the authority of the state to require a corporation doing business of this character to file in the office of the secretary of state a written agreement that it will not remove a suit, otherwise removable, to a federal court of the United States. *Insurance Co. vs. Morse*, 20 Wall.

445. In that case the right to exclude was held not to include the right to impose any condition under which that corporation might do business in the state. In that connection this court said:

"A man may not barter away his life or his freedom, or his substantial rights. In a criminal case he cannot, as was held in *Cancerm's* case, be tried in any other manner than by a jury of twelve men, although he consent in open court to be tried by a jury of eleven men. In a civil case he may submit his particular suit by his own consent to an arbitration or to the decision of a single judge. So he may omit to exercise his right to remove his suit to a federal tribunal, as often as he thinks fit, in each recurring case. In these aspects any citizen may no doubt waive the rights to which he may be entitled. He cannot, however, bind himself in advance by an agreement, which may be specifically enforced, thus to forfeit his rights at all times and on all occasions, whenever the case may be presented." *Insurance company vs. Morse*, 20 Wall. 445, 451.

It may be that an employer may be of the opinion that membership of his employees in the national guard, by enlistment in the militia of the state, may be detrimental to his business. Can it be successfully contended that the state may not, in the public interest, prohibit an agreement to forego such enlistment as against public policy? Would it be beyond a legitimate exercise of the police power to provide that an employee should not be required to agree, as a condition of employment, to forego affiliation with a particular political party, or the support of a particular candidate for office? It seems to me that these questions answer themselves. There is a real and not fanciful distinction between

the exercise of the right to discharge at will and the imposition of a requirement that the employee, as a condition of employment, shall make a particular agreement to forego a legal right. The agreement may be, or may be declared to be, against public policy, although the right of discharge remains. When a man is discharged the employer exercises his right to declare such action necessary because of the exigencies of his business or as the result of his judgment for other reasons sufficient to himself. When he makes a stipulation of the character here involved essential to future employment, he is not exercising his right to discharge, and may not wish to discharge the employee when, at a subsequent time, the prohibited act is done. What is in fact accomplished is that the one engaging to work, who may wish to preserve an independent right of action, as a condition of employment, is coerced to the signing of such an agreement against his will, perhaps impelled by the necessities of his situation. The state, within constitutional limitations, is the judge of its own policy and may execute it in the exercise of the legislative authority. This statute reaches not only the employed, but, as well, one seeking employment. The latter may never wish to join a union. By signing such agreements as are here involved he is doing so of his own free choice as to his future conduct, and must choose between employment and the right to act in the future as the exigencies of his situation may demand. It is such contracts, having such effect, that this statute and similar ones seek to prohibit and punish as against the policy of the state.

It is constantly emphasized that the case presented is not one of coercion. But in view of the relative positions of employer and employed, who is to deny that the stipulation here insisted upon and forbidden by the law is essentially coercive?

No form of words can strictly state its true character. Whatever our individual opinions may be as to the wisdom of such legislation, we cannot put our judgment in place of that of the legislature and refuse to acknowledge the existence of the conditions with which it was dealing. Opinions may differ as to the remedy, but we cannot understand upon what ground it can be said that a subject so intimately related to the welfare of society is removed from the legislative power. Wherein is the right of the employer to insert this stipulation in the agreement any more sacred than his right to agree with another employer in the same trade to keep up prices. He may think it quite as essential to his "financial independence" and so in truth it may be if he alone is to be considered. But it is too late to deny that the legislative power reaches such a case. It would be difficult to select any subject more intimately related to good order and the security of the community than that under consideration—whether one takes the view that labor organizations are advantageous or the reverse. It is certainly as much a matter for legislative consideration and action as contracts in restraint of trade.

It is urged that a labor organization—a voluntary association of workmen—has the constitutional right to deny membership to any man who will not agree that during such membership he will not accept or retain employment in company with nonunion men. And it is asserted that there cannot be one rule of liberty for the labor organization and its members and a different and more restrictive rule for employers.

It of course is true, for example, that a church may deny membership to those who unite with other denominations, but it by no means follows that the state may not constitutionally prohibit a railroad company from compelling a workman to agree that he will or will not join a particular church. An analogous case—viewed from the employer's standpoint—would be: Can the state, in the exercise of its legislative power, reach concerted effort of employees intended to coerce the employer as a condition of hiring labor that he shall engage in writing to give up his privilege of association with other employers in legal organizations, corporate or otherwise, having for their object a united effort to promote by legal

means that which employers believe to be for the best interest of their business?

I entirely agree that there should be the same rule for employers and employed, and the same liberty of action for each. In my judgment, the law may prohibit coercive attempts, such as are here involved, to deprive either of the free right of exercising privileges which are theirs within the law. So far as I know, no law has undertaken to abridge the right of employers of labor in the exercise of free choice as to what organizations they will form for the promotion of their common interests, or denying to them free right of action in such matters.

But it is said that in this case all that was done in effect was to discharge an employe for a cause deemed sufficient to the employer—a right inherent in the personal liberty of the employer protected by the constitution. This argument loses sight of the real purpose and effect of this and kindred statutes. The penalty imposed is not for the discharge, but for the attempt to coerce an unwilling employe to agree to forego the exercise of the legal right involved as a condition of employment. It is the requirement of such agreement which the state declares to be against public policy.

I think that the act now under consideration, and kindred ones, are intended to promote the same liberty of action for the employe as the employer confessedly enjoys. The law should be as zealous to protect the constitutional liberty of the employe as it is to guard that of the employer. A principal object of this statute is to protect the liberty of the citizen to make such lawful affiliations as he may desire with organizations of his choice. It should not be necessary to the protection of the liberty of one citizen that the same right in another citizen be abridged or destroyed.

If one prohibitive condition of the sort here involved may be attached, so may others, until employment can only be had as the result of written stipulations which will deprive the employe of the exercise of legal rights which are within the authority of the state to protect. While this court should, within the limitations of the constitutional guaranty, protect the free right of contract, it is not less important that the state be given the right to exert its legislative authority, if it deems best to do so, for the protection of rights which inhere in the privileges of the citizen of every free country.

The Supreme court of Kansas in sustaining this statute said that "employes as a rule are not financially able to be as independent in making contracts for the sale of their labor as are employers in making a contract of purchase thereof," and in reply to this it is suggested that the law cannot remedy inequalities of fortune, and that so long as the right of property exists it may happen that parties negotiating may not be equally unhampered by circumstances.

This view of the Kansas court, as to the legitimacy of such considerations, is in entire harmony, as I understand it, with former decisions of this court in considering the right of state legislatures to enact laws which shall prevent the undue or oppressive exercise of authority in making contracts with employes. In *Holden vs. Hardy*, 169 U. S. 366, this court, considering legislation limiting the number of hours during which laborers might be employed in a particular employment, said:

"The legislature has also recognized the fact, which the experience of legislators in many states has corroborated, that the proprietors of these establishments and their operatives do not stand upon an equality, and that their interests are, to a certain extent, conflicting. The former naturally desire to obtain as much labor as possible from their employes, while the latter are often induced by the fear of discharge to conform to regulations which, in their judgment, fairly exercised, would pronounce to be detrimental to their health or strength. In other words, the proprietors lay down the rules and the laborers are practically constrained to obey them. In such cases self-interest is often an unsafe guide,

and the legislature may properly interpose its authority. * * * But the fact that both parties are of full age and competent to contract does not necessarily deprive the state of the power to interfere where the parties do not stand upon an equality, or where the public health demands that one party to the contract shall be protected against himself. 'The state still retains an interest in his welfare, however reckless he may be. The whole is no greater than the sum of all the parts, and when the individual health, safety and welfare are sacrificed or neglected, the state must suffer.' " (Page 397.)

This language was quoted with approval in *Chicago, Burlington & Quincy Railroad company vs. McGuire*, 219 U. S. 549, 570, in which a statute of Iowa was sustained prohibiting contracts limiting liability for injuries made in advance of the injuries received, and providing that the subsequent acceptance of benefits under such contracts should not constitute satisfaction for injuries received after the contract. Certainly it can be no substantial objection to the exercise of the police power that the legislature has taken into consideration the necessities, the comparative ability and the relative situation of the contracting parties. While all stand equal before the law and are alike entitled to its protection, it ought not to be a reasonable objection that one motive which impelled an enactment was to protect those who might otherwise be unable to protect themselves.

I therefore think that the statute of Kansas, sustained by the Supreme court of the state, did not go beyond a legitimate exercise of the police power when it sought not to require one man to employ another against his will, but to put limitations upon the sacrifice of rights which one man may exact from another as a condition of employment. Entertaining these views, I am constrained to dissent from the judgment in this case.

I am permitted to say that Mr. Justice Hughes concurs in this dissent.

THE DANBURY HATTERS' CASE.

In the United States District court in Hartford, Conn., Oct. 11, 1912, a jury returned a verdict for \$80,000 and costs against the United Hatters of North America in the suit brought by D. E. Loewe & Co., hat manufacturers in Danbury, Conn., charging the defendants with conducting a boycott against hats made by the firm. Under the Sherman antitrust law the damages are trebled, making the award in this instance equivalent to \$240,000.

The suit was originally brought in the Circuit court in 1903, when Loewe & Co. filed a bill alleging that the labor organization had undertaken to unionize the company's hat factory in Danbury, and, failing to do so, had gone on a strike. This act was followed by the declaration of a boycott against the firm's hats wherever they were found, and as it controlled an extensive trade throughout many states the boycott, in the language of the bill, constituted a combination to limit and restrain interstate commerce. On a remurrer by the hatters' union the Circuit court decided that the Sherman law was inapplicable and dismissed the case. The Court of Appeals, however, certified the suit to the United States Supreme court, and that tribunal, Feb. 3, 1908, reversed the decision of the Circuit court, deciding, without a dissenting voice, that boycotting where it affected interstate commerce, was in violation of the Sherman antitrust act.

The case then went back to the Circuit court, and after a trial lasting eleven weeks resulted Feb. 4, 1910, in a verdict for \$74,000 damages for the plaintiff. An appeal was taken and the case was sent to the United States District court, with the result stated above. It was again taken to the United States Court of Appeals in New York, which in a decision announced Dec. 18, 1913, affirmed the judgment in favor of D. E. Loewe & Co. and against the hatters' organization for \$252,130. With interest and costs the

judgment amounted to \$272,000. The plaintiffs were backed by the Antiboycott society and the defendants by the American Federation of Labor.

The judgment of the Court of Appeals was affirmed by the United States Supreme court in a decision announced Jan. 5, 1915. The decision in full follows:

SUPREME COURT OF THE UNITED STATES.

No. 358. October term, 1914.

Martin Lawlor et al.,
Plaintiffs in Error,

vs.

Dietrich E. Loewe and
Martin Fuchs, Part-
ners, under the Firm
Name of D. E. Loewe
& Co.

In Error to the United
States Circuit Court of
Appeals for the Sec-
ond Circuit.

[Jan. 5, 1915.]

Mr. Justice Holmes delivered the opinion of the court.

This is an action under the act of July 2, 1890, c. 647, §7, 26 Stat. 209, 210, for a combination and conspiracy in restraint of commerce among the states, specifically directed against the plaintiffs (defendants in error) among others and effectively carried out with the infliction of great damage. The declaration was held good on the demurrer in 208 U. S. 274, where it will be found set forth at length. The substance of the charge is that the plaintiffs were hat manufacturers who employed nonunion labor; that the defendants were members of the United Hatters of North America and also of the American Federation of Labor; that in pursuance of a general scheme to unionize the labor employed by manufacturers of fur hats (a purpose previously made effective against all but a few manufacturers), the defendants and other members of the United Hatters caused the American Federation of Labor to declare a boycott against the plaintiffs and against all hats sold by the plaintiffs to dealers in the states and against dealers who should deal in them, and that they carried out their plan with such success that they have restrained or destroyed the plaintiffs' commerce with other states. The case now has been tried, the plaintiffs have got a verdict and the judgment of the District court has been affirmed by the Circuit Court of Appeals. 209 Fed. Rep. 721; 126 C. C. A. 445.

The grounds for discussion that were not cut away by the decision upon the demurrer have been narrowed still further since the trial by the case of Eastern States Retail Lumber Dealers' association vs. United States, 234 U. S. 600. Whatever may be the law otherwise, that case establishes that, irrespective of compulsion or even agreement to observe its intimation, the circulation of a list of "unfair dealers," manifestly intended to put the ban upon those whose names appear therein, among an important body of possible customers, combined with a view to joint action and in anticipation of such reports, is within the prohibitions of the Sherman act if it is intended to restrain and restrains commerce among the states.

It requires more than the blindness of justice not to see that many branches of the United Hatters and the Federation of Labor, to both of which the defendants belonged, in pursuance of a plan emanating from headquarters, made use of such lists and of the primary and secondary boycott in their effort to subdue the plaintiffs to their demands. The union label was used and a strike of the plaintiffs' employees was ordered and carried out to the same end, and the purpose to break up the plaintiffs' commerce affected the quality of the acts. Loewe vs. Lawlor, 208 U. S. 274, 299. We agree with the Circuit Court of Appeals that a combination and conspiracy forbidden by the statute were proved and that the question is narrowed to the responsibility of the defendants for what was done by the sanction and procurement of the societies above named.

The court in substance instructed the jury that if these members paid their dues and continued to delegate authority to their officers unlawfully to interfere with the plaintiffs' interstate commerce in such circumstances that they knew or

ought to have known, and such officers were warranted in the belief that they were acting in the matters within their delegated authority, then such members were jointly liable and no others. It seems to us that this instruction sufficiently guarded the defendants' rights and that the defendants got all that they were entitled to ask in not being held chargeable with knowledge as matter of law. It is a tax on credulity to ask anyone to believe that members of labor unions at that time did not know that the primary and secondary boycott and the use of the "We don't patronize" or "Unfair" list were means expected to be employed in the effort to unionize shops. Very possibly they were thought to be lawful. See Gompers vs. United States, 233 U. S. 604. By the constitution of the United Hatters the directors are to use "all the means in their power" to bring shops "not under our jurisdiction" "into the trade." The by-laws provide a separate fund to be kept for strikes, lockouts and agitation for the union label. Members are forbidden to sell nonunion hats. The Federation of Labor, with which the hatters were affiliated, had organization of labor for one of its objects, helped affiliated unions in trade disputes, and to that end before the present trouble had provided in its constitution for prosecuting and had prosecuted many what it called legal boycotts. Their conduct in this and former cases was made public, especially among the members, in every possible way. If the words of the documents on their face and without explanation did not authorize what was done, the evidence of what was done publicly and habitually showed their meaning and how they were interpreted. The jury could not but find that by the usage of the unions the acts complained of were authorized and authorized without regard to their interference with commerce among the states. We think it unnecessary to review the evidence of the publicity of this particular struggle in the common newspapers and union prints, evidence that made it almost inconceivable that the defendants, all living in the neighborhood of the plaintiffs, did not know what was done in the specific case. If they did not know that, they were bound to know the constitution of their societies and at least well might be found to have known how the words of those constitutions had been construed in act.

It is suggested that injustice was done by the judge speaking of "proof" that in carrying out the object of the association unlawful means had been used with their approval. The judge cautioned the jury with special care not to take their view of what had been proved from him, going even farther than he need have gone. Graham vs. United States, 231 U. S. 474, 480. But the context showed plainly that proof was used here in a popular way for evidence and must have been understood in that sense.

Damages accruing since the action began were allowed, but only such as were the consequence of acts done before and constituting part of the cause of action declared on. This was correct. New York, Lake Erie & Western R. v. McGinnis, 147 U. S. 591, 615, 616. We shall not discuss the objections to evidence separately and in detail, as we find no error requiring it. The introduction of newspapers, etc., was proper in large part to show publicity in places and directions where the facts were likely to be brought home to the defendants and also to prove an intended and detrimental consequence of the principal acts, not to speak of other grounds. The reason given by customers for ceasing to deal with sellers of Loewe hats, including letters from dealers to Loewe & Co., were admissible. 3 Wigmore, Evidence, §1729. We need not repeat or add to what was said by the Circuit Court of Appeals with regard to evidence of the payment of dues after this suit was begun. And in short neither the argument nor the perusal of the voluminous brief for the plaintiffs in error shows that they suffered any injustice or that there was any error requiring the judgment to be reversed. Judgment affirmed.

MINIMUM WAGE FOR WOMEN AND MINORS.

Following are the main features of the minimum wage laws in force in 1914 in various states of the union:

California—In effect Aug. 10, 1913: industries covered, all; employees covered, women and minors under 18; principle of wage determination, "necessary cost of proper living"; penalty for violation of act, minimum fine of \$50, imprisonment for thirty days, or both; administrative body, industrial welfare commission; members of commission, five, one a woman.

Colorado—In effect Aug. 12, 1913: industries covered, mercantile, manufacturing, laundry, hotel, restaurant, telephone or telegraph; employees covered, women and minors under 18; principle of wage determination, "necessary cost of living" and "financial condition of the business"; penalty for violation of act, maximum fine of \$100, imprisonment for three months or both; administrative body, state wage board; members of board, three, one a woman.

Massachusetts—In effect July 1, 1913: industries covered, all; employees covered, women and minors under 18; principle of wage determination, "needs of the employees" and "financial condition of the business"; penalty for violation of act, name may be published in newspapers (\$100 fine for newspapers refusing to publish); administrative body, minimum wage commission; members of board, three, one a woman.

Minnesota—In effect June 26, 1913: industries covered, all; employees covered, women and minors under 21; principle of wage determination, "living wages"; penalty for violation of act, \$10 to \$50 fine or imprisonment ten to sixty days; administrative body, minimum wage commission; members of commission, three, one a woman.

Nebraska—In effect July 17, 1913: industries covered, all; employees covered, women and minors under 18; principle of wage determination, "needs of employees" and "financial condition of the occupation"; penalty for violation of act, commission must publish names in newspapers (\$100 fine for newspapers refusing to publish); administrative body, minimum wage commission; members of commission, four, one a woman.

Oregon—In effect June 2, 1913: industries covered, all; employees covered, women and minors under 18; principle of wage determination, "necessary cost of living"; penalty for violation of act, fine of \$25 to \$100, imprisonment ten days to three months, or both; administrative body, industrial welfare commission; members of commission, three.

Utah—In effect May 17, 1913: industries covered, all; employees covered, "females"; principle of wage determination, experienced adults, \$1.25 a day (fixed by act); penalty for violation of act, same as for misdemeanor; administrator, commissioner of immigration, labor and statistics.

Washington—In effect June 13, 1913: industries covered, all; employees covered, women and minors under 18; principle of wage determination, "necessary cost of living"; penalty for violation of act, fine of \$25 to \$100; administrative body, industrial welfare commission; members of commission, five.

Wisconsin—In effect Aug. 1, 1913: industries covered, all; employees covered, women and minors; principle of wage determination, "a living wage"; penalty for violation of act, \$10 to \$100 fine for each offense; administrative body, industrial commission; members of commission, three.

BUCK'S STOVE COMPANY BOYCOTT CASE.

Proceedings were brought in the Supreme court of the District of Columbia in August, 1907, against the officers of the American Federation of Labor to enjoin them from conducting a boycott against the Buck's Stove and Range company of St. Louis, Mo., by advertising that the concern was on the "unfair" and "we don't patronize" lists of the federation's official organ. The injunction was issued by Judge Gould Dec. 23, 1907. On the plea that the injunction was being violated proceedings for contempt of court were brought against Samuel Gompers, president; John Mitchell, vice-president, and Frank Morrison, secretary of the federation. They were declared guilty by Justice Wright of the Supreme court of the District of Columbia Dec. 23, 1908. Mr. Gompers was sentenced to one year's imprisonment, Mr. Mitchell to nine months' and Mr. Morrison to six months' imprisonment. They were admitted to bail and the case was taken to the Court of Appeals of the District of Colum-

bia, which tribunal decided Nov. 2, 1909, that the decree against them was valid.

An appeal was taken to the United States Supreme court, which on May 15, 1911, reversed the judgments of the lower courts and remanded the case. May 6, 1913, the Court of Appeals of the District of Columbia again affirmed the original findings in the contempt case, but reduced Mr. Gompers' sentence to thirty days in jail and held that Mitchell and Morrison should be exempt from prison sentences, but should each pay a fine of \$500. June 19, 1913, Chief Justice White of the United States Supreme court granted an appeal by the defendants that the case be heard again by the highest tribunal.

May 11, 1914, the United States Supreme court set aside the sentences imposed upon Gompers, Mitchell and Morrison on the ground that they were barred by the statute of limitations. Justice Holmes, who read the opinion, held that the contempt proceedings should have been begun within three years from the date of the offense.

BOARD OF MEDIATION AND CONCILIATION.

Commissioner of Mediation—William L. Chambers.

Assistant Commissioner of Mediation—G. W. W. Hangar.

Board of Mediation and Conciliation—Martin A. Knapp, chairman; William L. Chambers, G. W. W. Hangar, secretary.

Office—Southern building, Washington, D. C.

The board of mediation and conciliation, created by act of congress approved July 15, 1913, was established to settle by mediation, conciliation and arbitration controversies concerning wages, hours of labor or conditions of employ-

ment that may arise between common carriers engaged in interstate transportation and their employees engaged in train operation or train service. Whenever such a controversy arises, interrupting or threatening to interrupt the operation of trains to the serious detriment of the public interest, upon the request of either party the board of mediation is required to use its best efforts by mediation and conciliation to bring about an agreement. If such efforts are unsuccessful, the board endeavors to induce the parties to submit their controversy to arbitration, and, if successful, makes the necessary arrangements for such arbitration. The board is an independent office.

UNITED STATES PASSPORT REGULATIONS.

Passports are issued to citizens of the United States upon application to the state department in Washington. The application must be accompanied by an affidavit, attested by a notary public or other officer empowered to administer oaths, stating that the applicant is a citizen and giving the place of birth and age, and it must be accompanied by the certificate of one other citizen to whom he is personally known that the declaration made by the applicant is true. The application must also be accompanied by a description of the person, particularly as to age, height, complexion, forehead, eyes, nose, mouth,

chin, hair and face. Blank forms are furnished by the state department upon application. The fee for each passport is \$1. Citizens traveling abroad may also in some cases obtain passports by applying to United States ambassadors and ministers. Where any person has made a declaration of intention to become a citizen of the United States and has resided in the United States for three years a passport valid for six months may be issued to him. [Owing to European war regulations for identification, passports were issued in November, 1914. Apply to state department for further information.]

CHRISTIAN SCIENCE CHURCH.

The Christian Science church was founded in 1852 by Mary Baker Eddy, the discoverer of Christian Science and author of its textbook, "Science and Health, with Key to the Scriptures." The church was organized "to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Church Manual). In 1892 the church was reorganized as the First Church of Christ, Scientist, known as the Mother Church, in Boston, Mass. The present officers of the Mother Church are:

President—Edward A. Merritt.
 Clerk—John V. Dittmore.
 Treasurer—Adam H. Dickey.
 Directors—Archibald McLellan, Allison V. Stewart, James A. Neal, John V. Dittmore, Adam H. Dickey.

All Christian Science churches and societies in the United States and in foreign countries are branches of the Mother Church. Lesson-sermons compiled from the bible and "Science and Health, with Key to the Scriptures" are read at the services in Christian Science churches.

Mrs. Eddy founded the Christian Science Jour-

nal. Sentinel, Quarterly. Der Herold der Christian Science and The Christian Science Monitor (a daily newspaper), all of which are published by the Christian Science Publishing society in Boston.

There is in connection with the Christian Science movement an official board of lectureship designed to furnish the public correct information concerning the fundamental teachings of Christian Science. Lectures given by members of this board are free to the public.

RELIGIONS OF THE WORLD.

According to the revised (1898) edition of Mulhall's Dictionary of Statistics, there were then 476,100,000 Christians in the world. The same authority placed the number of Roman Catholics in Europe, America and Australia at 223,090,000; protestants, 157,050,000, and Greeks, 88,660,000. It has been estimated that there are in the world 256,000,000 followers of Confucius, 190,000,000 Hindus, 176,800,000 Mohammedans, 148,000,000 Buddhists, 118,000,000 polytheists, 43,000,000 Taoists, 14,000,000 Shintoists and 12,000,000 Jews. Of the Christians more than 230,000,000 are Catholics, 98,000,000 orthodox Greeks, 70,000,000 Lutherans, 21,000,000 episcopalians, 17,000,000 methodists, 11,000,000 baptists, 9,000,000 presbyterians and 4,500,000 congregationalists.

Commanderies have been established in twenty-one states. Total membership about 1,200.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names as well as the services of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain or shall serve in future campaigns recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

GENERAL SOCIETY OF MAYFLOWER DESCENDANTS.

The Society of Mayflower Descendants was organized in the city of New York Dec. 23, 1894, by lineal descendants of the Mayflower pilgrims, "to preserve their memory, their records, their history and all facts relating to them, their ancestors and their posterity." Every lineal descendant over 18 years of age, male or female, of any passenger of the voyage of the Mayflower which terminated at Plymouth, Mass., December, 1620, including all signers of "The Compact," are eligible to membership.

The General Society of Mayflower Descendants was organized at Plymouth, Mass., 1897. The triennial congress is held in September at Plymouth, Mass. Societies have been organized in New York, Connecticut, Massachusetts, Pennsylvania, Illinois, District of Columbia, Ohio, New Jersey, Wisconsin, Rhode Island, Michigan, Maine, Colorado, California, Washington and Kansas. The officers of the general society are: Governor-General—Gen. Leonard Wood. Secretary-General—Walter S. Allerton. Treasurer-General—Henry H. Belknap. Historian-General—Dr. George B. Stevens. Captain-General—Miles Standish, M. D. Surgeon-General—Dr. Edwin N. Chaney. Elder-General—Frederick W. Harriman, D. D.

SUZ CANAL TRAFFIC IN 1913.

The total receipts of transit tonnage tolls of the Suez canal in 1913 amounted to \$23,443,643, a decrease of \$1,886,189 as compared with 1912. The decrease was owing to the reduction of the toll rate which went into effect Jan. 1, 1913. The total toll-paying tonnage for 1913 was 19,165,000 tons, or 456,000 tons in excess of that for 1912.

In 1913 the total number of vessels passing through the Suez canal was 5,085 as against 5,373 in 1912. The average time of vessels going through the canal in 1913 was 16 hours 19 minutes. Freight traffic in 1914 and 1915 was greatly diminished by the war in Europe, but no detailed statistics were published.

WEST INDIAN HURRICANE IN TEXAS.

The southeastern coast of Texas was visited by a storm of wind and rain Aug. 16 and 17, 1915, which caused the loss of scores of lives and the destruction of a large amount of property. It originated in the vicinity of Jamaica, where much damage was done to plantations, railroads and other property Aug. 12 and 13. The hurricane then swept northwest over the Caribbean sea and the Gulf of Mexico, striking Galveston and other cities on or near the Texas coast on the Monday evening following. It then passed on in a northeasterly direction through Arkansas, Missouri, Illinois and Indiana, causing heavy rains which in some places resulted in serious floods. Galveston was saved from a repetition of the disaster of Sept. 8, 1900, by the great sea wall, which kept the waters of the gulf from sweeping over the city. Not more

than thirty-three lives were lost on the island, and of these only eight were in the city proper. The wind, which blew at the rate of ninety miles an hour, caused the heaviest damage to property. This amounted to about \$3,000,000 in Galveston alone.

Ten soldiers were killed in the camp of the second division in Texas City by the collapse of a building. Casualties were also reported from Morgan Point, Port Arthur, Surfside, Lynchburg, Anhauc, Wallaceville and a dozen other places, the total number of dead being estimated at about 100. This was exclusive of an equal number of lives lost by the sinking of the dredge Sam Houston and other vessels in Galveston bay.

In the city and county of St. Louis a score or more of persons were drowned by floods caused by excessively heavy rains.

EASTLAND STEAMER DISASTER.

[Photo by American Press Association.]

STEAMER EASTLAND, ON WHICH 812 PERSONS LOST THEIR LIVES.

Date—July 24, 1915.

Place—Chicago river, Chicago, Ill.

Persons aboard—More than 2,000.

Lives lost—812.

Cause—Instability of steamer and overloading.

Eight hundred and twelve persons were drowned when the steamer Eastland overturned in the Chicago river early Saturday morning, July 24, 1915. The boat with several others had been chartered by the Hawthorne club to take employees of the Western Electric company on a lake excursion to Michigan City, Ind. It was to be the first steamer to start and by 7:30 o'clock in the morning it was ready to leave its dock on the south side of the river west of Clark street bridge. Just how many persons boarded the boat was never learned. It had a permit to carry 2,500 persons and while 2,412 tickets were turned in as having been collected from those intending to make the trip it was the belief that the actual number on board was larger. It seemed to observers that all the space on the craft, inside and outside, was crowded. Ticket holders who arrived at the last moment were refused permission to cross the gangplank and were told to take another boat.

According to the testimony of witnesses who appeared later before the state grand jury, the Eastland, just before the order to cast off the lines was given, listed first to starboard, then came back to an even keel, then listed to port, recovered a little and then rolled over toward the center of the river. The accident was seen by many persons on the bridge and the adjacent docks and instant alarm was given to the fire and police departments. The excursionists on the open part of the deck were for the most part thrown into the river and many of them were picked up by rowboats and tugs. The greater number of those on the inside of the vessel were trapped and perished long before help could reach them. The boat was not completely submerged and some of those on the upper side were rescued through holes cut through the steel walls of the hull by means of oxy-acetylene torches. Divers were employed to bring the bodies of the dead out of the submerged portion, and this work required several days. As fast as the bodies were recovered they were taken to the nearest undertaking establishments, where they were identified in course of time.

There was much confusion for a time and reports were current that more than 2,000 persons had lost their lives. Careful checking up by the coroner after many days of investigation led to the conclusion that in reality the number of the dead was 812. The victims were for the greater

part persons in moderate circumstances and, as will be seen from the following list of nationalities, were chiefly of foreign birth or extraction:

German	212	Hungarian	8
Bohemian	148	Scotch	7
American	117	Canadian	6
Polish	80	French	2
Austrian	49	Hollander	2
Swedish	41	Swiss	2
Irish	40	Greek	1
Norwegian	17	Lithuanian	1
Italian	16	Not ascertained.....	24
English	14		
Danish	13	Total	812
Russian	13		

The coroner's tabulation showed further that 451 of the victims were females and 361 males. As to civil condition, 573 were married, 226 single, 5 widows, 2 widowers, 1 divorced and 5 not ascertained. Nearly one-third—251—were between the ages of 20 and 25. Fifty-two were less than 10 years old and 285 less than 20. By far the largest number—252—were classified as factory hands.

Demands for an investigation of the disaster and for the punishment of those responsible came from all sides. The coroner's jury, after taking testimony for five days, returned the following verdict July 28:

State of Illinois—County of Cook:

An inquisition was taken for the people of the state of Illinois, at the County building, in the city of Chicago, in said county of Cook, on the 24th, 25th, 26th, 27th and 28th days of July, A. D. 1915, before me, Peter M. Hoffman, coroner in and for said county, upon view of the bodies of Kate Austin et al., then and there lying dead, upon the oaths of six good and lawful men of said county, who, being duly sworn to inquire on the part of the people of the state of Illinois into all circumstances attending the death of said Kate Austin et al., and by whom the same was produced, and in what manner and when and where the said Kate Austin et al. came to their deaths, do say, upon their oaths, as aforesaid, that the said Kate Austin et al., now lying dead at the morgues in said city of Chicago, county of Cook, state of Illinois, came to their deaths on the 24th day of July, A. D. 1915, from asphyxiation by drowning, the result of the overturning of the steamer Eastland while tied to the docks on the south side of the Chicago river immediately west of the Clark street bridge.

We recommend that the following persons be held to the grand jury on the charge of man-

slaughter and for such other offenses as the facts may warrant:

William H. Hull, vice-president and general manager of the St. Joseph-Chicago Steamship company, owner of the steamer Eastland, St. Joseph, Mich.

Capt. Harry Pedersen, St. Joseph, Mich., of the steamship Eastland.

Joseph M. Erickson, St. Joseph, Mich., chief engineer of the steamship Eastland.

Walter K. Greenebaum, Chicago, Ill., general manager of the Indiana Transportation company.

Robert Reid, Grand Haven, Mich., United States local steamboat inspector.

Charles C. Eckliff, Grand Haven, Mich., local United States steamboat inspector.

Nothing in the testimony offered before this jury indicated that the passengers were guilty of any unusual act that contributed to the disaster and we are of the opinion that no act of the passengers was responsible for the disaster.

In the absence of evidence of undue acts on the part of the passengers or violent physical causes, such as explosions, fire or collisions, the fact that this vessel overturned is proof either that it was improperly constructed for the service employed or that it was improperly loaded, operated or maintained, or that all of these causes operated to bring about the serious result.

It is our judgment that the steamship Eastland was both improperly constructed for the service employed and improperly loaded, operated and maintained, and that the parties named are responsible.

We recommend to the state's attorney and a grand jury that an investigation be made of the corporation or individuals responsible for the management of this boat with a view to discovering if other members of the corporation or other individuals were responsible for acts contributing to this disaster.

We further recommend that the state's attorney and the grand jury investigate carefully the circumstances of the construction of this boat to ascertain if there can be found legal methods by which those responsible for its defects in construction can be held accountable.

We further recommend that the state's attorney and the grand jury investigate the details of purchase and sale of the different common carriers which have owned the Eastland with a view to determining, if possible, whether knowledge of the instability of this boat and the hazards attendant thereon have been known to the sellers and have not been disclosed by the sellers to the purchasers, and whether the various purchasers of this boat have discharged their duties as common carriers in investigating the stability and freedom from hazards of the steamship Eastland.

It is the opinion that the federal government's system of permitting the construction of vessels for use by common carriers is unscientific and a menace to public safety. There is not now nor has there ever been an inspection service maintained by the federal government for the purpose of determining the stability of boats offered for passenger service. It is the judgment of the jury that the present method of determining the passenger carrying capacity of vessels is not founded on any proper basis.

In recommending that Inspectors Reid and Eckliff be held to the grand jury, we recognize the possibility that the courts of Illinois may not have jurisdiction over them. Should the courts of Illinois not have jurisdiction, we recommend to the department of Justice of the United States that they undertake to mete justice to these parties.

STATE GRAND JURY ACTION.

Investigations were begun by a state grand jury and a federal grand jury and much testimony was taken by both bodies. The state jury, Aug. 11, returned indictments against the following:

George T. Arnold, president of the St. Joseph-Chicago Steamship company.

William H. Hull, vice-president and general manager.

W. C. Steele, secretary-treasurer.

Ray W. Davis, assistant secretary-treasurer.

Harry Pedersen, captain.

Joseph M. Erickson, engineer.

The officials were charged with manslaughter and the captain and engineer with criminal carelessness.

Walter K. Greenebaum, general manager of the Indiana Transportation company, to which the Eastland had been leased by the St. Joseph-Chicago Steamship company, owner of the vessel, was indicted by the same jury on the charge of manslaughter. The bill contained three counts. Two charged the overloading of a passenger vessel, the other using an unseaworthy ship for carrying passengers. In submitting its first report the grand jury set forth that it considered the cause of the Eastland disaster to be the instability of the vessel under conditions of loading, and that this instability was due largely to overloading with passengers, mishandling of water ballast and the construction of the vessel.

"As actually operated, with the tanks used for trimming purposes only, the safety of the boat at all times depended, first, on the quick wit and the judgment of the engineer and captain; second, on the operating condition of the valves, pumps and sea cock, any of which could have easily been clogged and thus prevented the stabilizing of the boat," said the jury.

"The instability of this vessel, abundantly indicated by experience, would have been easily shown by calculation or by an inclining test, and could have been easily corrected by means of fixed ballast. That it was not corrected years ago we regard as indicating criminal carelessness or incompetence on the part of all persons connected with the design, construction, control, operation and inspection of the boat."

The recommendations of the grand jury embraced the following:

"Plans and calculations for a vessel are to be submitted to the federal government for approval before construction.

"Inspection of hull, engine, boilers and equipment to take place during construction of vessel; inclining tests to be made after completion.

"Stability of vessels in passenger service shall not depend upon movable ballast.

"Water ballast shall be used for trimming purposes only and so arranged that one set of tanks on one side can be filled while the other set is being pumped out.

"Data relating to stability under service conditions and information to be posted in the pilot house.

"Definite regulations governing number of passengers and equipment to be issued by the federal government.

"Reorganize and co-ordinate all branches of the steamboat inspection service and provide technically trained inspectors.

"Transfer the inspection service to the navy department."

FEDERAL GRAND JURY INDICTS.

The federal grand jury returned true bills, Sept. 22, for conspiracy and criminal neglect against the following:

George T. Arnold, president of the St. Joseph-Chicago Steamship company.

William H. Hull, vice-president and general manager of the St. Joseph-Chicago Steamship company.

Walter C. Steele, secretary-treasurer St. Joseph-Chicago Steamship Company.

Harry Pedersen, captain of the Eastland.
Joseph M. Erickson, chief engineer of the Eastland.

Robert Reid, federal steamboat inspector, of Grand Haven, Mich.

Charles C. Eckliff, federal steamboat inspector.

Walter K. Greenebaum, general manager of the Indiana Transportation company.

The St. Joseph-Chicago Steamship company, owners of the boat.

Indiana Transportation company, charterers of the boat.

The indictment charging conspiracy named the officers of the St. Joseph-Chicago Steamship company, the officers and the federal inspectors. It was charged that when they fixed the passenger capacity at 2,570 they knew they were overloading the boat. It was further charged that they knew that the boilers, machinery and ballast system of the boat were not of such shape, construction, material and arrangement as might be safely employed on a steamboat, and that the boat was "unstable, cranky and of insufficient water line and craft, top-heavy, inclined to list dangerously and equipped with an inadequate and defective ballast system and with an inexperienced and untrained crew."

The other indictments recited largely the acts said to have gone to constitute negligence.

In an address made Sept. 24 before the Engineers' club of Chicago, Andrews Allen, a mining engineer who was a member of the state grand jury, said in part:

"A great deal of evidence was presented to the grand jury bearing on different theories of the accident, among which were the following:

"It was thought that the line from the tug was attached high on the boat and that the lines holding the steamer to the tug were low, so that a heavy strain from the tug might have pulled the boat over. This theory was shown to be untenable when it was proved that there was only enough strain on the tow line to keep it taut.

"It was thought that the boat might have been resting on the bottom, in which case the load coming onto the boat would naturally cause her to careen and possibly to upset. This theory is untenable, first, because the boat first listed to starboard and then to port, and second, because the soundings showed 19 feet of water forward and 21 feet aft at 10 feet from the dock, and 17 feet 6 inches at 5 feet from the dock, while the boat drew only from 12 to 14 feet of water.

"On the morning of the accident the ballast tanks were pumped dry. When the boat listed to starboard they started to fill the port tanks. When it began to list to port they began to pump out the port tanks instead of filling the starboard tanks, too; in fact, this was attempted only at the last moment. The ballast tanks were, therefore, only partially filled and the water could

surge with every movement of the boat. The instability was doubtless increased instead of decreased thereby."

William C. Redfield, secretary of commerce, who visited Chicago immediately after the disaster, defended the steamship inspection service, and Edwin F. Sweet, assistant secretary of commerce, gave credence to the report that the overturning of the Eastland was caused by three submerged piles that had carelessly been left in the river after the construction of a tunnel.

HELP FOR BEREAVED.

Immediately after the disaster the collection of funds for persons left destitute by the death of those upon whom they depended for support was begun. The general public contributed about \$375,000 and the Western Electric company donated \$100,000. This together with \$85,000 from the company's death benefit association, \$271,000 from insurance companies and financial help from other sources made approximately \$850,000 paid out. The money was distributed by the Chicago branch of the American Red Cross society at an expense of about \$500.

The Eastland had a gross tonnage of 1,961 and net tonnage of 1,218. It was built in 1903 at Port Huron, Mich., and had a length of 265 feet, a breadth of 38 feet and a depth of 22 feet 4 inches.

Cause—Torpedo, fired by German submarine.

FEDERAL EMPLOYMENT WORK.

Since 1908 the division of information of the bureau of immigration in the federal department of labor has been active in securing work for the unemployed. The country has been divided into eighteen zones, some of which are subdivided, and each of these offices is in charge of an immigrant inspector, who receives applications from employers for help and from those in search of employment, referring the latter to such vacancies as he thinks suitable. All the work is done free of charge. Application blanks both for those seeking workers and those looking for work are deposited with every postmaster in the United States. The following table shows the total applications for positions, the number of places filled and the number of applications per 100 places filled in each fiscal year (ending June 30) since the organization of the division of information:

THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

The Carnegie Foundation for the Advancement of Teaching was founded by Andrew Carnegie in 1905 and incorporated by the congress of the United States in 1906 for the purpose of providing retiring allowances for teachers and officers of universities, colleges and technical schools in the United States, Canada and Newfoundland, and, in general, of advancing the profession of the teacher and the cause of higher education. By the ninth annual meeting of the trustees in 1914, 432 allowances were being paid to teachers and to widows of teachers, the amount of the average allowance being \$1,594.83, the total an-

nual cost being \$634,863.77 and the average age of retirement being about 69 years.

In the administration of its endowment, which now amounts to \$15,000,000, the foundation has restricted its allowances to professors and officers in a list of seventy-three institutions, selected for their educational standing, and has published a series of widely influential reports and bulletins concerning educational conditions. The president of the foundation is Henry S. Pritchett; its trustees are presidents of universities and colleges and financiers. Further information may be had by addressing the secretary, Clyde Furst, 576 5th avenue, New York.

POSTAL INFORMATION.

[From official pamphlet issued by the postoffice department.]

DOMESTIC MAIL MATTER.

CLASSIFICATION AND RATES OF POSTAGE.

Domestic mail matter includes mail addressed for local delivery or for transmission from one place to another within the United States, or to or from or between the possessions of the United States, and to that for transmission to or from the United States or its possessions and officers or members of crews of United States naval vessels, and to or from the United States postal agents at Shanghai, China, and to officers and men of the United States navy in the United States Naval hospital at Yokohama, Japan, and is divided into four classes: First, second, third, fourth (parcel post).

Domestic rates and conditions, with certain exceptions, apply to mail addressed to Canada, Cuba, Mexico and the Republic of Panama. The domestic rates apply also to letters, but not to other articles, addressed to Great Britain, Ireland and Newfoundland, and to letters for Germany dispatched only by steamers which sail direct to German ports.

Prepayment of postage on domestic matter at time of mailing, by stamps affixed, is required. By special permission, however, postage on matter of the third and fourth classes mailed in quantities of not less than 2,000 identical pieces may be paid in money.

Concealed matter—Matter of a higher class inclosed with matter of a lower class subjects the whole to the higher rate. Persons knowingly concealing or inclosing matter of a higher class in that of a lower class for the purpose of evading payment of the proper postage are liable to a fine of not more than \$100.

FIRST-CLASS MATTER.

First-class matter includes written matter, namely, letters, postal cards, postcards (private mailing cards) and all matter wholly or partly in writing, whether sealed or unsealed (except manuscript copy accompanying proof sheets or corrected proof sheets of the same and the writing authorized by law on matter of other classes). Also matter sealed or otherwise closed against inspection.

Rates of postage—Letters and other first-class matter, 2 cents for each ounce or fraction thereof. Postcards and postal cards, 1 cent each. "Drop letters," addressed for delivery at the office where mailed, 1 cent for each ounce or fraction thereof when deposited at postoffices where letter carrier service is not established. Letters addressed to patrons served by rural or star route carriers or deposited in boxes along such routes are subject to postage at the rate of 2 cents an ounce or fraction thereof. There is no drop rate on mail other than letters.

The limit of weight of first-class matter is four pounds.

SECOND-CLASS MATTER.

Second-class matter includes newspapers and periodicals bearing notice of entry as second-class matter. No limit of weight is prescribed.

Rate of postage—Newspapers and periodical publications of the second class, when sent unsealed by others than the publisher or a news agent, 1 cent for each four ounces or fraction thereof on each separately addressed copy or package of unaddressed copies. To be entitled to this rate the copies must be complete. Incomplete copies are third-class matter.

Additions to second-class matter—On the wrapper or the matter itself there may be written or printed: (1) The name and address of the sender, preceded by the word "from"; (2) the name and address of the person to whom sent; (3) the words "sample copy," or "marked copy," or both, as the case may be.

On the matter itself the sender may place all that is permitted on the wrapper; correct typographical errors in the text; designate by marks,

not by words, a word or passage in the text to which it is desired to call attention.

Other writing will subject the package to the first-class rate.

THIRD-CLASS MATTER.

Third-class matter embraces circulars, newspapers and periodicals not admitted to the second class, nor embraced in the term "book," miscellaneous printed matter on paper not having the nature of an actual personal correspondence, proof sheets, corrected proof sheets and manuscript copy accompanying the same, and matter in point print or raised characters used by the blind. (Books are included in fourth-class or parcel post mail.)

Typewriting and carbon and letter press copies thereof are the equivalent of handwriting and are classed as such in all cases. Matter produced by the photographic process (including blue prints), is printed matter. Matter printed on material other than paper is fourth-class.

Circulars—A circular is a printed letter sent in identical terms to several persons. It may bear a written, typewritten or hand-stamped date, name and address of person addressed and of the sender and corrections of mere typographical errors. When a name (except that of the addressee or sender), date (other than that of the circular), or anything else is handwritten or typewritten in the body of a circular for any other reason than to correct a genuine typographical error, the circular is subject to postage at the first-class (letter) rate, whether sealed or unsealed.

Reproductions or imitations of handwriting and typewriting obtained by means of the printing press, neostyle, multigraph or similar mechanical process will be treated as third-class matter, provided they are mailed at the postoffice or other depository designated by the postmaster in a minimum number of twenty identical, unsealed copies. If mailed elsewhere or in less quantity they will be subject to the first-class rate.

Matter for the blind—Letters and reading matter for the blind are transmissible in the mails under certain conditions at special rates, which may be ascertained from the postmaster.

The rate of postage on unsealed third-class matter is 1 cent for each two ounces or fraction thereof on each individually addressed piece or package.

The limit of weight of third-class matter is four pounds. Parcels of printed matter weighing more than four pounds which do not exceed the limit of weight and size for fourth-class matter come within that class and are mailable at the parcel post rates.

Additions to third-class matter—On the wrapper, envelope or the tag or label attached thereto, or upon the matter itself, in addition to the name and address of the addressee, there may be written or printed the name, occupation and residence or business address of the sender, preceded by the word "from." There may also be placed on the wrapper, envelope, tag or label, either written or otherwise, the inscription "Do not open until Christmas," or words to that effect, and any printed matter mailable as third-class, but there must be left on the address side a space sufficient for a legible address, postmark and the necessary postage stamps.

The words "Please send out" or "Post up," or other similar directions or requests, not a part of the address, nor necessary to effect delivery, may not be placed upon the wrapper of third-class matter or upon the matter itself without subjecting it to postage at the letter rate.

On the matter itself the sender may place all that is permitted on the wrapper and may make marks other than by written or printed words to call attention to any word or passage in the text and may correct any typographical errors.

There may also be written or printed upon any photograph, or other matter of the third class, a simple manuscript dedication or inscription not in the nature of personal correspondence. Such words as "Dear Sir," "My Dear Friend," "Yours truly," "Sincerely yours," "Merry Christmas," "Happy New Year" and "With best wishes," written upon third-class matter, are permissible inscriptions. A serial number written or impressed upon third-class matter does not affect its classification.

Written designation of contents, such as "Printed matter," "Photo," is permissible upon the wrapper of third-class matter.

Inclosures.—A single card bearing the written name and address of the sender or an envelope bearing a written or printed name and address of the sender may be inclosed with a circular or other third-class matter without affecting its classification.

Hand-stamped imprints on third-class matter will not affect its classification except when the added matter is in itself personal or converts the original matter into a personal communication; in the latter case, however, the mailing at one time at the postoffice window or other depository designated by the postmaster of not less than twenty identical unsealed copies will be sufficient evidence of impersonal character to entitle such matter to the third-class rate.

Corrections in proof sheets include the alteration of the text and insertion of new matter, as well as the correction of typographical and other errors; include also marginal instructions to the printer necessary to the correction of the matter or its proper appearance in print. Part of an article may be entirely rewritten if that be necessary for correction. Corrections should be upon the margin of or attached to the proof sheets. Manuscript of one article cannot be inclosed with proof or corrected proof sheets of another except at the first-class rate.

FOURTH-CLASS MATTER (DOMESTIC PARCEL POST).
Fourth-class matter embraces that known as domestic parcel post mail and includes farm and factory products (and books), not now embraced by law in either the first or second class or (with the exception of books) in the third class, not exceeding fifty pounds in weight (when mailed for delivery within the first or second zones, nor exceeding twenty pounds in weight when mailed for delivery within any of the other zones), nor greater in size than 84 inches in length and girth combined, nor in form or kind likely to injure the person of any postal employee or damage the mail equipment or other mail matter and not of a character perishable, within a period reasonably required for transportation and delivery.

Extent and usefulness of parcel post.—The domestic parcel post offers a convenient, quick and efficient means of transporting mailable parcels to any postoffice in the United States or its possessions. The service reaches more places than any other transportation agency. Special treatment and advantages are accorded to shipments of farm products weighing between 20 and 50 pounds. Low postage rates, based on the service rendered, are provided. The rates to near by zones are particularly advantageous. Parcels may be insured against loss and may be sent C. O. D.

Rates of postage.—To be fully prepaid—unsealed—are as follows.

(a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(b) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(c) Parcels weighing more than 3 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound

rates shown in the following table, a fraction of a pound being considered a full pound:

**ZONES—PARCEL POST GUIDE
AND MAPS.**

For parcel post purposes the United States is divided into units of area, thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area, in which some of the largest postoffices are located, and makes the map for these units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster-general, Washington, D. C. Stamps are not accepted.

To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area in which some of the largest postoffices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster-general, Washington, D. C. Stamps are not accepted.

The local rate applies to parcels mailed under the following conditions:

(1) At any postoffice, for local delivery at such office.

(2) At any city letter carrier office or at any point within its delivery limits, for delivery by carriers from that office.

(3) At any postoffice from which a rural route starts, for delivery on such route, or when mailed at any point on a rural route for delivery at any other point thereon, or at the office from which the route starts, or for delivery on any other rural route starting from the same office.

Alaska, Hawaiian and Philippine islands, etc.—The eighth zone rate of 12 cents for each pound or fraction thereof on all parcels weighing more than four ounces (except books, seeds, cuttings, bulbs, roots, scions and plants weighing eight ounces or less), applies (1) between the United States and the Hawaiian islands; (2) between the United States and its postal agency at Shanghai, China; (3) between any two points in Alaska and between any point in Alaska and any other point in the United States; (4) between the United States and the Canal Zone; (5) between the United States and the Philippine islands; (6) to, from or between Guam, Tutuila, Manua and other islands of the Samoan group

east of longitude 171° west of Greenwich and the United States and its other possessions; (7) between the United States and its naval vessels stationed in foreign waters.

Canada, Cuba, Mexico and Republic of Panama—The rate of 12 cents for each pound or fraction thereof also applies to fourth-class matter, including seeds, cuttings, bulbs, roots, scions and plants (but excepting books and other printed matter on which the rate is 1 cent for each two ounces or fraction thereof in all cases), weighing more than four ounces and not exceeding four pounds six ounces when mailed to Canada, Mexico, Cuba and the Republic of Panama. (Parcels weighing up to eleven pounds may be sent to Mexico and the Republic of Panama as foreign parcel post mail under the parcel post conventions with those countries.)

The limit of weight of fourth-class matter is fifty pounds for parcels mailed for delivery within the first and second zones and twenty pounds for all other zones.

Limit of size—Parcel post matter may not exceed eighty-four inches in length and girth combined. In measuring a parcel the greatest distance in a straight line between the ends (but not around the parcel), is taken as its length; while the distance around the parcel at its thickest part is taken as its girth.

Name and address of sender—A parcel of fourth-class matter may not be accepted for mailing unless it bears the name and address of the sender, which should be preceded by the word "from."

Additions to fourth-class mail—The written additions permissible upon third-class matter also may be placed on fourth-class matter together with any marks, numbers, names or letters for purpose of description or they may be placed on the wrapper or cover, tag or label. Space sufficient for a legible address, postmark and the necessary postage stamps must be left on the address side of parcels.

Inclosures—There may be inclosed with fourth-class matter a written or printed invoice showing the name and address of the sender and of the addressee; the names and quantities of articles inclosed, together with inscriptions indicating "for purpose of description," the price, style, stock number, size and quality of the articles; the order or file number, date of order and date and manner of shipment, and the initials or name of the salesman or of the person by whom the articles were packed or checked.

Inscriptions, such as "Merry Christmas," "With best wishes," "Do not open until Christmas," or words to that effect, may be written on fourth-class mail or on a card inclosed therewith.

Communications attached to parcels—When it is desired to send a communication with a parcel on which postage at the fourth-class rate has been fully prepaid, the communication may be placed in an envelope fully prepaid at the first-class rate and addressed to correspond with the address on the parcel and then be tied to or otherwise securely attached to the outside of the parcel in such manner as to prevent its separation therefrom and not to interfere with the address on the parcel. The stamps to cover the postage on the parcel must be affixed to the wrapper of the parcel and those to pay the postage on the communication must be affixed to the envelope of the communication. Parcels to which such communications are attached are treated as fourth-class matter. Only one special delivery fee is required on such parcels sent as special delivery matter.

Public library books, otherwise available as parcel post matter, may bear any printed or written mark constituting a necessary inscription for the purpose of a permanent library record.

Proprietary articles of merchandise, such as harmless medicinal preparations, soaps, tobacco, food products, etc., put up in fixed quantities, in original sealed packages by the manufacturer so

as to allow examination of the packages in their simplest mercantile form and labeled in printing so as to show the nature of contents, quantity and name of the manufacturer, are mailable at the fourth-class rates of postage. If such sealed packages are inclosed in an outer wrapper, the latter must not be sealed.

Meats and meat-food products—Before meat or meat-food products of cattle, sheep, swine or goats may be accepted for mailing from one state or territory to another state or territory, the certificate of inspection or exemption required by section 477, Postal Laws and Regulations, must be filed with the postmaster. Such certificates must be prepared and furnished by the sender.

Game—The dead bodies of any wild animals or birds or parts thereof, including furs, skins, plumage, etc., lawfully killed and offered for shipment may be accepted for mailing only when the parcels are plainly marked to show the actual nature of the contents and the name and address of the sender. The dead bodies or parts thereof of any wild animals or birds which have been killed or offered for shipment in violation of the laws of a state, territory or district are unmailable, persons sending such articles and the addressees knowingly receiving them in violation of law being liable to a fine of not more than \$200.

Nursery stock, including all field-grown florists' stock, trees, shrubs, vines, cuttings, grafts, scions, buds, fruit pits and other seeds of fruit and ornamental trees or shrubs and other plants and plant products for propagation, except field, vegetable and flower seeds, bedding plants and other herbaceous plants, bulbs and roots, may be admitted to the mails only when accompanied with a certificate from a state or government inspector to the effect that the nursery from which such nursery stock is shipped has been inspected within a year and found free from injurious insects and the parcel containing such nursery stock is plainly marked to show the nature of the contents and the name and address of the sender.

Place of mailing—Parcels of books, seeds and plants weighing more than eight ounces and parcels of other fourth-class matter weighing more than four ounces must be mailed at a postoffice, branch postoffice, named, numbered or lettered station or delivered to a rural or other carrier duly authorized to receive such matter. Smaller parcels may be deposited in letter or package boxes.

INSURANCE OF FOURTH-CLASS MAIL.

Fees and conditions—Fourth-class or domestic parcel post mail (but no other) may not be registered, but may be insured against loss in an amount equivalent to its actual value, but not to exceed \$5 in any one case, on payment of a fee of 3 cents; not to exceed \$25 on payment of a fee of 5 cents; not to exceed \$50 on payment of a fee of 10 cents, or not to exceed \$100 on payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed; but indemnity will not be allowed in cases of loss of such mail addressed to the Philippine islands, unless the loss occurred in the postal service of the United States.

Such mail may be insured at any postoffice or station thereof, or by rural carriers. The sender must fill out an insurance tag, which will be furnished him on request, to be attached to the parcel.

Return receipts for insured parcels may be obtained by indorsing the parcels and tags "Return receipt desired."

Indemnity for lost insured parcels is paid for their actual value within the limit of insurance. No indemnity is payable on account of mere partial damage. However, when an article is so damaged as to render it wholly worthless, it is regarded as lost, provided it was packed and indorsed in accordance with the postal requirements. No indemnity is paid for labor, workmanship, etc., in repairing partial damage.

COLLECT-ON-DELIVERY SERVICE.

Conditions and fee.—Parcels of fourth-class or parcel post matter (but no other) may be sent C. O. D. from one domestic money order post-office to another, including those in the Canal Zone, on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed \$100. The remittance is made by postoffice money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to \$50.

A receipt is given the sender of a C. O. D. parcel at the time of mailing, but no return receipt is furnished, as the remittance shows that delivery has been made.

Examination of contents of a C. O. D. parcel is not permitted until it has been receipted for and all charges paid.

Indemnity for lost C. O. D. parcels is paid for, the actual value not to exceed \$50, under the conditions governing the payment of indemnity for lost insured parcels.

PREPARATION AND WRAPPING OF MAIL MATTER.

Envelopes of weak or unsubstantial paper should not be used. It is recommended that stamped envelopes, on sale at all postoffices, be used.

Examination.—Second, third and fourth class matter must be so wrapped or enveloped that the contents may be examined easily by postal officials. When not so wrapped or when bearing or containing writing not authorized by law the matter will be treated as of the first class.

Nailed boxes.—Parcel post mail may be inclosed in boxes to which the lids are nailed or screwed, provided the lids can be readily removed with a chisel or screwdriver for examination of contents.

Wrapping.—All matter should be securely wrapped so as to bear transmission without breaking or injuring mail bags, their contents or the persons handling them.

Parcels weighing twenty pounds or under are generally carried inside mail bags with other mail; those weighing over twenty pounds are usually carried outside mail bags. They should be wrapped with that understanding.

Umbrellas, canes, golfsticks and similar articles must be re-enforced by strips of wood or otherwise sufficiently wrapped to withstand handling and transportation.

Hats must be packed in strong boxes; if in ordinary pasteboard hatboxes they must be properly crated.

Cut flowers, candies, etc., should be inclosed in strong and suitable boxes.

Stove castings and pieces of machinery should be protected with excelsior or similar material and wrapped in cloth or strong paper or be properly boxed or crated.

Mailable hides and pelts must be thoroughly wrapped to prevent the escape of grease.

Harmful articles not absolutely excluded from the mails, but which, from their form or nature, might, unless properly secured, destroy, deface or otherwise damage the contents of the mail bag or harm the person of any one engaged in the postal service, may be transmitted in the mails only when packed in accordance with the postal regulations.

Sharp-pointed or sharp-edged instruments or tools must have their points and edges protected so that they cannot cut through their covering.

Powders and all pulverized dry substances must be so wrapped that none of the contents of the package will sift out.

Pastes, salves, etc., not easily liquefiable must be inclosed in water-tight containers and placed in strong boxes and securely wrapped.

Liquids.—Admissible liquids in packages not exceeding the limit of weight of fourth-class matter will be acceptable for mailing when intended for delivery at the office of mailing or on a

rural route starting therefrom when inclosed in a glass or metal container securely inclosed and heavily wrapped, provided it is not necessary to transport them over steam or electric railways.

Admissible liquids and oils, pastes, salves or other articles easily liquefiable will be accepted for mailing, regardless of distance, when they conform to the following conditions:

(a) When in strong glass bottles holding four ounces or less the total quantity sent in one parcel shall not exceed twenty-four ounces, liquid measure. Each bottle shall be wrapped in paper or other absorbent substance and then all placed in a box made of cardboard or other suitable material and packed in a container made of double faced corrugated pasteboard of good quality. The corners of the container must fit tightly and be re-enforced with tape so as to prevent the escape of any liquid if the contents should be broken, and the whole parcel shall be securely wrapped with strong paper and tied with twine. Single bottles of liquid holding four ounces or less may also be packed as prescribed in the following paragraphs (b) and (c):

(b) When in glass bottles holding more than four ounces the total quantity sent in one parcel shall not exceed sixteen ounces, liquid measure. The bottle must be very strong and must be inclosed in a block or tube of metal, wood, papier mache or similar material, and there must be provided between the bottle and the block or tube a cushion of cotton, felt or other absorbent. The block or tube, if of wood or papier mache, must be at least one-eighth of an inch thick for bottles holding eight ounces or less and at least three-sixteenths of an inch thick for bottles holding more than eight ounces. The block or tube must be rendered watertight by an application on the inside of paraffin or other suitable substance and must be closed by a screw-top cover with sufficient screw threads to require at least one and one-half complete turns before it will come off. The cover must be provided with a washer so that no liquid could escape if the bottle should be broken. Any number of bottles separately packed as herein prescribed may be included in a single package if the limit of weight and size for fourth-class matter be not exceeded.

(c) Bottles containing liquid may also be packed in strong and tight receptacles of wood, metal or waterproof corrugated pasteboard. Space must be left all around the bottle, which must be filled with bran, sawdust or other absorbent material in sufficient quantity to absorb all the liquid if the bottle should get broken.

(d) When in a metal container the weight limit of the parcel is the same as for other fourth-class matter. The container must be securely sealed and inclosed in a strong box.

(e) When in parcels weighing more than twenty pounds mailable liquids in securely sealed glass bottles or metal cans will be accepted for mailing to offices in the first and second zones when packed in strong boxes and surrounded with sawdust or other suitable substance to protect the contents from breakage. All such packages to be marked "Fragile—This side up," or with similar inscription, and to be transported outside of mail bags.

All packages containing liquid must be marked "Fragile."

Fragile articles.—Articles easily broken must be very securely wrapped for safe transmission.

Glass, crockery, fragile toys, etc., must be so packed as to prevent the escape of particles or pieces from the packages if broken in transit. Cigars should be packed in a manner to prevent damage by shock or jar.

Maps, drawings, paintings, etc., must be suitably protected with stout material to prevent damage. When not flat they should be rolled around a stout stick and carefully wrapped or inclosed in a strong pasteboard tube.

Eggs will be accepted for local delivery when so packed in a basket or other container as to prevent damage to other mail.

Eggs will be accepted for mailing, regardless

of distance, when each egg is separately wrapped and surrounded with excelsior, cotton or other suitable material and packed in a strong container made of double-faced corrugated pasteboard, metal, wood or other suitable material and wrapped so that nothing can escape from the package. All such parcels shall be labeled "Eggs."

Eggs in parcels weighing more than twenty pounds will be accepted for mailing to offices in the first and second zones when packed in crates, boxes, buckets or other containers having tight bottoms to prevent the escape of anything from the package and so constructed as properly to protect the contents. Such packages to be marked "Eggs—This side up," and to be transported outside of mail bags.

Perishable articles—Parcels containing perishable articles shall be marked "Perishable." Articles likely to spoil within the time reasonably required for transportation and delivery shall not be accepted for mailing.

Butter, lard and perishable articles such as fish, fresh meats, dressed fowls, vegetables, fruits, berries and articles of a similar nature which decay quickly, when so packed or wrapped as to prevent damage to other mail, will be accepted for local delivery either at the office of mailing or on any rural route starting therefrom. When inclosed in an inner cover and a strong outer cover of wood, metal, heavy corrugated pasteboard or other suitable material, and wrapped so that nothing can escape from the package, they will be accepted for mailing to all offices to which in the ordinary course of mail they can be sent without spoiling.

Butter, dressed fowls, vegetables, fruits and other perishable articles in parcels weighing more than twenty pounds will be accepted for mailing to offices in the first and second zones when suitably wrapped or inclosed and packed in crates, boxes or other suitable containers having tight bottoms to prevent the escape of anything from the package and so constructed as properly to protect the contents. All such parcels to be transported outside of mail bags.

Vegetables and fruits which do not decay quickly will be accepted for mailing to any zone if packed so as to prevent damage to other mail.

ADDRESSING MAIL MATTER.

Exercise care—Because of carelessness in addressing and preparing matter for mailing or failure of sender to place his name and address on millions of letters and other pieces of mail which cannot be delivered or returned to the sender are each year sent to the division of dead letters. This seriously impairs the efficiency of the postal service and causes much additional expense. The practice of some business concerns of omitting street numbers, etc., from their stationery and advertisements results in increasing the volume of insufficiently addressed mail.

Write plainly the name of the person addressed, street and number or number of rural route, post-office and state in full. When the name of the state is abbreviated, frequently Va. and Pa., Md. and Ind., Col. and Cal., Miss. and Minn. and others are confused and mail is misdirected, as post-offices of the same name are located in several different states.

Do not abbreviate or use lead pencil.

The words "General delivery" should not be used as a part of the address when delivery by city or rural carrier is desired, but only in cases when it is known or believed that the addressee calls at the general delivery for his mail.

The word "Personal" does not affect the delivery of mail and should be placed only on mail intended for the personal attention of the addressee.

Directions for transmittal, delivery, forwarding or return of mail are deemed part of address. "In care of ——"—Mail addressed to one person in care of another will be delivered to the first of the two persons named who may call for it or to the address of the person in whose care it is directed in the absence of other instructions.

Fictitious addresses—Ordinary mail addressed to fictitious names of persons or firms or to no particular person will not be delivered unless directed to be delivered at a designated place, as a postoffice box, street and number or in the care of a person or firm receiving mail at the postoffice of address.

RETURN CARDS.

The sender's name and address must be placed on all fourth-class or parcel post mail and on all registered mail and should be placed on all other mail in the upper left corner of the envelope or wrapper. This will secure its return, if desired, when undelivered.

Time specified—A return request should not specify a number of days fewer than three nor more than thirty.

Hotel envelopes—If the sender of a letter mailed in the envelope of a hotel desires to have the letter returned if not delivered he should add to the hotel card a request to that effect.

Postage stamps should be securely affixed to the upper right corner of the address side, care being taken that one does not overlap another.

Space must be left on the address side of all mail sufficient for a legible address and for all directions permissible thereon, for postage stamps, postmarking, rating and any words necessary for forwarding or return.

Avoid delay by depositing mail as soon as it is ready, thus insuring prompt dispatch.

UNMAILABLE MATTER.

Definition—Unmailable domestic matter—that is, matter which is not admissible to the United States mails for dispatch or delivery in the United States or in any of its possessions—includes:

Address defective—All matter illegibly, incorrectly or insufficiently addressed.

Postage not prepaid—First-class matter not prepaid one full rate—2 cents—and all other matter not fully prepaid.

Overweight and oversize—All matter exceeding the limit of weight or size prescribed by law.

Game killed or offered for mailing in violation of law.

Meat and meat-food products of cattle, sheep, swine and goats presented without the required certificate of inspection or exemption.

Nursery stock not accompanied with certificate of inspection.

Poisons, liquors, live animals, fowls, etc.—All matter harmful in its nature, as poisons, explosives or inflammable articles, matches, live animals, fowls, insects and reptiles, guano or any article exhaling a bad odor, and vinous, spirituous or malt liquors. The postal laws provide a severe penalty for the mailing of poisons, explosives or inflammable articles and intoxicating liquors.

Tinsel, glass—Postcards and postal cards bearing particles of glass, metal, mica, sand, tinsel or other similar substances are unmailable, except when inclosed in envelopes tightly sealed to prevent the escape of such particles or when treated in such manner as will prevent the objectionable substance from being rubbed off.

Obscene and indecent—All obscene, lewd or lascivious matter and every article or thing intended, designed or adapted for any indecent or immoral purpose or for the prevention of conception or procuring abortion or matter of a character tending to incite arson, murder or assassination.

Defamatory, dunning, etc.—Postal, post or other cards mailed without wrappers and all matter bearing upon the outside cover or wrapper any delineation, epithets, terms or language of an indecent, lewd, lascivious, obscene, libelous, scurrilous, defamatory, threatening or dunning character or calculated by the terms or manner or style of display and obviously intended to reflect injuriously upon the character or conduct of another.

Lottery and fraud—All matter concerning any lottery, so-called gift concert or other enterprise of chance or concerning schemes devised

for the purpose of obtaining money or property under false pretenses.

POSTCARDS (PRIVATE MAILING CARDS).

Transmissible, when and where—Postcards manufactured by private persons, consisting of an unfolded piece of cardboard in quality and weight substantially like the government postal card, not exceeding in size 3 9-16 by 5 9-16 inches nor less than 2 3/4 by 4 inches, bearing either written or printed messages, are transmissible without cover in the domestic mails (including the possessions of the United States) and to Canada, Cuba, Mexico, Republic of Panama and city of Shanghai (China), at the postage rate of 1 cent each and in the foreign mails at the rate of 2 cents each.

Advertisements and illustrations may appear on the back of the card and on the left half of the face.

Nonconforming cards, rate—Cards which do not conform to the foregoing conditions are chargeable with postage at the letter rate if wholly or partly in writing or at the third-class rate if entirely in print.

Under cover, rate—Cards mailed under cover of sealed envelopes (transparent or otherwise) are chargeable with postage at the first-class rate; if inclosed in unsealed envelopes they are subject to postage at the first-class rate if wholly or partly in writing or the third-class rate if entirely in print—to be prepaid with stamps affixed to the envelope. Stamps affixed to matter inclosed in envelopes are not recognized in payment of postage thereon.

Folded advertising cards and other matter entirely in print, arranged with a detachable part for use as a postcard, are mailable as third-class matter.

Double or folded postcards are not authorized by law.

POSTAL CARDS.

Postal cards are furnished at the postage value represented by the stamp impressed thereon; single postal cards for domestic and foreign correspondence at 1 cent and 2 cents each, respectively, and reply (double) postal cards at 2 cents and 4 cents each, respectively.

Additions—Government postal cards may bear written, printed or other additions as follows:

Addresses on postal cards may be either written, printed or affixed thereto.

Advertisements, illustrations or writing may appear on the back of the card and on the left third of the face.

The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for the message, but the space to the right for the address only.

Unauthorized additions—The addition to a postal card of matter other than as above authorized will subject it, when mailed, to postage at the letter rate, if wholly or partly in writing, or at the rate for the added matter, if it bears no writing. In such case the postage value of the stamp impressed on the card will not be impaired.

Sheets of postal cards are furnished for printing purposes, but to be good for postage the cards must be cut to regulation size.

International postal cards—The United States international 2-cent single and reply postal cards should be used for correspondence with foreign countries, except Canada, Cuba, Mexico, Republic of Panama, the Philippine islands and city of Shanghai (China), to which the domestic 1-cent single and reply cards are mailable, but when these international cards cannot be obtained it is allowable to use the United States domestic 1-cent single and reply postal cards with 1-cent United States adhesive postage stamps affixed thereto.

Redemption—Uncanceled, unserviceable and spoiled postal cards not treated by bronzing, enameling or other process of coating, may be redeemed in postage stamps or other stamped paper only at 75 per cent of their postage value

when presented by the original purchaser, but parts or pieces of cards will not be redeemed.

Remailing—Used postal cards conforming to the conditions prescribed for postcards may be remailed upon prepayment of 1-cent postage with stamp affixed.

Reply postal cards—Either half of a domestic reply postal card may be used separately. Such postal cards should be folded before mailing and the initial half should be detached when the reply half is mailed for return.

POSTAGE STAMPS.

Denominations—Postage stamps are issued in the following denominations: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 15, 20, 30 and 50 cent; 1, 2 and 5 dollar, and 10-cent special delivery.

Varieties on sale—Only the kinds and denominations of stamps and other postage-stamped paper for which there is demand are kept on sale at the smaller postoffices.

Sold by postmasters only—No postage-stamped paper is sold by the department direct; it must be bought through postmasters. Postmasters are not required to affix stamps to mail.

Books of 1 and 2 cent stamps, interleaved with nonadhesive paper, are on sale at postoffices at the following prices:

24 1c stamps....	25 cents	12 2c stamps....	25 cents
96 1c stamps....	97 cents	24 2c stamps....	49 cents
24 1c and 24 2c stamps	73 cents		

Stamps are issued in colls of 500 and 1,000, perforated or unperforated, with the stamps endwise or sidewise on paper cores one-half inch in diameter, the cost of coiling being charged to purchasers.

Unperforated stamps in sheets of 400 each are sold upon request for use in automatic stamp-affixing or stamp-vending machines, but such stamps must be cut apart accurately.

Special delivery stamps, 10 cents each, secure prompt handling and delivery of mail.

Good for postage—All postage stamps issued by the United States since 1860 are good for postage in the United States, Guam, Hawaii, Porto Rico and Tutuila, but not in the Canal Zone or the Philippine Islands, except that embossed stamped envelopes, single 1-cent postal cards and the reply half of 1-cent double postal cards of the United States are valid for postage in the Philippine Islands when addressed to the United States. Postage stamps of the Canal Zone or Philippine Islands are not good for postage in the United States except that embossed stamped envelopes, single postal cards and the reply half of double postal cards of the Philippine Islands are valid for postage in the United States when addressed to the Philippine islands.

Not good for postage—Postage-due and special delivery stamps, mutilated or defaced stamps, internal revenue stamps and stamps cut from embossed stamped envelopes, newspaper wrappers or postal cards are not good for postage.

Postage-due stamps are used by postmasters to witness the collection of postage on short-paid matter, and are not sold to the public.

Not redeemable or exchangeable—Postage stamps are not redeemable from the public. Nor may they be exchanged, unless presented at the postoffice by the original purchaser within two business days after the purchase.

Perforating of stamps—For the purpose of identification only, and not for advertising, postage stamps may be punctured or perforated with letters, numerals or other marks or devices, but the puncture or perforations shall not exceed 1-32 inch in diameter and the whole space occupied by the identification device shall not exceed one-half inch square.

Overlapping stamps—When stamps are so affixed to mail that one overlies another, concealing part of its surface, the stamp thus covered is not taken into account in prepayment.

Rare and canceled stamps—The postoffice department does not purchase canceled postage stamps; nor can it furnish information as to the value of rare stamps over their face.

Remittances—Postage stamps should not be used in making remittances. Ample registry and money order facilities are provided for the safe transmission of money by mail.

Currency—Postmasters are not required to accept in payment for postage stamps, etc., any currency which is so mutilated as to be uncurrent or as to render its genuineness doubtful; nor are they required to receive more than 25 cents in copper or nickel coins in any one payment. Postmasters are expected to make change whenever possible, but are not permitted to give credit for postage.

STAMPED ENVELOPES.

Denominations and sizes—The department issues twelve different sizes of stamped envelopes, the smallest 2½ by 5¼, the largest 4½ by 10½ inches, in three qualities and five colors of paper, as follows: First quality, white and amber; second quality, buff and blue; third quality, manila. The denominations are 1, 2, 4 and 5 cent.

Stamped newspaper wrappers are issued in 1-cent and 2-cent denominations and in two sizes.

Return card—When stamped envelopes are purchased in lots of 500 or its multiple, of a single size, quality and denomination, the department will, upon request through the purchaser's post-office, print his return card. Such cards are not printed on newspaper wrappers or postal cards.

The return card on stamped envelopes insures the return of undeliverable letters to the writer.

No advertisement will be printed on stamped envelopes by the department; but names indicating or incidentally disclosing the nature of the purchaser's business or vocation will be printed on them, if such name is used under corporate charter, copartnership agreement, or other articles of organization so designating the concern, or is the name under which the purchaser is actually doing business with the public.

The name and title of an officer of a firm, corporation, institution, association or society will be printed when so desired; for example, "John Doe, Treasurer, Washington Educational Association." Such titles as "M. D.," "D. D. S.," "Rev.," "LL. D.," etc., will be printed when they are clearly for purposes of identification and not for advertisement.

Redemption—Uncanceled and spoiled stamped envelopes presented in a substantially whole condition will be redeemed by postmasters at their face value only in postage stamps, stamped envelopes or postal cards; but stamped envelopes bearing a printed address will be redeemed only from the original purchaser. Stamped envelopes and newspaper wrappers which bear no printing indicating the original purchaser may be redeemed when presented by any responsible person.

WINDOW ENVELOPES.

"Window" envelopes, having an opening or a transparent panel in the front, through which the address upon the inclosure is disclosed, are mailable under conditions which may be learned upon inquiry of postmasters.

COLLECTION OF MAIL.

City collections—At offices where city delivery is in operation, mail is collected from street letter boxes. Carriers while on their routes will receive letters with postage stamps affixed handed them for mailing, and also small packages on which the postage is fully prepaid, if this does not interfere with the prompt delivery of mail and collections from street letter boxes. Carriers will not delay their deliveries by waiting for such matter, and are not permitted to accept money to pay postage thereon.

Rural collections—Mail for dispatch will be collected from patrons' boxes when the carrier is making deliveries and when signals are displayed on the boxes indicating that there is outgoing mail therein. Collections will also be made from such U. S. collection boxes as may be located

along the route. Rural carriers will accept any mailable matter properly addressed and bearing the necessary postage, or accompanied with sufficient money to purchase the same, which may be personally tendered to be delivered or dispatched; except that mail matter tendered shall not be accepted in a town or village having a postoffice if it is reliably ascertained that parties offering it intend by so doing to "boycott" the office to deprive it of legitimate revenue. Patrons of rural routes are expected to provide themselves with stamps, through purchase from the carriers, and to affix the proper postage to mail before depositing it in boxes for collection. When this is not practicable, coins left with mail in boxes for payment of postage should be placed in coin-holding receptacles. Rural boxes are intended solely for the reception of mail and should not be used for the depositing of unstamped and unaddressed circulars or other advertising matter.

DELIVERY OF MAIL.

Methods—Four methods are used for the delivery of mail: (1) The general delivery; (2) Through postoffice boxes; (3) By carriers in cities where delivery service is in operation; (4) By rural and star route carriers. If patrons so direct, all mail intended for them, however addressed, will be delivered in one of these ways, but if such directions are not given mail will be delivered as addressed.

General delivery—The general delivery is intended for the use of only those patrons who are not permanently located or who cannot, for good and sufficient reasons, receive mail by carrier or through a postoffice box. Persons intending to remain for thirty days or more in a city having carrier service should file their names and street addresses at the postoffice so that their mail may be delivered by carrier.

Persons applying for mail at the general delivery window, if unknown, may be required to prove their identity, and residents of cities having carrier service who call at the general delivery may be required to furnish a statement as to name and address and reason for calling at postoffice for mail instead of receiving it by carrier.

Postoffice boxes are provided for the convenience of the public in the delivery of mail. Box rents must be paid quarterly in advance. The use of a box is restricted to one individual, family, firm or corporation.

The renter of a box may have delivered through it mail for his family, guests, transient boarders, employees who are members of his household, and, for a period not to exceed thirty days, mail of a person addressed in his care.

A box rented by a firm may be used for the delivery of its mail, and by the consent of each member of the firm, the individual mail of each, of his household, and of the firm's office employees.

A box rented by a corporation, association or society may be used for the delivery of mail addressed to it and its officials.

Boxes rented by schools, colleges or public institutions, if consistent with the rules and usage thereof, may be used for the delivery of mail addressed to officers, students, employees and inmates.

City delivery—Mail will not be delivered by carriers above the second floor in office buildings not equipped with elevators, nor to the different rooms or suites on any floor of apartment houses whether or not they are equipped with elevators, nor to the side or back doors of houses. Mail will not be withdrawn in order to deliver it to persons calling at the postoffice, after it has been distributed to carriers, except in emergencies. Carriers are not permitted to stop and deliver mail to patrons who meet them on the street unless such delivery can be made without unreasonable delay.

Private mail receptacles—Patrons at offices having city delivery are urged to provide private

mail receptacles or cut slots in the doors at their residences and places of business for the receipt of mail, which will permit its safe delivery in the absence of the addressee instead of having it carried by and delivered on a later trip.

Rural delivery—Mail is delivered by rural and star route carriers to persons who properly place mail boxes on the lines of travel of such routes. Mail boxes on rural routes must conform to the prescribed specifications and be approved by the postoffice department. Mail will be delivered only to the boxes of persons to whom it is addressed or the boxes of persons duly authorized to receive it. Mail addressed to a rural mail box number only is not deliverable.

Delivery to addressee or agent—Mail is delivered to the person addressed or according to his written order. An order to make delivery to another person is implied in cases where the addressee is in the habit of receiving his mail through his clerk, servant, agent or some member of his family, or other person, and recognizes or acquiesces in such delivery.

Husband or wife—Neither husband nor wife can control the delivery of mail addressed to the other against the wishes of the one to whom it is addressed. In the absence of instructions to the contrary, the wife's letters will be placed in the husband's box and delivered to him with his letters, unless they be known to live separately.

Minors—The delivery of mail addressed to a minor is subject to the orders of the parent or guardian upon whom the minor is dependent.

Persons of the same name—Where two or more persons of the same name receive mail at the same postoffice, they should adopt, where practicable, some form of address or other means by which their mail may be distinguished.

Officials—Mail addressed to a public official, or to an officer of a corporation, by his title, will be delivered to the person actually holding the office designated in the address, the assumption being that the mail is intended for the officer as such.

Pensioners—Pension check letters will be delivered only to the pensioner addressed or to his or her clerk, servant, agent or some member of the pensioner's family through whom mail is habitually received. Such letters addressed to a pensioner who is dead, or has permanently removed, or has been declared mentally incompetent, or, in case of a widow, has remarried, will be returned to the sender.

Advertised mail—The addressee of an advertised letter or other piece of mail is required to identify it and pay a fee of one cent before receiving it.

Wrong delivery—A person receiving mail not intended for him should return it promptly to the postoffice for proper disposition. If such mail has been opened by mistake it should be indorsed, "Opened by mistake," with the signature of the person receiving it.

SPECIAL DELIVERY SERVICE.

Special delivery service is the prompt delivery of mail by messenger during prescribed hours to persons who reside within the carrier limits of city delivery offices, to patrons of rural service who reside more than one mile from postoffices but within one-half mile of rural routes, and to residents within one mile of any postoffice. Special delivery mail is not expedited in transit between postoffices.

How obtained—This service is obtained by placing on any letter or article of mail a special delivery stamp or 10 cents' worth of ordinary stamps in addition to the lawful postage. When ordinary stamps are used the words "Special Delivery" must be placed on the envelope or wrapper, directly under, but never on the stamps; otherwise the letter or article will not be accorded special delivery service.

Hours of delivery—From 7 a. m. to 11 p. m. at city delivery offices, and from 7 a. m. to 7 p. m. at all other offices, or until after the arrival of the last mail, provided that be

not later than 9 p. m. Special delivery matter will be delivered at postoffices of the first and second classes on Sunday; and at other offices if open on Sunday. Special delivery will be made at all offices on holidays.

One delivery only attempted—When special delivery mail cannot be delivered for the reason that no one is present to receive it or for other cause, notice is left at the place of address and the mail returned to the postoffice, and it is thereafter treated in all respects as ordinary mail.

Forwarding—Special delivery mail may be forwarded under the same rules as ordinary mail, and is then entitled to special delivery service unless an attempt was made to effect delivery at the office of original address.

Does not insure unusual safety—When it is desired to send money or other valuables by special delivery the matter should also be registered or insured. A special delivery stamp does not insure unusual safety or a personal delivery to the party addressed.

RETURN OF MAIL.

First class—Letters and other mail of the first class, prepaid one full rate (2 cents); official matter and reply (double) postal cards, and single postal and post cards deposited for local delivery, when undeliverable, will be returned to the sender without additional postage, provided such mail bears the name and address of the sender. Single postal cards and post cards not deposited for local delivery will not be returned to the sender.

If the sender does not specify the number of days within which such mail shall be delivered, then it will be returned as follows: (a) After five days, if intended for delivery by city or rural carrier; (b) after ten days, if addressed "transient" or "general delivery" to a city; and (c) after fifteen days, if addressed to an office not having city carrier service and not intended for delivery by rural carrier.

A definite return address is required. The mere request to return to "office of mailing," as indicated by the postmark, is not sufficient.

Other classes—When matter of other than the first class which is of obvious value, or bears a pledge to furnish return postage, cannot be delivered, the postmaster will notify the sender of that fact; and such matter will be returned to the sender only upon new prepayment of postage. After notification of nondelivery such matter will be held not longer than two weeks, unless the office of mailing be so remote from the office of address that a response could not be received from the sender within that time.

If the sender habitually fails to redeem his pledge to furnish return postage no further notices will be sent him in regard to undelivered mail.

Recall of mail—When the sender of a letter desires to recall it his application must be submitted to the postmaster at the office of mailing.

Retention in postoffice at addressee's request—Letters bearing return cards cannot be held at the addressee's request at the office of address beyond the time indicated in the return card.

When remailing a letter which has been returned to the sender as undeliverable it should be placed in a new envelope in order to avoid confusion and secure prompt transmission. A new prepayment of postage is required.

FORWARDING OF MAIL.

Orders for—A person desiring to have his mail forwarded should file with the postmaster at the office of address a request signed in writing, giving his present address, the full address to which mail is to be forwarded and specific information as to the time during which the order is to be observed. If a person who has filed such an order at a postoffice returns to the delivery of that office before the expiration of the time indicated in his forwarding order he should immediately have the order canceled.

What mail may be forwarded after delivery—

Upon being properly readdressed and deposited in the postoffice originally addressed, or a street letter box of such office, mail may be forwarded after delivery. This applies to mail erroneously delivered or addressed; to mail addressed in care of another; and to mail opened inadvertently upon misdelivery, in which case it should be indorsed "Opened by mistake" and signed by the person who opened it.

First class—Only first-class mail can be forwarded from one postoffice to another without a new prepayment of postage. This includes letters and other first-class matter prepaid one full rate (2 cents), postal cards, post cards (private mailing cards) and official matter.

Other classes—A new prepayment of postage on mail of the second, third and fourth classes must be made by the addressee, or some one for him, every time it is forwarded, as follows: (a) Second-class matter, 1 cent for each four ounces or fraction thereof; (b) third-class matter, 1 cent for each two ounces or fraction thereof; (c) fourth-class or parcel post matter, at the rate applicable between the forwarding office and the one to which the mail is forwarded.

Exceptions—A change of street number to secure delivery at the office of address is not a "forwarding" and does not subject the mail to additional postage.

Patrons of any office who, on account of a change in the postal service, receive their mail from another postoffice may have mail matter of all classes transmitted to that office without additional charge for forwarding, provided they first file with the postmaster at the former office a request to have their mail so sent. This is not to be construed as "forwarding" within the meaning of the law.

Hotels, clubs, etc.—Managers of hotels and officers of clubs, boards of trade and exchanges should not hold unclaimed mail addressed to their care longer than ten days, except at the request of the person addressed, and should redirect it for forwarding if the present address is known; otherwise such mail should be returned to the postoffice.

Unnecessary inscriptions not permitted—Inscriptions not necessary to proper forwarding subject the matter to new prepayment of postage. **Hotels should not use the indorsement "Forwarded" or "Returned from Hotel."**

Notice of postage for forwarding mail of the second, third or fourth class will be sent to a person who has filed a forwarding order. After such notification the mail may be delivered to the addressee at the office from which the notice was sent, without payment of the forwarding postage, provided he shall first revoke the forwarding order, thus obviating the necessity of sending notices that are inoperative; or if he does not revoke his forwarding order, the matter may be delivered to him on payment of 1 cent for each notice sent him.

UNDELIVERED MAIL.

Advertised—All undelivered and unreturnable mail of the first class (except postal cards and private mailing cards) and valuable matter of the third and fourth classes are advertised by posting a weekly list in the postoffice. A charge of 1 cent in addition to any postage due is collected on advertised mail if delivered.

Undeliverable letters and sealed parcels (first-class matter), which cannot be delivered to addressees or returned to senders, are sent to the division of dead letters for disposal. Such matter includes unclaimed, misdirected, unaddressed and insufficiently prepaid letters and those directed to initials only or to fictitious persons. Letters are opened and returned to writers, if practicable, except such as contain advertising matter only, the return of which is not requested. If valuable inclosures are found a record is made and if not returned at once to the owner may be reclaimed within four years from the date of their receipt.

Undeliverable parcels of third and fourth class matter of obvious value which cannot be returned to the sender, and articles found loose in

the mails, except money and postage stamps, are sent to the postoffice at the headquarters of the division of the railway mail service in which the parcels or articles are detained, where they are held for twelve months, subject to inquiry, after which they cannot be reclaimed. Matter addressed to foreign countries mailed in violation of law or treaty stipulation is sent to the division of dead letters.

Undeliverable single postal cards and post cards are destroyed or disposed of as waste paper by postmasters.

Inquiries relating to undelivered letters of domestic origin should be addressed to the Fourth Assistant Postmaster-General, Division of Dead Letters, and should state to whom and to what postoffice the letter was addressed, the name and full address of the writer or sender, the date and place of mailing and a brief description of the contents.

MISCELLANEOUS.

Alaska—All mails for Alaska are dispatched from Seattle, Wash. During the season of navigation all classes of mail are dispatched. During the winter season (from about Oct. 1 to June 1), on account of the difficulty of transportation, the dispatch of mail for Alaska, except for offices on the southern coast, is limited, preference being given, first, to letters in their usual and ordinary form and postal cards; second, to single newspapers and magazines addressed to public libraries, newspaper publishers and to individuals. Books, catalogues, newspapers and periodicals sent to dealers for purpose of trade or otherwise, and merchandise (parcel post matter) cannot be forwarded to interior offices during the winter season. But, as an exception to the foregoing, when the weight limit of mail for dispatch will permit, packages of seeds, not exceeding one pound per package, and articles of merchandise, not exceeding a few ounces each, as the proper offices of the service have reason to believe contain articles of urgent necessity, such as eyeglasses, medicines, etc., for individual use, but not intended primarily for trade, may be inclosed in the mails for dispatch.

The rate of postage on gold coin, gold bullion and gold dust offered for mailing between any two points in Alaska, or between any point in Alaska and any point in the United States or its possessions, is 2 cents an ounce or fraction thereof, regardless of distance. Such gold coin, gold bullion or gold dust must be inclosed in sealed packages not exceeding eleven pounds in weight and sent by registered mail.

Complaints and inquiries—All complaints in regard to mail should be addressed to the postmaster, and, whenever possible, they should be accompanied with the envelope or wrapper of the piece of mail to which the complaint refers.

An early report should be made relative to lost or missing mail of any description. The postmaster will forward the complaint to the proper officer of the department.

Copyright—Matter for copyright deposited with a postmaster for transmission to the register of copyrights, Washington, D. C., will be accepted for mailing free of postage; and when requested a receipt therefor will be given on a form furnished by the sender. Such matter, however, may not be sent by registered mail without prepayment of the registry fee.

Periodical publications—The postoffice department does not determine questions regarding the liability of a subscriber for the subscription price of a publication. Publications which are not desired may be refused and not removed from the postoffice, or they may be returned to the postmaster indorsed "Refused."

A subscriber to a publication should promptly notify the publisher of any change in his address.

Collection of postage due at office of address—When a piece of mail reaches the office of address without postage having been fully prepaid the required amount of postage due will be collected of the addressee on delivery.

Loss of or damage to ordinary mail—There is no provision for the payment of indemnity for the loss of or damage to mail not insured or registered.

Lists of names or other information—Postmasters and all others in the postal service are forbidden to furnish lists of names of persons receiving mail at their offices or give information as to the addresses, character or standing of patrons.

Pensioners' oaths—Fourth-class postmasters and rural carriers are required to administer oaths to pensioners and witnesses in the execution of pension vouchers, and have authority to receive from the pensioners for each voucher a sum not exceeding 25 cents. Rural carriers are not required to deviate from their routes to execute vouchers.

Letter boxes—The willful injury or destruction of any letter box or other receptacle authorized by the postmaster-general for the receipt or delivery of mail matter, or the willful theft, destruction or defacement of any matter contained in such box or receptacle, is a penal offense, for which the offender is liable to a fine of not more than \$1,000 or imprisonment for not more than three years.

Postoffice lobbies—Notices for private advertising purposes cannot be placed in postoffice lobbies.

REGISTRY SYSTEM.

Advantages—The registry system provides for careful transmission to any postoffice in the world of money and other valuable mail, furnishes receipts to the mailer and provides for indemnity in case of loss.

What should be registered—All valuable letters and sealed parcels and those for which a return receipt or special care in delivery is desired should be registered.

What may be registered; where and by whom—Any matter, properly addressed and bearing the name and address of the sender, admissible to the domestic mails (except fourth-class mail, which may be insured), or to the postal union mails (except foreign "parcel post" packages for Barbados, Curacao, Dutch Guiana, France, Great Britain, Guadeloupe, Martinique, the Netherlands and Uruguay), may be registered. Foreign "parcel post" mail must be taken to the postoffice to be registered, but other mail may be registered at any postoffice or postoffice station by rural carriers, and, when sealed and not cumbersome, by city carriers in residential districts.

The registry fee for each separate article, foreign or domestic, is 10 cents in addition to the postage, both to be fully prepaid.

Return receipts—When the sender desires a return receipt he should indorse the address side of the envelope or wrapper, "Return receipt desired."

An article for registration should not be placed in a street letter box or in a mail drop at the postoffice. Firm registration books are supplied without cost to those registering large quantities of mail. All matter registered as first class must be securely sealed.

Indemnity for lost registered mail will be paid as follows:

Domestic mail, first class (sealed), up to \$50, actual value; third class (unsealed), up to \$25, actual value.

Foreign mail, amount claimed within limit of 50 francs (\$9.65), for total loss (not partial loss or riding) of a registered article exchanged between the United States and a postal union country, except foreign parcel post matter, and losses beyond control ("force majeure").

Reports of losses and application for indemnity should be made to the postmaster at the mailing office or office of address with particulars of registration, description of contents and, in case of partial loss or riding, with the envelope or wrapper.

The delivery of registered mail may be restricted by the sender under certain conditions, which may be ascertained from the postmaster.

Forwarding and return—The conditions under which ordinary mail is forwarded or returned apply also to registered matter. No additional registry fee is required in such case.

Identification—Unknown persons applying or inquiring for registered mail, as senders or addressees or their authorized representatives, will be required to establish their identity satisfactorily before the mail or information about it is given them.

MONEY ORDER SYSTEM.

Advantages—The postal money order system offers to the public a safe, cheap and convenient method of making remittances by mail to all parts of the United States and its possessions, as well as foreign countries. Postal money orders should be used whenever available instead of cash for remittances by mail; when money orders are not available the money should be sent by registered mail. Money order business is transacted at all postoffices where practicable.

Application for a money order must be made on a form furnished for that purpose and be presented at the money order window of the postoffice or one of its stations. Money orders are issued for any desired amount from 1 cent to \$100, and when a larger sum than \$100 is to be sent any number of additional orders may be obtained. Applications may be made through rural carriers, who will furnish the necessary forms and give receipts for the amounts.

International money orders, payable in almost any part of the world, may be obtained at all of the larger postoffices and at many of the smaller ones.

Fees for money orders payable in the United States (which includes Hawaii and Porto Rico) and its possessions, comprising the Canal Zone, Guam, the Philippines and Tutuila, Samoa; also for orders payable in Bermuda, British Guiana, British Honduras, Canada, Cuba, Mexico, Newfoundland, at the United States postal agency at Shanghai (China), in the Bahama islands and in certain other islands in the West Indies:

For orders from \$0.01 to \$2.50.....	3 cents
For orders from 2.51 to 5.00.....	5 cents
For orders from 5.01 to 10.00.....	8 cents
For orders from 10.01 to 20.00.....	10 cents
For orders from 20.01 to 30.00.....	12 cents
For orders from 30.01 to 40.00.....	15 cents
For orders from 40.01 to 50.00.....	18 cents
For orders from 50.01 to 60.00.....	20 cents
For orders from 60.01 to 75.00.....	25 cents
For orders from 75.01 to 100.00.....	30 cents

The fees for foreign money orders payable in any country on which a money order may be drawn, other than those named above, may be ascertained upon inquiry at the postoffice.

Payment—A money order will be paid to the person named therein, or his indorsee, or his agent or attorney upon his written order. Domestic money orders issued in the continental United States, excepting Alaska, will be paid at any money order office in the continental United States, excepting Alaska, if presented within thirty days following the date of issue. Theater payment will be made only at the office drawn on.

A money order drawn in favor of a person residing on a rural route may be paid through the carrier if entrusted to him for collecting with written request addressed to the postmaster that payment be so made.

Repayment—A domestic order may be repaid at the office of issue within one year from the last day of the month of its issue. Repayment of the amount of an international order may be effected after the consent of the country drawn on has been obtained.

Identification—The person presenting a money order for payment, or making inquiry relative thereto, will, if unknown, be required to prove his identity before payment will be made or information concerning the order will be given.

Indorsements—More than one indorsement on a money order is prohibited, but additional signatures may be affixed for the purpose of identifying the payee or indorsee, or of guaranteeing his signature.

Invalid orders—A domestic order which has not been paid within one year from the last day of the month of its issue is invalid, but the owner may secure payment of the amount by making application to the postoffice department through the postmaster at any money order office.

Lost orders—When a domestic money order has been lost the owner may, upon application to the postmaster at any money order office, obtain a duplicate to be issued in its stead within one year from the last day of the month of issue.

POSTAL SAVINGS SYSTEM.

Purpose—The postal savings system provides facilities for depositing savings at interest, with the security of the United States government for repayment.

Service free—No charge or fee is collected or required in connection with the opening of an account or the subsequent deposit or withdrawal of money. The proper money order fee is charged, however, when withdrawals are made by mail.

Deposits—Any person of the age of 10 years or over may become a depositor. The account of a married woman is free from the control or interference of her husband. No person can have more than one account at the same time.

An account cannot be opened for less than \$1, nor can fractions of \$1 be deposited or withdrawn. Amounts less than \$1 may, however, be saved by the purchase of 10-cent postal savings cards and adhesive 10-cent postal savings stamps. A postal savings card with nine postal savings stamps affixed will be redeemed in cash for \$1, or will be accepted as a deposit of \$1 either in opening an account or adding to an existing account. No person is permitted to deposit more than \$100 in any one calendar month, nor to have a balance to his credit at one time of more than \$500, exclusive of interest. An account may be opened through a representative. After an account is opened deposits may be made through a representative or by mail.

Certificates of deposit—Depositors receive postal savings certificates covering the amount of each deposit made. These certificates are issued in fixed denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100, and are valid until paid, without limitation as to time. Postmasters are not permitted to receive savings certificates for safe keeping.

Interest—Interest will be allowed on all certificates at the rate of 2 per cent for each full year that the money remains on deposit, beginning on the first day of the month following the month in which the deposit is made. Interest continues to accrue on deposits as long as the certificates remain outstanding.

Withdrawals—A depositor may at any time withdraw the whole or any part of his deposits, with any interest payable, by surrendering at his depository office savings certificates covering the desired amount. Withdrawals may also be made through a representative or by mail.

Bonds—Any depositor may, under certain conditions, exchange the whole or any part of his deposits, in sums of \$20 or any multiple of \$20 up to and including \$500, for United States coupon or registered bonds, bearing interest at the rate of 2½ per cent, such bonds to be exempt from all taxes or duties of the United States as well as from taxation in any form by or under state, municipal or local authority. Postal savings bonds are not counted as part of the balance of \$500 allowed to one depositor. On the application of any holder these bonds will be purchased at par by the board of trustees of the postal savings system.

CLASSIFICATION.

Articles for or from foreign countries (except Canada, Cuba, Mexico and the Republic of Panama, and the United States postal agency at Shanghai) are classified as "Letters," "Postcards," "Printed Matter," "Commercial Papers" and "Samples of Merchandise." There is no provision in the postal union mails for merchandise other than samples.

Letters—When a package is prepaid in full at the letter rate it is treated as letter mail provided it does not contain prohibited articles. Such packages may contain merchandise not sent as trade samples. Sealed or unsealed packages which appear to contain dutiable matter will be inspected by customs officers of the country of destination and the proper customs duties will be levied.

Postal cards—The United States international 2-cent single and reply postal cards should be used for correspondence with foreign countries, except Canada, Cuba, Mexico, the Republic of Panama and Shanghai, to which the domestic 1-cent single and reply postal cards are mailable.

Private mailing cards are transmissible to foreign countries at the rate of 2 cents each, provided they conform to the conditions prescribed for similar cards in our domestic mails. If entirely in print and bearing no personal message they may be sent at the rate of 1 cent each. Those addressed to Canada, Cuba, Mexico, Republic of Panama and Shanghai may be sent at 1 cent each.

Printed matter—The rate of postage on printed matter in the foreign mails is 1 cent for each two ounces.

Commercial papers—This class includes all instruments or documents written or drawn wholly or partly by hand which have not the character of an actual and personal correspondence.

Samples of merchandise—Packages of miscellaneous merchandise in the regular mails for foreign countries (except Canada, Cuba, Mexico, Republic of Panama and Shanghai) are restricted to bona fide samples or specimens having no salable or commercial value in excess of that actually necessary for their use as samples or specimens.

Samples of merchandise must conform to the following conditions:

1. They must be placed in bags, boxes or removable envelopes in such a manner as to admit of easy inspection.

2. They must not have any salable value nor bear any manuscript other than the name or profession of the sender, the address of the addressee, a manufacturer's or trade mark, numbers, prices and indications relating to the weight or size of the quantity to be disposed of and words which are necessary to indicate precisely the origin and nature of the merchandise. Packages of samples of merchandise must not exceed twelve ounces in weight, twelve

inches in length, eight inches in breadth and four inches in thickness.

Permissible additions and inclosures—Packets of printed matter, commercial papers and samples must not contain any letter or manuscript note having the character of an actual and personal correspondence and must be made up in such manner as to admit of being easily examined. The following manuscript additions may be made to "prints": The name, business and residence of the sender; to visiting cards, the title and address of the sender and congratulations, thanks, etc., not to exceed five words; the date of dispatch; the necessary corrections on proofs of printing, and the "copy" may be inclosed with the proof; correction of errors in printing other than proof; the erasure and underscoring of certain words; the insertion or correction of figures in price lists, advertisements, trade circulars and prospectuses; the insertion of the name of the traveler, the date and place of his intended visit, in notices concerning the trips of commercial travelers; the dates of sailing on notices relating to the sailing of vessels; the name of the person invited, the date, object and place, on cards of invitation and notices of meetings; a dedication on books, journals, photographs, Christmas and New Year's cards; fashion plates, maps, etc., may be painted; to cuttings from journals, the title, date, number and address of the journal from which they were cut may be added; an invoice may be attached to the article to which it relates.

Manuscript additions other than those above indicated, and those which would deprive the print of its general character and give to it that of individual correspondence, are prohibited upon "prints."

It is permitted to inclose in the same package samples of merchandise, prints and commercial papers, but subject to the following conditions: (1) That each class of articles taken singly shall not exceed the limits which are applicable to it as regards weight and size. (2) That the total weight of the package must not exceed four pounds six ounces. (3) That the minimum charge shall be 5 cents when the package contains commercial papers and 2 cents when it consists of printed matter and samples.

Reply coupon—There may be purchased at a postoffice for 6 cents a reply coupon, by means of which a person in the United States can furnish his correspondent in certain foreign countries with a postage stamp with which to prepay postage on a reply. The countries in which the reply coupon is valid may be ascertained upon inquiry at a postoffice.

Reply coupons issued by other countries are redeemable at United States postoffices in postage stamps to the value of 5 cents for each reply coupon.

Canada, Cuba, Mexico and Panama—Articles of every kind or nature which are admitted to the domestic mails of the United States will be admitted under the same conditions to the mails for Canada, Cuba, Mexico and the Republic of Panama, except that commercial papers and bona fide trade samples are transmissible in the regular mails at the postage rate and subject to the conditions applicable to those articles in foreign mails. Packages of printed matter other than second-class matter and single volumes of printed books—the weight of which exceeds four pounds six ounces are excluded from mails for Canada, Cuba, Mexico and the Republic of Panama, and sealed packages other than letters in their usual and ordinary form are unmailable to those countries.

The postage rate applicable in the United States to "second-class matter," except daily newspapers mailed by publishers and news agents, addressed for delivery in Canada is 1 cent for each four ounces or fraction of four ounces.

Plants, seeds, etc., mailed to Canada are subject to a postage rate of 1 cent an ounce up to four ounces, and 12 cents a pound or fraction of a pound when over that weight.

Prohibited articles—All articles not admissible

to the domestic mails are excluded also from the foreign mails.

The transmission of the following articles is absolutely prohibited in the mails for foreign countries under any circumstances, viz.: Publications which violate the copyright laws of the country of destination; packets (except single volumes of printed books for Canada, Cuba, Mexico, the Republic of Panama, Shanghai and Salvador, and second-class matter for Canada, Cuba, Mexico, the Republic of Panama and Shanghai) which exceed four pounds six ounces in weight; and letters or packages containing coin, gold or silver substances, jewelry or precious articles. This prohibition against coin, etc., does not apply to Canada, Cuba, Mexico, the Republic of Panama, Shanghai or those countries whose legislation does not prohibit their circulation in their domestic mails. So far as this department has been advised the conditions prescribed to prevent the forwarding of the articles referred to in the mail for any country of the postal union except Canada, Cape Colony, Colombia, Denmark, Germany and the German protectorates, Great Britain and certain British colonies, Luxembourg, Peru and Siam.

Miscellaneous conditions—Wrapping. All matter to be sent in the mails at less than the letter rates of postage must be wrapped securely and in such manner that it can easily be examined.

Postage due—Letters with postage wholly unpaid and articles of all kinds with insufficient postage paid are chargeable with double the amount of the deficient postage.

Forwarding—Mail matter of all kinds received from any foreign country, including Canada, Cuba, Mexico and the Republic of Panama, is required to be forwarded, at the request of the addressee, from one postoffice to another and—in the case of articles other than parcel post packages—to any foreign country, without additional charge for postage.

Return—Letters and other articles of apparent value, if undeliverable, are required to be returned without extra charge.

FOREIGN PARCEL POST.

Admissible matter—Packages of mailable merchandise may be sent in unsealed packages by "parcel post" to the following named countries:

Australia.	Honduras (British).
Austria.	Honduras (Republic of).

*Parcel post packages addressed for delivery in the cities in China named in United States Postal Guide are mailable at the postage rate and subject to the conditions applicable to parcel post packages for delivery at Hongkong.

†Parcel post packages addressed for delivery at any postoffice in Formosa or Korea, and the places in China and Manchuria named in United States Postal Guide, are mailable at the postage rate and subject to the conditions applicable to parcel post packages addressed for delivery in Japan.

Postage rates—Postage must be prepaid in full by stamps affixed at the rate of 12 cents a

pound or fraction of a pound. Registry fee 10 cents in addition to postage.

Registration—The sender of a parcel addressed to any of the countries named in the table at the head of this section, except Barbados, Curacao, Dutch Guiana, France, Great Britain, Greece, Guadeloupe, Martinique, The Netherlands and Uruguay, may have the same registered by paying a registry fee of 10 cents, and will receive the "return receipt" without special charge, therefor when envelope or wrapper is marked "Return receipt demanded."

Place of mailing—Matter intended for parcel post must be taken to the postoffice for inspection and there deposited in the mails. It must not be deposited in a letter box.

Letters prohibited—A letter or communication

of the nature of personal correspondence must not accompany, be written on or inclosed with any parcel. If such be found, the letter will be placed in the mails if separable, and if the communication be inseparably attached the whole parcel will be rejected.

Dimensions—To all countries named packages are limited to three and one-half feet in length and to six feet in length and girth combined, except that packages for Colombia and Mexico are limited to two feet in length and four feet in girth.

Weight—Packages to certain postoffices in Mexico must not exceed four pounds six ounces in weight, but those for all other countries named may weigh up to but not exceeding eleven pounds.

IRON WORKERS' DYNAMITE CASES.

Forty-six men, chiefly union labor officials and agents, were placed on trial before Federal Judge A. B. Anderson in Indianapolis, Ind., Oct. 1, 1912, on the charge of complicity in nearly 100 dynamite explosions growing out of the strike against the American Bridge company declared by the International Association of Bridge and Structural Iron Workers. These explosions occurred between August, 1905, and April, 1911, and one of them, that in the Los Angeles Times building, Oct. 1, 1910, resulted in the loss of twenty-five lives. For this last crime James Boyd McNamara was sentenced Dec. 5, 1911, to life imprisonment in San Quentin prison, California, his brother, John J. McNamara, getting a sentence of fifteen years in the same prison for another explosion. Both had pleaded guilty.

The men brought before Judge Anderson were tried on counts charging conspiracy and violation of the law against carrying explosives. Edward S. Clark of Cincinnati, business agent and president of a local union of the bridge workers' organization, pleaded guilty and was given a suspended sentence. The trial ended Dec. 23, 1912, in a verdict of guilty as to thirty-three of the defendants and Dec. 30 Judge Anderson sentenced them to serve terms ranging from one

year and one day to seven years in the federal prison at Leavenworth, Kas. Among those receiving the heaviest sentences were Frank M. Ryan, Chicago; John T. Butler, Buffalo; Herbert S. Hockin, Detroit; Olaf A. Tveitmo, San Francisco; Eugene A. Clancy, San Francisco; Philip A. Cooley, New Orleans, and Michael J. Young, Boston.

Jan. 3, 1913, the defendants were admitted to bail by the United States Circuit Court of Appeals in Chicago, the bonds being fixed at \$10,000 for each year of imprisonment imposed. Jan. 6, 1914, the court decided as to twenty-four of the defendants that they must serve out their sentences and that six were to be given new trials. The latter were: Olaf A. Tveitmo, San Francisco; William McCain, New Orleans; James E. Ray, Peoria; Fred Sherman, Indianapolis; William Bernhardt, Cincinnati, and Richard H. Houllhan, Chicago. March 9, 1914, the Supreme court of the United States announced that it would not review the cases of the defendants who had been denied new trials.

June 24, 1914, President Wilson commuted, to expire at once, the sentences imposed on William Shupe of Chicago, Ill.; Michael J. Hannon of Scranton, Pa.; Frank H. Painter of Omaha, Neb., and Fred J. Mooney of Duluth, Minn.

THE SAGE FOUNDATION.

March 12, 1907, Mrs. Russell Sage of New York announced that she had set aside the sum of \$10,000,000 to be known as the Sage Foundation and to be devoted to the improvement of the social and living conditions in the United States.

Following is a part of the statement given out by Mrs. Sage as to the object of the gift: "I have set aside \$10,000,000 for the endowment of this foundation. Its object is the improve-

ment of social and living conditions in the United States. The means to that end will include research, publication, education, the establishment and maintenance of charitable and beneficial activities, agencies and institutions and the aid of any such activities, agencies and institutions already established."

The general director of the fund is John M. Glenn. Office, 130 East 22d street, New York, N. Y.

EARTHQUAKE IN CALIFORNIA.

Beginning at 8 p. m., June 22, 1915, and continuing with diminishing force until the next day, a series of earth shocks was experienced in the southern part of California, the northwestern part of Mexico and the southwestern part

of Arizona. Considerable damage was done in the Imperial valley to irrigation works and buildings. Five persons were killed in Mexicali, Mexico, by a falling wall. The total damage to property was estimated at \$400,000.

STATES AND TERRITORIES IN THE UNION.

There are forty-eight states in the union and two territories, Hawaii and Alaska. The District of Columbia is governed by three commissioners, appointed by the president of the United States, under laws passed directly by congress.

Alaska has a governor, appointed by the president, and a legislature. Porto Rico, the Philippines and other island possessions of the United States are not technically territories, each having a special form of government.

The unappropriated lands in Alaska are not included herein. The total area of Alaska is 373,165,760 acres, of which about 20,898,000 acres are reserved. Approximately 300,000 acres have been surveyed under the rectangular system within the last five years.

FATAL FIRE IN PEABODY (MASS.) SCHOOL.

Twenty-one children, most of them girls ranging in age from 7 to 17, lost their lives in a fire which destroyed St. John's parochial school in Peabody, Mass., Oct. 23, 1915. The morning session had just opened when the fire was discovered. The majority of the 600 pupils were

guided to safety by sisters of the Order of Notre Dame, who were their teachers, but some of the children lost their footing in the front vestibule and their bodies blocked the exit. The origin of the fire was not determined.

LEAGUE TO ENFORCE PEACE.

In Philadelphia, Pa., June 17, 1915, there was organized a society with the purpose of creating a league of nations to prevent or lessen the possibility of wars. The name adopted was "The League to Enforce Peace; American Branch." Resolutions were adopted declaring it desirable for the United States to join a league of nations binding the signatories to the following:

"1. All justiciable questions arising between the signatory powers, not settled by negotiation, shall, subject to the limitations of treaties, be submitted to a judicial tribunal for hearing and judgment, both on the merits and on any issue as to its jurisdiction on the question.

"2. All other questions arising between the signatories and not settled by negotiations shall be submitted to a council of conciliation for hear-

ing, consideration and recommendation.

"3. The signatory powers shall jointly use forthwith both their economic and military forces against any one of their number that goes to war or commits acts of hostility against another of the signatories before any question arising shall be submitted as provided in the foregoing.

"4. Conferences between the signatory powers shall be held from time to time to formulate and codify rules of international law, which, unless some signatory shall signify its dissent within a stated period, shall thereafter govern in the decisions of the judicial tribunal mentioned in article one."

Former President William H. Taft was elected president of the American branch of the league.

ANTIOPUM PROTOCOL SIGNED.

The protocol of the antiopium convention of 1912, which aims at the suppression of the opium traffic and international traffic in cocaine and other habit forming drugs, was signed at The

Hague, Holland, Feb. 12, 1915, by the ministers of the United States and China and by the foreign affairs secretary of Holland.

 Francisco Carbajal—July 15, 1914, to Aug. 14, 1914.
 Venustiano Carranza—Aug. 14, 1914; recognized by United States Oct. 19, 1915.
 Eulalio Gutierrez—Nov. 1, 1914.
 Roque Gonzales Garza—Jan. 16, 1915.
 Francisco Villa—Feb. 3, 1915.

Fighting between the Carranza, Villa and Zapata factions kept Mexico in a state of complete disorder throughout 1915, though there appeared to be some chance of improvement toward the close of the year.

American Press Photo.

GEN. V. CARRANZA. The results varied, except that in all cases there were bloodshed, looting and destruction of property. On the whole the outcome was favorable to the constitutionalists led by Gen. Venustiano Carranza, the Villa forces being gradually driven to the northwestern part of the republic. So far as there was any government in Mexico it was represented by Carranza and his followers. This was acknowledged in Washington as early as March, when a note was sent to the constitutionalist chief in which the following language was used:

"Conditions have become intolerable and can no longer be endured. The government of the United States therefore desires Gen. Obregon and Gen. Carranza to know that it has, after mature consideration, determined that if, as a result of the situation for which they are responsible, Americans shall suffer by reason of the conduct of the constitutionalist forces in the City of Mexico, or because they fail to provide means of protection to life and property, it will hold Gen. Obregon and Gen. Carranza personally responsible."

Gen. Carranza resented the note and replied in terms not regarded as either courteous or satisfactory and no improvement in the situation was apparent. In May it was announced in Washington that stern measures would be taken if the Mexican factions did not agree and that the policy of "watchful waiting" would be abandoned. However, nothing further was done until the first part of August, when it was announced that a conference would be held at the state department in which those taking part would be the ambassadors from Brazil, Argentina and Chile and the three ranking ministers of the American republics, namely, those of Bolivia, Uruguay and Guatemala.

Beginning Aug. 5 the conferees held several meetings and finally agreed upon a policy to be observed in restoring order in Mexico. Aug. 13 the following note was sent to the warring factions in Mexico:

"The undersigned, the secretary of state of the United States, the ambassadors extraordinary and plenipotentiary of Brazil, Chile and Argentina, and the envoys extraordinary and ministers plenipotentiary of Bolivia, Uruguay and Guatemala, accredited to the government of the United States of America, acting severally and independently, unanimously send to you the following communication:

"Inspired by the most sincere spirit of American fraternity and convinced that they rightly interpret the earnest wish of the entire continent, they have met informally at the suggestion of the secretary of state of the United States to consider the Mexican situation and to ascer-

tain whether their friendly and disinterested help could be successfully employed to re-establish peace and constitutional order in our sister republic.

"In the heat of the frightful struggle which for so long has steeped in blood the Mexican soil, doubtless all may well have lost sight of the dissolving effects of the strife upon the most vital conditions of the national existence, not upon the life and liberty of the inhabitants, but on the prestige and security of the country.

"We cannot doubt, however—no one can doubt—that in the presence of a sympathetic appeal from their brothers of America, recalling to them these disastrous effects, asking them to save their motherland from an abyss—no one can doubt, we repeat, that the patriotism of the men who lead or aid in any way the bloody strife will not remain unmoved; no one can doubt that each and every one of them, measuring in his own conscience his share in the responsibilities of past misfortune and looking forward to his share in the glory of the pacification and reconstruction of the country, will respond, nobly and resolutely, to this friendly appeal and give their best efforts to opening the way to some saving action.

"We, the undersigned, believe that if the men directing the armed movements in Mexico—whether political or military chiefs—should agree to meet, either in person or by delegates, far from the sound of cannon, and with no other inspiration save the thought of their afflicted land, there to exchange ideas and to determine the fate of the country—from such action would undoubtedly result the strong and unyielding agreement requisite to the creation of a provisional government, which should adopt the first steps necessary to the constitutional reconstruction of the country—and to issue the first and most essential of them all, the immediate call to general elections.

"An adequate place within the Mexican frontiers, which for the purpose might be neutralized, should serve as the seat of the conference; and in order to bring about a conference of this nature the undersigned, or any of them, will willingly, upon invitation, act as intermediaries to arrange the time, place and other details of such conference, if this action can in any way aid the Mexican people.

"The undersigned expect a reply to this communication within a reasonable time; and consider that such a time would be ten days after the communication is delivered, subject to proration for cause."

Gen. Carranza made a formal reply to the note Sept. 10 declining to enter into any conference with the Villa or other factions, calling attention to the fact that the constitutionalists with an army of 150,000 men were in control of the greater part of the national domain, and concluding as follows:

"If your excellencies consider that the first chief of the constitutionalist army in charge of the executive power, Citizen Venustiano Carranza, maintains a de facto government in the republic with all the attributes necessary for recognition as such, he suggests that you recommend to your respective governments that it be so recognized, thus establishing one more bond of friendship between the people and the governments of your excellencies and the Mexican people and the Mexican government."

Further conferences took place between the American secretary of state and the representatives of Argentina, Brazil, Chile, Bolivia, Guatemala and Uruguay, and Oct. 9 Mr. Lansing made this announcement:

"The conferees, after careful consideration of the facts, have found that the Carranzista party is the only party possessing the essentials for recognition as the de facto government of Mexico, and they have so reported to their respective governments."

Each of the governments represented at the conference formally recognized, Oct. 19, the de facto government of Mexico of which Gen. Car-

ranza is chief executive." The event was celebrated in the City of Mexico as signifying the restoration of peace and normal conditions in the southern republic within a short time. The United States placed an embargo on the shipment of arms to the factions in Mexico opposed to Gen. Carranza and entered into diplomatic relations with the de facto government.

In the course of the year the United States was obliged to send war vessels to Vera Cruz and to maintain considerable forces of cavalry and infantry along the northern border of Mexico. These were under command of Maj.-Gen. Frederick Funston and their work consisted mainly in preventing raids by Mexican bandits into Texas and Arizona and firing across the border by Mexican soldiers. In the performance of this duty a number of American soldiers were killed and others wounded, but there were no encounters involving large numbers of troops.

One of the incidents of the year was the arrival in the United States of Gen. Victoriano Huerta. He landed in New York April 12, and later proceeded toward Texas. June 27 he was arrested by federal officers on the charge of inciting rebellion against a friendly country and was confined in Fort Bliss, Texas.

Porfirio Diaz, who was president of Mexico from 1877 to 1911, died in Paris, France, July 2, after four years in exile, during which his country was torn by revolutions and factional warfare, and knew nothing of that prosperity which it experienced while he was in power.

CHRONOLOGY.

1910-1913.

Following is a chronology of the main events in the political history of Mexico since the overthrow of President Porfirio Diaz:

June 26, 1910—Porfirio Diaz elected president for eighth successive term.
Nov. 18, 1910—Revolution started by anti-re-electionists.
Nov. 23, 1910—Francisco I. Madero proclaims himself provisional president of Mexico.
May 25, 1911—Porfirio Diaz resigns presidency of Mexico.
May 31, 1911—Gen. Diaz and family sail from Vera Cruz for Europe.
Oct. 1, 1911—Francisco I. Madero elected president of Mexico.
Oct. 16, 1912—Gen. Felix Diaz begins new revolution.
Oct. 27, 1912—Gen. Diaz captured by federal troops.
Feb. 9, 1913—Military uprising in City of Mexico; Gen. Diaz liberated; rebels seize arsenal.
Feb. 11-19, 1913—Bombardment in heart of City of Mexico, rebels firing from arsenal and federals from national palace.
Feb. 19, 1913—President Madero's own troops revolt; he is arrested and Gen. Victoriano Huerta is proclaimed provisional president; Gustavo Madero executed.
Feb. 21, 1913—New revolution started by Venustiano Carranza, governor of Coahuila.
Feb. 23-24, 1913—President Francisco I. Madero and Vice-President Jose Plutarco Suarez shot to death about midnight of Feb. 23-24.
May 8, 1913—Rebels under Gen. Carranza in control of larger part of northern Mexico.
Aug. 4, 1913—Resignation of Ambassador Wilson accepted; John Lind of Minnesota sent to Mexico as personal representative of President Wilson.
Aug. 26, 1913—President Wilson reads message to congress on Mexican situation.
Oct. 14, 1913—Gen. Huerta suspends constitutional guarantees and proclaims himself dictator of Mexico.
Oct. 26, 1913—Presidential and congressional elections take place; Gen. Huerta elected president and Gen. Blanquez vice-president.
Oct. 27-28, 1913—Gen. Felix Diaz flees to Havana.
Nov. 2, 1913—Gen. Huerta notified that he must resign the presidency of Mexico.
Dec. 31, 1913—Year closes with rebels generally victorious in northern Mexico and Gen. Huerta still in presidential office in the City of Mexico.

1914.

Jan. 10—Rebels under Gen. Francisco Villa enter Ojinaga; federal generals, soldiers and camp followers to the number of several thousand cross to the American side of the Rio Grande near Presidio, Tex., and surrender to United States troops.

Feb. 3—President Wilson issues a proclamation ending the embargo on the exportation of arms and ammunition to Mexico.

Feb. 17—William S. Benton, ranchman, an English subject, killed by revolutionists at or near Juarez, Mexico.

March 9—Senator Albert B. Fall of New Mexico makes a speech in the United States senate giving details of between seventy and eighty outrages on Americans in Mexico; severely criticizes state department for its lack of action.

April 2—Gen. Villa's forces take Torreon.
April 9—Paymaster and seven sailors of the U. S. gunboat Dolphin arrested at boat landing in Tampico by Mexican soldiers; after their release Rear-Admiral Mayo demands an apology, punishment of the officer responsible and a public salute of twenty-one guns to the United States flag within twenty-four hours.

April 10—Apology for arrest of sailors at Tampico made and officer responsible is punished, but salute to flag is not fired.

April 11—Charge O'Shaughnessy in Mexico City directed by President Wilson to inform President Huerta that the salute to the flag must be fired as demanded by Rear-Admiral Mayo.

April 12—President Huerta replies that no salute will be fired.

THE PAN-AMERICAN UNION.

The Pan-American union was established upon the recommendation of the first international American conference in 1890 for the purpose of maintaining closer relations between the republics of the western hemisphere. Its duties have been broadened since then and it is now a general clearing house of information concerning the nations of North, South and Central America. It publishes a monthly bulletin in which are given the latest official data concerning the resources, commerce and other features of the republics. The officers of the union occupy a fine building

at the corner of 17th street and Potomac park in Washington, D. C. The structure, which was built with money given by Andrew Carnegie, was dedicated April 26, 1910. Following are the officers.

Director-General—John Barrett.
Assistant Director—Francisco J. Yanes.
Chief Statistician—William C. Wells.
Chief Clerk—Franklin Adams.
Chief Translator—Emilio M. Amores.
Librarian—Charles E. Babcock.
Special Compilers—W. A. Reid, C. E. Albes.

THE COST OF LIVING.

RELATIVE RETAIL PRICES OF FOOD.

[From bulletin of United States bureau of labor statistics.]

Taking the average price for the year 1913 as a base or as 100.0, the average relative retail prices of certain articles of food in the years specified were as follows:

Articles.	1910.	1911.	1912.	1913.	1914.
All combined	92.9	91.9	97.4	100.0	102.0

Reports to the bureau of labor statistics of retail prices of seventeen of the principal articles of food for July 15, 1915, covering forty-four important industrial cities throughout the United States showed a decrease of 1 per cent in the price of all articles combined from July, 1914, to July, 1915. According to previous reports to the bureau, retail prices had been gradually increasing from 91 per cent in July, 1911, to 100 per cent in July, 1914. The price of all meats was lower in July, 1915, than in July, 1914. The price of lard, eggs, potatoes and milk was also lower in July, 1915, than in July, 1914, while only flour, cornmeal, butter and sugar showed an increase in price. The increases in flour and sugar, however, were quite marked, being 26 per cent and 33 per cent, respectively. A table showing the relative price of each of the seventeen articles in July, 1911 to 1915, is given herewith. The average price for 1914 equals 100. The relative prices of the seventeen articles combined and weighted according to the average consumption in workmen's families are also shown.

Leo M. Frank, serving a life term for the murder of Mary Phagan, a factory girl, was taken from the prison farm at Milledgeville, Ga., on the evening of Aug. 16, 1915, and hanged to a tree, two miles east of Marietta, early on the following morning. The lynchers organized in Marietta and made the trip to and from the prison, a total distance of 200 miles, in automobiles. They were well armed and had but little difficulty in overpowering the prison authorities, seizing Frank, who was just recovering from wounds inflicted by a fellow convict, and hurrying him away.

Frank was arrested April 29, 1913, after the body of Mary Phagan, 14 years old, was found in the basement of a pencil factory in Atlanta, Ga., where he was superintendent. Notes found near the body, supposed to have been written by the girl while dying, accused a "tall black negro" of the crime, and Jim Conley, a colored watchman at the factory, was taken into custody. Though he declared at first that he could not write, he afterward said that he had written the notes at Frank's dictation. Aug. 26 Frank was convicted of murder and sentenced to die. Conley was given one year in prison as accessory to murder and when he had served his term was set free.

Frank's attorneys carried the case to the state Supreme court, which, Feb. 17, 1914, refused to

WHOLESALE COMMODITY PRICES.

Dun's index number of wholesale commodity prices, including breadstuffs, meat, dairy and garden products, other foods, clothing, metals and miscellaneous articles, stood at the highest level reached in several decades Nov. 1, 1915. The total was \$130.467, as compared with \$124.340 Nov. 1, 1914; \$125.502, Nov. 1, 1913, and \$122.525, Nov. 1, 1912. By divisions the index number stood:

	Nov. 1, 1915.	Nov. 1, 1914.
Breadstuffs	\$24.024	\$25.300
Meat	11.392	11.907
Dairy, garden products	20.616	18.586

Clothing	22.325	19.970
Metals	17.276	15.849
Miscellaneous	23.878	21.843

According to the New York Annalist's "Curve of the Cost of Living," which shows the fluctuations in the average wholesale price of twenty-five food commodities selected and arranged to represent a theoretical family's food budget, the highest point in recent years was reached in August and September, 1914. The highest point in 1915 was in February. The "curve" descended in March, rose in April, descended in May and June, rose in July, descended in August and September, and then rose again in October and November. The Annalist index number published Nov. 8, 1915, showed:

LYNCHING OF LEO M. FRANK.

grant him a new trial. Then an effort was made to have the United States Supreme court grant a writ of error, but this it refused to do, announcing its decision Dec. 8. Justice Lamar, however, granted a hearing, and arguments were heard before the highest tribunal in the country. The result was the same, the court refusing to grant a writ of error Feb. 19, 1915. The case had in the meantime attracted countrywide attention and sympathy on account of the character of the evidence against Frank, even the judge who presided at the trial, L. S. Roan, expressing doubts as to its value. Thousands of names were signed to petitions circulated in all parts of the country, asking the state pardon board or the governor to save Frank from the gallows. The result was that, June 20, Gov. J. M. Slaton commuted the sentence to imprisonment for life, and Frank was taken to the prison farm. There, July 18, a fellow convict, William Greene, for no known cause, stabbed him, inflicting a wound that came near proving fatal.

The home of the murdered girl, Mary Phagan, was at Marietta and she was buried there. The Cobb county grand jury at Marietta, which took some testimony regarding the lynching, reported Sept. 2 that the evidence available was not sufficient to warrant the indictment of any one for the crime.

PROHIBITION SITUATION UP TO JAN. 1, 1916.

[By Deets Pickett.]

Prohibition states prior to Sept. 1, 1914: Maine, Kansas, Georgia, Mississippi, North Carolina, North Dakota, Oklahoma, Tennessee, West Virginia.

Prohibition advance since Sept. 1, 1914: Virginia—Sept. 22, 1914, Virginia voted for constitutional statewide prohibition, effective Nov. 1, 1916.

Colorado—Nov. 3, 1914, Colorado voters adopted statewide constitutional prohibition, effective Jan. 1, 1916.

Arizona—Nov. 3, 1914, Arizona voters adopted statewide constitutional prohibition, effective Jan. 1, 1915.

Washington—Nov. 3, 1914, Washington voters adopted statewide constitutional prohibition, effective Jan. 1, 1916.

Oregon—Nov. 3, 1914, Oregon voted for prohibition, the law to become effective Jan. 1, 1916.

Alabama—Jan. 21, 1915, the legislature of Alabama enacted a statewide prohibition measure, effective July 1, 1915.

Arkansas—Feb. 5, 1915, the Arkansas legislature enacted a statewide prohibition law, effective July 1, 1915, but the law was later amended to become effective Jan. 1, 1915.

Iowa—In February, 1915, the Iowa legislature voted to submit to the people a constitutional statewide prohibition amendment, to be voted on at the general election in 1917, provided the legislature of 1917 ratifies; prohibition to become effective Jan. 1, 1918. Then the legislature repealed the mulct law, effective Jan. 1, 1916, thereby making Iowa dry under statute after that date.

Idaho—In February, 1915, the Idaho legislature passed a statutory prohibition law, making the state dry Jan. 1, 1916.

Montana—In February, 1915, the Montana legislature voted to submit to the people at the November (1916) election a statutory measure which, if adopted, makes Montana a prohibition state Dec. 31, 1918.

South Carolina—On Sept. 14, 1915, South Caro-

lina voted for statewide prohibition by 41,735 votes to 16,809. The law became effective Dec. 31, 1915.

New Jersey—On March 2, 1915, the senate of New Jersey passed a bill granting to municipalities the right to vote on the liquor question.

Utah—In March, 1915, the legislature of Utah passed the Wooten bill providing statutory prohibition for Utah after June 1, 1916. The bill was vetoed by the governor after holding for many days.

Vermont—In February, 1915, the Vermont legislature voted to submit to popular vote on March 7, 1916, the question of statutory prohibition, to go into effect May 1, 1916.

Minnesota—On Feb. 25, 1915, the legislature of Minnesota passed a county option law, effective immediately. Under this law fifty-six county elections were held in eight months. Forty-five were dry victories.

South Dakota—On March 2, 1915, the legislature of South Dakota voted to submit to popular vote at the election in November, 1916, a constitutional amendment, effective Jan. 1, 1917.

Florida—In the spring of 1915 the legislature passed the Davis package law, abolishing the treating system and free lunch, closing saloons at 6 p. m. until 7 a. m., and imposing other restrictions so drastic that the character of the saloon in Florida is totally altered. The act closed more than 200 saloons, leaving only about seventy-five wholesale, mail order and retail liquor houses.

Georgia—In the fall of 1915 a special session of the legislature passed new laws for rigid prohibition and strict law enforcement. Before the passage of these laws, which will go into effect May 1, 1916, prohibition in Georgia was very lax, but it now bids fair to be as strict as that in any other state in the union.

Nebraska—This state will vote on statewide prohibition in 1916.

In various states laws prohibiting liquor advertising and otherwise increasing the strictness of liquor regulation have been numerous.

CHINA VOTES IN FAVOR OF MONARCHY.

In August, 1915, the Chou An Hui, or peace party of China, issued a manifesto advocating the restoration of the monarchical form of government. The movement spread rapidly and was favored by President Yuan Shih-kai and his advisers; in fact, it was suspected by many that the chief executive of the republic and his friends originated it. However, he received petitions from all parts of the country urging the restoration of the monarchy with himself at the head of it. In reply he said he would per-

mit the people to decide for themselves and would obey their will. Elections were held in October and November and the provinces voted in favor of a monarchy with Yuan Shih-kai as monarch.

Japan, with the reported support of Britain and Russia, informed China that the time for a change was inopportune, as it might lead to disturbances dangerous to peace in the far east. The president and his cabinet thereupon announced that the restoration of the monarchy would be postponed.

NATIONAL GUARD ASSOCIATION.

President—Gen. Thos. J. Stewart, Harrisburg, Pa.

Meeting place in 1916—Asheville, N. C.

THE PRESIDENT'S MESSAGE TO CONGRESS.

Gentlemen of the Congress: Since I last had the privilege of addressing you on the state of the union the war of nations on the other side of the sea, which had then only begun to disclose its portentous proportions, has extended its threatening and sinister scope until it has swept within its flame some portion of every quarter of the globe, not excepting our own hemisphere, has altered the whole face of international affairs, and now presents a prospect of reorganization and reconstruction such as statesmen and peoples have never been called upon to attempt before.

We have stood apart, studiously neutral. It was our manifest duty to do so. Not only did we have no part or interest in the policies which seem to have brought the conflict on; it was necessary, if a universal catastrophe was to be avoided, that a limit should be set to the sweep of destructive war and that some part of the great family of nations should keep the processes of peace alive, if only to prevent collective economic ruin and the breakdown throughout the world of the industries by which its populations are fed and sustained. It was manifestly the duty of the self-governed nations of this hemisphere to redress, if possible, the balance of economic loss and confusion in the other, if they could do nothing more. In the day of readjustment and recuperation we earnestly hope and believe that they can be of infinite service.

In this neutrality, to which they were bidden not only by their separate life and their habitual detachment from the politics of Europe but also by a clear perception of international duty, the states of America have become conscious of a new and more vital community of interest and moral partnership in affairs, more clearly conscious of the many common sympathies and interests and duties which bind them stand together.

There was a time in the early days of our own great nation and of the republics fighting their way to independence in Central and South America when the government of the United States looked upon itself as in some sort the guardian of the republics to the south of her, as against any encroachments or efforts at political control from the other side of the water; felt it its duty to play the part even without invitation from them; and I think that we can claim that the task was undertaken with a true and disinterested enthusiasm for the freedom of the Americas and the unmolested self-government of her independent peoples.

But it was always difficult to maintain such a role without offense to the pride of the peoples whose freedom of action we sought to protect and without provoking serious misconceptions of our motives, and every thoughtful man of affairs must welcome the altered circumstances of the new day in whose light we now stand, when there is no claim of guardianship or thought of wards, but, instead, a full and honorable association as of partners between ourselves and our neighbors in the interest of all America, north and south. Our concern for the independence and prosperity of the states of Central and South America is not altered. We retain unabated the spirit that has inspired us throughout the whole life of our government and which was so frankly put into words by President Monroe. We still mean always to make a common cause of national independence and of political liberty in America. But that purpose is now better understood so far as it concerns ourselves. It is known not to be a selfish purpose. It is known to have in it no thought of taking advantage of any government in this hemisphere or playing its political fortunes for our own benefit. All the governments of America stand, so far as we are concerned, upon a footing of genuine equality and unquestioned independence.

We have been put to the test in the case of Mexico, and we have stood the test. Whether

we have benefited Mexico by the course we have pursued remains to be seen. Her fortunes are in her own hands. But we have at least proved that we will not take advantage of her in her distress and undertake to impose upon her an order and government of our own choosing. Liberty is often a fierce and intractable thing, to which no bounds can be set and to which no bounds of a few men's choosing ought ever to be set.

Every American who has drunk at the true fountains of principle and tradition must subscribe without reservation to the high doctrine of the Virginia bill of rights, which in the great days in which our government was set up was everywhere amongst us accepted as the creed of free men. That doctrine is, "That government is, or ought to be, instituted for the common benefit, protection and security of the people, nation or community;" that "of all the various modes and forms of government, that is the best which is capable of producing the greatest degree of happiness and safety, and is most effectually secured against the danger of maladministration; and that, when any government shall be found inadequate or contrary to these purposes, a majority of the community hath an indubitable, inalienable and indefeasible right to reform, alter or abolish it, in such manner as shall be judged most conducive to the public weal."

We have unhesitatingly applied that heroic principle to the case of Mexico, and now hopefully await the rebirth of the troubled republic, which had so much of which to purge itself and so little sympathy from any outside quarter in the radical but necessary process. We will aid and befriend Mexico, but we will not coerce her; and our course with regard to her ought to be sufficient proof to all America that we seek no political suzerainty or selfish control.

The moral is that the states of America are not hostile rivals, but co-operating friends, and that their growing sense of community of interest, alike in matters political and in matters economic, is likely to give them a new significance as factors in international affairs and in the political history of the world. It presents them as in a very deep and true sense a unit in world affairs, spiritual partners, standing together because thinking together, quick with common sympathies and common ideals. Separated, they are subject to all the cross currents of the confused politics of a world of hostile rivalries; united, in spirit and purpose, they cannot be disappointed of their peaceful destiny.

This is pan-Americanism. It has none of the spirit of empire in it. It is the embodiment, the effectual embodiment of the spirit of law and intelligence and liberty and mutual service.

A very notable body of men recently met in the city of Washington at the invitation and as the guests of this government, whose deliberations are likely to be looked back to as marking a memorable turning point in the history of America. They were representative spokesmen of the several independent states of this hemisphere and were assembled to discuss the financial and commercial relations of the republics of the two continents which nature and political fortune have so intimately linked together. I earnestly recommend to your perusal the reports of their proceedings and of the actions of their committees. You will get from them, I think, a fresh conception of the ease and intelligence and advantage with which Americans of both continents may draw together in practical co-operation and of what the material foundations of this hopeful partnership of interest must consist, of how we should build them and of how necessary it is that we should hasten their building.

There is, I venture to point out, an especial significance just now attaching to this whole matter of drawing the Americas together in bonds of honorable partnership and mutual advantage because of the economic readjustments

which the world must inevitably witness within the next generation, when peace shall have at last resumed its healthful tasks. In the performance of these tasks I believe the Americas to be destined to play their parts together. I am interested to fix your attention on this prospect now because unless you take it within your view and permit the full significance of it to command your thought I cannot find the right light in which to set forth the particular matter that lies at the very front of my whole thought as I address you to-day. I mean national defense.

No one who really comprehends the spirit of the great people for whom we are appointed to speak can fail to perceive that their passion is for peace, their genius best displayed in the practice of the arts of peace. Great democracies are not belligerent. They do not seek or desire war. Their thought is of individual liberty and of the free labor that supports life and the uncensored thought that quickens it. Conquest and dominion are not in our reckoning or agreeable to our principles. But just because we demand unmolested development and the undisturbed government of our own lives upon our own principles of right and liberty, we resent, from whatever quarter it may come, the aggression we ourselves will not practice.

We insist upon security in prosecuting our self-chosen lines of national development. We do more than that. We demand it also for others. We do not confine our enthusiasm for individual liberty and free national development to the incidents and movements of affairs which affect only ourselves. We feel it wherever there is a people that tries to walk in these difficult paths of independence and right. From the first we have made common cause with all partisans of liberty on this side the sea and have deemed it as important that our neighbors should be free from all outside domination as that we ourselves should be; have set America aside as a whole for the uses of independent nations and political freemen.

Out of such thoughts grow all our policies. We regard war merely as a means of asserting the rights of a people against aggression. And we are as fiercely jealous of coercive or dictatorial power within our own nation as of aggression from without. We will not maintain a standing army except for uses which are as necessary in times of peace as in times of war; and we shall always see to it that our military peace establishment is no larger than is actually and continuously needed for the uses of days in which no enemies move against us. But we do believe in a body of free citizens ready and sufficient to take care of themselves and of the governments which they have set up to serve them. In our constitutions themselves we have commanded that "the right of the people to keep and bear arms shall not be infringed" and our confidence has been that our safety in times of danger would lie in the rising of the nation to take care of itself, as the farmers rose at Lexington.

But war has never been a mere matter of men and guns. It is a thing of disciplined might. If our citizens are ever to fight effectively upon a sudden summons, they must know how modern fighting is done, and what to do when the summons comes to render themselves immediately available and immediately effective. And the government must be their servant in this matter, must supply them with the training they need to take care of themselves and of it. The military arm of their government, which they will not allow to direct them, they may properly use to serve them and make their independence secure—and not their own independence merely—but the rights also of those with whom they have made common cause, should they also be put in jeopardy. They must be fitted to play the great role in the world, and particularly in this hemisphere, which they are qualified by principle and by chastened ambition to play.

It is with these ideals in mind that the plans of the department of war for more adequate national defense were conceived which will be laid before you and which I urge you to sanction and put into effect as soon as they can be properly scrutinized and discussed. They seem to me the essential first steps, and they seem to me for the present sufficient.

They contemplate an increase of the standing force of the regular army from its present strength of 5,023 officers and 102,985 enlisted men of all services to a strength of 7,136 officers and 134,707 enlisted men, or 141,843 all told, all services, rank and file, by the addition of fifty-two companies of coast artillery, fifteen companies of engineers, ten regiments of infantry, four regiments of field artillery and four aero squadrons, besides 750 officers required for a great variety of extra service, especially the all important duty of training the citizen force of which I shall presently speak, 792 noncommissioned officers for service in drill, recruiting and the like, and the necessary quota of enlisted men for the quartermaster corps, the hospital corps, the ordnance department and similar auxiliary services. These are the additions necessary to render the army adequate for its present duties—duties which it has to perform not only upon our own continental coasts and borders and at our interior army posts but also in the Philippines, in the Hawaiian islands, at the isthmus and in Porto Rico.

By way of making the country ready to assert some part of its real power promptly and upon a larger scale, should occasion arise, the plan also contemplates supplementing the army by a force of 400,000 disciplined citizens, raised in increments of 133,000 a year throughout a period of three years. This it is proposed to do by a process of enlistment under which the serviceable men of the country would be asked to bind themselves to serve with the colors for purposes of training for short periods throughout three years and to come to the colors at call at any time throughout an additional "fourth" period of three years. This force of 400,000 men would be provided with personal accouterments as fast as enlisted and their equipment for the field made ready to be supplied at any time. They would be assembled for training at stated intervals at convenient places in association with suitable units of the regular army. Their period of annual training would not necessarily exceed two months in the year.

It would depend upon the patriotic feeling of the younger men of the country whether they responded to such a call to service or not. It would depend upon the patriotic spirit of the employers of the country whether they made it possible for the younger men in their employ to respond under favorable conditions or not. I, for one, do not doubt the patriotic devotion either of our young men or of those who give them employment—those for whose benefit and protection they would, in fact, enlist. I would look forward to the success of such an experiment with entire confidence.

At least so much by way of preparation for defense seems to me to be absolutely imperative now. We cannot do less.

The program which will be laid before you by the secretary of the navy is similarly conceived. It involves only a shortening of the time within which plans long matured shall be carried out; but it does make definite and explicit a program which has heretofore been only implicit, held in the minds of the committees on naval affairs and disclosed in the debates of the two houses, but nowhere formulated or formally adopted. It seems to me very clear that it will be to the advantage of the country for the congress to adopt a comprehensive plan for putting the navy upon a final footing of strength and efficiency and to press that plan to completion within the next five years. We have always looked to the navy of the country as our first and chief line of defense; we have always seen it to be our manifest course of prudence

to be strong on the seas. Year by year we have been creating a navy which now ranks very high indeed among the navies of the maritime nations. We should now definitely determine how we shall complete what we have begun, and how soon.

The program to be laid before you contemplates the construction within five years of ten battle ships, six battle cruisers, ten scout cruisers, fifty destroyers, fifteen fleet submarines, eighty-five coast submarines, four gunboats, one hospital ship, two ammunition ships, two fuel oil ships and one repair ship. It is proposed that of this number we shall the first year provide for the construction of two battle ships, two battle cruisers, three scout cruisers, fifteen destroyers, five fleet submarines, twenty-five coast submarines, two gunboats and one hospital ship; the second year, two battle ships, one scout cruiser, ten destroyers, four fleet submarines, fifteen coast submarines, one gunboat and one fuel oil ship; the third year, two battle ships, one battle cruiser, two scout cruisers, five destroyers, two fleet submarines and fifteen coast submarines; the fourth year, two battle ships, two battle cruisers, two scout cruisers, ten destroyers, two fleet submarines, fifteen coast submarines, one ammunition ship and one fuel oil ship; and the fifth year, two battle ships, one battle cruiser, two scout cruisers, ten destroyers, two fleet submarines, fifteen coast submarines, one gunboat, one ammunition ship and one repair ship.

The secretary of the navy is asking also for the immediate addition to the personnel of the navy of 7,500 sailors, 2,500 apprentice seamen and 1,500 marines. This increase would be sufficient to care for the ships which are to be completed within the fiscal year 1917 and also for the number of men which must be put in training to man the ships which will be completed early in 1918. It is also necessary that the number of midshipmen at the naval academy at Annapolis should be increased by at least 300 in order that the force of officers should be more rapidly added to; and authority is asked to appoint, for engineering duties only, approved graduates of engineering colleges, and for service in the aviation corps a certain number of men taken from civil life.

If this full program should be carried out we should have built or building in 1921, according to the estimates of survival and standards of classification followed by the general board of the department, an effective navy consisting of twenty-seven battleships of the first line, six battle cruisers, twenty-five battle ships of the second line, ten armored cruisers, thirteen scout cruisers, five first-class cruisers, three second-class cruisers, ten third-class cruisers, 108 destroyers, eighteen fleet submarines, 157 coast submarines, six monitors, twenty gunboats, four supply ships, fifteen fuel ships, four transports, three tenders to torpedo vessels, eight vessels of special types and two ammunition ships. This would be a navy fitted to our needs and worthy of our traditions.

But armies and instruments of war are only part of what has to be considered. If we are to consider the supreme matter of national self-sufficiency and security in all its aspects. There are other great matters which will be thrust upon our attention, whether we will or not. There is, for example, a very pressing question of trade and shipping involved in this great problem of national adequacy. It is necessary for many weighty reasons of national efficiency and development that we should have a great merchant marine. The great merchant fleet we once used to make us rich, that great body of sturdy sailors who used to carry our flag into every sea and who were the pride and often the bulwark of the nation, we have almost driven out of existence by inexcusable neglect and indifference and by a hopelessly blind and provincial policy of so-called economic protection. It is high time we repaired our mistake and resumed our commercial independence on the seas.

For it is a question of independence. If other nations go to war or seek to hamper each other's commerce, our merchants, it seems, are at their mercy, to do with as they please. We must use their ships and use them as they determine. We have not ships enough of our own. We cannot handle our own commerce on the seas. Our independence is provincial and is only on land and within our own borders. We are not likely to be permitted to use even the ships of other nations in rivalry of their own trade, and are without means to extend our commerce even where the doors are wide open and our goods desired.

Such a situation is not to be endured. It is of capital importance not only that the United States should be its own carrier on the seas and enjoy the economic independence which only an adequate merchant marine would give it but also that the American hemisphere as a whole should enjoy a like independence and self-sufficiency, if it is not to be drawn into the tangle of European affairs. Without such independence the whole question of our political unity and self-determination is very seriously clouded and complicated, indeed.

Moreover, we can develop no true or effective American policy without ships of our own—not ships of war, but ships of peace, carrying goods and carrying much more: creating friendships and rendering indispensable services to all interests on this side the water. They must move constantly back and forth between the Americas. They are the only shuttles that can weave the delicate fabric of sympathy, comprehension, confidence and mutual dependence in which we wish to clothe our policy of America for Americans.

The task of building up adequate merchant marine for America private capital must ultimately undertake and achieve, as it has undertaken and achieved every other like task amongst us in the past, with admirable enterprise, intelligence and vigor; and it seems to me a manifest dictate of wisdom that we should promptly remove every legal obstacle that may stand in the way of this much-to-be-desired revival of our old independence and should facilitate in every possible way the building, purchase and American registration of ships. But capital cannot accomplish this great task of a sudden. It must embark upon it by degrees, as the opportunities of trade develop. Something must be done at once; done to open routes and develop opportunities where they are as yet undeveloped; done to open the arteries of trade where the currents have not yet learned to run—especially between the two American continents, where they are, singularly enough, yet to be created and quickened; and it is evident that only the government can undertake such beginnings and assume the initial financial risks. When the risk has passed and private capital begins to find its way in sufficient abundance into new channels, the government may withdraw. But it cannot omit to begin. It should take the first steps, and should take them at once. Our goods must not lie piled up at our ports and stored upon side tracks in freight cars which are daily needed on the roads; must not be left without means of transport to any foreign quarter. We must not await the permission of foreign ship owners and foreign governments to send them where we will.

With a view to meeting these pressing necessities of our commerce and availing ourselves at the earliest possible moment of the present unparalleled opportunity of linking the two Americas together in bonds of mutual interest and service, an opportunity which may never return again if we miss it now, proposals will be made to the present congress for the purchase or construction of ships to be owned and directed by the government similar to those made to the last congress, but modified in some essential particulars. I recommend these proposals to you for your prompt acceptance with the more confidence because every month that has elapsed since the former proposals were made has made

the necessity for such action more and more manifestly imperative. That need was then foreseen; it is now acutely felt and everywhere realized by those for whom trade is waiting, but who can find no conveyance for their goods. I am not so much interested in the particulars of the program as I am in taking immediate advantage of the great opportunity which awaits us if we will but act in this emergency. In this matter, as in all others, a spirit of common counsel should prevail, and out of it should come an early solution of this pressing problem.

There is another matter which seems to me to be very intimately associated with the question of national safety and preparation for defense. That is our policy toward the Philippines and the people of Porto Rico. Our treatment of them and their attitude toward us are manifestly of the first consequence in the development of our duties in the world and in getting a free hand to perform those duties. We must be free from every unnecessary burden or embarrassment; and there is no better way to be clear of embarrassment than to fulfill our promises and promote the interests of those dependent on us to the utmost.

Bills for the alteration and reform of the government of the Philippines and for rendering fuller political justice to the people of Porto Rico were submitted to the sixty-third congress. They will be submitted also to you. I need not particularize their details. You are most of you already familiar with them. But I do recommend them to your early adoption with the sincere conviction that there are few measures you could adopt which would more serviceably clear the way for the great policies by which we wish to make good, now and always, our right to lead in enterprises of peace and good will and economic and political freedom.

The plans for the armed forces of the nation which I have outlined and for the general policy of adequate preparation for mobilization and defense involve, of course, very large additional expenditures of money—expenditures which will considerably exceed the estimated revenues of the government. I have made my duty by law, whenever the estimates of expenditure exceed the estimates of revenue, to call the attention of the congress to the fact and suggest any means of meeting the deficiency that it may be wise or possible for me to suggest. I am ready to believe that it would be my duty to do so in any case; and I feel particularly bound to speak of the matter when it appears that the deficiency will arise directly out of the adoption by the congress of measures which I myself urge it to adopt. Allow me, therefore, to speak briefly of the present state of the treasury and of the fiscal problems which the next year will probably disclose.

On the 30th of June last there was an available balance in the general fund of the treasury of \$104,170,105.78. The total estimated receipts for the year 1916, on the assumption that the emergency revenue measure passed by the last congress will not be extended beyond its present limit, the 31st of December, 1915, and that the present duty of 1 cent a pound on sugar will be discontinued after the first of May, 1916, will be \$670,395,500. The balance of June last and these estimated revenues come, therefore, to a grand total of \$774,535,605.78. The total estimated disbursements for the present fiscal year, including \$25,000,000 for the Panama canal, \$12,000,000 for probable deficiency appropriations and \$50,000 for miscellaneous debt redemptions, will be \$753,891,000; and the balance in the general fund of the treasury will be reduced to \$20,644,605.78. The emergency revenue act, if continued beyond its present time limitation, would produce, during the half year then remaining, about \$41,000,000. The duty of 1 cent a pound on sugar, if continued, would produce during the two months of the fiscal year remaining after the 1st of May about \$15,000,000. These two sums, amounting together to \$56,000,

if added to the revenues of the second half of the fiscal year, would yield the treasury at the end of the year an available balance of \$76,644,605.78.

The additional revenues required to carry out the program of military and naval preparation of which I have spoken would, as at present estimated, be for the fiscal year 1917 \$93,800,000. Those figures, taken with the figures for the present fiscal year which I have already given, disclose our financial problem for the year 1917.

Assuming that the taxes imposed by the emergency revenue act and the present duty on sugar are to be discontinued, and that the balance at the close of the present fiscal year will be only \$20,644,605.78, that the disbursements for the Panama canal will again be about \$25,000,000, and that the additional expenditures for the army and navy are authorized by the congress, the deficit in the general fund of the treasury on the 30th of June, 1917, will be nearly \$235,000,000. To this sum at least \$50,000,000 should be added to represent a safe working balance for the treasury, and \$12,000,000 to include the usual deficiency estimates in 1917; and these additions would make a total deficit of some \$297,000,000. If the present taxes should be continued throughout this year and the next, however, there would be a balance in the treasury of some \$76,500,000 at the end of the present fiscal year and a deficit at the end of the next year of only some \$50,000,000, or, reckoning in \$62,000,000 for deficiency appropriations and a safe treasury balance at the end of the year, a total deficit of some \$112,000,000. The obvious moral of the figures is that it is a plain counsel of prudence to continue all of the present taxes or their equivalents, and confine ourselves to the problem of providing \$112,000,000 of new revenue rather than \$297,000,000.

How shall we obtain the new revenue? We are frequently reminded that there are many millions of bonds which the treasury is authorized under existing law to sell to reimburse the sums paid out of current revenues for the construction of the Panama canal; and it is true that bonds to the amount of approximately \$222,000,000 are now available for that purpose. Prior to 1913 \$134,631,980 of these bonds had actually been sold to recoup the expenditures at the isthmus and now constitute a considerable item of the public debt. But I, for one, do not believe that the people of this country approve of postponing the payment of their bills.

Borrowing money is short-sighted finance. It can be justified only when permanent things are to be accomplished which many generations will certainly benefit by and which it seems hardly fair that a single generation should pay for. The objects we are now proposing to spend money for cannot be so classified, except in the sense that everything wisely done may be said to be done in the interest of posterity as well as in our own. It seems to me a clear dictate of prudent statesmanship and frank finance that in what we are now, I hope, about to undertake we should pay as we go. The people of the country are entitled to know just what burdens of taxation they are to carry, and to know from the outset, now. The new bills should be paid by internal taxation.

To what sources, then, shall we turn? This is so peculiarly a question which the gentlemen of the house of representatives are expected under the constitution to propose an answer to that you will hardly expect me to do more than discuss it in very general terms. We should be following an almost universal example of modern governments if we were to draw the greater part or even the whole of the revenues we need from the income taxes. By somewhat lowering the present limits of exemption and the figure at which the surtax shall begin to be imposed, and by increasing, step by step throughout the present graduation, the surtax itself, the income taxes as at present apportioned would yield sums sufficient to balance the books

of the treasury at the end of the fiscal year 1917 without anywhere making the burden unreasonably or oppressively heavy. The precise reckonings are fully and accurately set out in the report of the secretary of the treasury which will be immediately laid before you.

And there are many additional sources of revenue which can justly be resorted to without hampering the industries of the country or putting any too great charge upon individual expenditure. A tax of 1 cent per gallon on gasoline and naphtha would yield, at the present estimated production, \$10,000,000; a tax of 50 cents per horse power on automobiles and internal explosion engines, \$15,000,000; a stamp tax on bank checks probably \$18,000,000; a tax of 25 cents per ton on pig iron, \$10,000,000; a tax of 50 cents per ton on fabricated iron and steel probably \$10,000,000. In a country of great industries like this it ought to be easy to distribute the burdens of taxation without making them anywhere bear too heavily or too exclusively upon any one set of persons or undertakings. What is clear is that the industry of this generation should pay the bills of this generation.

I have spoken to you to-day, gentlemen, upon a single theme, the thorough preparation of the nation to care for its own security and to make sure of entire freedom to play the impartial role in this hemisphere and in the world which we all believe to have been providentially assigned to it. I have had in my mind no thought of any immediate or particular danger arising out of our relations with other nations. We are at peace with all the nations of the world, and there is reason to hope that no question in controversy between this and other governments will lead to any serious breach of amicable relations, grave as some differences of attitude and policy have been and may yet turn out to be.

I am sorry to say that the gravest threats against our national peace and safety have been uttered within our own borders. There are citizens of the United States. I blush to admit, born under other flags but welcomed under our generous naturalization laws to the full freedom and opportunity of America, who have poured the poison of disloyalty into the very arteries of our national life; who have sought to bring the authority and good name of our government into contempt, to destroy our industries wherever they thought it effective for their vindictive purposes to strike at them, and to debase our politics to the uses of foreign intrigue. Their number is not great as compared with the whole number of those sturdy hosts by which our nation has been enriched in recent generations out of virile foreign stocks; but it is great enough to have brought deep disgrace upon us and to have made it necessary that we should promptly make use of processes of law by which we may be purged of their corrupt distempers.

America never witnessed anything like this before. It never dreamed it possible that men sworn into its own citizenship, men drawn out of great free stocks such as supplied some of the best and strongest elements of that little, but how heroic, nation that in a high day of old staked its very life to free itself from every entanglement that had darkened the fortunes of the older nations and set up a new standard here—that men of such origins and such free choices of allegiance would ever turn in malign reaction against the government and people who had welcomed and nurtured them and seek to make this proud country once more a hotbed of European passion. A little while ago such a thing would have seemed incredible. Because it was incredible we made no preparation for it. We would have been almost ashamed to prepare for it, as if we were suspicious of ourselves, our own comrades and neighbors!

But the ugly and incredible thing has actually come about and we are without adequate federal laws to deal with it. I urge you to enact such laws at the earliest possible moment and feel that in doing so I am urging you to do nothing

less than save the honor and self-respect of the nation. Such creatures of passion, disloyalty and anarchy must be crushed out. They are not many, but they are infinitely malignant, and the hand of our power should close over them at once. They have formed plots to destroy property, they have entered into conspiracies against the neutrality of the government, they have sought to pry into every confidential transaction of the government in order to serve interests alien to our own. It is possible to deal with these things very effectually. I need not suggest the terms in which they may be dealt with.

I wish that it could be said that only a few men, misled by mistaken sentiments of allegiance to the governments under which they were born, had been guilty of disturbing the self-possession and misrepresenting the temper and principles of the country during these days of terrible war, when it would seem that every man who was truly an American would instinctively make it his duty and his pride to keep the scales of judgment even and prove himself a partisan of no nation but his own. But it cannot. There are some men among us, and many resident abroad, who, though born and bred in the United States and calling themselves Americans, have so forgotten themselves and their honor as citizens as to put their passionate sympathy with one or the other side in the great European conflict above their regard for the peace and dignity of the United States. They also preach and practice disloyalty.

No laws, I suppose, can reach corruptions of the mind and heart; but I should not speak of others without also speaking of these and expressing the even deeper humiliation and scorn which every self-possessed and thoughtfully patriotic American must feel when he thinks of them and of the discredit they are daily bringing upon us.

While we speak of the preparation of the nation to make sure of her security and her effective power we must not fall into the patent error of supposing that her real strength comes from armaments and mere safeguards of written law. It comes, of course, from her people, their energy, their success in their undertakings, their free opportunity to use the natural resources of our great home land and of the lands outside our continental borders which look to us for protection, for encouragement and for assistance in their development; from the organization and freedom and vitality of our economic life. The domestic questions which engaged the attention of the last congress are more vital to the nation in this time of test than at any other time. We cannot adequately make ready for any trial of our strength unless we wisely and promptly direct the force of our laws into these all-important fields of domestic action.

A matter which it seems to me we should have very much at heart is the creation of the right instrumentalities by which to mobilize our economic resources in any time of national necessity. I take it for granted that I do not need your authority to call into systematic consultation with the directing officers of the army and navy men of recognized leadership and ability from among our citizens who are thoroughly familiar, for example, with the transportation facilities of the country and therefore competent to advise how they may be co-ordinated when the need arises, those who can suggest the best way in which to bring about prompt co-operation among the manufacturers of the country, should it be necessary, and those who could assist to bring the technical skill of the country to the aid of the government in the solution of particular problems of defense. I only hope that if I should find it feasible to constitute such an advisory body the congress would be willing to vote the small sum of money that would be needed to defray the expenses that would probably be necessary to

give it the clerical and administrative machinery with which to do serviceable work.

What is more important is that the industries and resources of the country should be available and ready for mobilization. It is the more imperatively necessary, therefore, that we should promptly devise means for doing what we have not yet done; that we should give intelligent federal aid and stimulation to industrial and vocational education, as we have long done in the large field of our agricultural industry; that, at the same time that we safeguard and conserve the natural resources of the country, we should put them at the disposal of those who will use them promptly and intelligently, as was sought to be done in the admirable bills submitted to the last congress from its committees on the public lands—bills which I earnestly recommend in principle to your consideration; that we should put into early operation some provision for rural credits which will add to the extensive borrowing facilities already afforded the farmer by the reserve bank act, adequate instrumentalities by which long credits may be obtained on land mortgages; and that we should study more carefully than they have hitherto been studied the right adaptation of our economic arrangements to changing conditions.

Many conditions about which we have repeatedly legislated are being altered from decade to decade, it is evident, under our very eyes, and are likely to change even more rapidly and more radically in the days immediately ahead of us, when peace has returned to the world and the nations of Europe once more take up their tasks of commerce and industry with the energy of those who must bestir themselves to build anew. Just what these changes will be no one can certainly foresee or confidently predict. There are no calculable, because no stable, elements in the problem. The most we can do is to make certain that we have the necessary instrumentalities of information constantly at our service, so that we may be sure that we know exactly what we are dealing with when we come to act, if it should be necessary to act at all. We must first certainly know what it is that we are seeking to adapt ourselves to. I may ask the privilege of addressing you more at length on this important matter a little later in your session.

In the meantime may I make this suggestion? The transportation problem is an exceedingly serious and pressing one in this country. There has from time to time of late been reason to fear that our railroads would not much longer be able to cope with it successfully, as at present equipped and co-ordinated. I suggest that it would be wise to provide for a commission of inquiry to ascertain by a thorough canvass of the whole question whether our laws as at present framed and administered are as serviceable as they might be in the solution of the problem. It is obviously a problem that lies at the very foundation of our efficiency as a people. Such an inquiry ought to draw out every circumstance and opinion worth considering, and we need to know all sides of the matter if we mean to do anything in the field of federal legislation.

No one, I am sure, would wish to take any backward step. The regulation of the railways of the country by federal commission has had admirable results and has fully justified the hopes and expectations of those by whom the policy of regulation was originally proposed. The question is not what should we undo—it is whether there is anything else we can do that would supply us with effective means, in the very process of regulation, for bettering the conditions under which the railroads are operated and for making them more useful servants of the country as a whole. It seems to me that it might be the part of wisdom, therefore, before further legislation in this field is attempted, to look at the whole problem of co-ordination and efficiency in the full light of a fresh assessment of circumstance and opinion, as a guide to dealing with the several parts of it.

For what we are seeking now, what in my mind is the single thought of this message, is national efficiency and security. We serve a great nation. We should serve it in the spirit of its peculiar genius. It is the genius of common men for self-government, industry, justice, liberty and peace. We should see to it that it lacks no instrument, no facility or vigor of law, to make it sufficient to play its part with energy, safety and assured success. In this we are no partisans but heralds and prophets of a new age.

SEVEN CARDINALS CREATED AT CONSISTORY.

Seven cardinals were created Dec. 6, 1915, at a consistory held at the Vatican in Rome. The name of one was reserved "in pectore"; the other six named were:

Mgr. Guilio Tonti, nuncio at Lisbon.

Mgr. Alfonso Maria Mistrangelo, archbishop of Florence.

Mgr. Giovanni Cagliero, nuncio for the Central American States.

Mgr. Andreas Furwirth, Austrian by birth, nuncio at Munich.

Mgr. Raffaele Scapinelli, nuncio at Vienna.

Mgr. Giorgio Gusmini, archbishop of Bologna.

The following American appointments were also announced:

Bishop Glass, formerly of Lead, S. D., to be bishop of St. Cloud, Minn.; Bishop Mundelein of Brooklyn to be archbishop of Chicago; Mgr. Brossant to be bishop of Covington, Ky.; Mgr. Dougherty to be bishop of Buffalo; Mgr. Petrelli to be apostolic delegate to the Philippines, and Mgr. Edward Patricx Rogue to be administrator of the metropolitan diocese of St. John's, Newfoundland.

ARMIES AND NAVIES OF BELLIGERENTS.

Reliable statistics of the men under arms in the belligerent nations of the world in 1915 are not available. That the armies in the field were much larger than the figures usually given for the war strength of the various powers is certain. For example, Great Britain, instead of having 700,000, had at least 3,000,000 men in the war. In the nations having compulsory training the war strength given in the books and the actual strength were not so far apart, yet the latter was from all accounts far in excess of the former. M. Yves Guyot, the French statistician at the beginning of the year estimated that the armies then in the field numbered nearly 18,500,000, or 28,000,000 with all reserves and men in training counted. After that time the figures were largely increased by the entry of Italy and Bulgaria into the war, so that in spite of the heavy losses sustained in battle the active armies toward the close of 1915 probably aggregated between 20,000,000 and 25,000,000 men. William Michaelis, a German authority, estimated the total number in July at 21,770,000, of whom 12,820,000 were on the side of the allies and 8,950,000 on the side of the Germanic powers. The so-called "war strength" of the belligerent nations is given herewith merely for comparative purposes:

Aust.-Hungary	1,400,000	Great Britain	700,000
Bulgaria	280,000	Italy	2,500,000
Germany	3,500,000	Japan	570,000

LOSSES IN BATTLE.

Gen. Francis Vinton Greene, U. S. A., retired, made the following estimate of the casualties in the war up to Oct. 7, 1915:

	Killed.	Wounded.	Missing.	Total.
Britain	86,000	251,000	55,000	392,000
France	400,000	700,000	300,000	1,400,000
Russia	500,000	800,000	900,000	2,200,000
Italy	5,000	15,000	5,000	25,000
Belgium	25,000	40,000	15,000	80,000
Serbia	20,000	40,000	10,000	70,000
Total	1,036,000	1,846,000	1,285,000	4,167,000
Germany	600,000	1,000,000	300,000	1,900,000
Austria	400,000	700,000	700,000	1,800,000
Turkey	30,000	50,000	20,000	100,000

Total 1,030,000 1,780,000 1,020,000 3,830,000
It will be noted that these figures do not include the losses sustained by Bulgaria or the heavy losses sustained by the Serbians in October and November.

July 31, in the British house of commons, Premier Asquith announced that the first year of the war showed the total number of slain, based on German as well as English calculations, to have been 2,223,300, distributed as follows:

Great Britain	116,000	Germany	482,000
France	400,000	Austria	341,000
Russia	733,000	Turkey	45,000
Belgium	47,000	Total	868,000
Serbia	64,000		
Japan	300		
Total allies	1,360,300	Grand total	2,223,300

It was figured out that on this basis the total number of killed up to Nov. 15, 1915, was more than 4,000,000. This approximates the estimate credited to Col. Heussler, a Swiss military statistician, that the total losses in killed of the fighting men on all sides in the war up to Nov. 13 had been 5,000,000. An even larger estimate was that made by the French ministry

of war, which gave the casualties up to May 31 as follows:

	Killed.	Wounded.	Prisoners.	Total.
France	460,000	660,000	180,000	1,300,000
England	181,000	200,000	90,000	471,000
Belgium	49,000	49,600	15,000	113,000
Russia	1,250,000	1,680,000	850,000	3,780,000
Germany	1,630,000	1,880,000	490,000	4,000,000
Austria	1,610,000	1,865,000	910,000	4,385,000
Turkey	110,000	144,000	95,000	349,000

Total 5,290,000 6,478,000 2,630,000 14,398,000

Still another estimate may be quoted. This was one issued by the French Relief society, showing that up to June 1, 1915, the casualties had been: Killed, 2,228,300; wounded, 4,837,510; prisoners and missing, 1,707,000; total, 8,770,810. The French losses were put at 400,000 killed, 700,000 wounded and 300,000 prisoners and missing.

It may be added that according to official reports the total British losses up to Nov. 30, 1915, were 600,000 and of the Prussians 2,178,918.

In reply to a question addressed to the government, Premier Asquith announced in the house of commons Dec. 2 that the total British military and naval losses from the beginning of the war to Nov. 9, 1915, amounted to 510,230, distributed as follows:

	Killed.	Wounded.	Missing.
Officers	4,620	9,754	1,583
Other ranks	69,272	240,284	54,445
Total			379,968

NAVY (MARINES).			
Officers	589	161	52
Other ranks	9,128	1,920	310

Grand total.....510,230

The totals given as killed included those who died from wounds or other causes, as well as the officers and men killed outright in battle.

EFFECT OF WAR ON FOOD SUPPLIES AND PRICES.

Both the belligerent and neutral countries of Europe suffered to a greater or less extent from high prices of food. The central empires naturally were hit hardest because of the difficulty of getting supplies through the usual channels on account of the sea blockade maintained by the allies. The bureau of labor statistics in Washington, D. C., made a study of prices as affected by the war and in the December number of its Monthly Review it published a table

based on official sources showing the percentage of increase for indicated periods in the retail prices of the more important articles of food. This table is given herewith:

NOTE—The Austrian are minimum prices in Vienna from Aug. 30, 1914, to Aug. 29, 1915. The German figures are for Berlin, week ending Aug. 29, 1914, and Aug. 28, 1915. The Italian prices are those in forty-one cities from August, 1914, to August, 1915. The Swedish prices are those in forty-four cities from August, 1914, to August, 1915. The French are wholesale prices in Paris from June, 1914, to June, 1915.

Those in the first column under Britain are for large towns and those in the second column are for small towns and villages and the period is from July, 1914, to Oct. 1, 1915. The Netherlands prices are those at two co-operative stores January to July, 1914, and August, 1915. The Danish prices are those in Copenhagen in July, 1914, and August, 1915.

In Germany and Austria-Hungary the regulation of the food distribution and prices was largely in the hands of the government authorities. Stringent rules were issued as to consumption of certain articles, but it was claimed that this was merely a precautionary measure to prevent waste and unequal distribution. Although it was claimed that the food supplies in the way of grain, vegetables, fruits and cattle were sufficient to make starvation out of the question, there was much complaint of the high prices charged by the farmers for their products and food riots were reported from time to time in various parts of Austria and Germany.

In Poland, Belgium and the western provinces of Russia there was actual want and the people suffered severely from the lack of food.

WAR AND LIQUOR DRINKING.

Following the example of Russia and France, the united kingdom early in 1915 took up the question of prohibiting or limiting the use of alcoholic liquors during the continuance of the war. The matter first came up for consideration by the military authorities, who found that the manufacture of munitions of war was seriously hampered through the indulgence by workmen and others in the liquor habit. March 29 a deputation of the Shipbuilding Employers' federation called upon David Lloyd George, chancellor of the exchequer, and urged the prohibition of the sale of liquor both in public houses and clubs. It was stated by the deputation that although work was being carried on night and day seven days in the week the total working time on the average in nearly all British ship yards was actually less than before the war, and the average productiveness had decreased. Many of the men did not even approximate full time. The time during which the public houses in the neighborhood of the ship yards were allowed to keep open had been curtailed, yet their receipts had in some cases increased 40 per cent. As an instance of many cases, that of a battle ship coming in for repairs was cited. She was delayed a whole day through the absence of riveters, who were drinking and carousing.

"We are fighting Germany, Austria-Hungary and drink," said the chancellor in reply, "and so far as I can see the greatest of these three deadly foes is drink. I have a growing conviction,

to settle German militarism we must first of all settle with drink."

The following letter was sent by King George to Chancellor David Lloyd George March 30:

"Dear Chancellor of the Exchequer: The king thanks you for so promptly letting him have a full report of the proceedings at yesterday's meeting of the deputation of employers. His majesty has read it with intense interest, but also with the deepest concern. He feels that nothing but the most vigorous measures will successfully cope with the grave situation now existing in our armament factories.

"We have before us the statements not merely of the employers but of the admiralty and the war office, which are responsible for munitions of war and for the transport of troops and their food and ammunition. From this evidence it is without doubt largely due to drink that we are unable to secure the output of war material indispensable to meet the requirements of the army in the field, and that there has been such serious delay, in consequence, of the necessary re-enforcements of supplies to aid our gallant troops at the front.

"A continuance of such a state of things must inevitably result in the prolongation of the horrors and burdens of this terrible war.

"I am instructed to add that, if it be deemed advisable, the king will be prepared to set an example by giving up all alcoholic liquor himself and by issuing orders against its consumption in the royal households, so that no difference shall be made so far as his majesty is concerned between the treatment of the rich and the poor in this question.

"LORD STAMFORDHAM,
The king's private secretary."

The king's example was followed by Lord Kitchener and other members of the cabinet and by many well known men in all walks of life, including some of the labor leaders who joined the ranks of the employers asking the cabinet to forbid the sale of liquor during the rest of the war. April 5 the following announcement was made: "By the king's command no wines or spirits will be consumed in any of his majesty's houses after to-day." Sunday, April 18, was observed in 10,000 protestant churches throughout England as "king's pledge Sunday." The largest meeting was held in central London,

where more than 2,000 persons took the pledge to abstain from intoxicants during the remainder of the war. Several colleges, such as Oriol and Jesus in Oxford, debarred alcoholic drinks for the period of the war.

Opposition to the complete prohibition of liquor soon arose and the government felt compelled to change its plans either to stop the sale of intoxicants entirely or to impose heavy taxes on spirits and wines. Instead it was finally decided by an order in council that the government, under the powers conferred by the defense of the realm act, should take over and control the sale and supply of intoxicating liquors in many of the districts where war material was being handled.

Absinth was barred from the French fighting lines at the beginning of the war and by an official decree, dated March 17, the French government prohibited the making, sale or transportation of absinth. Under certain conditions the soldiers were permitted to drink a small quantity of ordinary wine. In Germany the regulations regarding the sale of liquor were strengthened.

M. Bark, Russian minister of finance, announced in July that the returns of the savings banks to the beginning of that month showed that the deposits were \$900,000,000 in excess of the amount reported for the previous year, and that this was almost the same amount as the imperial treasury had lost through the prohibition of the sale of vodka or alcohol.

ITALY ENTERS THE WAR.

Italy, after remaining neutral nearly ten months, declared war on Austria-Hungary May 24, 1915. The reasons impelling King Victor Emmanuel and his ministers to take this step were set forth in an official statement issued May 25 and addressed to the American and other neutral governments. The text of the document as translated by the Italian embassy in Washington follows:

"The triple alliance was essentially defensive and designed solely to preserve the status quo. In other words, the equilibrium in Europe. That these were its only objects and purposes is established by the letter and spirit of the treaty as well as by the intentions clearly described and set forth in official acts of the ministers who created the alliance and confirmed and renewed it in the interest of peace, which always has inspired Italian policy.

"The treaty, as long as its intents and purposes had been loyally interpreted and regarded and as long as it had not been used as a pretext for aggression against others, greatly contributed to the elimination and settlement of causes of conflict, and for many years assured to Europe the inestimable benefits of peace.

"But Austria-Hungary severed the treaty by her own hands. She rejected the response of Serbia, which gave to her all the satisfaction she could legitimately claim. She refused to listen to the conciliatory proposals presented by Italy in conjunction with other powers in the effort to spare Europe from a vast conflict certain to drench the continent with blood and to reduce it to ruin beyond conception of human imagination, and finally she provoked that conflict.

"Article 1 of the treaty embodied the usual and necessary obligation of such pacts—the pledge to exchange views upon any fact and economic questions of a general nature that might arise pursuant to its terms. None of the contracting parties had the right to undertake, without a previous agreement, any step the consequence of which might impose a duty upon the other signatories arising out of the alliance or which would in any way whatsoever encroach upon their vital interests. This article was violated by Austria-Hungary when she sent to Serbia her note dated July 23, 1914, an action taken without the previous assent of Italy.

"Thus Austria-Hungary violated beyond doubt one of the fundamental provisions of the treaty.

The obligation of Austria-Hungary to come to a previous understanding with Italy was the greater because her obstinate policy against Serbia gave rise to a situation which directly tended to the provocation of a European war.

"As far back as the beginning of July, 1914, the Italian government, preoccupied by the prevailing feeling in Vienna, caused to be laid before the Austro-Hungarian government a number of suggestions advising moderation and warning it of the impending danger of a European outbreak. The course adopted by Austria-Hungary against Serbia constituted, moreover, a direct encroachment upon the general interests of Italy, both political and economical, in the Balkan peninsula. Austria-Hungary could not for a moment imagine that Italy could remain indifferent while Serbian independence was being trodden upon.
